(An Empowered Autonomous Institute, affiliated to SUK)

**UG Program**

- **Department Name: Sciences and Humanities**
- **UG Program Name:-All**
- **Vision and Mission:-**

<b>Vision</b>	To augment UG and PG engineering programs in the institute by encouraging First Year Students in their academic pursuit and instilling competence to think critically, logically, and communicate clearly.
<b>Mission</b>	<ul style="list-style-type: none"><li>• To induct the students with the engineering ecosystem that nurtures their holistic development.</li><li>• To provide a student-centric learning environment to upscale their interest in engineering.</li><li>• To provide strong foundation of basic sciences and fundamental engineering courses for assimilation of it in developing engineering solutions.</li><li>• To acquire mathematical ability in evaluating problems and in suggesting solutions.</li><li>• To improve basic skills of language for effective technical communication in English.</li></ul>

**Course Outcomes of first year courses (2024-25)**

**Class: F. Y. B. Tech**

**Sem I**

**Group A:**

Course	COs	Statement
<b>SH1313 General Physics and Optics</b>	CO1	Compare the behavior of mechanical system under damping and external periodic force.
	CO2	Use the principles of architectural acoustics to assess the acoustical characteristics of a hall.
	CO3	Analyze the interference in thin films, wedge shaped film and Newton's rings to calculate conditions in constructive and destructive interference.
	CO4	Examine the behavior of microscopic particles using the theories in quantum mechanics such as wave particle duality, uncertainty principle, and particle in 1D infinite potential box problem.
	CO5	Compare the semiconductors based on type of charge carrier, band energy diagram, location of Fermi energy, and Hall effect
	CO6	Classify the different types of laser based on fundamentals of operation including solid state, and gas laser.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>SH1515 General Physics and Optics Lab</b>	CO1	Develop the skills of performing the experiments relevant to theories in optics, oscillations, semiconductors, ultrasound, and quantum mechanics.
	CO2	Use different measuring tools and techniques to conduct the experiments.
	CO3	Interpret the collected data from experiment to determine the relevant physical quantity.
	CO4	Write a lab report which communicates scientific information in clear manner
<b>SH1056 Matrices and Differential Equations</b>	CO1	Use the concepts of matrices that serve as an essential basis for several computational techniques.
	CO2	Solve the problems on ordinary differential equations analytically and numerically.
	CO3	Make use of different methods to solve simultaneous algebraic linear equations
	CO4	Apply the relevant numerical method for interpolating the polynomial.
<b>SH1101 Matrices and Differential Equations Lab</b>	CO1	Use MATLAB for interactive computations.
	CO2	Familiar with memory and file management in MATLAB.
	CO3	Generate plots and export this for use in reports and presentations.
	CO4	Familiar with strings, matrices, and their use.
<b>SH1294 Basic Electrical Engineering</b>	CO1	Solve D.C. and A.C. electric circuits.
	CO2	Illustrate the notions of magnetic circuits
	CO3	Explore switchgear for electrical installations and illumination
	CO4	Elaborate transformer and rotating electrical machines.
<b>SH1794 Basic Electrical Engineering Lab</b>	CO1	Explain the concept of circuit laws and network theorems and apply them to specific network.
	CO2	To demonstrate balanced and unbalanced star and delta connected supply and measure power in three phase circuits.
	CO3	To demonstrate characteristics equations for DC machines and single-phase transformer.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	CO4	Explain operation, features of electric machines and their applications.
	CO5	Apply the skills using electrical measuring devices.
<b>Electives</b> <b>SE1054</b> <b>Basics of Civil Engineering</b>	CO1	Identify the components of a given type of building structure and recommend their suitability under specified soil and loading conditions.
	CO2	Prepare plan of a single storey residential building for the given requirements using building planning principles, byelaws and property document information.
	CO3	Assess the quality of different construction materials based on their engineering properties and explain the standard procedures followed for using them in the construction of building components.
	CO4	Determine included angles, areas, reduced levels and contours for the specified ground points or surfaces using the methods of horizontal and vertical measurements.
	CO5	. Describe the components of a specified infrastructure system and the functions served by them.
	<b>SE1554</b> <b>Basics of Civil Engineering Lab</b>	CO1
CO2		Plan building using principles and bye laws.
CO3		Perform horizontal and vertical measurement.
CO4		Use modern surveying tool/equipment for performing horizontal and vertical measurements.
<b>SE1134</b> <b>Green Technology</b>	CO1	Explain the basic principles of green chemistry and ecology.
	CO2	Discuss concept of green buildings and green management.
	CO3	Compare conventional and non-conventional energy sources.
	CO4	Discuss solid waste processing techniques.
	CO5	Describe various green innovations for sustainability.
<b>SE1634</b>	CO1	Explain the concept of green technology/green building.
	CO2	Prepare energy and water budget for a building.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>Green Technology Lab</b>	CO3	Design rainwater harvesting for a small catchment area.
	CO4	Analyze solid waste for Waste-to-Energy.
<b>SE1453 Creativity, Design Thinking and Entrepreneurial Mindset</b>	CO1	Learn structured approach to creativity, problem identification and problem solving in a new venture context
	CO2	Apply design thinking approach to identify innovation opportunities and develop solutions
	CO3	Identify, validate and define specific innovation opportunities through Jobs-to-be-Done methodology
	CO4	Develop mindset of a successful entrepreneur
<b>SE1673 Creativity, Design Thinking and Entrepreneurial Mindset Lab</b>	CO1	Learn structured approach to creativity, problem identification and problem solving in a new venture context.
	CO2	Apply design thinking approach to identify innovation opportunities and develop solutions.
	CO3	Develop mindset of a successful entrepreneur
<b>SE1751 Basics of Sensor Technology</b>	CO1	Recognize basic analog and digital devices used for different electronic applications.
	CO2	Explain working principle of various sensors
	CO3	Identify suitable sensors and transducers for real time applications
	CO4	Analyze the different sensor based electronic circuits.
<b>SE1791 Basics of Sensor Technology Lab</b>	CO1	Identify the electronics components for given values.
	CO2	Design electronic system using sensors
	CO3	Measure electrical parameters of sensors.
	CO4	Write report and communicate effectively.
<b>SH1853 Engineering Practice Lab. I</b>	CO1	Acquire skills in basic engineering practice.
	CO2	Use hand tools and power tools.
	CO3	Develop sheet metal model for specific application.
	CO4	Illustrate the various operations performed in machine shop.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	CO5	Perform different joining operations
	CO6	Perform pipe fittings operations.
<b>SE1472</b> <b>Introduction to Artificial Intelligence</b>	CO1	Explain the different terminologies used in Artificial Intelligence.
	CO2	Identify engineering and societal problems that can be efficiently solved by artificial intelligence techniques.
	CO3	Demonstrate the search algorithms to solve problems.
	CO4	Apply Python Programming in AI based applications.
	CO5	Illustrate the concepts of machine learning.
	CO6	Describe the robot tasks, architecture and usage in real world.
<b>SE1692</b> <b>Introduction to Artificial Intelligence Lab</b>	CO1	Identify Real Time Problems with their AI solutions.
	CO2	Demonstrate and explore the functionalities in different programming frameworks & S/W technologies.
	CO3	Solve problems using python programming concepts.
	CO4	Implement supervised learning algorithms using python programming to solve the real time problems.
<b>SE1094</b> <b>Engineering Materials</b>	CO1	Classify materials on the basis of various properties.
	CO2	Estimate different mechanical properties using destructive testing methods.
	CO3	Select suitable non-destructive testing method for flaw detection in component.
	CO4	Explain composites, nonferrous materials and alloys with their applications
	CO5	Identify the recycling issues associated with various engineering materials.
<b>SE1594</b> <b>Engineering Materials Lab</b>	CO1	Illustrate stress strain diagram for different materials.
	CO2	Use Rockwell Hardness testing machine to measure hardness of material.
	CO3	Measure impact strength of the metals

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	CO4	Determine fatigue strength of metals.
	CO5	Determine flaws in the component using non-destructive testing methods.
	CO6	Explain working principle of emission spectrometer.
<b>SE1811</b> <b>Introduction to Electric Vehicles</b>	CO1	Justify the need for EVs and HEVs from environment and policy perspectives.
	CO2	Demonstrate the knowledge of electric vehicle technology.
	CO3	Elaborate the hybrid electric vehicle technology.
<b>SE1831</b> <b>Introduction to Electric Vehicles Lab</b>	CO1	Compare typical conventional powertrain and the electric powertrain.
	CO2	Evaluate the performance and sizing of typical EV electric motor and battery.
	CO3	Model and simulate the EV/HEV using MATLAB/Simulink Powertrain block set.
<b>SH1834</b> <b>English Proficiency Lab. I</b>	CO1	Analyse aspects of nature and process of communication in professional contexts.
	CO2	Demonstrate reception skills of language.
	CO3	Apply speaking skills in various situations.
	CO4	Make use of English language with grammatical accuracy.
<b>SH1893</b> <b>Engineering Exploration and Design Project</b>	CO1	Explain the role of an engineer as a problem solver
	CO2	Design engineering solutions to complex problems utilizing multi-disciplinary systems approach.
	CO3	Examine a given problem using process of engineering problem analysis.
	CO4	Build simple systems/prototypes using engineering design and development process.
	CO5	Analyze engineering solutions from ethical and sustainability perspectives.
	CO6	Apply basics of engineering project management skills in project development.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

<b>SH136</b> <b>Biology</b> <b>Engineers</b>	<b>for</b>	CO1	Apply biological engineering principles, procedures needed to solve real-world problems.
		CO2	Describe the functions of biological systems.
		CO3	Analyze biological phenomena and compute work done at microscale.
		CO4	Explain working of different biomedical instruments.
		CO5	Select the sensors for given biological applications.
		CO6	Explain relevant aspect of movement control process.

**Course Outcomes of first year courses (2024-25)**

**Class: F. Y. B. Tech**

**Sem II**

**Group A:**

<b>SH 1036 Modern Engineering Chemistry</b>	CO1	Examine water quality for industrial and domestic sector and suggest remedial measures
	CO2	Distinguish the basic concepts of spectroscopic methods for characterization of advanced materials.
	CO3	Interpret components of the various systems using Phase rule concept and outline the various applications of alloys
	CO4	Identify causes of corrosion and its remedial measures.
	CO5	Explain the synthesis and applications of nanomaterials in engineering sector.
	CO6	Compare types and quality of fuels, lubricants and illustrate the applications of batteries
<b>SH1535 Engineering Chemistry Lab</b>	CO1	Examine the materials by using analytical instruments.
	CO2	Identify the quality of water for industrial and domestic purposes.
	CO3	Apply the knowledge of corrosion science for measurement of rate of corrosion.
	CO4	Apply science of polymers and nanomaterials in the synthesis of materials.
	CO5	Inspect the quality of fuel.
<b>SH1026 Calculus</b>	CO1	Solve problems on improper and multiple integrals
	CO2	Sketch the curve and use it to solve the problems on rectification and multiple integral.
	CO3	Prove the results of partial differentiation.
	CO4	Apply partial differentiation for problems on jacobian, errors and approximations, maxima and minima.
	CO1	Develop codes for different type's integrals.

<b>SH1161</b> <b>Calculus Lab</b>	CO2	Sketch the curves.
	CO3	Solve various problems on partial differentiation by MATLAB.
<b>SH1135</b> <b>Engineering Graphics</b>	CO1	Draw the projections of line, plane and regular solids with respect to reference planes as per given conditions using AUTOCAD software.
	CO2	Generate the sectional view, true shape of the section and development of the solid with the help of AUTOCAD software.
	CO3	Prepare orthographic views of engineering components by using AUTOCAD software.
<b>SH1333</b> <b>Programming for Problem Solving</b>	CO1	Explain the basic terminologies and concepts of C programming language.
	CO2	Construct the algorithm and flow chart to solve the given problem
	CO3	Write a C program for given problem statement
	CO4	Examine the given C program to remove the logical & syntax errors and predict the correct output
<b>SH146</b> <b>Vedic Mathematics</b>	CO1	Apply Vedic sutras to usual multiplication
	CO2	Solve problems on division and divisibility by Vedic sutras
	CO3	Factorise the polynomials of degree two and three using Vedic sutras
	CO4	Employ Vedic Sutras to solve system of linear equations and matrices faster and with
<b>SH1913</b> <b>Programming for Problem Solving Lab</b>	CO1	Describe various terminologies and concepts of C programming language
	CO2	Construct the algorithm and flow chart to solve the given problem.
	CO3	Implement a 'C' program for given problem statement
	CO4	Test the implemented 'C' programs by removing syntax & logical errors for getting expected output on various input.
<b>SH1623</b>	CO1	Identify the need of positive attitude in interpersonal communication.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>English Proficiency Lab. II</b>	CO2	Demonstrate conversational and comprehension skills of English language.
	CO3	Demonstrate writing skills through reports, letters, circulars, notices, and memos.
	CO4	Organize content of technical documents in specific forms.
<b>SH1643 Engineering Practice Lab II</b>	CO1	Make wooden job.
	CO2	Make Sheet metal job.
	CO3	Make job by various machining processes.
	CO4	Make job by joining processes.
<b>SH136 Biology for Engineers</b>	CO1	Apply biological engineering principles, procedures needed to solve real-world problems.
	CO2	Describe the functions of biological systems.
	CO3	Analyze biological phenomena and compute work done at microscale.
	CO4	Explain working of different biomedical instruments.
	CO5	Select the sensors for given biological applications.
	CO6	Explain relevant aspect of movement control process.

**Course Outcomes of first year courses (2024-25)**

**Class: F. Y. B. Tech**

**Sem I**

**Group B:**

Course	COs	Statement
<b>SH1201 Linear Algebra, and</b>	CO1	Use the concepts of matrices that serve as an essential basis for several computational techniques.
	CO2	Make use of different methods to solve simultaneous algebraic linear equations.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>Ordinary Differential Equation</b>	CO3	Solve the problems on ordinary differential equations analytically and numerically.
	CO4	Apply the relevant numerical method for interpolating the polynomial.
<b>SH1221 Linear Algebra, and Ordinary Differential Equation Lab</b>	CO1	Use MATLAB for interactive computations.
	CO2	Familiar with memory and file management in MATLAB.
	CO3	Generate plots and export this for use in reports and presentations.
	CO4	Familiar with strings, matrices, and their use.
<b>SH1834 English Proficiency Lab. I</b>	CO1	Analyse aspects of nature and process of communication in professional contexts.
	CO2	Demonstrate reception skills of language.
	CO3	Apply speaking skills in various situations.
	CO4	Make use of English language with grammatical accuracy.
<b>SH 1181 Advanced Engineering Chemistry</b>	CO1	Examine water quality for industrial and domestic sector and suggest remedial measures
	CO2	Distinguish the basic concepts of spectroscopic methods for characterization of advanced materials.
	CO3	Illustrate fundamentals of various polymers and distinguish their applications in engineering field.
	CO4	Identify causes of corrosion and its remedial measures.
	CO5	Explain the synthesis and applications of nanomaterials in engineering sector.
	CO6	Explain the fundamentals of electroplating with its applications.
<b>SH1535 Engineering Chemistry Lab</b>	CO1	Examine the materials by using analytical instruments.
	CO2	Identify the quality of water for industrial and domestic purposes.
	CO3	Apply the knowledge of corrosion science for measurement of rate of corrosion.
	CO4	Apply science of polymers and nanomaterials in the synthesis of materials.
	CO5	Inspect the quality of fuel.

**Course Outcomes of first year courses (2024-25)**

**Class: F. Y. B. Tech**

**Sem II**

**Group B:**

Course	COs	Statement
<b>SH1241</b> <b>: Quantum Physics and Materials</b>	CO1	Solve the Schrodinger equation to obtain wave functions for some basic, physically important types of potential in one dimension, and estimate the shape of the wave function based on the shape of the potential.
	CO2	Explain the types of semiconductor, concept of Fermi energy, and Hall Effect in semiconductors.
	CO3	Illustrate the basics of laser production and its application in holography, propagation of light through optical fibers and its application in sensors and communication.
	CO4	Classify and analyze magnetic materials and superconductors.
<b>SH1281</b> <b>Quantum Physics and Materials Lab</b>	CO1	Develop the skills of performing the experiments relevant to theories in optics, semiconductors, hysteresis, and quantum mechanics.
	CO2	Use different measuring tools and techniques to conduct the experiments.
	CO3	Interpret the collected data from experiment to determine the relevant physical quantity.
	CO4	Write a lab report which communicates scientific information in a clear manner.
<b>SH1294</b> <b>Basic Electrical Engineering</b>	CO1	Solve D.C. and A.C. electric circuits.
	CO2	Solve magnetic circuits and related issues.
	CO3	Illustrate transformers and its application.
	CO4	Choose appropriate rotating machines based on their applications.
	CO5	Explore suitable capacity of wires, cables switchgear and illumination system for electrical installations.
<b>SH1794</b>	CO1	Explain the concept of circuit laws and network theorems and apply them to specific network.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>Basic Electrical Engineering Lab</b>	CO2	Demonstrate balanced and unbalanced star and delta connected supply and measure power in three phase circuits.
	CO3	Demonstrate characteristics equations for DC machines and single-phase transformer.
	CO4	Explain operation, features of electric machines and their applications.
	CO5	Apply the skills using electrical measuring devices.
<b>Electives SE1054 Basics of Civil Engineering</b>	CO1	Identify the components of a given type of building structure and recommend their suitability under specified soil and loading conditions.
	CO2	Prepare plan of a single storey residential building for the given requirements using building planning principles, byelaws and property document information.
	CO3	Assess the quality of different construction materials based on their engineering properties and explain the standard procedures followed for using them in the construction of building components.
	CO4	Determine included angles, areas, reduced levels and contours for the specified ground points or surfaces using the methods of horizontal and vertical measurements.
	CO5	. Describe the components of a specified infrastructure system and the functions served by them.
<b>SE1554 Basics of Civil Engineering Lab</b>	CO1	Draw dimensioned sketch/plan of building
	CO2	Plan building using principles and bye laws.
	CO3	Perform horizontal and vertical measurement.
	CO4	Use modern surveying tool/equipment for performing horizontal and vertical measurements.
<b>SE1134 Green Technology</b>	CO1	Explain the basic principles of green chemistry and ecology.
	CO2	Discuss concept of green buildings and green management.
	CO3	Compare conventional and non-conventional energy sources.
	CO4	Discuss solid waste processing techniques.
	CO5	Describe various green innovations for sustainability.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>SE1634</b>  <b>Green Technology Lab</b>	CO1	Explain the concept of green technology/green building.
	CO2	Prepare energy and water budget for a building.
	CO3	Design rainwater harvesting for a small catchment area.
	CO4	Analyze solid waste for Waste-to-Energy.
<b>SE1453</b>  <b>Creativity, Design Thinking and Entrepreneurial Mindset</b>	CO1	Learn structured approach to creativity, problem identification and problem solving in a new venture context
	CO2	Apply design thinking approach to identify innovation opportunities and develop solutions
	CO3	Identify, validate and define specific innovation opportunities through Jobs-to-be-Done methodology
	CO4	Develop mindset of a successful entrepreneur
<b>SE1673</b>  <b>Creativity, Design Thinking and Entrepreneurial Mindset Lab</b>	CO1	Learn structured approach to creativity, problem identification and problem solving in a new venture context.
	CO2	Apply design thinking approach to identify innovation opportunities and develop solutions.
	CO3	Develop mindset of a successful entrepreneur
<b>SE1751</b>  <b>Basics of Sensor Technology</b>	CO1	Recognize basic analog and digital devices used for different electronic applications.
	CO2	Explain working principle of various sensors
	CO3	Identify suitable sensors and transducers for real time applications
	CO4	Analyze the different sensor based electronic circuits.
<b>SE1791</b>  <b>Basics of Sensor Technology Lab</b>	CO1	Identify the electronics components for given values.
	CO2	Design electronic system using sensors
	CO3	Measure electrical parameters of sensors.
	CO4	Write report and communicate effectively.
<b>SH1852</b>	CO1	Acquire skills in basic engineering practice.
	CO2	Use hand tools and power tools.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>Engineering Practice</b>  <b>Lab. I</b>	CO3	Develop sheet metal model for specific application.
	CO4	Illustrate the various operations performed in machine shop.
	CO5	Perform different joining operations
	CO6	Perform pipe fittings operations.
<b>SE1472</b>  <b>Introduction to Artificial Intelligence</b>	CO1	Explain the different terminologies used in Artificial Intelligence.
	CO2	Identify engineering and societal problems that can be efficiently solved by artificial intelligence techniques.
	CO3	Demonstrate the search algorithms to solve problems.
	CO4	Apply Python Programming in AI based applications.
	CO5	Illustrate the concepts of machine learning.
	CO6	Describe the robot tasks, architecture and usage in real world.
<b>SE1692</b>  <b>Introduction to Artificial Intelligence Lab</b>	CO1	Identify Real Time Problems with their AI solutions.
	CO2	Demonstrate and explore the functionalities in different programming frameworks & S/W technologies.
	CO3	Solve problems using python programming concepts.
	CO4	Implement supervised learning algorithms using python programming to solve the real time problems.
<b>SE1094</b>  <b>Engineering Materials</b>	CO1	Classify materials on the basis of various properties.
	CO2	Estimate different mechanical properties using destructive testing methods.
	CO3	Select suitable non-destructive testing method for flaw detection in component.
	CO4	Explain composites, non ferrous materials and alloys with their applications
	CO5	Identify the recycling issues associated with various engineering materials.
	CO1	Illustrate stress strain diagram for different materials.

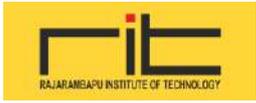

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>SE1594 Engineering Materials Lab</b>	CO2	Use Rockwell Hardness testing machine to measure hardness of material.
	CO3	Measure impact strength of the metals
	CO4	Determine fatigue strength of metals.
	CO5	Determine flaws in the component using non-destructive testing methods.
	CO6	Explain working principle of emission spectrometer.
<b>SE1811 Introduction to Electric Vehicles</b>	CO1	Justify the need for EVs and HEVs from environment and policy perspectives.
	CO2	Demonstrate the knowledge of electric vehicle technology.
	CO3	Elaborate the hybrid electric vehicle technology.
<b>SE1831 Introduction to Electric Vehicles Lab</b>	CO1	Compare typical conventional powertrain and the electric powertrain.
	CO2	Evaluate the performance and sizing of typical EV electric motor and battery.
	CO3	Model and simulate the EV/HEV using MATLAB/Simulink Powertrain block set.
<b>SE1433 Basics of Mechanical Engineering</b>	CO1	Explain different power generation systems.
	CO2	Select appropriate energy conversion device for the given application.
	CO3	Classify vehicles on the basis of different parameters.
	CO4	Compare two stroke and four stroke IC engines.
	CO5	Describe different transmission devices in a given system.
	CO6	Choose suitable materials and manufacturing processes for a given application.
<b>SE1633 Basics of Mechanical Engineering Lab</b>	CO1	Explain the different components of power generation systems.
	CO2	Identify the systems and components of vehicle.
	CO3	Distinguish between two stroke and four stroke engines.
	CO4	Explain the working of major components of vehicle.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

<b>SH1893</b>  <b>Engineering Exploration and Design Project</b>	CO1	Explain the role of an engineer as a problem solver
	CO2	Design engineering solutions to complex problems utilizing multi-disciplinary systems approach.
	CO3	Examine a given problem using process of engineering problem analysis.
	CO4	Build simple systems/prototypes using engineering design and development process.
	CO5	Analyze engineering solutions from ethical and sustainability perspectives.
	CO6	Apply basics of engineering project management skills in project development.
<b>SH1261</b>  <b>Calculus and complex variables</b>	CO1	Solve problems on improper and multiple integrals
	CO2	Sketch the curve and use it to solve the problems on rectification and multiple integral.
	CO3	Prove the results of partial differentiation and apply partial differentiation for problems on Jacobian, maxima and minima
	CO4	Solve various problems of complex variable.
<b>SH1301</b>  <b>Calculus and complex variables Lab</b>	CO1	Develop codes for different types integrals.
	CO2	Sketch the curves.
	CO3	Solve various problems on partial differentiation by MATLAB.
<b>SH1623</b>  <b>English Proficiency Lab. II</b>	CO1	Identify the need of positive attitude in interpersonal communication.
	CO2	Organize content of technical documents in specific forms.
	CO3	Demonstrate writing skills through reports, letters, circulars, notices, and memos.
	CO4	Apply techniques of online communication in its various forms.
	CO1	Make wooden job.
	CO2	Make Sheet metal job.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

<b>SH1643</b> <b>Engineering</b> <b>Practice Lab II</b>	CO3	Make job by various machining processes.
	CO4	Make job by joining processes.

**UG Program**

- **Department Name :- Robotics and Automation**
- **UG Program Name :- B.Tech. Robotics and Automation**
  
- **Vision and Mission :-**

<b>Vision</b>	To excel in the robotics & automation field through continuous research, innovation and industry-oriented curriculum leading to responsible engineering professionals.
<b>Mission</b>	<ul style="list-style-type: none"> <li>• To inculcate teaching and learning process promoting state-of-the-art industry practices in robotics and automation engineering and technology to address global challenges.</li> <li>• To integrate academics, research and entrepreneurship skills to address present and future challenges of ever-growing industries.</li> <li>• To develop professionalism with strong foundations adapting to changing technology.</li> </ul>

Sr. No.	Program Outcomes
1.	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2.	<b>Problem analysis:</b> Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3.	<b>Design/development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4.	<b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5.	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

6.	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7.	<b>Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8.	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9.	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10.	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11.	<b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12.	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
1.	Apply engineering skills to model, simulate and implement robotics and automation systems for improvement of the industrial productivity.
2.	Design indigenous systems using advanced hardware and software tools to solve problems faced in factory automation.
3.	Develop the application of robotics and automation Engineering to solve societal problems.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	RA201	Fundamentals of Robotics & Automation	1. Explain the fundamental concepts related to robotics and its applications.
				2. Explain the fundamental concepts of mechanisms and their application to robotics.
				3. Compare various end effectors used in robotic applications.
				4. Use robot programming to solve problems in diverse applications.
				5. Distinguish between various types of automation systems.
				6. Apply the knowledge of Programmable Logic Controllers (PLCs) for industrial automation problems
2.	III	RA203	Engineering Mechanics	1. Calculate resultant force of coplanar force system.
				2. Analyze engineering problems applying conditions of equilibrium
				3. Determine centroid & moment of inertia of the geometrical plane lamina.
3.	III	RA205	Sensors and Instrumentation	1. Explain the basic principles of measurement systems, classify different types of measurement errors, and perform error analysis.
				2. Compare different types of motion, proximity and ranging sensors.
				3. Illustrate the working principles of force measurement devices.
				4. Comprehend and implement optical and pressure sensing technologies.
				5. Describe the general structure, components and key characteristics of smart sensors.
				6. Analyse and apply Data Acquisition Systems in various applications.
4.	III	RA207	Analog and Digital Electronics	1. Explain the working principles of electronic devices.
				2. Select components for building analog circuits.
				3. Design analog and digital circuits.
				4. Convert digital signals to analog and vice versa.
				5. Explain the working principles of electronic devices.
5.	III	RA209	Materials and Manufacturing Technology	1. Explain the characteristics of materials.
				2. Select suitable material for robotics and automation application.
				3. Select manufacturing method for robotic and automation components.
				4. Describe advanced manufacturing methods.
6.				1. Verify law of polygon of forces, law of triangle of forces and principle of moment.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
	III	RA211	Engineering Mechanics Lab.	2. Verify Lami's theorem
				3. Compare coefficient of friction of various surfaces in contact.
				4. Correlate theoretical and practical results of support reactions and Centroid of plane lamina.
				5. Analyze a simple truss.
7.	III	RA213	Analog and Digital Electronics Lab.	1. Verify characteristics of electronics devices.
				2. Analyze electronic circuits as per requirement.
				3. Design analog and digital circuits.
				4. Use logic gates to design circuits.
8.	III	RA215	Object Oriented Programming Lab.	1. Identify elements and features of object-oriented programming.
				2. Implement various object-oriented concepts with the help of programs.
				3. Apply the object-oriented concepts in real time problem-solving.
				4. Use constructors and destructors in the programs.
				5. Implement inheritance concept in programming.
9.	III	RA217	Technical Aptitude - I	1. Comprehend the knowledge gained in the course work
				2. Demonstrate problem-solving ability
10.	III	SH2634	Professional Leadership Skills	1. Explain the traits of a leadership through real life examples.
				2. Exhibit the ability to work effectively in team.
				3. Prepare a presentation as per the audience and context requirements.
11.	IV	SH2614	Interpersonal Skills	1. Exhibit interpersonal communication skills.
				2. Demonstrate decision-making skills.
				3. Apply conflict resolution styles appropriate in different situations.
				4. Demonstrate skills to manage balance in work and life.
12.	IV	SH2694	Innovation Tools and Methods for Entrepreneurs	1. Explain structured approach to define the problem with every possible detail, identify conflicts and solve them
				2. Apply User Journey Map to the selected problem to show user interaction at various stages
				3. Analyze the solutions provided by competitors for effectiveness and gaps if any.
13.	IV	SH2594	Personal Effectiveness and Body Language	1. Develop skills to build self-esteem and positive attitude.
				2. Develop interpersonal skills characterized by effective communication and conflict resolution.
				3. Demonstrate responsiveness towards time, stress, and health issues.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Interpret the non-verbal behaviour of a person.
14.	IV	SH2734	German Language – III	1. Develop skills to build self-esteem and positive attitude.
				2. Develop interpersonal skills characterized by effective communication and conflict resolution.
				3. Demonstrate responsiveness towards time, stress, and health issues.
15.	IV	SH2714	Japanese Language – III	1. Make use of basic conversations in various situations.
				2. Identify the sentence patterns.
				3. Explain insights about the communication required for living in Japan.
				4. Interpret Japanese work ethics required in their professional career.
16.	IV	RA202	Mathematics for Robotics & Automation	1. Solve higher order linear differential equations and its applications.
				2. Solve Partial Differential Equation to various engineering problems.
				3. Apply Laplace and Invers Laplace transforms to standard functions and use it to solve Ordinary Differential Equation.
				4. Evaluate Fourier transform and apply them to solve heat conduction problem in Engineering.
				5. Apply Z-Transform, Inverse Z-Transform and Solve Difference Equations.
17.	IV	RA204	Strength of Materials	1. Apply elementary knowledge of stresses and strains
				2. Select appropriate beam section for robotic arms
				3. Apply stiffness criteria for beam analysis
				4. Analyze the twisting of robot links.
				5. Compare behavior of columns based on end conditions.
18.	IV	RA206	Control Systems	1. Discuss various control systems.
				2. Model the control system mathematically.
				3. Analyse control systems using various mathematical tools.
				4. Represent the system using state space model.
				5. Discuss role of control systems in industrial automation and process control applications.
19.	IV	RA208	Robot Kinematics	1. Select the type of mechanism for the robotic applications
				2. Apply spatial transformation to obtain forward and inverse kinematics
				3. Perform workspace analysis for different types of robots
				4. Plan trajectories for the tool to follow on order to perform meaningful tasks.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Perform Jacobian analysis of serial manipulators
				6. Apply the procedure to design robot end effectors
20.	IV	RA210	Machine Drawing Lab.	1. Develop base features for modeling of machine elements.
				2. Develop 3D model for machine components.
				3. Assemble components using functional constraints.
				4. Prepare production drawings in drafting workbench.
				5. Simulate the working of systems.
21.	IV	SH2174	<u>Environmental Science</u>	1. Apply interdisciplinary knowledge in environmental science by integrating concepts and principles from various fields of science and engineering to address environmental issues.
				2. Evaluate environmental impacts of human activities on ecosystems and on the environment.
				3. Use scientific approach to identify and solve environment related problems.
				4. Design sustainable solutions to address environmental challenges by considering renewable energy sources, waste management strategies conservation measures, and environmental policies.
				5. Participate in group work to become acquainted with the importance of teamwork, collaboration
				6. Develop presentation and report writing skills.
22.	IV	RA212	Technical Aptitude - II	1. Comprehend the knowledge gained in the course work
				2. Demonstrate problem-solving ability
23.	IV	SH202	मराठी भाषिक कौशल्यविकास	1. भाषा आणि व्यक्तिमत्व विकास यांमधील सहसंबंध स्पष्ट करू शकेल
				2. भाषिक कौशल्यविकास करू शकेल
				3. कथा या मराठी साहित्य प्रकाराचे विश्लेषण करू शकेल
				4. एकांकिका या मराठी साहित्य प्रकाराच्या विश्लेषणाची क्षमता प्राप्त करेल
24.	IV	SH204	हिंदी कथा साहित्य एवं प्रयोजमूलक हिंदी	1. विद्यार्थियों में मानवीय संवेदनाओं के विकास के साथ नवीन सामाजिक सांस्कृतिक बोध और जीवन मूल्यों का विकास होगा।
				2. विद्यार्थियों में साहित्य के माध्यम से कलात्मक गुणों की अभिवृद्धि होगी कला की साहित्यिक विधाओं के प्रति अभिरुचि जागृत होगी तथा रचनात्मक कौशल्य को बढ़ावा मिलेगा।
				3. विद्यार्थियों में नए वैश्विक मूल्यों के प्रति सजगता को बढ़ावा मिलेगा एवं मूल्यवादी दृष्टि के प्रति दायित्व बोध उत्पन्न होगा। छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
				4. छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।

**UG Program**

- **Department Name :-Civil Engineering**
- **UG Program Name :-Civil Engineering**

<b>Vision</b>	To be an outstanding department devoted to provide high end research and technical education in Civil engineering which will produce socially aware professionals to provide solutions to global community
<b>Mission</b>	<p>To design curriculum based on changing needs of stakeholders &amp; provide excellence in delivery &amp; assessment to ensure holistic development of civil engineering students.</p> <p>To enhance research &amp; consultancy resulting in solving problems related to civil engineering infrastructure as well as society at large.</p> <p>To mentor students in pursuit of higher education, entrepreneurship and global professionalism.</p>

Sr. No.	Program Outcomes
13.	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
14.	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
15.	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
16.	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
17.	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
18.	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
19.	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
20.	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

21.	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
22.	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
23.	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
24.	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
1	Enhance employability and/or entrepreneur skills through in-house and onsite training.
2	Provide solutions/procedures to societal and rural development problems through research and innovative practices.

**S. Y. B. Tech Civil**

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	CE231	Mathematics for Civil Engineer	Solve problems on linear differential equations (LDE) and linear partial differential equations (PDE).
				Apply linear differential equations (LDE) to deflection of beams and columns
				Determine Fourier series of given functions.
				Compute Karl Pearson's coefficient of correlation and to fit regression lines.
				Solve problems on probability distributions.
2.	III	CE2214	Building Planning and Design	Suggest appropriate materials for building construction applications.
				Prepare a functional design of components of the building.
				Explain building finish materials and procedures.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Design and draw residential building plan using AutoCAD software.
				Prepare plumbing and electrification plan for the building.
3.	III	CE2074	Surveying	Calculate reduced levels and identify the characteristics of contours.
				Determine the angular and linear measurements by using theodolite.
				Calculate the data for design of curve and area-volumes.
				Describe the principles of surveying with advanced techniques.
4.	III	CE2034	Engineering Mechanics	Calculate resultant force of coplanar force system.
				Analyze engineering problems applying conditions of equilibrium
				Determine centroid & moment of inertia of the geometrical plane lamina.
5.	III	SH2174	Environmental Science	Apply interdisciplinary knowledge from various fields of science and engineering to address environmental issues.
				Evaluate environmental impacts of human activities on the environment.
				Use scientific approach to identify and solve environment related problems.
				Design sustainable solutions to address environmental challenges.
				Participate in group work to become acquainted with the importance of teamwork, collaboration
				Develop presentation and report writing skills.
6.	III	CEMD201	Building Construction and Planning	Suggest appropriate materials for building construction applications.
				Prepare a functional design of components of the building.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Design and draw residential building using principles of planning and by-laws.
				Prepare plumbing and electrification plan for the building.
				Explain properties of building finishing materials and application procedure.
7.	III	CSMD201	Introduction to Data Structures	Compare between linear and nonlinear data structures
				Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				Analyze various searching and sorting algorithms and apply it to solve particular problem.
				Determine a suitable data structure and algorithm to solve a real world problem
8.	III	EEMD201	Electrical Power Generation	List the main components of different power plants
				Describe the operation of various power plants used for electrical power generation.
				Explain working principles of various power plants
				Compare different power plants based on advantages, limitations and future prospects
				Draw layout of electrical power plants.
				Explore alternate electrical energy resources for future needs and challenges.
9.	III	ECMD201	Electronics Devices and Applications	Describe the fundamental concepts of electronics and working principles of different devices.
				Analyze different analog and digital electronics circuits.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Design digital electronics circuits with truth table and logic diagram.
10.	III	CIMD201	Data Structures	Describe the basic terminologies of data structures.
				Examine the linear data structure array with its types.
				Demonstrate the working of stack, queue performed on data structures.
				Illustrate the working of linked list.
				Discuss Tree terminologies and their Applications.
				Elaborate Graph terminologies with their types.
11.	III	MEMD203	Design Thinking	Identify the new product opportunities and sources of new product ideas.
				Elaborate the product life cycle and product design process.
				Integrate the customer and end-consumer needs into design process.
				Assimilate the various product characteristics to design a novel product
				Participate effectively in group work sessions and teams to become acquainted with the importance of teamwork and collaboration that is critical to new product success.
12.	III	MCMD201	Fundamentals of Mechatronics	Identify various elements of mechatronics systems.
				Select appropriate sensor/Actuator/controller/control algorithm for different applications.
				Develop PLC/ microcontroller-based applications.
13.	III	AIMD201	Object Oriented Programming	Understand the basic object oriented programming concepts and apply them in problem solving.
				Illustrate inheritance concepts for reusing the program.
				Implement program using loops, decision statements and functions in Python.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Plot data using appropriate Python visualization libraries.
14.	III	RAMD201	Fundamentals of Robotics and Automation	Differentiate various robotic configurations and performance metrics.
				Compare various end effectors, sensors, and drive systems in robotic applications.
				Illustrate kinematic and dynamic principles applied to robotic systems.
				Outline robot programming solutions for diverse applications.
				Distinguish various types and aspects of automation.
				Relate the knowledge of Programmable Logic Controllers (PLCs) to industrial automation tasks.
15.	III	CE2234	Building Planning and Drawing Laboratory	Design and draw the different types of staircases for a building using AutoCAD.
				Prepare submission and working drawings of a residential building using AutoCAD.
16.	III	CE2114	Surveying Laboratory	Determine the reduced levels by using dumpy level.
				Measure the angular and linear measurements by using theodolite and tachometry.
				Perform the setting out of the simple curves.
				Prepare topographical map by using total station and software.
17.	III	CE2134	Engineering Mechanics and Materials Testing Laboratory	Verify law of polygon of forces, principle of moment, Lami's theorem.
				Compare coefficient of friction of various surfaces in contact.
				Correlate theoretical and practical results of support reactions and Centroid of plane lamina.
				Analyze a simple truss.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Identify various types of stresses in various structural elements.
				Determine various strengths of different construction materials
18.	III	CE233	Building Interior Design & Drawing	Design and draw the furniture, plumbing and electrification details of a building using AutoCAD.
				Design and draw the flooring and ceiling details of a building using AutoCAD.
19.	III	SH2634	Professional Leadership Skills	Explain the traits of a leadership through real life examples.
				Exhibit the ability to work effectively in team.
				Prepare a presentation as per the audience and context requirements.
20.	III	SH2614	Interpersonal Skills	Exhibit interpersonal communication skills.
				Demonstrate decision-making skills.
				Apply conflict resolution styles appropriate in different situations.
				Demonstrate skills to manage balance in work and life.
21.	III	SH2694	Innovation Tools and Methods for Entrepreneurs	Explain structured approach to define the problem with every possible detail, identify conflicts and solve them
				Apply User Journey Map to the selected problem to show user interaction at various stages
				Analyze the solutions provided by competitors for effectiveness and gaps if any.
22.	III	SH2594	Personal Effectiveness and Body Language	Develop skills to build self-esteem and positive attitude.
				Develop interpersonal skills characterized by effective communication and conflict resolution.
				Demonstrate responsiveness towards time, stress, and health issues.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Interpret the non-verbal behaviour of a person.
23.	III	SH2734	German Language - Level III	Interpret the language if the next person is speaking slowly and clearly.
				Make use of the language in routine life with the routing topics like family, shopping, work etc.
				Demonstrate the language by self-introduction in German with simple sentences.
24.	III	SH2644	German Language - Level IV	Interpret the language if the next person is speaking slowly and clearly.
				Make use of the language in routine life with the routing topics like family, shopping, work etc.
				Demonstrate the language by self-introduction in German with simple sentences.
25.	III	SH2714	Japanese Language - Level III	Make use of basic conversations in various situations.
				Identify the sentence patterns.
				Explain insights about the communication required for living in Japan.
				Interpret Japanese work ethics required in their professional career.
26.	III	SH2624	Japanese Language - Level IV	To be able to make basic conversations in various situations.
				To recognize the sentence patterns.
				To improve Japanese Language proficiency.
				To give students insights about the communication required for living in Japan.
				To expose students to the Japanese work ethics required in their professional careers.
27.	III	CE232	Strength of Material	Analyze the section for various types of stresses and strains.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Construct shear force and bending moment diagrams for determinate beams.
				Determine stresses (bending, shear and torsional) developed in the beam cross section.
				Evaluate strain energy stored in a body due to various loading conditions.
28.	IV	CE2044	Concrete Technology	Explain properties of various materials used in the manufacture of different kinds of concretes and role played by them in developing strong, durable concretes.
				Select materials for the manufacturing concretes for a given requirement.
				Explain procedures for conducting various quality control tests on fresh and hardened concrete as per standard codes.
				Design concrete mixes of given grade using mix design procedures recommended by IS and ACI codes of practices.
29.	IV	CE2064	Fluid Mechanics	Analyze different physical properties of fluid.
				Calculate various forces acting on submerged and floating bodies.
				Discriminate fluid kinematics and fluid dynamics.
				Illustrate flow through pipe and flow through open channels.
				Analyzes dimensional homogeneity using Buckingham's $\pi$ theorem
30.	IV	CE234	Water resources and Irrigation Engineering	Analyze the intricate processes involved in the water cycle and its impact on the distribution of water resources.
				Utilize advanced techniques to evaluate and interpret rainfall data for

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				making well-informed decisions in water management.
				Develop and assess various irrigation methods tailored to the specific water requirements and efficiency of different crops.
				Evaluate the structural stability criteria for gravity dams and identify potential vulnerabilities in earthen dam constructions.
				Apply statistical flood estimation methods to determine flood discharge and devise effective flood control measures.
31.	IV	CE236	Highway Engineering	Design the geometric components of highway.
				Determine traffic volume for design of road.
				Perform different tests on highway materials.
				Design the highway pavement.
				Explain about construction and maintenance of highways.
32.	IV	CEMD202	Building Estimation and Valuation	Explain the types and basic requirements of the estimate.
				Explain measurement sheet, abstract sheet, and detailed specifications of different construction items.
				Prepare detailed estimate of load bearing structure and framed structure.
				Prepare rate analysis and bar bending schedule of different construction items.
				Explain the tenders and contracts.
				Describe basic terms of valuation.
33.	IV	CSMD202	Problem Solving using JAVA	Understand the basic object oriented programming concepts and apply them in problem solving.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Apply concept of inheritance for code reusability.
				Develop Programs using multithreading.
				Develop data-centric applications using JDBC.
				Design the basics of java console and GUI based programming
34.	IV	EEMD202	Power System	Write the basic working principles of different generating sources.
				Analyze different types of loads
				Explain importance of power factor and tariffs in power system.
				Identify various components in power transmission and distribution system.
				Select substation equipments as per requirement.
35.	IV	ECMD202	Electronics Communication Systems	Describe different communication systems.
				Explain applications of analog and digital modulation techniques.
				Analyze different modulation and demodulation techniques.
				Explain the use of satellite communication.
36.	IV	CIMD202	Computer Algorithms	Analysing asymptotically the performance of algorithms.
				Compare and analyse searching and sorting algorithms.
				Apply different algorithm design techniques to solve problems like job sequencing, knapsack, TSP, finding shortest path etc.
				Apply backtracking method to solve problems like N-queens, graph coloring, sum of subsets etc.
				Describe computational complexity theory to classify computational problems according to their inherent difficulty.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
37.	IV	MEMD204	Behavioral Engineering and Design	Explain key concepts and theories related to influencing user behavior in product design.
				Utilize psychological principles to develop product designs that effectively address user needs and preferences.
				Create products that demonstrate high levels of user engagement, measured through metrics such as adoption rates and user interaction patterns.
				Develop products that prioritize user satisfaction and usability, as measured through user testing and feedback.
				Incorporate aesthetic appeal and ergonomic considerations into product designs, assessed through objective criteria such as user comfort and visual appeal ratings.
				Analyze user feedback and iteratively improve designs to enhance user experience, measured by improvements in user satisfaction scores or usability metrics.
39.	IV	MCMD202	Industrial Fluid Power	Describe the structure and function of common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors etc.
				Model and analyze common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors.
				Create & simulate basic hydraulic and pneumatic circuit diagrams for different applications.
				Design, develop & analyze simple hydraulic and pneumatic systems for given task.
40.	IV	AIMD202	Data structure & Algorithms	Compare between linear and nonlinear data structures
				Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				Analyze various searching and sorting algorithms and apply it to solve particular problem.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Determine a suitable data structure and algorithm to solve a real world problem
41.	IV	RAMD202	Sensors and Actuators	Explain the functioning of various sensors and transducers
				Calibrate the transducers such as accelerometers, microphones and strain gauges.
				Explain the characteristics of various sensors and transducers
				Describe the process and need for calibration.
				Choose the sensor for measurement of few parameters.
				Use the appropriate sensor and calibrate
42.	IV	CE2184	Concrete Technology Laboratory	Explain standard procedures for testing properties of various ingredients of concrete and concrete mixes/specimens
				Perform tests on ingredients of concrete and on fresh and hardened concrete to determine their properties using standard procedures
				Design the concrete mix for a given grade of concrete using guidelines of IS code
				Evaluate the quality of concrete specimens / elements using NDT equipment
43.	IV	CE2164	Fluid Mechanics Laboratory	Determine fluid properties.
				Design most economical open channel section.
				Measure velocity of flow using wind tunnel.
44.	IV	CE238	Highway Materials Testing Laboratory	Perform quality control tests on aggregate and bitumen.
				Suggest suitable material for road construction.
				Perform quality control tests on bituminous pavement.
45.	IV	CE240		Read the working drawings and

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Practical Aspects of Construction Supervision	perform the inspection of different work items of building construction as per the given detailing and specifications.
				Judge the quality of on-site construction materials and the different work items of building construction.
				Perform independently the supervision work of any building as per the provided drawings and detailed specifications

**T. Y. B. Tech Civil**

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	V	CE 3014	Design of Steel Structures	Analyse and design of connections.
				Analyse the steel tension and compression members.
				Design the steel tension and compression members.
2.	V	CE351	Estimations and Costing	Apply standard requirements to prepare detailed estimate
				Estimate the quantities for building, road, canal and culvert
				Analyze the rates for construction items
				Prepare tenders and contracts documents
3.	V	CE3053	Irrigation and Hydraulic Structures	Prepare valuation report of property (Land & Building)
				Explain hydrological cycle and ground water flow.
				Calculate various surface and ground water hydrology parameters
				Estimate water requirement of crops.
4.		CE353	Mechanics of Structures	Design canal and canal regulator structures.
				Analyze and design axially loaded columns.
				Analyze and design structural members subjected to direct and bending stresses.
				Compute slopes and deflections at various locations for determinate beams.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Construct ILD for determinate beams and 2D trusses.
				Analyze three hinged arches and suspended cables.
5.	V	CE359	Legal Practices in Construction	Explain the fundamental principles of construction laws and their application in the construction industry.
				Discuss types of contracts and provisions of Indian contract act.
				Explain compliance with legal requirements related to building acts, arbitration and labor laws throughout the construction process.
				Acquire the ability to draft, negotiate, and manage various types of construction contracts, ensuring adherence to legal requirements and effective project execution.
				Discuss the ethical and professional responsibilities of construction professionals, including compliance with codes of conduct and regulatory standards.
6.	V	CE361	Optimization Techniques	Discuss the fundamentals of optimization in engineering.
				Identify the necessity and scope of optimization techniques.
				Analyze the managerial problem through mathematical models and arrive at an optimal solution or decision.
7.	V	CE363	Construction Quality Control	Evaluate the quality in civil construction works.
				Develop quality checks for construction.
				Apply provisions of standard codes in civil construction.
				Prepare quality control documents for construction projects.
8.	V	CE365	Advanced Fluid Mechanics	Apply basic laws of fluid mechanics to solve fluid flow numerically.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Explain the advection-dispersion phenomenon in groundwater hydrology
				Explain the application of the Navier-Stokes Equation in pipe flow
				Determine boundary layer thickness, Prandtl's mixing length and velocity distribution
				Calculate Pump head and specify the Pump suitability
9.	V	CE367	Solid Waste Management	Determine solid waste properties and quantity for municipal and hazardous waste.
				Illustrate health effects by municipal solid waste.
				Design optimum route for collection of solid waste.
				Select suitable processing technique for solid waste management
				Design sanitary land fill site for solid waste management
				Explain applications Artificial Intelligence in solid waste management
10.	V	CE369	Public Building Planning and Design	Design the various types of public buildings for given requirements following the principles of building planning and development control regulations
				Prepare the different drawings (i.e. line plans, building plans, sectional elevations etc.) of the public buildings using AutoCAD software
11.	V	CE371	Engineering Geology	Identify earth constituents their genesis and physical & mechanical properties.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Recognize geological structures in rock mass, their origin and their impact on civil engineering structures.
				Analyze and interpret geological reports and information and the latest geological exploration methods for suitable site selection.
				Describe and compare different geological formation and geological structures required for construction of dam, reservoirs and tunnel.
12.	V	CE373	Matrix Methods of Structural Analysis	Perform the structural analysis of determinate and indeterminate structures using matrix methods.
				Analyze the structures by using the stiffness & flexibility method.
				Solve multiple degree of freedom two-dimensional problems involving trusses & beams.
13.	V	CE375	Earthquake Engineering	Explain various concepts related to engineering seismology.
				Evaluate responses for a single degree of freedom system for free and forced vibration.
				Apply principles of earthquake resistant structural system for building planning.
				Calculate lateral loads developed due to earthquake forces by equivalent static method.
				Explain methods to improve earthquake resisting capacity of the structure
14.	V	OE3064	Environmental Impact Assessment	Apply EIA methods to prepare a report.
				Analyse the all projects by using Environmental Impact assessment tool.
				Provide solution for decision making in Industrial Development Problem.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Prepare EIA report for submission to concerned authority.
15.	V	OE350	Operations Research	Identify the necessity and scope of operation research in decision making.
				Formulate and solve linear programming problems using mathematical models and various optimization techniques.
				Apply quantitative analysis methods to real-world decision-making scenarios in various industries.
				Evaluate and improve decision-making processes under uncertainty.
16.	V	ATMD301	Automotive Safety & Ergonomics	Discuss the basics of vehicle collision and its effects.
				Summarize the various safety concepts used in passenger cars.
				Explain use of ergonomics in automotive design.
				Explain the human response to impact.
				Explain the use of various systems used in automobiles for safety & ergonomic considerations.
17.	V	CEMD301	Infrastructure Engineering	Apply the knowledge of geometric design in road construction.
				Identify the quality parameters of pavement materials and various methods of road construction.
				Discuss the various aspects of airport engineering.
				Explain design parameters of railway engineering and it's component parts.
				Summaries the different off shore structures for dock and harbors.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
18.	VI	CSMD301	Fundamentals of Database Systems	Describe the purpose and nature of the database system for storing and fast access to the data
				Identify various protocols, issues, and techniques related to transaction management for a consistent & and stable database
				Draw E-R models to represent simple database application scenarios
				Design the queries to manipulate and access data using procedural and non-procedural languages
				Apply relational database design concepts to remove data redundancy and to retrieve data easily
				Perform operation on Unstructured data.
19.	VI	EEMD301	Electrical Machines	Describe behavior of dc machine.
				Explain the working principle of 1-Phase and 3-Phase transformers.
				Explain working of different induction motors.
				Select the relevant electrical machines for different applications
				Interpret the relevant fractional horse power motor for different applications
20.	VI	ECMD301	Advanced Communication Systems	Explain the principles of antenna and wave propagation.
				Understand basic antenna parameters and their types.
				Discuss the evolution, requirements, and challenges of 5G communication systems.
				Understand and compare various communication techniques.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Communicate effectively on complex engineering topics related to modern communication techniques.
21.	VI	CIMD301	Introduction to DBMS	Describe the fundamental elements of relational database management systems.
				Design ER-models to represent simple database application scenarios.
				Write SQL query to perform various operations on the database.
				Analyze principles of integrity constraints, Hashing and Indexing on databases.
				Illustrate the transaction management, concurrency control and crash recovery.
22.	VI	MEMD301	Manufacturing and Assembly Processes	Select appropriate manufacturing process suitable for the component design and production volume
				Select appropriate joining process for given application.
				Select appropriate machine tools for machining operations.
				Select appropriate finishing process for given product.
				Explain concept of automation in manufacturing.
				Explain and select appropriate Non Traditional machining process and machine with constructional details for engineering component.
23.	VI	MCMD301	Sensor and Instrumentation	Understand the fundamental principles of various sensors and transducers.
				Analyze the characteristics, advantages, and limitations of different sensor types.
				Apply appropriate signal conditioning techniques to improve sensor output accuracy and integrate sensors into mechatronic systems for real-time data acquisition and control.
				Select appropriate sensors for specific mechatronic systems used in real life applications.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
24.	VI	AIMD301	Machine Learning	Utilize machine learning techniques and understand the basic theory underlying machine learning.
				Articulate supervised, unsupervised and reinforcement learning
				Identify the basic concepts of learning and decision trees.
				Utilize Bayesian techniques for problems appear in machine learning
				Perform statistical analysis of machine learning techniques.
25.	VI	ATMD303	Automobile Engineering Lab.	Differentiate between S.I. and C.I. engines.
				Zest engines and plot performance characteristics curves.
				Describe the working of various automotive systems.
26.	VI	CEMD303	Smart Cities & Sustainable Development	Discuss the concept of smart cities and ideologies of sustainable Development.
				Analyze the different approaches toward smart cities on global level.
				Evaluate the present state and approach of Smart city Mission in India.
				Comprehend the concept of resilience and sustainable development and its measurement.
				Study the present status of sustainable development in India.
27.	VI	CSMD303	Object-oriented Programming in Python	Demonstrate a comprehensive understanding of Python syntax, data types, and basic operations.
				Make use of common Python libraries for data manipulation.
				Implement lists, tuples, sets, and dictionaries for effective data handling.
				Apply principles of OOP, including classes, objects, inheritance, and polymorphism.
28.	VI	EEMD303	Electrical Technology	Demonstrate speed control methods of electrical machines.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Analyze performance of DC motor and induction motor for speed control applications.
				Implement power electronic circuits for given application.
				Measure electrical quantities using electrical and electronic instruments.
29.	VI	ECMD303	Electronic Product Design	Elaborate product design processes.
				Explain various aspects of PCB design.
				Differentiate product-testing methods.
				Create various documents for the product.
30.	VI	CIMD303	OOP using Java	Explain the concepts and terminologies in object-oriented concepts and java programming language.
				Apply object-oriented programming features and concepts for solving given problem.
				Develop the java application using the collection framework to solve real word problem.
				Apply the concepts exception handling to develop error free codes.
				Utilize the concepts of package to develop efficient codes.
31.	VI	MEMD303	Refrigeration and Air Conditioning	Explain the basic laws of thermodynamics, working of various RAC systems, psychrometric process of air, applications of RAC systems.
				Summarise the properties of refrigerants.
				Calculate performance of refrigeration and air conditioning system.
32.	VI	MCMD303	Industrial Automation	Explore the architecture of PLC and its functions.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Execute the various instructions and logic in PLC.
				Develop the PLC program for various applications.
				Design and develop the SCADA, DCS system for various applications.
33.	VI	AIMD303	Business Intelligence	Articulate data pre-processing techniques
				Analyze the data modeling required for business intelligence related tasks
				Determine the role of statistical techniques in data analysis tasks
				Identify big data analysis techniques
				Utilize different reporting/visualization tool
34.	VI	SH3034	Scholastic Aptitude I	Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.
				Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
				Develop a bridge in analogies, series and visualizing directions.
				Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
35.	VI	CE355	Estimations Costing and Valuation Laboratory	Explain mode of measurement and current market rates of civil engineering materials and labours.
				Prepare detailed estimate of different structures like building, road, canal, culvert and factory shed etc.
				Prepare bar bending schedule of different RCC items.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
36	V	CE357	Summer Internship	Apply academic concepts in civil engineering into practical situations encountered during the internship.
				Develop effective communication skills, both written and verbal, through interactions with colleagues, clients, and project stakeholders within the civil engineering industry.
				Exhibit proficiency in planning, organizing, and executing tasks related to civil engineering projects, showcasing effective time management and resource utilization during the internship.
				Cultivate teamwork, ethical conduct, and professional behavior within the civil engineering workplace, emphasizing the importance of integrity and collaboration in the industry setting.
37	VI	CE352	Geotechnical Engineering	Classify types of soil using different index properties of soil.
				Calculate permeability of various types of soil using different methods.
				Analyse compressibility phenomenon of soil using Laboratory and field considerations.
				Determine settlement, shear strength and bearing capacity of soil.
39	VI	CE354	Construction Practices	Discuss applications of various construction practices.
				Select appropriate equipment for construction task.
				Develop method statement for construction task.
				Analyze equipment selection based on productivity.
40	VI	CE356	Research Methodology	Formulate a research problem by using literature review process.
				Analyse the data related research information.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Prepare and present research proposal/paper by following research ethics.
				Make effective use of computing tools to analyse the data and prepare report.
				Describe nature and processes involved in development of intellectual property rights.
41	VI	CE364	Construction Equipment Management	Discuss the suitability of equipment for a specified construction task.
				Select equipment/plant for a particular task.
				Perform productivity and economic analysis for equipment.
42	VI	CE382	Town Planning	Describe different concepts of town planning.
				Illustrate surveying and zoning methods pertaining to town planning.
				Critique on the policies, norms, bylaws, and housing schemes in the Indian context.
				Summarize the concept, necessity, and components of a master plan, including layout planning for city development and re-planning of existing towns.
				Outline various legislative acts pertinent to town planning.
43	VI	CE366	Advanced Hydraulic Engineering	Explain the water balance and continuity equation for watershed
				Determine the depth and velocity of flow in an open channel
				Design of equivalent pipe flow and Flood forecasting
				Analyses flood protection systems and reservoir operation system
				Prepare DPR for urban water requirement
44	VI	CE368	Air Quality Assessment	Describe structure of the atmosphere and Scales of air pollution.
				Interpret on sources of air pollution natural and artificial, air pollution Episodes.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Explain effect of different air pollutants on man, animals and plants.
				Analyse the dispersion of air pollution in the atmosphere.
				Design of air pollution control mechanism
45	VI	CE370	Traffic Engineering	Illustrate the traffic and its components, factors affecting road traffic for traffic planning.
				Design traffic intersections and signals considering traffic regulations.
				Summarize the basic principles behind the design and placement of traffic control devices for traffic management.
				Select the suitable techniques necessary for maintaining road environment.
				Suggest preventive measures to avoid road accidents by analyzing traffic conditions.
46	VI	CE372	Industrial Waste Management	Apply various techniques of wastewater volume and strength reduction
				Analyze characteristics of Industrial wastewater.
				Suggest different wastewater treatment option for industrial wastewater.
				Design Effluent Treatment Plant for Industrial wastewater treatment.
				Prepare Report for Industrial Wastewater Management using AI tools.
47	VI	CE3184	Repair and Rehabilitation of Structures	Identify the causes of distress and deterioration of concrete structure
				Explain the stages of condition assessment of buildings.
				Interpret and evaluate of ND test result data.
				Describe the procedures of various repair and strengthening techniques.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Design for strengthening of structural member/elements
48	VI	CE374	Advanced Structural Analysis	Analyse indeterminate structures using force methods- Consistent deformation method and three moment equation.
				Analyse indeterminate structures using displacement methods- Slope-deflection equation and moment distribution method.
				Analyse indeterminate beam and portal frame using matrix methods of analysis- Stiffness and flexibility matrix method.
49	VI	CE376	Composite Materials and Structures	Describe the properties and uses of composite materials in civil engineering fields.
				Analyse and design of composite column and beam.
				Analyse and design of composite slab.
50	VI	CE378	Finite Element Method	Apply variational approach for solving 1D,2D problems
				Analyze linear springs, bars, beam and truss by FEM
				Explain convergence and compatibility requirement
				Develop element stiffness matrix [K] for isoparametric element
				Formulate element stiffness matrix for 3D and axisymmetric element
51	VI	CE380	Fiber Reinforced Concrete	Compare types of fibres used in Fiber-Reinforced Concrete with respect to their properties and applications.
				Evaluate the effect of fibers on the properties of Fiber-Reinforced Concrete.
				Illustrate the characteristics of Fiber-Reinforced Concrete in the fresh and hardened state.
				Design Fiber-Reinforced Concrete mixes. Illustrate applications and

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				advancements in Fiber-Reinforced Concrete.
52	VI	OE3381	Disaster Management	Outline disaster and disaster management cycle.
				Summarize disaster preparedness and response activities for various types of disaster.
				Apply various advanced techniques for disaster management.
				Examine role of various agencies in disaster management.
				Analyze the disaster management scenario in India.
53	VI	OE3084	Materials Management	Apply management principles to material management,
				Develop and apply codification and standardization process,
				Derive material procurement plan and evaluate vendors,
				Develop stores layout for optimum stores management,
				Apply inventory control techniques for material management.
				Apply M.R.P. logic and systems to material management.
54	VI	OE358	Plumbing (Water and Sanitation)	Explain the scope and purpose of building industry codes and standards
				Explain different plumbing fixtures and its working.
				Prepare layout of sanitary drain and storm drain.
				Calculate water requirement and suggest layout for water supply.
				Discuss functions of WTP and STP in plumbing system.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
55	VI	ATMD302	Electric Vehicles	Articulate the need of EVs and HEVs in today's transportation context.
				Design an electric vehicle for given requirements.
				Design a hybrid electric vehicle for given requirements.
				Elaborate fuel cell technology for vehicular application.
56	VI	CEMD302	Environmental Engineering	Explain importance of water and wastewater analysis for various parameters.
				Discuss impact of pollution on man, animal and plants.
				Prepare layout of water and wastewater treatment process.
				Design Water and Wastewater Treatment Plant.
				Apply AI tools for impact of humans on environment.
57	VI	CSMD302	Artificial Intelligence	Understand the basic concepts and techniques of Artificial Intelligence.
				Apply AI algorithms for solving typical practical problems.
				Describe appropriate knowledge representation schemes in AI.
				Apply reasoning schemes in AI.
				Analyze the planning schemes for goal stack.
				Evaluate performance of solution for constraint satisfaction problem.
58	VI	EEMD302	Smart Grid	Summarize the concept and future of smart grid
				Develop smart grid architecture
				Compile various smart grid technologies

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Identify communication and information technologies for smart grid
				Elaborate distributed generation and storage technologies
				Recommend smart metering and distribution automation
59	VI	ECMD302	Industrial Electronics	Identify basics Power Electronics devices and components.
				Illustrate use of Power Electronics.
				Develop PLC logic using ladder programming.
				Analyze industrial electronics applications.
60	VI	CIMD302	Software Engineering	Describe fundamental concepts in software engineering and project management
				Practice software process models for the undertaken software problems
				Design function-oriented and object oriented models using modern tools.
				Identify classes and build the domain model using advanced concepts in object, dynamic and functional modeling.
				Analyze existing software systems using function and object-oriented analysis.
				Design models using UML diagrams for software systems: use case, class, sequence, collaboration, activity, state chart diagrams, component and deployment.
61	VI	MEMD302	Power Plant Engineering	Explain economics of power generation and energy scenario
				Explain improvisations in Rankine cycle and its effect on performance
				Analyze thermodynamics gas power cycles and effect of various parameter on efficiency.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Analyze different techniques for improvement of efficiency of gas turbine plant
				Explain construction and working of nuclear power plants and its subsystems
				Explain construction and working of different renewable energy power plants
62	VI	MCMD302	Industrial Robotics	Explain the basic concepts of Robots.
				Select an end effector and sensor for application.
				Explain drives and controls for robotic system.
				Develop program for robot to perform tasks in industrial applications.
63	VI	AIMD302	Principles of Artificial Intelligence	Articulate basic concepts and techniques of Artificial Intelligence.
				Apply AI algorithms for solving typical practical problems.
				Designate appropriate knowledge representation schemes in AI.
				Analyze reasoning schemes in AI.
64	VI	SH3064	Scholastic Aptitude II	Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.
				Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
				Develop a bridge in analogies, series and visualizing directions.
				Apply various short cuts & techniques to manage speed and accuracy to get equipped

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				for various competitive and campus recruitment exams
65	VI	CE358	Geotechnical Engineering Laboratory	Determine index and engineering properties of soil.
				Classify soil based on its index properties.
				Analyze field conditions through Laboratory tests.
66	VI	CE360	Design of Steel Structures Laboratory	Analyse and design steel industrial shed by manual process and software/ tool.
				Interpret the results obtained from the software.
				Prepare structural drawing of steel industrial shed.
67	VI	CE362	Software Laboratory	Develop technical competency in software in the Civil Engineering field.
				Solve civil engineering problems by using software.
				Develop presentation skills for project/case study.
				Design and interpret data by soft skill Civil Engineering projects.
68	VI	CE3144	Capstone Project Phase I	Perform a comprehensive literature review to identify gaps and gain insights into existing solutions within the chosen engineering field.
				Define clear problem statements and establish project objectives of the engineering project proposal.
				Develop detailed project plans encompassing tasks, timelines, and resource allocation, applying effective project management principles.
				Effectively communicate the proposals in both written and verbal formats, ensuring adherence to industry standards for documentation.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	VII	CE4013	<b>Design of Reinforced Concrete Structures</b>	Design singly, doubly reinforced and flanged beams using Limit State Method of design.
				Design R.C.C. slab and R.C.C. staircase using Limit State Method of design
				Design R.C.C. columns, isolated pad footing using Limit State Method of design.
2.	VII	CE4033	<b>Construction Equipment and Methods</b>	Plan equipment/plants utilization for construction activities,
				Perform productivity and economic analysis of equipment,
				Develop method statement for construction task,
				Discuss equipment requirement for construction task.
3.	VII	CE4473	<b>Earthquake Engineering</b>	Explain various concept related to engineering seismology
				Evaluate responses for a single degree of freedom system for free and force vibration
				Apply principles of earthquake resistant structural systems for building planning.
				Estimate lateral loads developed due to earthquake force by equivalent static method.
				Design and detail ductile RCC Structural elements.
				Explain different methods to improve earthquake resisting capacity of the structure.
4.	VII	CE4353	PE-III Design of Bridges	Explain various components of bridge hydrology and types of loading on bridge.

				Analyze the sub structure and super structure of R.C.C. bridges.
				Design the sub structure and super structure of R.C.C. bridges.
5.	VII	CE4373	PE-III Design of formwork	Design the form work for Beams, Slabs, columns, Walls and Foundations.
				Design the form work for Special Structures.
				Explain the working of flying formwork.
				Explain the formwork failures through case studies.
6.	VII	CE4393	PE-III Advanced Construction Equipment	Select appropriate equipment for construction task.
				Discuss processes of operation of equipment.
				Develop method statement for construction tasks.
7.	VII	CE4413	PE-III Environmental Management System	Describe an environmental policy for an organization.
				Develop environmental treatment and monitor system.
				Analyze a life cycle assessment for a selected product or service.
				Apply standard environmental, health and safety auditing principles and practices to environmental management systems.
8.	VII	CE4433	<b>PE- III Geographical Information System (GIS)</b>	Explain principles and components of GIS
				Describe types of data used in GIS
				Describe the data editing operations
				Explain various steps used for Disaster Management

9.	VII	CE4453	<b>PE-III Metro Rail Technology</b>	Relate the importance of metro rail infrastructure to the development of India.
				Choose suitable methods for preliminary survey of metro rail.
				Identify rail and signal components in Metro.
				Illustrate the codal provisions and the Metro Act.
10.	VII	CE4093	PE-IV Advanced Structural Design	Design reinforced concrete flat slab, combined footing, raft footing and pile foundation.
				Design cantilever and counterfort retaining wall.
				Design overhead circular water tank with flat base.
11.	VII	CE4113	<b>PE-IV Pre-stressed Concrete Structures</b>	Explain the concept and importance of pre-stressing.
				Analyze the pre-stressed concrete sections
				Design the pre-stressed concrete sections for flexure and shear
				Design an end block for pre-stressed members.
12.	VII	CE4133	<b>PE-IV Project Management</b>	Apply principles of project management for the success of the project
				Analyze impact of time, cost and scope on construction projects.
				Develop pre-feasibility report for construction project.
				Plan the project using various techniques.
				Develop project close out checklist for given project.

				Apply techniques for human resource management
13.		<b>CE4153</b>	<b>PE-IV Rock Mechanics</b>	Classify the various types of rocks based on geological strata and engineering parameters of the rock.
				Analyze the theory of in-situ induced stresses in a rock mass and structurally controlled failure.
				Analyze the rock slope stability and rockfall hazards
				Determine settlement and bearing capacity of rock foundation.
				Apply the concepts of rock mechanics for various subsurface conditions.
14.	VII	CE4173	<b>PE-IV Industrial Waste Management</b>	Explain various techniques of wastewater volume and strength reduction.
				Discuss characteristics of Industrial wastewater.
				Suggest different wastewater treatment options for industrial wastewater.
				Prepare layout of ETP for Industrial Wastewater Management.
				Design Effluent Treatment Plant for Industrial wastewater treatment.
15.	VII	CE4193	<b>PE-IV Pavement Analysis and Design</b>	Select the material based on its specifications and design criteria of pavements.
				Analyze the stresses in flexible and rigid pavements.
				Design of flexible and rigid pavements.
				Compose different steps for construction and strengthening of pavements.
16.	VII	CE4513	<b>PE-IV</b>	Evaluate concrete quality based on the microstructural analysis/ properties.

			<b>Advanced Concrete Technology</b>	<p>Recommend appropriate admixture for given concreting applications.</p> <p>Examine the mechanisms affecting the properties of fresh and hardened concrete.</p> <p>Justify the use of special purpose concretes for a given concreting job.</p>
17.	VII	CE4533	<b>PE-V Advanced Structural Analysis</b>	<p>Construct ILD for indeterminate structures</p> <p>Apply energy principles/theorems for analysis of indeterminate structures.</p> <p>Construct SFD, BMD and TMD for beam curves in plan.</p> <p>Analyze beams on elastic foundations under various loads.</p> <p>Evaluate forces in space truss members.</p> <p>Analyze building frames using approximate methods of analysis.</p>
18.	VII	CE4553	<b>PE-V Finite Element Analysis</b>	<p>Apply variational approach for solving 1D,2D problems</p> <p>Analyze linear springs, bars, beam and truss by FEM</p> <p>Describe convergence and compatibility requirement</p> <p>Develop element stiffness matrix [K] for isoparametric element</p> <p>Formulate element stiffness matrix for 3D and axisymmetric element</p>
19.	VII	CE4573	<b>PE-V Matrix Method of Structural Analysis</b>	<p>Develop stiffness and flexibility matrix of structural members.</p> <p>Analyze structure using flexibility and stiffness matrix method</p> <p>Apply direct stiffness approach for structural analysis.</p>

				Analyze the structure using the matrix method by application of MATLAB.
20.	VII	CE4593	<b>PE-V Construction Resource Planning and Management</b>	Draft layout for store and material management
				Select vendor for material purchase,
				Build proper inventory management skill,
				Describe employee development and welfare facilities,
				Design performance appraisal matrix
21.	VII	CE4613	<b>PE-V Total Quality Management</b>	Illustrate Quality Management philosophies and the contribution of Quality Gurus in TQM Journey.
				Identify the basic concept and framework of Total Quality management
				Apply the tools and techniques of quality management in manufacturing and services sector.
				Summarize the codal provisions for quality improvement
22.	VII	CE4633	<b>PE-V Air Pollution and Control</b>	Examine structure of the atmosphere air pollution, scales of air pollution
				Interpret on sources of air pollution natural and artificial, air pollution Episodes
				Analyze effect of different air pollutants on man, animals and plants.
				Design Stack height and explain meteorology, transport and control mechanism
				Evaluate effects of noise pollution.
23.	VII	CE4653	<b>PE-V</b>	Demonstrate appreciation and knowledge of histories of planning

			<b>Fundamentals of Urban and Regional Planning</b>	Express basic understanding of sociological processes generally as they relate to urban and regional planning
				Analyze planning and policy issues for urban and regional infrastructure
				Develop knowledge of constitutional amendments as they impact urban and regional planning.
				Analyze the nature, form and planning of metropolitan cities and regions in India
24.	VII	CE4673	<b>PE-V Solid and Hazardous Waste Management</b>	Apply basic concepts for management of municipal, biomedical, hazardous, e-waste, industrial wastes.
				Explain different techniques for solid wastes management.
				Assess environmental and health impacts solid waste mis-management
				Design landfill site for different solid waste management
25.	VII	CE4693	<b>PE-V Photogrammetry Surveying</b>	Apply advanced surveying methodologies to conduct topographical survey measurements.
				Calculate the errors in topographical surveying measurements.
				Illustrate the principles of advanced surveying techniques.
26.	VII	CE4713	<b>PE-V Geo-informatics for Engineering</b>	Explain the principles of Geo-informatics
				Describe the Remote Sensing process
				Demonstrate the image interpretation and ground investigation
				Analyze and apply Remote sensing techniques for ground investigation

27.	VII	CE4733	<b>PE-V Docks, Harbour and Airport Engineering</b>	List out various types of docks and harbour based on its selection criteria.
				Identify various component parts of docks and harbour and its constructional aspects.
				Analyze the requirements of airport layout with respect to international regulations
				Summarize concepts for planning of runway, taxiway, apron and terminal building facility.
28.	VII	CE4213	<b>PE-IV Advanced Structural Design Laboratory</b>	Design reinforced concrete flat slab, combined footing, raft footing, pile foundation using appropriate software.
				Design retaining wall and elevated circular water tank using appropriate software.
				Prepare structural drawings of flat slab, combined footing, raft footing, pile foundation, retaining wall and elevated circular water tank.
29.	VII	CE4233	<b>PE-IV Pre-stressed Concrete Structures Laboratory</b>	Design the pre-stressed concrete sections for flexure and shear
				Design an end block for prestressed members.
				Design the pre-stressed concrete beams
30.	VII	CE4253	<b>PE-IV Project Management Laboratory</b>	Develop a project charter for a construction project.
				Analyze feasibility of project.
				Determine optimum time and optimum cost of project through network compression.
				Plan resources required for execution of the project.
31.	VII	CE4273		Determine the physical and mechanical properties of rock samples

			<b>PE-IV Rock Mechanics Laboratory</b>	Classify various types of rock based on observations and laboratory testing
				Prepare the site investigation report.
32.		CE4293	<b>PE-IV Industrial Waste Management Laboratory</b>	Analyze characteristics of Industrial wastewater
				Prepare a water budget for industry.
				Suggest different wastewater treatment options for industrial wastewater treatment.
				Prepare layout of ETP for Industrial Wastewater Management.
				Design Effluent Treatment Plant (ETP) for Industrial wastewater treatment.
33.	VII	CE4313	<b>PE-IV Pavement Analysis and Design Laboratory</b>	Select materials based on its suitability in different layers of pavement
				Evaluate different methods of quality control during pavement construction.
				Design of bituminous mix for flexible pavement.
				Design of concrete mix for rigid pavement.
34.	VII	CE4333	<b>PE-IV Advanced Concrete Technology Laboratory</b>	Evaluate the quality of concrete/ concrete elements based on the data collected during condition assessment of RCC building
				Design the mixes of special concretes using the available guidelines.
				Perform the workability tests on flowable concretes
35.	VII	CE4053	<b>Design of Concrete Structures Laboratory</b>	Determine primary and combination design loads on building referring appropriate standards and handbooks
				Design a two storied building manually and using standard software.
				Prepare structural drawings of slab, beam, column and footing.

36.	VII	CE4493	<b>Capstone Project Phase-II</b>	Analyze the primary/secondary data to solve the problem.
				Interpret results of experimentation/questionnaire survey/data analysis.
				Perform project work in team.
				Apply the tools/techniques/ knowledge to arrive at a conclusion.
				Develop oral and written presentation skills.
37.	VII	CE4073	<b>Employment Enhancement Skills</b>	Develop technical competency in software in the Civil Engineering field,
				Solve civil engineering problems by using software.
				Develop presentation skills for project/case study.
				Design and interpret data by soft skill Civil Engineering projects.
38.	VIII	OE4381	<b>Finance for Engineers (Online Course)</b>	Discuss the fundamental aspects of accounting and finance
				Apply theoretical knowledge and information for preparing various financial statements.
				Analyze the financial information for solving managerial problems.
				Evaluate financial performance of the organization for effective decision making
39.	VIII	OE4361	<b>Engineering Management &amp; Economics (Online Course)</b>	Develop administrative, organizational and planning skills to execute engineering project.
				Develop bar chart/mile stone chart for the project.
				Analyze profit/cost data and carry out economic analysis to take optimal decision.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Calculate depreciation as per various methods.
40.	VIII	IP4023	<b>Internship &amp; Project</b>	Examine the functioning of the company on the terms of inputs, transformation process and the outputs (products and services)
				Develop an attitude to adjust with the company culture, work norms, code of conduct.
				Recognize and follow the safety norms, Code of conduct.
				Demonstrate the ability to observe, analyse and document the details as per the industry practices.
				Interpret the processes, systems and procedures and to relate to the theoretical concepts- studies
				Develop the leadership abilities, communication.
				Demonstrate project management and finance sense
				Identify the project/problem in the domain of a program relevant for the company.
				Compile the information to the pertaining to the problem identified.
				Analyse the information using the statistical tools/ techniques
				Develop the feasible solution for given problem.
Analyse the impact of the project on the performance of company/department.				
41.	VIII	OE4381	<b>Finance for Engineers (Online Course)</b>	Discuss the fundamental aspects of accounting and finance.
				Apply theoretical knowledge and information for preparing various financial statements.

				Analyze the financial information for solving managerial problems.
				Evaluate financial performance of the organization for effective decision making.
42.	VIII	OE4361	<b>Engineering Management &amp; Economics (Online Course)</b>	Develop administrative, organizational and planning skills to execute engineering project.
				Develop bar chart/mile stone chart for the project
				Analyze profit/cost data and carry out economic analysis to take optimal decision
				Calculate depreciation as per various methods.
43.	VIII	RE4043	<b>Research Project</b>	Investigate the technical literature
				Recognize and evaluate theories, practices, and/or research on a chosen topic by conducting a thorough literature review and submitting a written integrative, critical summary of the current literature.
				Design a research problem and develop a methodology
				Develop and implement an advanced original research or creative project.
				Develop the ability to explain the conceptual viability of the project and describe the major components involved.
				Develop the ability to explain how the project will impact the relevant body of work.
				Develop advanced discipline-relevant skills and competencies.
				Construct an accurate record of research performed.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Write a research report and paper.
44.	VIII	ED4103	Project Management	Prepare business Plan for selected business.
				Make risk analysis & market analysis of selected project.
				Make risk analysis & market analysis of selected project
				Make financial appraisal of selected project.
45.	VIII	ED4043	Commercial Aspects of the Project	Interpret basic Financial Terminologies.
				Prepare & analyze financial statements.
				Prepare financial Plan for venture.
				Apply basic principles of marketing for various products.
				Prepare market survey.
				Apply knowledge of marketing management for selected business.
46.	VIII	ED4063	Entrepreneurship Development Program (EDP)	Apply knowledge of engineering, economics, marketing and finance for formulation of business plan, starting & managing new business.
47.	VIII	ED4083	Entrepreneurship Development Project	Apply knowledge of engineering, economics, marketing and finance for preparation of project report.
				Make commercial, technical and financial appraisal of project.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

**PG Program**

- **Department Name :- Civil Engineering**
- **PG Program Name :- Structural Engineering**

<b>Vision</b>	To be an outstanding department devoted to provide high end research and technical education in Civil engineering which will produce socially aware professionals to provide solutions to global community
<b>Mission</b>	<p>To design curriculum based on changing needs of stakeholders &amp; provide excellence in delivery &amp; assessment to ensure holistic development of civil engineering students.</p> <p>To enhance research &amp; consultancy resulting in solving problems related to civil engineering infrastructure as well as society at large.</p> <p>To mentor students in pursuit of higher education, entrepreneurship and global professionalism.</p>

Sr. No.	Program Outcomes
1.	An ability to independently carry out research /investigation and development work to solve practical problems.
2.	An ability to write and present a substantial technical report/document.
3.	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.
4.	An ability to design civil engineering structures and execute the projects.
5.	An ability to use modern tools and techniques, skills, instrumentation and software packages necessary to predict and solve complex engineering problems.
6.	An ability to perform efficiently with others as part of collaborative and/or multidisciplinary team with ethics.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	CES1015	<b>Advanced Solid Mechanics</b>	Analyze bodies for stresses and strains
				Analyze prismatic bars and tubes subjected to torsion.

				Analyze beams and thick cylinders for elasto-plastic loading
2				Develop ILD for reactions, S.F. and B.M. for indeterminate structures
3	CES1035	<b>Advanced Structural Analysis</b>		Construct SFD, BMD and TMD for beams curved in plan for various loading and support condition.
				Analyse the beam-column structures
				Analyse the structures by using the stiffness & flexibility matrix method.
				Solve boundary value problems from civil engineering.
4	CES1055	<b>Structural Dynamics and Earthquake Engineering</b>		Analyse the response of single and multi-degree freedom systems by fundamental theory.
				Explain principles of seismology and conceptual design.
				Evaluate lateral loads developed on multi-storeyed structures
5	SHP5511	<b>Technical Communication</b>		Use grammatically correct sentences in different types of technical writings.
				Apply technical writing skills to improve readability of documents.
				Demonstrate professional skills required in job interviews and at workplace
6	CES1075	<b>Computer Aided Design of Steel Structures Lab</b>		Analyze and design of the steel structures such as truss, towers, steel building frame and hoarding board etc. using standard software packages.
				Interpret the results of analysis and design obtained from the software.
				Prepare drawings of detailing of structural elements
7	CES1095	<b>Structural Dynamics Lab</b>		Examine damping effect on beam model.
				Perform testing of various models of structures for dynamic loading
8	CES1115	<b>Mini Project I</b>		Identify research problem.
				Prepare and present statement of Purpose.
				Perform analysis work.
				Communicate with outside agencies.
				Prepare report and present the work carried out.
				Develop self-learning ability

9	CES1135	<b>Theory of Thin Plates and Shells</b>	Analyse various problems using different theories based on plates and shells.
			Derive equilibrium equations related with different theories of plates and shells
10	CES1155	<b>Advanced Concrete Technology</b>	Select binders and admixtures to design strong, durable and sustainable concretes.
			Describe various special processes and techniques involved in various concreting jobs.
			Identify reasons affecting durability of concrete / concrete structures /elements.
			Design concrete mix for special concretes.
			Analyse qualities of concrete elements using appropriate destructive or non-destructive testing methods for evaluating quality
11	CES1175	<b>Analysis and Design of Tall Structures</b>	Evaluate forces on tall structures due to wind load.
			Construct SFD and BMD in building frame by approximate analysis method.
			Design RC shear wall, chimney, bunkers and silos
12	CES1195	<b>Design of Bridges</b>	Evaluate various loadings on bridges.
			Analyse and design of super-structure of various bridges.
			Analyse and design of sub-structure of various bridges
13	CES1213	<b>Structural Health Monitoring</b>	Discuss the concept and various components of SHM
			Identify suitable Sensors and Instruments required in SHM for in-service performance structures.
			Assess the health of structures using different techniques of SHM
			Select the appropriate strengthening and retrofitting techniques for regaining the structure strength.
			Design the sensor layouts of SHM for the civil engineering structures
14	SHP5171	<b>Numerical Methods for Engineers</b>	Apply numerical methods for error analysis.
			Compute the roots of the given equations and polynomials
			Apply the relevant numerical method for interpolating the polynomial.
			Develop the equation to be fitted to the given data.

				Solve problems involving linear algebraic equations
15	II	CES1025	<b>Finite Element Analysis</b>	Describe the finite element method and convergence requirement
				Apply the basic finite element formulation techniques to solve civil engineering problems by 1D, 2D and axisymmetric elements
				Explain shape function and isoparametric element
				Derive element stiffness matrix for thin plate and shell element
				Use commercial software to solve problems related to civil engineering
16	II	CES1045	<b>Design of Concrete Structures</b>	Analyse R.C. slabs using yield line theory.
				Design R.C.C. deep beam and flat slab.
				Design R.C.C. elevated service reservoir, retaining wall
				Design R.C. members for fire resistance
17	II	CES1065	<b>Research Methodology &amp; Intellectual Property Rights (IPR)</b>	Prepare abstract through literature review.
				Formulate a research problem.
				Prepare and present research proposal/paper by following research ethics.
				Prepare and present report on intellectual property rights
18	II	CES1085	<b>Computer Aided Design of Concrete Structures Lab.</b>	Analyse and design of the RCC structures such as building, retaining wall, flat slab and foundations using standard software packages.
				Interpret the results of analysis and design obtained from the software.
				Prepare drawings of detailing of structural elements
19	II	CES1105	<b>Advanced Concrete Technology Lab</b>	Design special concretes using IS 10262-2019.
				Evaluate durability properties of concrete.
				Judge the quality of concrete using NDT.
				Write a technical report on special concreting techniques based on site visit
20	II	CES1125	<b>Mini Project II</b>	Identify research problem.
				Prepare and present statement of Purpose.
				Perform analysis work.
				Communicate with outside agencies.
				Prepare report and present the work carried out.

				Develop self-learning ability.
21	SHP552	Framework of Indian Constitution		Realize the significance of constitution of India to students from all walks of life and help them to understand the basic concepts of Indian constitution.
				Identify the importance of fundamental rights as well as fundamental duties
				Understand the functioning of Union, State and Local Governments in Indian federal system
				Learn procedure and effects of emergency, composition and activities of election commission and amendment procedure.
22	CES1145	Advanced Earthquake Engineering		Design RCC structural elements for ductility requirements as per IS 13920 2016.
				Apply clauses given in IS codes to design of water tanks for earthquake force.
				Apply new techniques for controlling the vibrations of the structures.
				Evaluate natural frequency of continuous elements/systems.
23	CES1161	Composite Structures		Design composite structural elements like beams, columns, floors, trusses.
				Design of Multi-storeyed commercial and residential composite building.
				Design composite girder bridges.
24	CES1181	Maintenance and Rehabilitation of Structures		Diagnose the causes of distress and deterioration of concrete structure
				Describe the procedures of various repair techniques or methods.
				Suggest appropriate materials and techniques for repair and strengthening of structures/elements
25	CES1205	Design of Pre-stress Concrete Structures		Prepare a report on condition assessment of buildings based on observations
				Explain the concept, material requirement and behaviour of the pre-stressed concrete.
				Calculate the losses of pre-stress in pre-tensioning and post-tensioning concrete.
				Analyse & design the statically determinate,

				indeterminate pre-stressed concrete beams and end block.
				Analyse & design the pre-stressed concrete pipes and tanks
26		CES1225	<b>Design of Steel Structures</b>	Design steel structures and frames by varying methods.
				Design various connectivity of structure as per code provisions
27		CES1240	<b>Design of Foundations</b>	Explain various types of foundations and their design procedures
				Design different types of foundations.
				Perform the analysis and design of various types of foundation using available software's
28		CES2015	<b>Industry Internship</b>	Identify training area.
				Prepare on site work report of training.
				Perform analysis work.
				Communicate with agencies.
				Prepare report and present the work carried out.
29	III	MOE2011	<b>Artificial Intelligence - Machine Learning</b>	Describe central machine learning methods and techniques and how they relate to artificial intelligence
				Differentiate between supervised and unsupervised learning techniques
				Apply the ML algorithms to a real-world problem,
				Optimize the models learned and report on the expected accuracy that can be achieved by applying the models.
				Evaluate a given problem and apply appropriate machine learning technique
30		MOE2021	<b>Creative Thinking: Techniques &amp; Tools</b>	Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios
				Apply different brainstorming techniques in group activities
				Be proficient in the application of the 6 thinking hats tool in different life scenarios
				Develop a systematic approach to idea generation through the use of morphological analysis
				Innovate on an existing product, service or situation applying the SCAMPER method

				Get confident with the theory of inventive problem solving, called TRIZ
31	MOE2031	MOOC Course		Identify the real applications and practices of courses studied, at industry level.
				Recognize various modelling, analysis and validation techniques adopted at industries.
				Demonstrate the issues at design, manufacturing and assembly levels.
				Summarize and present technical data in report format.
32	MOE2041	Condition Monitoring and Signal Processing		Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.
				Analyze for machinery condition monitoring and explain how this compliments monitoring the condition.
				Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenance expenditure.
				Emphasizes on case studies that require gathering information using the modern testing equipment and processing it to identify the malfunction in that system.
33	MOE2051	Aircraft Conceptual Design		Identify vibration measurement, lubrication oil analysis
				Analyze the design process of aircraft and decide the aircraft configuration.
				Choose type of power plant as per flight regime.
				Design the fuselage layout as per type of aircraft.
				Design the wing for type of aircraft and its wing loading
				Evaluate lift, drag and mass for design synthesis.
34	MOE2060	Augmented Reality and Virtual Reality		Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design
				Define the basic concepts of Virtual and Augmented Reality
				Identify the differences in AR/VR concepts and technologies
				Describe the fundamental concepts relating to Virtual Reality such as presence, immersion, and engagement

				Evaluate usability of AR/VR applications and critique their use of AR/VR capabilities
				Design and prototype effective AR/VR applications using UNITY platform for various application
35		MOE2070	<b>Industrial Instrumentation</b>	Elaborate working principal of different transducers.
				Select suitable transducer/sensor for specific application.
				Justify the use of specific measurement technique for specific task.
				Evaluate the Calibration and Interfacing of the transducers.
36		MOE2080	<b>Advanced Mechatronics Systems</b>	Explain Mechatronics System
				Analyze the Mechatronics Based System
				Model, simulate, and verify the mechatronics systems.
				Identify Electrical, Hydraulic and Pneumatic Components.
37		CES2035	<b>Dissertation Phase-I</b>	Identify research problem from literature survey.
				Prepare research design for identified problem.
				Prepare synopsis report.
				Present the work plan to be carried out
38		CES2055	<b>Dissertation Phase-II</b>	Prepare the set up for experimentation/ develop/ learn software.
				Perform experimental/software analysis for validation of research work.
				Generate report of work carried out.
				Present the work carried out
39		CES2025	<b>Dissertation Phase-III</b>	Perform experimental/software analysis for developing research work.
				Generate report work carried out.
				Present the work carried out.
40	IV	CES2045	<b>Dissertation Phase-IV</b>	Perform experimental/software analysis for developing research work.
				Generate report work carried out.
				Publish a research paper in journals/conference.
				Prepare report using total work done as dissertation report.
				Present the work carried out

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**

- **PG Program Name :- Construction Management**

<b>Vision</b>	To be an outstanding department devoted to provide high end research and technical education in Civil engineering which will produce socially aware professionals to provide solutions to global community
<b>Mission</b>	<p>To design curriculum based on changing needs of stakeholders &amp; provide excellence in delivery &amp; assessment to ensure holistic development of civil engineering students.</p> <p>To enhance research &amp; consultancy resulting in solving problems related to civil engineering infrastructure as well as society at large.</p> <p>To mentor students in pursuit of higher education, entrepreneurship and global professionalism.</p>

Sr. No.	Program Outcomes
7.	An ability to independently carry out research /investigation and development work to solve practical problems.
8.	An ability to write and present a substantial technical report/document.
9.	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.
10.	An ability to Analyze, evaluate, and select computer applications for the purpose of efficient and effective construction project management.
11.	An ability to Analyze construction projects relative to fundamental aspects of construction management (i.e., cost, schedule, quality, safety, ethics) and develop appropriate solutions
12.	Apply ethical business principles and Demonstrate responsibility for safety planning and productivity in construction management settings.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	CCM1010	<b>Construction Planning &amp; Scheduling</b>	Develop project work breakdown structure.

				Estimate activity time durations and define scope of project.
				Prepare and update schedule of a construction project.
				Analyze resource requirement for a construction project.
2.	CCM1030	<b>Construction Equipment</b>		Select equipment/plant for particular task.
				Perform productivity analysis for equipment.
				Design equipment fleet for construction task.
				Perform economic analysis of equipment use.
3.	CCM1050	<b>Construction Practices</b>		Develop method statement for various construction activities.
				Differentiate among various practices used to complete construction activities.
				Choose appropriate technique for particular construction activity.
4.	CCM1070	<b>Quality Assurance and Quality Control in Construction</b>		Differentiate between QA and QC in consideration with different construction activities.
				Apply statistical quality control and monitoring methods.
				Develop quality checks for construction activities.
				Develop guideline in accordance with quality standard codes and quality management system
5.	CCM1095	<b>Management Information System</b>		Demonstrate Information Systems used in organizations for meeting strategic and operational goals.
				Develop skills using current end-user software for communication, data transformation, collaboration, and problem solving
6.	CCM1115	<b>Disaster Management</b>		Summarize effects of natural and man-made disasters.
				Develop disaster management program.
				Analyze vulnerable conditions and risk assessment.
				Prepare plan for post disaster management
				Describe stakeholder's role in disaster response.

7.	CCM1135	<b>Pavement Construction &amp; Management</b>	Conduct highway condition assessment surveys.
			Develop method for pavement management using PMS system.
			Select material as per MORTH and IRC specifications.
			Plan and design pavement structures
8.	CCM1150	<b>Repair and Rehabilitation of Structures</b>	Perform Assessment of buildings.
			Recognize damages in the structure.
			Select proper repair materials.
			Suggest repair or rehabilitation method for particular damage
9.	CCM1175	<b>Bridge Construction</b>	Select location for bridge based on topographical and geotechnical investigation.
			Perform hydrological calculations of design parameters.
			Apply standard loadings and safety consideration for bridge design.
			Select appropriate bridge superstructure elements for bridges
10.	CCM1195	<b>Prefabricated Structures</b>	Choose prefabricated elements for construction.
			Develop detail drawings of prefabricated elements.
			Design prefabricated elements for construction.
			Prepare project report for establishing production unit
11.	CCM1210	<b>Advanced Concrete Technology</b>	Select binders, SCMs and admixtures to design strong, durable and sustainable concretes.
			Analyze the factors affecting properties of fresh concrete.
			Develop quality control plan for a concrete construction.
			Design special purpose concrete mixes using mix design procedures recommended by pertinent codes of practices and handbooks
12.	CCM1235	<b>Construction Waste Management</b>	Develop strategies for construction and demolition waste management and resource efficiency.
			Examine the environmental impact of building materials.
			Design site waste management plans.

				Justify the application of waste minimization techniques on construction site.
13.		CCM1255	Microsoft Project (MSP) Laboratory	Develop Work Breakdown Structure for project.
				Prepare project schedule using Microsoft project.
				Modify construction schedule based on site progress.
				Extract and present various types of reports
14.		CCM1275	Geographic Information System Laboratory	Perform data collection using tools.
				Analyze data using GIS software.
				Prepare and present maps in GIS
15.		SHP5511	Technical Communication	Acquire skills required for good oral and written communication.
				Demonstrate improved writing skills and level of readability.
				Ensure the good quality of technical reports at very first-time submission.
16.		CCM1020	Project Economics & Financial Management	Analyze projects using different techniques.
				Suggest different sources of finance.
				Analyze different financial statement with the help of ratio analysis.
17.		CCM1040	Legal Aspects in Construction	Select appropriate type of contract for construction projects.
				Develop tender document for construction project.
				Perform comparative analysis of types of contract.
				Analyse arbitration documents for construction project.
18.	II	CCM1060	Project Formulation and Appraisal	Perform technical and financial analysis of construction projects.
				Perform BC ratio analysis.
				Select project based on appraisal.
				Develop administration process for project execution.
19.		CCM1080	Advanced Construction Techniques	Use modern construction techniques in the high rise structures.
				Identify the suitable formwork technique used to construct a structure.
				Justify the concepts used in the construction of special structures
20.		CCM1105	Health and Safety Management	Classify hazards to employees on construction site.

				Determine safe practices necessary for a project site.
				Identify the causes of accidents and suggest preventive measures to avoid accident.
				Prepare safety management plan.
21.	CCM1125	<b>Human Resource Management</b>		Plan manpower for a project.
				Develop organization for a project.
				Apply aspects of human behavior to HRM.
				Select right person to build the team.
				Discuss solutions for human resource problems
22.	CCM1145	<b>Shoring, Scaffolding and Formwork</b>		Develop proper plan for form-work.
				Select appropriate material and type of form-work.
				Design form-work for components.
				Design scaffold for construction task.
23.	SHP5261	<b>Probability and Statistics for Engineers</b>		Apply relevant probability distribution for given problems.
				Use different methods of sampling and testing in statistical inference.
				Solve problems on correlation and regression.
24.	CCM1165	<b>Material Management</b>		Apply supplier selection methods.
				Produce optimal stores layout.
				Perform codification and classification.
				Perform material requirement planning.
				Apply inventory control techniques for materials management.
25.	CCM1180	<b>Advanced Construction Materials</b>		Justify the need of new material development.
				Choose material for construction process based on material properties.
26.	CCM1200	<b>International Contracting</b>		Prepare tender documents as per international contracting procedures.
				Apply of various conditions of international contract under the FIDIC document.
				Understand the labour laws.
				Act as arbitrator for dispute resolving.
27.	CCM1225	<b>Research Methodology &amp; IPR</b>		Prepare abstract through literature review.
				Formulate a research problem.

				Prepare and present research proposal/paper by following research ethics.
				Prepare and present a report on Intellectual Property Rights.
28.		CCM1245	<b>Fundamentals of BIM Laboratory</b>	Develop drawings as per software requirement.
				Compute quantities of building items.
				Develop project schedule using “Revit” application.
29.		CCM1265	<b>Primavera Laboratory</b>	Prepare schedule plan for construction project.
				Analyze construction project using primavera.
				Prepare and present various types of reports.
30.		CCM1285	<b>Mini project</b>	Select mini project problem.
				Prepare and present statement of purpose.
				Develop solution to the selected problem.
				Prepare and present report related to project undertaken.
31.		SHP552	<b>Framework of Indian Constitution</b>	Realise the significance of constitution of India to students from all walks of life and help them to understand the basic concepts of Indian constitution.
				Identify the importance of fundamental rights as well as fundamental duties
				Understand the functioning of Union, State and Local Governments in Indian federal system
				Learn procedure and effects of emergency, composition and activities of election commission and amendment procedure
32.	III	MOE2011	<b>Artificial Intelligence - Machine Learning</b>	Describe central machine learning methods and techniques and how they relate to artificial intelligence
				Differentiate between supervised and unsupervised learning techniques
				Apply the ML algorithms to a real-world problem,
				Optimize the models learned and report on the expected accuracy that can be achieved by applying the models.

				Evaluate a given problem and apply appropriate machine learning technique
33.	MOE2021	<b>Creative Thinking: Techniques &amp; Tools</b>		Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios
				Apply different brainstorming techniques in group activities
				Be proficient in the application of the 6 thinking hats tool in different life scenarios
				Develop a systematic approach to idea generation through the use of morphological analysis
				Innovate on an existing product, service or situation applying the SCAMPER method
				Get confident with the theory of inventive problem solving, called TRIZ
34.	MOE2031	<b>MOOC Course</b>		Identify the real applications and practices of courses studied, at industry level.
				Recognize various modelling, analysis and validation techniques adopted at industries.
				Demonstrate the issues at design, manufacturing and assembly levels.
				Summarize and present technical data in report format.
35.	MOE2041	<b>Condition Monitoring and Signal Processing</b>		Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.
				Analyze for machinery condition monitoring and explain how this compliments monitoring the condition.
				Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenance expenditure.
				Emphasizes on case studies that require gathering information using the modern testing equipment and processing it to identify the malfunction in that system.
				Identify vibration measurement, lubrication oil analysis
36.	MOE2051	<b>Aircraft Conceptual Design</b>		Analyze the design process of aircraft and decide the aircraft configuration.

				Choose type of power plant as per flight regime.
				Design the fuselage layout as per type of aircraft.
				Design the wing for type of aircraft and its wing loading
				Evaluate lift, drag and mass for design synthesis.
				Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design
37.	MOE2060	<b>Augmented Reality and Virtual Reality</b>		Define the basic concepts of Virtual and Augmented Reality
				Identify the differences in AR/VR concepts and technologies
				Describe the fundamental concepts relating to Virtual Reality such as presence, immersion, and engagement
				Evaluate usability of AR/VR applications and critique their use of AR/VR capabilities
				Design and prototype effective AR/VR applications using UNITY platform for various application
38.	MOE2070	<b>Industrial Instrumentation</b>		Elaborate working principal of different transducers.
				Select suitable transducer/sensor for specific application.
				Justify the use of specific measurement technique for specific task.
				Evaluate the Calibration and Interfacing of the transducers.
39.	MOE2080	<b>Advanced Mechatronics Systems</b>		Explain Mechatronics System
				Analyze the Mechatronics Based System
				Model, simulate, and verify the mechatronics systems.
				Identify Electrical, Hydraulic and Pneumatic Components.
40.	CCM2015	<b>Industry Internship</b>		Relate theory to practice.
				Compile technical data of the project.
				Prepare daily work reports of ongoing activities.
				Prepare and present internship report.
41.	CCM2035	<b>Dissertation Phase-I</b>		Select research problem through literature survey.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Develop research design for research problem.
				Prepare and present synopsis report.
42.		<b>CCM2055</b>	<b>Dissertation Phase-II</b>	Perform data/experimental data collection for the project.
				Analyze collected data using appropriate tools/techniques/ software.
				Perform experimental/software analysis for validation of research work.
				Prepare and present report.
43.		<b>CCM2025</b>	<b>Dissertation Phase-III</b>	Analyze collected data using appropriate tools/techniques/ software's.
				Prepare and present/publish technical paper.
				Prepare and present report
	IV			Compile the work done in appropriate sequence.
44.		<b>CCM2045</b>	<b>Dissertation Phase-IV</b>	Derive conclusion of the work done of the project.
				Analyze proposed system.
				Perform plagiarism analysis of compiled report.
				Prepare and present the final dissertation report in desired format.

- **Department Name :-Computer Science and Engineering**
- **UG Program Name :- Computer Engineering**
- **Vision and Mission :-**

<b>Vision</b>	To excel in the computer science engineering discipline through continuous research, innovation and industry-oriented curriculum leading to responsible IT professionals.
<b>Mission</b>	<ol style="list-style-type: none"><li>1. To inculcate teaching and learning process promoting state-of-the-art IT industry practices in computer science engineering and technology to address global challenges.</li><li>2. To integrate academics, research and entrepreneurship skills to address present and future challenges of the society and industry.</li><li>3. To develop professionalism with strong foundations adapting to changing technology.</li></ol>

<b>Sr. No.</b>	<b>Program Outcomes</b>
25.	PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization for the solution of complex engineering problems. 3. 4. 5. 6.
26.	PO2: Problem analysis: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
27.	PO3: Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.
28.	PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
29.	PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

30.	PO6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
31.	PO7: Ethics: Apply ethical principles and commit to professional ethics and responsibilities  and norms of the engineering practice.
32.	PO8: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
33.	PO9: Communication: Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
34.	PO10: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
35.	PO11: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
PSO1	Apply knowledge of database management systems, data mining and analytics techniques to solve real world problems
PSO2	Apply knowledge of machine learning and intelligence to identify, formulate and solve complex engineering problems
PSO3	Design, develop and deploy software using emerging IT technologies like open source tools, mobile application development platforms, web technologies and cloud computing

• **S.Y. B. Tech.**

Sr. No.	Semester	Course Code	Course Name	Course Learning Outcomes
1.	III	CS2014	Computer Organization and Architecture	1) Perform various arithmetic operations on different number systems.
				2) Apply Boolean algebra to solve logic functions.
				3) Design, implement, and analyze various logic circuits.
				4) Apply the programming techniques in developing assembly language program.
				5) Analyze flow chart and apply assembly language programming techniques.
2.	III	CS2034	Data structure & Algorithms	1) Compare between linear and nonlinear data structures.
				2) Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				3) Analyze various searching and sorting algorithms and apply it to solve particular problem.
				4) Determine a suitable data structure and algorithm to solve a real world problem.
3.	III	CS2074	Discrete Mathematics	1) Describe mathematical logic, truth table and their applications to programming and hardware design.
				2) Apply the concepts of set theory.
				3) Characterize the properties of relations, functions and algebraic systems for formal languages.
				4) Develop essential concepts to solve problems on graphs and networks.
				5) Express counting principle to determine various combinatorial configurations.
4.	III	CEMD201	Building Construction and Planning	1) Suggest appropriate materials for building construction applications.
				2) Prepare a functional design of components of the building.
				3) Design and draw residential building using principles of planning and bye-laws.
				4) Prepare plumbing and electrification plan for the building.
				5) Explain properties of building finishing materials and application procedure.
5.	III	CSMD201	Introduction to Data Structures	1) Compare between linear and nonlinear data structures.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				2) Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				3) Analyze various searching and sorting algorithms and apply it to solve particular problem.
				4) Determine a suitable data structure and algorithm to solve a real world problem.
6.	III	EEMD201	Electrical Power Generation	1) List the main components of different power plants.
				2) Describe the operation of various power plants used for electrical power generation.
				3) Explain working principles of various power plants.
				4) Compare different power plants based on advantages, limitations and future prospects.
				5) Draw layout of electrical power plants.
				6) Explore alternate electrical energy resources for future needs and challenges.
7.	III	ECMD201	Electronics Devices and Applications	1) Describe the fundamental concepts of electronics and working principles of different devices.
				2) Analyze different analog and digital electronics circuits.
				3) Design digital electronics circuits with truth table and logic diagram.
8.	III	CIMD201	Data Structures	1) Describe the basic terminologies of data structures.
				2) Examine the linear data structure array with its types.
				3) Demonstrate the working of stack, queue performed on data structures.
				4) Illustrate the working of linked list.
				5) Discuss Tree terminologies and their Applications.
				6) Elaborate Graph terminologies with their types.
9.	III	MEMD203	Design Thinking	1) Identify the new product opportunities and sources of new product ideas.
				2) Elaborate the product life cycle and product design process.
				3) Integrate the customer and end-consumer needs into design process.
				4) Assimilate the various product characteristics to design a novel product.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				5) Participate effectively in group work sessions and teams.
10.	III	MCMD201	Fundamentals of Mechatronics	1. Identify various elements of mechatronics systems.
				2. Select appropriate sensor/Actuator/controller/control algorithm for different applications.
				3. Develop PLC/ microcontroller-based applications.
11.	III	AIMD201	Object Oriented Programming	1) Understand the basic object-oriented programming concepts and apply them in problem solving.
				2) Illustrate inheritance concepts for reusing the program.
				3) Implement program using loops, decision statements and functions in Python.
				4) Plot data using appropriate Python visualization libraries.
12.	III	RAMD201	Fundamentals of Robotics & Automation	1) Differentiate various robotic configurations and performance metrics.
				2) Compare various end effectors, sensors, and drive systems in robotic applications.
				3) Illustrate kinematic and dynamic principles applied to robotic systems.
				4) Outline robot programming solutions for diverse applications.
				5) Distinguish various types and aspects of automation.
				6) Relate knowledge of PLCs to industrial automation.
13.	III	SH2174	Environmental Science	1) Describe methods for conservation of natural resources, ecosystem and to achieve sustainable development.
				2) Evaluate impacts of environmental pollution on the environment and human health.
				3) Design sustainable solutions to address environmental challenges.
				4) Demonstrate the importance of teamwork, collaborative approach in group work.
				5) Develop presentation and report writing skills.
14.	III	CS221	Object Oriented Programming	1) Explain the fundamental concepts of Object-Oriented Programming.
				2) Illustrate the concepts of polymorphism and inheritance.
				3) Use exception handling in C++ programs.

				4) Demonstrate the concept of file handling using C++.
	III			5) Implement templates in C++.
15.	III	CS2134	Data structure & Algorithms Lab	1) Implement various data structures and algorithms using programming languages such as C or C++.
				2) Conduct experiments to validate the theoretical analysis of algorithms.
				3) Analyze data, interpret results, and draw conclusions.
				4) Evaluate the efficiency and scalability of different data structures and algorithms enabling them to make informed choices when selecting the most appropriate solution for a given problem
16.	III	CS223	Digital Marketing	1) Describe the principles of search engine optimization (SEO), social media marketing, email marketing, and analytics.
				2) Apply data analysis techniques to measure and optimize digital marketing campaigns.
				3) Design effective digital marketing plans and strategies.
				4) Develop practical skills in implementing digital marketing strategies.
17.	III	CS2174	Technical Aptitude-I	1) Choose proper techniques to find solution for engineering problems.
				2) Solve various types of problems.
				3) Develop ability to face competitive examinations.
				4) Inspect the problem & conclude with proper solution.
18.	III	SH2634	Professional Leadership Skills	1) Explain the traits of a leadership through real life examples.
				2) Exhibit the ability to work effectively in team.
				3) Prepare a presentation as per the audience and context requirements.
19.	III	SH2614	Interpersonal Skills	1) Exhibit interpersonal communication skills.
				2) Demonstrate decision-making skills.
				3) Apply conflict resolution styles appropriate in different situations.
				4) Demonstrate skills to manage balance in work and life.

20.	III	SH2694	Innovation Tools and Methods for Entrepreneurs	1) Explain structured approach to define the problem with every possible detail, identify conflicts and solve them.
				2) Apply User Journey Map to the selected problem to show user interaction at various stages.
				3) Analyze the solutions provided by competitors for effectiveness and gaps if any.
21.	III	SH2594	Personal Effectiveness and Body Language	1) Develop skills to build self-esteem and positive attitude.
				2) Develop interpersonal skills characterized by effective communication and conflict resolution.
				3) Discover ways to overcome procrastination.
				4) Demonstrate responsiveness towards stress and health issues.
				5) Interpret the non-verbal behaviour of a person.
22.	III	SH2734	German Language- III	1) Interpret the language if the next person is speaking slowly and clearly.
				2) Make use of the language in routine life with the routing topics like family, shopping, work etc.
				3) Demonstrate the language by self-introduction in German with simple sentences.
23.	III	SH2714	Japanese Language - III	1) Make use of basic conversations in various situations.
				2) Identify the sentence patterns.
				3) Explain insights about the communication required for living in Japan.
				4) Interpret Japanese work ethics required in their professional career.
24.	IV	CS220	Statistics and Fuzzy Logic	1) Apply the statistical techniques, probability distributions and density estimates to various kinds of data.
				2) Develop the fundamental concepts of fuzzy sets and operations.
				3) Apply fuzzy arithmetic for various problems involving fuzzy numbers.
				4) Develop the concept of fuzzy relations and operations.
25.	IV	CS230	Software Engineering	1) Explain various life cycle activities like Analysis, Design, Implementation, Testing and Maintenance.
				2) Identify risks, manage the change to assure quality in software projects.

				3) Apply the knowledge, techniques, and skills in the development of a software product.
				4) Evaluate various software testing techniques and metrics.
26.	IV	CS224	Finite Automata and Formal Languages	1) Solve automata problems using mathematical theorems and techniques.
				2) Design computational models for different language classes.
				3) Construct grammar or regular expressions for different language classes.
				4) Prove and disprove key properties of formal languages and automata.
				5) Create a compiler using various tools like LEX and YACC.
27.	IV	CS2004	Computer Network	1) Remember and explain the modulation techniques, components used in a communication system.
				2) Analyze different network models and protocols of different layers.
				3) Understand and discuss the concept of multiplexing & switching.
				4) Apply and discuss various functions of the different protocols in network layer.
				5) Create the different services of application layer.
28.	IV	SH202	मराठी भाषिक कौशल्यविकास	१. भाषा आणि व्यक्तिमत्व विकास यांमधील सहसंबंध स्पष्ट करू शकेल
				२. भाषिक कौशल्यविकास करू शकेल
				३. कथा या मराठी साहित्य प्रकाराचे विश्लेषण करू शकेल
				४. एकांकिका या मराठी साहित्य प्रकाराच्या विश्लेषणाची क्षमता प्राप्त करेल
29.	IV	SH204	हिंदी कथा साहित्य एवं प्रयोजमूलक हिंदी	1. विद्यार्थियों में मानवीय संवेदनाओं के विकास के साथ नवीन सामाजिक सांस्कृतिक बोध और जीवन मूल्यों का विकास होगा।
				2. विद्यार्थियों में साहित्य के माध्यम से कलात्मक गुणों की अभिवृद्धि होगी कला की साहित्यिक विधाओं के प्रति अभिरुचि जागृत होगी तथा रचनात्मक कौशल्य को बढ़ावा मिलेगा।
				3. विद्यार्थियों में नए वैश्विक मूल्यों के प्रति सजगता को बढ़ावा मिलेगा एवं मूल्यवादी दृष्टि के प्रति दायित्व बोध उत्पन्न होगा। छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
				4. छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
30.	IV	CS226	Java Programming	1) State the OOP concepts and basic Java programming fundamentals.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				2) Explain interfaces, packages, and exception handling in Java.
				3) Apply file handling and multithreading in Java programs.
				4) Develop Java programs for database connectivity.
				5) Design graphical user interfaces using Java.
31.	IV	CEMD202	Building Estimation and Valuation	1) Explain the types and basic requirements of the estimate.
				2) Explain measurement sheet, abstract sheet, and detailed specifications of different construction items.
				3) Prepare detailed estimate of load bearing structure and framed structure.
				4) Prepare rate analysis and bar bending schedule of different construction items.
				5) Explain the tenders and contracts.
				6) Describe basic terms of valuation.
32.	IV	CSMD202	Problem Solving using JAVA	1) Explain the basic object-oriented programming concepts.
				2) Illustrate the concept of inheritance for code reusability.
				3) Use the concepts of interfaces and packages in Java programming.
				4) Demonstrate the concepts of exception handling and multithreading.
				5) Implement JDBC and GUI programming using Java.
33.	IV	EEMD202	Power System	1) Write the basic working principles of different generating sources.
				2) Analyze different types of loads.
				3) Explain importance of power factor and tariffs in power system.
				4) Identify various components in power transmission and distribution system.
				5) Select substation equipments as per requirement.
34.	IV	ECMD202	Electronics Communication Systems	1) Describe different communication systems.
				2) Explain applications of analog and digital modulation techniques.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				3) Analyze different modulation and demodulation techniques.
				4) Explain the use of satellite communication.
35.	IV	CIMD202	Computer Algorithms	1) Analysing asymptotically the performance of algorithms.
				2) Compare and analyse searching and sorting algorithms.
				3) Apply different algorithm design techniques to solve problems like job sequencing, knapsack, TSP, finding shortest path etc.
				4) Apply backtracking method to solve problems like N-queens, graph coloring, sum of subsets etc.
				5) Describe computational complexity theory to classify computational problems according to their inherent difficulty..
36.	IV	MEMD204	Behavioral Engineering and Design	1. Explain key concepts and theories related to influencing user behavior in product design.
				2. Utilize psychological principles to develop product designs that effectively address user needs and preferences.
				3. Create products that demonstrate high levels of user engagement, measured through metrics such as adoption rates and user interaction patterns.
				4. Develop products that prioritize user satisfaction and usability, as measured through user testing and feedback.
				5. Incorporate aesthetic appeal and ergonomic considerations into product designs, assessed through objective criteria such as user comfort and visual appeal ratings.
				6. Analyze user feedback and iteratively improve designs to enhance user experience, measured by improvements in user satisfaction scores or usability metrics.
37.	IV	MC2051	Industrial Fluid Power	1. Describe the structure and function of common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors etc.

				<p>2. Model and analyze common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors.</p> <p>3. Create &amp; simulate basic hydraulic and pneumatic circuit diagrams for different applications.</p> <p>4. Design, develop &amp; analyze simple hydraulic and pneumatic systems for given task.</p>
38.	IV	AIMD202	Data Structures & Algorithms	<p>1) Compare between linear and nonlinear data structures.</p> <p>2) Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.</p> <p>3) Analyze various searching and sorting algorithms and apply it to solve particular problem.</p> <p>4) Determine a suitable data structure and algorithm to solve a real world problem.</p>
39.	IV	RAMD202	Sensors & Actuators	<p>1) Explain the functioning of various sensors and transducers.</p> <p>2) Calibrate the transducers such as accelerometers, microphones and strain gauges.</p> <p>3) Explain the characteristics of various sensors and transducers.</p> <p>4) Describe the process and need for calibration.</p> <p>5) Choose the sensor for measurement of few parameters.</p> <p>6) Use the appropriate sensor and calibrate.</p>
40.	IV	CS2044	Computer Networks Lab	<p>1. Define and apply architectural principles and mechanisms for data exchange among computer</p> <p>2. Design, implement and analyse simple computer networks.</p> <p>3. Identify &amp; analyse the performance of different network layer protocols to formulate and solve network-engineering problems.</p> <p>4. Analyze to compare performance of different routing protocols.</p>

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				5. Ability to use techniques, skills, and modern networking tools necessary for engineering practice.
				6. Demonstrate an understanding of computer communications standards.
41.	IV	CS232	Fundamentals of Web Technology	1. Explain the fundamental concepts of web technology, including the structure of the Internet, client-server architecture, and basic HTTP protocols.
				2. Apply syntax and semantics of HTML for creation of well-structured and semantic web documents.
				3. Apply CSS to style web documents and enhance user interfaces for web applications.
				4. Analyze JavaScript code for utilizing the DOM and handling events in web apps.
				5. Develop responsive web application using Bootstrap.
				6. Deploy interactive website on World Wide Web.
42.	IV	CS2084	Technical Aptitude-II	1) Choose proper techniques to find solution for engineering problems.
				2) Solve various types of problems.
				3) Develop ability to face competitive examinations.
				4) Inspect the problem & conclude with proper solution.
43.	IV	SH2634	Professional Leadership Skills	1. Explain the traits of a leadership through real life examples.
				2. Exhibit the ability to work effectively in team.
				3. Prepare a presentation as per the audience and context requirements.
44.	IV	SH2614	Interpersonal Skills	1. Exhibit interpersonal communication skills.
				2. Demonstrate decision-making skills.
				3. Apply conflict resolution styles appropriate in different situations.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				4. Demonstrate skills to manage balance in work and life.
45.	IV	SH2694	Innovation Tools and Methods for Entrepreneurs	1. Explain structured approach to define the problem with every possible detail, identify conflicts and solve them
				2. Apply User Journey Map to the selected problem to show user interaction at various stages
				3. Analyze the solutions provided by competitors for effectiveness and gaps if any.
46.	IV	SH2594	Personal Effectiveness and Body Language	1. Develop skills to build self-esteem and positive attitude.
				2. Develop interpersonal skills characterized by effective communication and conflict resolution.
				3. Discover ways to overcome procrastination.
				4. Demonstrate responsiveness towards stress and health issues.
				5. Interpret the non-verbal behaviour of a person.
47.	IV	SH 2644	German Language - IV	1. Interpret the language if the next person is speaking slowly and clearly.
				2. Make use of the language in routine life with the routing topics like family, shopping, work etc.
				3. Demonstrate the language by self-introduction in German with simple sentences.
48.	IV	SH2624	Japanese Language - IV	1. To be able to make basic conversations in various situations.
				2. To recognize the sentence patterns.
				3. To improve Japanese Language proficiency.
				4. To give students insights about the communication required for living in Japan.
				5. To expose students to the Japanese work ethics required in their professional careers.

• **T. Y. B. Tech.**

Sr.No.	Semester	Course Code	Course Name	Course Learning Outcomes
1.	V	CS3014	Database Management Systems	1) Formulate E-R models to represent simple database application scenarios .
				2) Apply the principles of the database system for efficient access of the data .
				3) Analyze various protocols, issues, and techniques related to transaction management for enabling consistency of database .
				4) Design the queries to manipulate data using procedural and non-procedural languages
2.	V	CS335	Operating System	1) Distinguish between different operating systems .
				2) Express concepts of process management .
				3) Summarize synchronization techniques .
				4) Demonstrate the concept of deadlock .
				5) Discuss memory management and virtual memory management
				6) Review on storage management, Protection and security
3.	V	CS323	Cryptography and Network Security	1) Analyze different methods of Data Encryption and Decryption; their advantages & limitations .
				2) Use different key distribution methods for distribution of Public/Private & Secret keys .
				3) Apply message authentications techniques for implementing security during message communication .
				4) Create and use digital signatures .
				5) Discuss different security attacks & security solutions for e-mail & web applications
4.	V	CS325	Program Elective - I-Parallel Algorithm Design	1) Compare different parallel architectures .
				2) Design parallel algorithms for different applications
				3) Analyze the role of parallel architecture in parallel algorithm™s design .
				4) Perform complexity analysis of parallel systems .
				5) Compare different Parallel algorithms from various application domains
5.	V	CS327	Program Elective - I-Soft Computing	1) Describe soft computing techniques and their role in problem solving .
				2) Apply various Soft Computing techniques such as fuzzy logic and genetic algorithms to solve problems .

				3) Analyze the strengths and weaknesses of different Soft Computing techniques in specific problem domains .
				4) Design and implement advanced Soft Computing models for complex real-world problems
6.	V	CS329	Program Elective - I Operations Research	1) Develop mathematical models for the given application .
				2) Apply mathematical methods to solve complex operational problems .
				3) Evaluate operations research techniques in solving business problems .
				4) Select appropriate operations research technique to solve engineering, scientific or business problems
7.	V	CS331	Data Warehousing & Data Mining	1) Analyze the aspect of mining data over the statistical techniques for selected applications .
				2) Justify the usage of various classification/clustering algorithms .
				3) Apply knowledge to build association based rules technique for real world case studies .
				4) Explore data warehousing and OLAP concepts .
				5) Experiment the advancement in mining techniques for wide variety of areas
8.	V	OE3104	Network Administration	1) Recall and describe the different basic components of computer networks .
				2) Explain the functions and interactions of each layer of the OSI model .
				3) Distinguish various networking devices with their functions .
				4) Analyze different web services and applications .
				5) Synthesize the knowledge about cyber security related services and networking maintenance
9.	V	CEMD301	Infrastructure Engineering	1) Apply the knowledge of geometric design in road construction .
				2) Identify the quality parameters of pavement materials and various methods of road construction .
				3) Discuss the various aspects of airport engineering .
				4) Explain design parameters of railway engineering and its component parts .
				5) Summaries the different off shore structures for dock and harbors
10.	V	OE3104	Network Administration	1. Recall and describe the different basic components of computer networks.
				2. Explain the functions and interactions of each layer of the OSI model.
				3. Distinguish various networking devices with their functions.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				4. Analyze different web services and applications.
				5. Synthesize the knowledge about cyber security related services and networking
11.	V	CEMD301	Infrastructure Engineering	1. Apply the knowledge of geometric design in road construction.
				.
				2. Identify the quality parameters of pavement materials and various methods of road construction
				3. Discuss the various aspects of airport engineering.
				4. Explain design parameters of railway engineering and it's component parts.
				5. Summaries the different off shore structures for dock and harbors.
12.	V	CSMD301	Fundamentals of Database Systems	1) Describe the purpose and nature of the database system for storing and fast access to the data .
				2) Identify various protocols, issues, and techniques related to transaction management for a consistent and stable database .
				3) Draw E-R model store present simple database application scenarios .
				4) Design the queries to manipulate and access data using procedural and non-procedural languages
				5)Apply relational database design concepts to remove data redundancy and to retrieve data easily
				6)Perform operation on Unstructured data.
13.	V	EEMD301	Electrical Machines	1) Describe behavior of dc machine .
				2) Explain the working principle of 1-Phase and 3-Phase transformers .
				3) Explain working of different induction motors .
				4) Select the relevant electrical machines for different applications .
				5) Interpret the relevant fractional horse power motor for different applications
14.	V	ECMD301	Advanced Communication Systems	1) Explain the principles of antenna and wave propagation .
				2) Understand basic antenna parameters and their types .
				3) Discuss the evolution, requirements, and challenges of 5G communication systems .
				4) Understand and compare various communication techniques .
				5) Communicate effectively on complex engineering topics related to modern communication techniques

15.	V	CIMD301	Introduction of DBMS	1) Describe the fundamental elements of relational database management systems .
				2) Design ER-model store present simple database application scenarios .
				3) Write SQL query to perform various operations on the database .
				4) Analyze principle of integrity constraints, Hashing and Indexing on databases .
				5) Illustrate the transaction management, concurrency control and crash recovery
16.	V	MEMD305	Product Design Tools and Techniques	1) Explain the basic principles of engineering design .
				2) Design products for ease of manufacturing and assembly .
				3) Apply value engineering and concurrent engineering principles in product design .
				4) Apply reverse engineering on a product .
				5) Apply various prototyping techniques, including rapid prototyping technologies
17.	V	MCMD301	Sensor and Instrumentation	1) Understand the fundamental principles of various sensors and transducers .
				2) Analyze the characteristics, advantages, and limitations of different sensor types .
				3) Apply appropriate signal conditioning techniques to improve sensor output accuracy and integrate sensors into mechatronic systems for real-time data acquisition and control .
				4) Select appropriate sensors for specific mechatronic systems used in real life applications
18.	V	AIMD301	Machine Learning	1) Utilize machine learning techniques and understand the basic theory underlying machine learning .
				2) Articulate supervised, unsupervised and reinforcement learning .
				3) Identify the basic concepts of learning and decision trees .
				4) Utilize Bayesian techniques for problems appear in machine learning .
				5) Perform statistical analysis of machine learning techniques
19.	V	RAMD301	Kinematic & Dynamics for Robots	1) Select the type of mechanism for the robotic applications .
				2) Perform kinematic analysis and synthesis of mechanisms .
				3) Perform forward and inverse kinematics of robots .
				4) Perform workspace analysis for different types of robots .

				5) Design robot manipulators based on dynamic analysis 6) Perform forward and inverse dynamics of robots
				6) Perform forward and inverse dynamics of robots
20.	V	SH3034	Scholastic Aptitude - I	1) Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems . 2) Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests . 3) Develop a bridge in analogies, series and visualizing directions . 4) Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
21.	V	CEMD303	Smart Cities & Sustainable Development	1) Develop a critical understanding of the different concept and ideologies of smart cities . 2) Analyse the different approaches toward planning and development of smart cities on global level . 3) Assess the existing state and approach of Smart city Mission in India . 4) Comprehend the concept of resilience and sustainable development and its measurement . 5) Evaluate the present status of sustainability and rating systems initiatives within the Indian context
22.	V	CSMD303	Object-oriented Programming in Python	1) Demonstrate a comprehensive understanding of Python syntax, data types, and basic operations . 2) Make use of common Python libraries for data manipulation . 3) Implement lists, tuples, sets, and dictionaries for effective data handling . 4) Apply principles of OOP, including classes, objects, inheritance, and polymorphism
23.	V	EEMD303	Electrical Technology	1) Demonstrate speed control methods of electrical machines . 2) Analyze performance of DC motor and induction motor for speed control applications . 3) Implement power electronic circuits for given application . 4) Measure electrical quantities using electrical and electronic instruments
24.	V	ECMD303	Electronic Product Design	1) Elaborate product design processes . 2) Explain various aspects of PCB design . 3) Differentiate product-testing methods . 4) Create various documents for the product

25.	V	CIMD303	OOP using Java	1) Explain the concepts and terminologies in object-oriented concepts and java programming language .
				2) Apply object-oriented programming features and concepts for solving given problem .
				3) Develop the java application using the collection framework to solve real word problem .
				4) Apply the concepts exception handling to develop error free codes .
				5) Utilize the concepts of package to develop efficient codes
26.	V	MEMD307	Design and Prototyping	1) Use CAD software to create detailed CAD models and designs .
				2) Explain the workflow and settings for effective additive manufacturing .
				3) Simulate the 3D printing process to identify and correct potential issues before actual printing .
				4) Print a 3D component based on CAD models
27.	V	MCMD303	Industrial Automation	1) Explore the architecture of PLC and its functions .
				2) Execute the various instructions and logic in PLC .
				3) Develop the PLC program for various applications .
				4) Design and develop the SCADA, DCS system for various applications
28.	V	AIMD303	Business Intelligence	1. Articulate data pre-processing techniques
				2. Analyze the data modeling required for business intelligence related tasks
				3. Determine the role of statistical techniques in data analysis tasks
				4. Identify big data analysis techniques
				5. Utilize different reporting/visualization tool
29.	V	RAMD303	Robot Programming Lab.	1. Explain Robot programming ecosystem.
				2. Create reusable code for robot powered applications.
				3. Design a custom robot using programming.
				4. Simulate and control the robot using ROS.
30.	V	CS333	Web Technology	1. Explain the fundamental concepts of web technology, including the structure of the Internet, client-server architecture, and basic HTTP protocols.
				2. Apply syntax and semantics of HTML for creation of well-structured and semantic web documents.
				3. Apply CSS to style web documents and enhance user interfaces for web applications.
				4. Analyze JavaScript code for utilizing the DOM and handling events in web apps.
				5. Develop responsive web application using Bootstrap.

				6. Deploy interactive website on World Wide Web.
31.	V	CS3174	Database Management System Lab	1. To Recognize the fundamentals of database design and ER modelling.
				2. To Apply PL/SQL programming techniques including exception handling.
				3. To Analyze and design complex SQL queries to manage database objects and manipulate data.
				4. To Develop Java applications to connect and interact with databases using JDBC ODBC.
				5. To Sort out the CRUD operations on Mongo DB and integrate NoSQL databases with applications.
32.	V	C3214	Summer Internship/  Professional Certification	1. Apply the theoretical and practical knowledge of Computer Science & Engineering for product/service development.
				2. Undergo real time IT Industry practices regarding product/service development.
				3. Identify and analyze engineering problems to provide IT based solutions.
				4. Adopt recent industry practices for project development
				5. Improve the ability to work in teams
				6. Enhance technical skills for solving complex engineering problems.
33.	VI	CS320	Machine Learning	1. Differentiate among various machine learning techniques.
				2. Apply data pre-processing techniques to real-world problems in various domains
				3. Build and apply machine learning models to solve practical problems in various
				4. Fields (e.g., finance, healthcare, marketing etc).
				5. Analyse the concept of neural networks for learning linear and non-linear activation functions.
				6. Develop new Recommender Systems for a number of domains especially, Education, Health-care etc.
34.	VI	CS322	Design and Analysis of Algorithms	1. Identify appropriate algorithm design techniques for solving problems
				2. Design an algorithm to solve problem in systematic way.
				3. Analyze the performance or complexity of algorithms
				4. Explain non-deterministic and randomized algorithms.
35.				1. Formulate a research problem

	VI	CS324	Research Methodology	<ol style="list-style-type: none"> <li>2. Search, review and analyze relevant literature</li> <li>3. Make effective use of computing tools to search, analyze, and present information</li> <li>4. Prepare, present, and get published</li> </ol>
36.	VI	CS326	Program Elective-II- Cyber Security	<ol style="list-style-type: none"> <li>1. Explain essentials of Cyber Security concepts</li> <li>2. Apply the scientific method for security assessment</li> <li>3. Develop computer forensics awareness</li> <li>4. Formulate and execute Cyber Security strategies leveraging the latest technological developments</li> <li>5. Analyze the actual and intricate problems of cybercrime.</li> </ol>
37.	VI	CS328	Program Elective – II Parallel Computing and HPC	<ol style="list-style-type: none"> <li>1. Compare different parallel architectures and models</li> <li>2. Develop parallel programs using various parallel programming models</li> <li>3. Apply parallel computing concepts to solve real-world problems</li> <li>4. Analyze and optimize the performance of parallel applications</li> <li>5. Evaluate the high-performance computing systems.</li> </ol>
38.	VI	CS330	Program Elective-II- Artificial Neural Network	<ol style="list-style-type: none"> <li>1. Explain the basic structure and functioning of artificial neural networks</li> <li>2. Implement simple neural network architectures, such as single-layer perceptrons and basic multi-layer feedforward networks</li> <li>3. Analyze the behavior of neural networks during training and testing phases, including the impact of different activation functions and learning algorithms</li> <li>4. Evaluate the performance of neural networks in solving various real-world problems</li> </ol>
39.	VI	CS332	Program Elective - II Introduction to Logistics	<ol style="list-style-type: none"> <li>1. To Recognize fundamentals of logistics and supply chain management principles.</li> <li>2. Apply logistics and supply chain strategies to optimize business operations.</li> <li>3. To Analyze the flow of goods and information effectively within supply chain networks.</li> </ol>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			and Supply Chain Management	<ol style="list-style-type: none"> <li>4. To Develop Effective Distribution Networks</li> <li>5. To sort out the distribution and transportation network.</li> </ol>
40.	VI	CS334	Program Elective-II-Big Data Analytics	<ol style="list-style-type: none"> <li>1. Understand Big Data and its analytics in the real world</li> <li>2. Analyze the Big Data framework like Hadoop and NOSQL to efficiently store and process Big Data to generate analytics 2</li> <li>3. Design of Algorithms to solve Data Intensive Problems using Map Reduce Paradigm 3</li> <li>4. Design and Implementation of Big Data Analytics using pig and spark to solve data intensive problems and to generate analytics</li> <li>5. Implement Big Data Activities using Hive</li> </ol>
41.	VI	OE348	Information Technology Foundation Program	<ol style="list-style-type: none"> <li>1. Solve the real-world problem using Programming Concept</li> <li>2. Apply Data structure Algorithm to solve Computational Problem</li> <li>3. Make use of an ER model for a given problem domain.</li> <li>4. Relate the relationship between project integration, scope, cost and time Management System to improve quality of projects.</li> </ol>
42.	VI	CEMD302	Environmental Engineering	<ol style="list-style-type: none"> <li>1. Explain importance of water and wastewater analysis for various parameters.</li> <li>2. Discuss impact of pollution on man, animal and plants.</li> <li>3. Prepare layout of water and wastewater treatment process.</li> <li>4. Design Water and Wastewater Treatment Plant.</li> <li>5. Apply AI tools for impact of humans on environment.</li> </ol>
43.	VI	CSMD302	Artificial Intelligence	<ol style="list-style-type: none"> <li>1. Understand the basic concepts and techniques of Artificial Intelligence.</li> <li>2. Apply AI algorithms for solving typical practical problems.</li> <li>3. Describe appropriate knowledge representation schemes in AI.</li> <li>4. Apply reasoning schemes in AI.</li> <li>5. Analyze the planning schemes for goal stack.</li> <li>6. Evaluate performance of solution for constraint satisfaction problem.</li> </ol>

44.	VI	EEMD302	Smart Grid	1. Summarize the concept and future of smart grid
				2. Develop smart grid architecture
				3. Compile various smart grid technologies
				4. Identify communication and information technologies for smart grid
				5. Elaborate distributed generation and storage technologies
				6. Recommend smart metering and distribution automation
45.	VI	ECMD302	I  Industrial Electronics	1. Identify basics Power Electronics devices and components.
				2. Illustrate use of Power Electronics.
				3. Develop PLC logic using ladder programming.
				4. Analyze industrial electronics applications.
46.	VI	CIMD302	Software Engineering	1. Describe fundamental concepts in software engineering and project management
				2. Practice software process models for the undertaken software problems
				3. Design function-oriented and object oriented models using modern tools.
				4. Identify classes and build the domain model using advanced concepts in object,
				5. dynamic and functional modeling
				6. Analyze existing software systems using function and object-oriented analysis.
				7. Design models using UML diagrams for software systems: use case, class, sequence, collaboration, activity, state chart diagrams, component and deployment.
47.	VI	MEMD304		1. Explain product positioning and branding strategies for new products
				2. Analyse market trends and consumer behaviour to identify opportunities for new product development
				3. Develop pricing strategies and cost estimation techniques for new products
				4. Explain the basics of intellectual property rights and patents in the context of new product development
				5. Design distribution channels and sales strategies

			Marketing and Business Fundamentals for New Products	
48.	VI	MCMD302	Industrial Robotics	1. Explain the basic concepts of Robots
				2. Select an end effector and sensor for application
				3. Explain drives and controls for robotic system
				4. Develop program for robot to perform tasks in industrial applications.
49.	VI	AIMD302	Principles of AI	1. Articulate basic concepts and techniques of Artificial Intelligence
				2. Apply AI algorithms for solving typical practical problems
				3. Designate appropriate knowledge representation schemes in AI
				4. Analyze reasoning schemes in AI.
50.	VI	RAMD302	Industrial Automation & Control	1. Explain need, basic elements, and systems of industrial automation
				2. Develop PLC programming for various applications
				3. Discuss various material handling and identification technologies
				4. Explain basics of DCS and its interfacing
51.	VI	SH3064	Scholastic Aptitude II	1. Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems
				2. Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
				3. Develop a bridge in analogies, series and visualizing directions
				4. Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams.

52.	VI	CS336	Machine Learning Lab	1. Explore dataset and its associated characteristics using python libraries
				2. Implement various supervised learning algorithms for given dataset
				3. Implement various Unsupervised learning algorithms for given dataset
				4. Design solution for real world problem by implementing ML algorithms.
				5. Develop, report and present implementation of typical Mini Project in ML.
53.	VI	CS338	Mobile Application Development-I	1. Demonstrate setting up a React development environment and understand the project structure
				2. Differentiate between functional and class components in React
				3. Set up a Node.js environment and demonstrate basic asynchronous programming concepts
				4. Configure MongoDB server and establish a connection to a database
				5. Evaluate the role of Express.js in building RESTful APIs
				6. Create React components that handle API responses and update the UI accordingly.
54.	VI	CS3144	Technical Aptitude-IV	1. Choose proper techniques to find solution for engineering problems
				2. Solve various types of problems
				3. Develop ability to face competitive examinations
				4. Inspect the problem & conclude with proper solution.
55.	VI	CS3104	Capstone Project Phase I	1. Apply knowledge of computer science for real world problem
				2. Possess Professional, Practical and reflective practitioner skills
				3. Upgrade and apply the knowledge through continuous learning
				4. Effectively apply Design Thinking Processes and Template to structure learning lifecycle in the development of a prototype
				5. To develop project management and time management skills. 6. To formulate a process whereby to keep the end-user or customer in mind throughout the project life cycle.

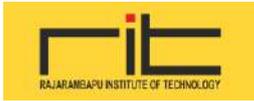

• **Final Year. B. Tech.**

Sr.No.	Semester	Course Code	Course Name	Course Learning Outcomes (CLOs)
1.	VII	CS4013	Machine Learning	1. Differentiate among various machine learning techniques.
				2. Formulate a machine learning problem.
				3. Apply machine learning techniques such as classification and feature selection to practical applications and detect patterns in the data.
				4. Choose appropriate ML and Neural network algorithm for predication of class label or value of target attribute.
				5. Develop new Recommender Systems for a number of domains especially, Education, Health-care etc.
2.	VII	CS4033	Program Elective – III Big Data Analytics	1. Identify big data for business intelligence
				2. Explore the fundamental concepts of big data and its analytics
				3. Analyze the big data using Hadoop and intelligent techniques
				4. Apply NoSQL big data management underlying analytics framework
				5. Recognize the suitable secure models for building competitive business decisions
3.	VII	CS4053	Program Elective-III: Natural Language Processing	1. Acquire knowledge of the fundamental mathematical models and algorithms in the field of NLP.
				2. Apply these mathematical models and algorithms in applications in software design and implementation for NLP.
				3. Apply deep learning models to solve machine translation and conversation problems.
				4. Analyze deep structured semantic models on information retrieval and natural language applications.
				5. Acquire knowledge of the design and implementation issues in various NLP applications such as information extraction and Machine translation.
4.		CS4073	Program Elective-III: Blockchain Technology	1. Differentiate Blockchain models.
				2. Analyze Components & Consensus models of Blockchain.
				3. Illustrate the Forking methods & Cryptographic concepts of Blockchain.
				4. Draw the architecture of Hyperledger fabric.

				5. Describe applications of Blockchain in the sector of Trade, Government & Finance
				6. Explain research aspects of Blockchain
5.	VII	CS4093	Program Elective-III:IOS Development Lab-I	1. Define key programming terms relevant to Swift and iOS programming.
				2. Describe the process of creating an iOS application.
				3. Demonstrate programming best practices in Swift.
				4. Select the appropriate UI primitives, persistent storage, user interactions, to develop the working iOS application from the concept.
				5. Develop, report and present implementation of typical Mini Project.
6.	VII	CS4113	Program Elective-IV:Parallel Programming	1. Identify compute intensive part from sequential algorithm
				2. Design a parallel algorithm for any compute-intensive application
				3. Develop parallel programs to use multi-core processors using OpenMP
				4. Write parallel programs to demonstrate various features of CUDA C/C++
				5. Explore different features of the CUDA framework
7.	VII	CS4133	Program Elective-IV:Artificial Intelligence	1. Apply Artificial Intelligence techniques for problem solving
				2. Comprehend the abstractions and reasoning for Intelligent Agents
				3. Analyze and design a real-world problem for implementation
				4. Develop knowledge of decision making and learning methods
				5. Select appropriately from a range of techniques when implementing intelligent systems
8.	VII	CS4153	Program Elective-IV Internet of Things	1. Identify the various components of IoT.
				2. Design a middleware for IoT.
				3. Identify the issues to address the security, intelligence in IoT.
				4. Describe various protocols used in IoT.
				5. Establish the communication between IoT devices and cloud server using wireless technology.
				6. Develop IoT application to solve real world problems.
9.	VII	CS4173		1. Introduce different databases systems like distributed and parallel databases

			Program Elective-V Advanced Database System	<ol style="list-style-type: none"> <li>2. Illustrate data mining &amp; warehousing with OLAP implementations</li> <li>3. Explore and design the object-oriented database.</li> <li>4. Acquaint with distributed query processing and its phases including query optimization</li> <li>5. Demonstrate Bigdata with Hadoop&amp; its components</li> </ol>
10.	VII	CS4233	IOS Development Lab-II	<ol style="list-style-type: none"> <li>1. Define key programming terms relevant to Swift and iOS programming.</li> <li>2. Describe the process of creating an iOS application.</li> <li>3. Design the user interface (UI) and user's interaction for iOS application.</li> <li>4. Select the appropriate UI primitives, persistent storage, user interactions, to develop the working iOS application from the concept.</li> <li>5. Develop, report and present implementation of typical Mini Project.</li> </ol>
11.	VII	CS4193	Program Elective V- Computer Vision	<ol style="list-style-type: none"> <li>1. Implement fundamental image processing techniques required for computer vision</li> <li>2. Perform shape analysis</li> <li>3. Implement boundary tracking techniques</li> <li>4. Apply chain codes and other region descriptors</li> <li>5. Apply Hough Transform for line, circle, and ellipse detections.</li> <li>6. Apply and analyse 3D vision techniques.</li> </ol>
12.	VII	CS4213	Program Elective – V : Wireless Networks	<ol style="list-style-type: none"> <li>1. Comment on difference between wireless and wired networks and possible challenges in the design of wireless networks.</li> <li>2. Identify design issues in various wireless technologies and discuss possible solutions for them.</li> <li>3. Review architectures of various access technologies such as 3G, 4G, WiFi etc.</li> <li>4. List challenges and possible solutions in various layers for Ad hoc networks</li> <li>5. Demonstrate working of different types of wireless network applications.</li> </ol>
13.	VII	CS4253	Cloud Computing	<ol style="list-style-type: none"> <li>1. Describe fundamental concepts of cloud computing and its Architecture</li> <li>2. Explain the core concepts of Virtualization</li> <li>3. Differentiate and analyze the components of various cloud platforms</li> <li>4. Explain the key components of Amazon web Services</li> <li>5. Analyze the applications of Cloud Computing in different domains</li> </ol>
14.	VII	CS4273		<ol style="list-style-type: none"> <li>1. Explore dataset and it associated characteristics using python libraries.</li> </ol>

			Machine Learning Lab	<ul style="list-style-type: none"> <li>2. Implement various supervised learning algorithms for given dataset.</li> <li>3. Implement various Unsupervised learning algorithms for given dataset.</li> <li>4. Implement reinforcement learning algorithm to solve suitable real word problem.</li> <li>5. Design solution for real world problem by implementing ML algorithms.</li> <li>6. Develop, report and present implementation of typical Mini Project.</li> </ul>
15.	VII	CS4293	Parallel Programming Lab	<ul style="list-style-type: none"> <li>1. Design different parallel algorithms to solve compute-intensive problems</li> <li>2. Develop programs using different parallel programming languages on multi-core and many-core architecture systems</li> <li>3. Evaluate the performance of applications/programs using different performance metrics</li> </ul>
16.	VII	CS4313	Program Elective IV Lab: Artificial Intelligence Lab	<ul style="list-style-type: none"> <li>1. Apply Artificial Intelligence techniques for problem solving</li> <li>2. Comprehend the abstractions and reasoning for Intelligent Agents</li> <li>3. Analyze and design a real-world problem for implementation</li> <li>4. Develop knowledge of decision making and learning methods</li> <li>5. Select appropriately from a range of techniques when implementing intelligent systems</li> <li>6. Design, develop and present a mini project for typical application of Artificial Intelligence.</li> </ul>
17.	VII	CS4333	Program Elective IV Lab : Internet of Things Lab	<ul style="list-style-type: none"> <li>1. Identify the components of IoT</li> <li>2. Design a middleware for IoT</li> <li>3. Develop IoT application to solve social problems</li> <li>4. Analyze various protocols for IoT</li> <li>5. Establish the communication to the cloud through Wi-Fi / Bluetooth</li> <li>6. Design, develop and present a mini project for typical application of IoT.</li> </ul>
18.	VII	CS4353	Capstone Project Phase –II	<ul style="list-style-type: none"> <li>1) Apply knowledge of computer science for real world problem.</li> <li>2) Possess Professional, Practical and reflective practitioner skills.</li> <li>3) Upgrade and apply the knowledge through continuous learning.</li> <li>4) Effectively apply Design Thinking Processes and Template to structure learning life cycle in the development of a prototype.</li> <li>5) To develop project management and time management skills</li> </ul>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

				6) To formulate a process whereby to keep the end-user or customer in mind throughout the project lifecycle.
19.	VII	CS4373	Web Technology Lab	1. Design static and dynamic web pages using scripting languages like HTML and CSS
				2. Develop a dynamic web application using JavaScript and jQuery to demonstrate data validation
				3. Demonstrate knowledge of Angular by designing dynamic web applications.
				4. Design and Debug React App.
				5. Develop web Application in React using JavaScript

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

**PG Program**

- Department Name :- **Computer Science & Engineering**
- PG Program Name :- **Computer Science & Engineering**
- Vision and Mission :-

<b>Vision</b>	To excel in the computer science engineering discipline through continuous research, innovation and industry-oriented curriculum leading to responsible IT professionals.
<b>Mission</b>	<ol style="list-style-type: none"> <li>1. To inculcate teaching and learning process promoting state-of-the-art IT industry practices in computer science engineering and technology to address global challenges.</li> <li>2. To integrate academics, research and entrepreneurship skills to address present and future challenges of the society and industry.</li> <li>3. To develop professionalism with strong foundations adapting to changing technology.</li> </ol>

Sr. No.	Program Outcomes
1.	<b>PO1:</b> An ability to independently carry out research /investigation and development work to solve practical problems.
2.	<b>PO2:</b> An ability to write and present a substantial technical report/document.
3.	<b>PO3:</b> Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.
4.	<b>PO4:</b> Apply knowledge of database management systems, data mining and analytics techniques to solve real world problems.
5.	<b>PO5:</b> Apply knowledge of machine learning and intelligence to identify, formulate and solve complex engineering problems.
6.	<b>PO6:</b> Design, develop and deploy software using emerging IT technologies like open source tools, mobile application development platforms, web technologies and cloud computing.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	CSE129	Foundation of Data Science	Apply statistical and computational techniques to analyze datasets.
				Analyze different data visualizations techniques.
				Evaluate data characteristics using hypothesis testing.
				Explore ethical implications of data science.
2.	I	CSE1016	Machine Learning	Explain the working principles of advanced machine learning paradigms including semi

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<p>supervised, self-supervised, and reinforcement learning.</p> <p>Apply appropriate advanced algorithms such as meta-learning, few-shot learning, and federated learning to solve domain-specific problems.</p> <p>Analyze the performance and limitations of various advanced machine learning models on complex datasets</p> <p>Design end-to-end machine learning solutions using cutting-edge techniques with privacy, scalability, and data efficiency in mind.</p>
3.	I	CSE1026	Advanced Algorithms	<p>Select appropriate algorithm design techniques such as greedy method, dynamic programming, backtracking and heuristic algorithms.</p> <p>Explore different NP problems and approximation algorithmic solutions.</p> <p>Apply backtracking algorithm to solve real world problems.</p> <p>Apply and design parallel algorithms to solve fundamental problems.</p> <p>Apply and compare performance of local search techniques algorithms for solving fundamental combinatorial problems.</p> <p>Compare and design global search techniques for solving engineering/real-world combinatorial problems.</p>
4.	I	CSE130	Program Elective-I-Big Data Paradigm	<p>Analyze big data for business intelligence</p> <p>Explore business case studies for big data analytics</p> <p>Implement map-reduce analytics using hadoop related advance frameworks</p> <p>Apply NoSQL big data management</p> <p>Manage big data with aspects of Security, Privacy and ethics</p>
5.	I	CSE1046	Program Elective-I (Cloud Computing)	<p>Compare cloud computing with other computing technologies.</p> <p>Illustrate the virtualization technologies and its role in enabling the cloud computing system model.</p> <p>Identify and compare different cloud service and deployment models for scientific, business and consumer applications.</p> <p>Describe Aneka platform as a service to design different applications.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<p>Compare different cloud services with pros and cons from multiple cloud providers.</p> <p>Describe recent advances in cloud framework/services for solving scientific and business applications.</p>
6.	I	CSE131	<p>Program Elective-I- Decision Support Systems</p>	<p>Explain the role of data, models, and user interfaces in supporting decision-making processes.</p> <p>Apply decision models, what-if analysis, and optimization techniques in solving structured and semi-structured problems.</p> <p>Analyze the integration of data-driven, knowledge-driven, and web-based DSS within enterprise environments.</p> <p>Evaluate advanced DSS technologies and ethical considerations in the design and deployment of intelligent decision systems.</p>
7.	I	CSE132	<p>Program Elective-II - Block Chain Technology</p>	<p>Identify basic cryptographic primitives utilised in Blockchain- Secure, collision-resistant hash functions, digital signatures, public key cryptosystems, and zero-knowledge proof systems</p> <p>Explain basic Distributed System concepts – distributed consensus and atomic broadcast, Byzantine fault-tolerant consensus methods</p> <p>Compare Basic Blockchain (Blockchain 1.0), Blockchain 2.0 and Blockchain 3.0</p> <p>Design various Blockchain applications</p>
8.	I	CSE1073	<p>Program Elective-II- Computer Vision</p>	<p>Describe Image formation processes (BL2).</p> <p>Apply fundamental image processing techniques required for computer vision (BL3).</p> <p>Analyze 3-D vision. (BL4)</p> <p>Generate and evaluate appropriate 3D model from images. (BL5)</p>
9.	I	CSE133	<p>Program Elective-II- Software Engineering and Project Management</p>	<p>Describe fundamental concepts of software engineering and project management, including project phases, stakeholder roles, and basic terminology.</p> <p>Explain various software requirement analysis and specification techniques, and describe the processes involved in software estimation and project planning.</p> <p>Apply appropriate tools and techniques to analyze, plan, and schedule software projects, including estimation and resource allocation.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Evaluate and recommend effective risk management, reliability strategies, and human resource practices to enhance software project success and address real-world project challenges.
10.	I	CSE134	Research Methodology and IPR	Formulate a research problem.
				Analyze research related information.
				Prepare and present research proposal / paper by following research ethics.
				Make effective use of computers and computing tools to search information, analyze information and prepare report.
				Describe nature and processes involved in development of intellectual property rights.
11.	I	CSE1106	Machine Learning Lab	Demonstrate data preparation, transformation, and visualization techniques.
				Implement advanced ML algorithms using Python and open-source libraries.
				Evaluate and compare models based on relevant performance metrics.
				Design end-to-end ML pipelines and research-oriented solutions using real-world or benchmark datasets.
12.	I	CSE1116	Advanced Algorithms Laboratory	Select appropriate algorithm design techniques such as greedy method, dynamic programming, backtracking and heuristic algorithms.
				Apply backtracking algorithm to solve real world problems.
				Explore different NP problems and approximation algorithmic solutions.
				Apply and design parallel algorithms to solve fundamental problems.
				Apply and compare performance of local search techniques algorithms for solving fundamental combinatorial problems.
				Compare and design global search techniques for solving engineering/real-world combinatorial problems.
13.	I	CSE135	Seminar	Conduct a focused and systematic literature review
				Identify state-of-the-art trends and open research problems
				Critically evaluate methodologies and research gaps
				Present technical content with academic rigor and clarity

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Formulate a feasible problem statement for the upcoming Mini-Project and Dissertation
14.	I	SHE5513	Technical Communication	Construct grammatically correct sentences in different types of technical writing, such as reports and proposals.
				Apply technical writing skills to improve the readability of documents.
				Demonstrate professional skills required in job interviews and at workplaces.
15.	II	CSE1152	Deep Learning	Apply various approaches for training of the neural network and Deep Learning networks.
				Analyse working of the neural networks and Deep Learning networks with reference to certain case study examples.
16.				Analyse performance of Generative Adversarial Network.
				Develop typical applications of deep learning networks for solving real world problems
17.	II	CSE136	Information and Network Security	After successful completion of the course, students will be able to,
				Define basic concepts of computer security, attacks, and classical encryption. (L1)
				Explain DES, AES, RSA and their cryptographic operations. (L2)
				Apply hash and MAC algorithms for data integrity and authentication.(L3)
				Analyze secure communication protocols like SSL, HTTPS, and S/MIME. (L4)
				Evaluate threats from malware and configure firewalls for system protection. (L5)
18.	II	CSE137	Adhoc Networks	Discuss the design and research issues in wireless networks
				Demonstrate the working of 802.11 a/g/n wireless standards
				Apply the different types of routing protocols in ad-hoc networks.
				Analyze different protocols in MAC, Routing and Transport Control for Sensor Networks
19.	II	CSE138	Program Elective-III-Advanced Database Management System	After successful completion of the course, students will be able to,
				Describe query processing steps, join strategies, indexing techniques, and cost-based optimization used in relational databases.
				Apply transaction and concurrency control mechanisms such as 2PL and timestamp ordering to maintain data consistency.

				<p>Analyze distributed and parallel database systems to determine suitable fragmentation, replication, and query strategies.</p> <p>Compare and evaluate object-oriented, temporal, and NoSQL databases based on structure, use cases, and consistency models.</p> <p>Design a data warehousing solution and big data processing framework using OLAP, ETL, Hadoop, and Spark for large-scale analytical workloads.</p>
20.	II	CSE1186	Program Elective-III- Parallel Computing	<p>Explain how massive parallelisms are implemented in accelerator architectures.</p> <p>Design and implement parallel algorithms for GPGPU.</p> <p>Demonstrate parallel patterns for performance improvement.</p> <p>Analyze the parallel programming and computational thinking strategies.</p> <p>Compare different Parallel algorithms from various application domains for performance analysis.</p>
21.	II	CSE139	Program Elective III- Introduction to Industry 4.0 and Industrial Internet of Things	<p>Describe the fundamental of theory and practice related to Industrial IoT Systems.</p> <p>Identify, formulate and solve engineering problems by using Industrial IoT.</p> <p>Explain Data Monitoring &amp; Control in IIoT.</p> <p>Discuss the Advanced Technologies and platform in IIoT.</p> <p>Investigate the use of IoT capability in Industrial applications.</p>
22.	II	CSE1206	Soft Computing	<p>Identify and describe soft computing techniques and their roles in building intelligent machines.</p> <p>Apply fuzzy logic and reasoning to handle uncertainty and solve various engineering problems.</p> <p>Design artificial neural network for solving real world problems.</p> <p>Evaluate solutions by various evolutionary approaches for a given problem.</p> <p>Design hybrid algorithms for solving complex problems.</p>
23.	II	CSE140	Program Elective-IV - Natural Language Processing	<p>Acquire knowledge of the fundamental mathematical models and algorithms in the field of NLP. (BL2)</p> <p>Apply NLP models and algorithms in applications. (BL3)</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Analyze deep learning models for NLP applications. (BL4)
				Evaluate NLP applications such as information extraction and Machine translation (BL5).
24.	II	CSE1226	Program Elective-IV - Software Architecture	Recognize major software architectural styles, design patterns, and frameworks.
				Describe a software architecture using various documentation approaches and architectural description languages.
				Design and develop software architecture for large scale software systems.
				Formulate architectural alternatives for a problem and select among them.
25.	II	CSE1232	Deep Learning Laboratory	Apply well-understood paradigms for designing new systems.
				Apply various approaches for pre-processing and visualization of input data for Deep Learning networks.
				Apply various approaches for training of neural networks and Deep Learning networks with reference to certain case study examples.
				Analyse performance of Deep Learning Networks.
26.	II	CSE139	Information and Network Security Lab	Develop and present typical applications of deep learning networks for solving real world problems.
				Define basic cryptographic concepts and classical encryption techniques like Caesar, Vigenère, and Playfair.
				Explain and simulate symmetric (DES, AES) and asymmetric (RSA) encryption algorithms
				Apply hashing (SHA, MD5) and HMAC to ensure data integrity and authentication.
				Analyze the use of digital signatures and secure key generation techniques in cryptographic applications. (L4)
Evaluate weaknesses in classical encryption using frequency analysis and demonstrate secure password practices. (L5)				
27.	II	CSE142	Program Elective-III-Lab Advanced Database Management System Lab	Implement advanced SQL queries including views, indexing, and performance tuning.
				Simulate transaction management and concurrency control mechanisms using real time cases.
				Analyze distributed database models using fragmentation, replication, and optimization strategies.
				Evaluate NoSQL and graph database technologies for unstructured data handling.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Design a data warehousing and big data solution using OLAP and Hadoop/Spark frameworks.
28.	II	CSE1266	Program Elective-III - Parallel Computing Lab	Design different parallel algorithms suitable for multi-core and many-core systems.
				Implement different parallel algorithms on multi-core and many-core systems.
				Solve compute intensive applications using accelerators.
				Perform the analysis with different performance metrics.
29.	II	CSE1276	Program Elective-III- Internet of Things Lab	Explore the relationship between IoT, cloud computing.
				Adapt the emerging cloud and IoT technologies informed by an appropriate evaluation process to support business applications.
				Design secure cloud and IoT applications to support scalable online services using best practice.
				Demonstrate knowledge of cloud computing and IoT concepts, components, architecture, frameworks and issues.
				Analyze applications of IoT in real time scenario.
30.	II	CSE143	Mini Project	Conduct a focused and systematic literature review
				Identify state-of-the-art trends and open research problems
				Critically evaluate methodologies and research gaps
				Present technical content with academic rigor and clarity
				Define a feasible problem statement for the upcoming Mini-Project
31.	III	CSE2016	Industry Internship	Identify the real applications and practices of courses studied, at industry level
				Recognize various modeling, analysis and validation techniques adopted at industries
				Demonstrate the issues at design, manufacturing and assembly levels
				Summarize and present technical data in report format.
32.	III	MOE2012	Artificial Intelligence - Machine Learning	Describe central machine learning methods and techniques and how they relate to artificial intelligence.
				Differentiate between supervised and unsupervised learning techniques.
				Apply the ML algorithms to a real-world problem.
				Optimize the models learned and report on the expected accuracy that can be achieved by applying the models.
				Evaluate a given problem and apply appropriate machine learning technique.

33.	III	MOE2022	Creative Thinking: Techniques & Tools	Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios.
				Apply different brainstorming techniques in group activities.
				Be proficient in the application of the 6 thinking hats tool in different life scenarios.
				Develop a systematic approach to idea generation through the use of morphological analysis.
				Innovate on an existing product, service or situation applying the SCAMPER method.
				Get confident with the theory of inventive problem solving, called TRIZ.
34.		MOE2032	MOOC Course	Identify the real applications and practices of courses studied, at industry level
				Recognize various modelling, analysis and validation techniques adopted at industries.
				Demonstrate the issues at design, manufacturing and assembly levels.
				Summarize and present technical data in report format.
35.	III	MOE2041	Energy Audit and Management	Identify the important of Energy Scenario.
				Use energy audit knowledge to carry out energy audit of a given firm.
				Examine different rolls in energy action planning
				Apply project finance and management skills to carry out energy audit
36.	III	MOE2062	Augmented Reality and Virtual Reality	Plan for energy monitoring and targeting.
				Define the basic concepts of Virtual and Augmented Reality
				Identify the differences in AR/VR concepts and technologies
				Describe the fundamental concepts relating to Virtual Reality such as presence, immersion, and engagement
				Evaluate usability of AR/VR applications and critique their use of AR/VR capabilities
Design and prototype effective AR/VR applications using UNITY platform for various application.				
37.	III	MOE2072	Industrial Instrumentation	Elaborate working principal of different transducers.
				Select suitable transducer/sensor for specific application.
				Justify the use of specific measurement technique for specific task.
				Evaluate the Calibration and Interfacing of the transducers.
38.	III	MOE2082		Explain Mechatronics System
				Analyze the Mechatronics Based System.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			Advanced Mechatronics Systems	Model, simulate, and verify the mechatronics systems. Identify Electrical, Hydraulic and Pneumatic Components.
39.	III	MOE2091	Disaster Management	Outline disaster and disaster management cycle. Summarize disaster preparedness and response activities for various types of disaster. Apply various advanced techniques for disaster management. Examine role of various agencies in disaster management. Dissect the disaster management scenario in India.
40.	III	CSE2026	Dissertation Phase – I	Explain the contributions of various researchers in the field of design engg. after carrying out literature survey from reputed journals. Recognize the gap in the research and define a problem statement. Explain significance and applicability of problem statement. Summarize and present technical data in report format.
41.	III	CSE2036	Dissertation Phase – II	Outline the work plan for problem statement. Identify the proper modelling and analysis tool. Reproduce the preliminary results of problem statement. Summarize and present technical data in report format.
42.	IV	CSE2046	Dissertation Stage III	Explain the issues related to method adopted in solving the problem Select proper technique in solving the problem Compare the results with available literature
43.	IV	CSE 2056	Dissertation Stage IV	Design new methodology to address the problem. Justify the results obtained from new methodology. Write technical report and de end work.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

**Computer Science and  
Engineering  
(Artificial Intelligence &  
Machine Learning)**

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

**UG Program**

- **Department Name:- Computer Science and Engineering (Artificial Intelligence & Machine Learning)**
- **UG Program Name: - Computer Science and Engineering (Artificial Intelligence & Machine Learning)**
- **Vision and Mission: -**

<b>Vision</b>	To be renowned department for education in Computer Science and Engineering (Artificial Intelligence & Machine Learning) for molding students into professional with research aptitude and innovation
<b>Mission</b>	<ul style="list-style-type: none"><li>➤ To offer high quality education through state of art curriculum and innovate teaching &amp; learning practices</li><li>➤ To establish state of art laboratories and center of excellence in the emerging fields of AI and ML</li><li>➤ To mold students to be technically competent through innovation and leadership.</li><li>➤ To inculcate problem solving aptitude in graduates with lifelong learning skills to become valuable resource for industry and society.</li><li>➤ To adopt professional practice, standards and ethical values</li></ul>

Sr. No.	Program Outcomes
36.	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and AI-ML specialization to the solution of complex engineering problems.
37.	<b>Problem analysis:</b> Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.
38.	<b>Design/Development of solutions:</b> Design and develop IT solutions using AI-ML domain knowledge for engineering problems that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
39.	<b>Conduct investigations of problems:</b> Use fundamental knowledge of AI-ML domain and engineering skills including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

40.	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, modern engineering and AI-ML tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
41.	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
42.	<b>Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.
43.	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
44.	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
45.	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
46.	<b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one own work, as a member and leader in a team, to manage projects and in multidisciplinary environments
47.	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
<b>Sr. No.</b>	<b>Program Specific Outcomes</b>
<b>PSO1</b>	Design and develop applications of AI & ML for Data analytics, Augmented / Virtual Reality (AR/VR), health care systems and allied domains
<b>PSO2</b>	Utilize dynamic up-scaling of AI and ML techniques for industrial applications in the areas including Robotics, Autonomous Systems, Natural Language Processing, IOT, Cloud Computing, Security, Networks, Computing, Open source technologies and emerging areas
<b>PSO3</b>	Demonstrate use of AI and ML techniques for solutions of real life problems

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	III	AI201	<b>Discrete Mathematics</b>	Define mathematical logic, truth table and their applications to programming and design.
				Apply the concepts of set theory.
				Characterize the properties of relations, functions and algebraic systems for formal languages.
				Develop essential concepts to solve problems on graphs and networks
				Express counting principle to determine various combinatorial configurations
2	III	AI203	<b>Data structure &amp; Algorithms</b>	Compare between linear and nonlinear data structures
				Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				Analyze various searching and sorting algorithms and apply it to solve particular problem.
				Determine a suitable data structure and algorithm to solve a real world problem
3	III	AI205	<b>Computer Organization and Architecture</b>	Perform various arithmetic operations on different number systems.
				Apply Boolean algebra to solve logic functions.
				Design, implement, and analyze various logic circuits.
				Apply the programming techniques in developing the assembly language program for the microprocessor system.

				Analyze flow chart and apply assembly language programming techniques
<b>4</b>	<b>III</b>	<b>AI207</b>	<b>Principles of Artificial Intelligence</b>	Recognize the basic concepts and techniques of Artificial Intelligence.
				Apply AI algorithms for solving typical practical problems.
				Describe appropriate knowledge representation schemes in AI.
				Analyze reasoning schemes in AI.
<b>5</b>	<b>III</b>	<b>AIMD201</b>	<b>Object Oriented Programming</b>	Identify and integrate basic object-oriented programming concepts and apply them in problem-solving
				Construct and test inheritance concepts for reusing the program.
				Develop and test a program using loops, decision statements, and functions in Python.
				Evaluate the given Plot data using appropriate Python visualization libraries.
<b>6</b>	<b>III</b>	<b>SH2174</b>	<b>Environmental Science</b>	Apply interdisciplinary knowledge in environmental science by integrating concepts and principles from various fields of science and engineering to address environmental issues.
				Evaluate environmental impacts of human activities on ecosystems and on the environment.
				Use scientific approach to identify and solve environment related problems.

				Design sustainable solutions to address environmental challenges by considering renewable energy sources, waste management strategies conservation measures, and environmental policies. .
				Participate in group work to become acquainted with the importance of teamwork, collaboration
				Develop presentation and report writing skills
7	III	AI209	<b>Object Oriented Programming using JAVA</b>	Recognize the basic object oriented programming concepts and apply them in problem solving.
				Illustrate inheritance concepts for reusing the program.
				Demonstrate on the multi-tasking by using multiple threads.
				Develop data-centric applications using JDBC.
				Exhibit the basics of java console and GUI based programming
8	III	AI211	<b>Data structure &amp; Algorithms Lab</b>	Implement various data structures and algorithms using programming languages such as C or C++.
				Conduct experiments to validate the theoretical analysis of algorithms.
				Analyze data, interpret results, and draw conclusions, aiding them in making informed decisions for algorithmic optimizations.

				Evaluate the efficiency and scalability of different data structures and algorithms, enabling them to make informed choices when selecting the most appropriate solution for a given problem
9	III	AI213	<b>Desktop Publishing for Web Development</b>	Create well-structured web pages using HTML and apply the principles of semantic markup.
				Style web pages effectively using CSS, including layout design and responsive techniques.
				Implement client-side interactivity and dynamic content using JavaScript and jQuery.
				Utilize Bootstrap to develop responsive and mobile-first web applications.
				Set up and customize WordPress websites, managing content and plugins effectively.
				Build and deploy functional websites that integrate HTML, CSS, JS, Bootstrap, and WordPress.
10	III	AI215	<b>Technical Aptitude-I</b>	Choose proper techniques to find solution for engineering problems
				Solve various types of problems
				Develop ability to face competitive examinations
				Inspect the problem & conclude with proper solution
11	III	SH2634	<b>Professional Leadership Skills</b>	Explain the traits of a leadership through real life examples.

				Exhibit the ability to work effectively in team.
				Prepare a presentation as per the audience and context requirements.
12	III	SH2614	<b>Interpersonal Skills</b>	Exhibit interpersonal communication skills.
				Demonstrate decision-making skills.
				Apply conflict resolution styles appropriate in different situations.
				Demonstrate skills to manage balance in work and life.
13	III	SH2694	<b>Innovation Tools and Methods for Entrepreneurs</b>	Explain structured approach to define the problem with every possible detail, identify conflicts and solve them
				Apply User Journey Map to the selected problem to show user interaction at various stages
				Analyze the solutions provided by competitors for effectiveness and gaps if any.
14	III	SH2594	<b>Personal Effectiveness and Body Language</b>	Develop skills to build self-esteem and positive attitude.
				Develop interpersonal skills characterized by effective communication and conflict resolution.
				Discover ways to overcome procrastination.
				Demonstrate responsiveness towards stress and health issues.
				Interpret the non-verbal behaviour of a person.

15	III	SH 2734	<b>German Language- III</b>	Interpret the language if the next person is speaking slowly and clearly.
				Make use of the language in routine life with the routing topics like family, shopping, work etc.
				Demonstrate the language by self-introduction in German with simple sentences
16	III	SH2714	<b>Japanese Language – III</b>	Make use of basic conversations in various situations.
				Identify the sentence patterns.
				Explain insights about the communication required for living in Japan.
				Interpret Japanese work ethics required in their professional career.
17	IV	AI202	<b>Statistics and Fuzzy systems</b>	Apply the probability distributions, random number generation and density estimations to perform analysis of various kinds of data
				Develop the fundamental concepts such as fuzzy sets, operations and fuzzy relations.
				Acquire and apply the schemes of fuzzification of scalar variables and the defuzzification of membership functions.
				Develop fuzzy decision making techniques.
18	IV	AI204	<b>Machine Learning</b>	Realize machine learning and learn the basic theory underlying machine learning.
				Differentiate supervised, unsupervised and reinforcement learning

				Recognize the basic concepts of learning and decision trees.
				Realize Bayesian techniques for problems appear in machine learning
				Perform statistical analysis of machine learning techniques
19	IV	AI206	<b>Computer Networks</b>	Analyze the various Components of Data Communication & Various Networking Concepts.
				Apply the concepts, Services and Protocols.
				Assess the algorithms used in Computer Networks
				Evaluate the problems related to framing, routing error correction & detection and others.
20	IV	AI208	<b>Database Management Systems</b>	Enlighten terms related to database design and management
				Apply the Relational Algebra with Structured Query Language (SQL) for database definition and manipulation
				Use the concept of functional dependency and decompose schemas by applying certain normal forms
				Analyze the principles of concurrency control, recovery and deadlock handling for database consistency
				Design and create database to solve real world problems
21	IV	AIMD202	<b>Data Structures &amp; Algorithms</b>	Compare between linear and nonlinear data structures

				Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				Analyze various searching and sorting algorithms and apply it to solve particular problem.
				Determine a suitable data structure and algorithm to solve a real world problem
22	IV	SH202	मराठी भाषिक कौशल्यविकास	भाषा आणि व्यक्तिमत्व विकास यांमधील सहसंबंध स्पष्ट करू शकेल
				भाषिक कौशल्यविकास करू शकेल
				कथा या मराठी साहित्य प्रकाराचे विश्लेषण करू शकेल
				एकांकिका या मराठी साहित्य प्रकाराच्या विश्लेषणाची क्षमता प्राप्त करेल
23	IV	SH204	हिंदी कथा साहित्य एवं प्रयोजमूलक हिंदी	विद्यार्थियों में मानवीय संवेदनाओं के विकास के साथ नवीन सामाजिक सांस्कृतिक बोधऔर जीवन मूल्यों का विकास होगा।
				विद्यार्थियों में साहित्य के माध्यम से कलात्मक गुणों की अभिवृद्धि होगी कला की साहित्यिक विधाओं के प्रति अभिरुचि जागृत होगी तथा रचनात्मक कौशल्य को बढ़ावा मिलेगा।
				विद्यार्थियों में नए वैश्विक मूल्यों के प्रति सजगता को बढ़ावा मिलेगा एवं मूल्यवादी दृष्टि के प्रति दायित्व बोध उत्पन्न होगा।छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
				छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
24	IV	AI210	Machine Learning Lab	Explore dataset and its associated characteristics using python libraries.
				Implement various supervised learning algorithms for given dataset.
				Implement various Unsupervised learning algorithms for given dataset.
				Design solution for real world problem by implementing ML algorithms.

				Develop, report and present implementation of typical Mini Project in ML.
25	IV	AI212	<b>Database Management Systems Lab</b>	Sketch E-R diagram for given Case Study/ Problem Statement.
				Implement SQL query for various operations like retrieval, insertion, manipulation of data, PL/SQL cursor, procedure and triggers.
				Design relational database using Normalization and Functional Dependency.
				Apply hashing mechanism to build hash index file on given records
				Develop a program to connect database to an application program.
26	IV	AI214	<b>Hardware Networking with python programming</b>	Explain the concepts in Python.
				Implement programs using loops, decision statements, python collections, functions, and modules in Python.
				Use object-oriented programming with classes using Python.
				Apply data pre-processing for the given dataset using Python.
				Plot data using appropriate Python visualization libraries.
				Perform the exploratory data analysis using Python for the given dataset.
27	IV	AI216	<b>Technical Aptitude-II</b>	Choose proper techniques to find solution for engineering problems
				Solve various types of problems

				Develop ability to face competitive examinations
				Inspect the problem & conclude with proper solution
28	IV	SH2634	<b>Professional Leadership Skills</b>	Explain the traits of a leadership through real life examples.
				Exhibit the ability to work effectively in team.
				Prepare a presentation as per the audience and context requirements.
29	IV	SH2614	<b>Interpersonal Skills</b>	Exhibit interpersonal communication skills.
				Demonstrate decision-making skills.
				Apply conflict resolution styles appropriate in different situations.
				Demonstrate skills to manage balance in work and life.
30	IV	SH2694	<b>Innovation Tools and Methods for Entrepreneurs</b>	Explain structured approach to define the problem with every possible detail, identify conflicts and solve them
				Apply User Journey Map to the selected problem to show user interaction at various stages
				Analyze the solutions provided by competitors for effectiveness and gaps if any.
31	IV	SH2594	<b>Personal Effectiveness and Body Language</b>	Develop skills to build self-esteem and positive attitude.
				Develop interpersonal skills characterized by effective communication and conflict resolution.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Discover ways to overcome procrastination.
				Demonstrate responsiveness towards stress and health issues.
				Interpret the non-verbal behavior of a person.
32	IV	SH 2644	<b>German Language - IV</b>	Interpret the language if the next person is speaking slowly and clearly.
				Make use of the language in routine life with the routing topics like family, shopping, work etc.
				Demonstrate the language by self-introduction in German with simple sentences.
33	IV	SH2624	<b>Japanese Language - IV</b>	To be able to make basic conversations in various situations.
				To recognize the sentence patterns.
				To improve Japanese Language proficiency.
				To give students insights about the communication required for living in Japan.
				To expose students to the Japanese work ethics required in their professional careers.

1	V	AI301	<b>Deep Learning</b>	Designate the basic concepts related to Deep learning in feed forward networks, activation function, and loss function.
---	---	-------	----------------------	---

				<p>Apply appropriate deep learning tools and optimization strategies for exploratory data analysis.</p> <p>Analyze the results of state-of-the-art algorithms and convert the appropriate information required to solve real-world problems.</p> <p>Demonstrate various case studies in deep learning.</p>
2	V	<b>AI303</b>	<b>Software Engineering</b>	<p>Analyze fundamental concepts in software engineering and project management.</p> <p>Practice software process models for the undertaken software problems.</p> <p>Design function-oriented and object-oriented models using modern tools.</p> <p>Compare different software testing techniques and strategies.</p> <p>Apply the project management concepts for the undertaken software problems.</p> <p>Illustrate concepts of project monitoring and control in software development</p>
3	V	<b>AI305</b>	<b>Sensor Actuated Technology</b>	<p>Illustrate Key Concepts and Terminologies related to IOT.</p> <p>Outline Raspberry Pi Programs and Arduino Programs.</p> <p>Analyze IOT Servers and Cloud Services.</p> <p>Evaluate IOT Solutions for real life Problems.</p>
4	V	<b>AI307</b>	<b>Computer Graphics and Vision</b>	<p>Demonstrate Proficiency in Color Image Processing Techniques, including Color Models and Segmentation.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<p>Apply 2D and 3D Graphics Algorithms for Line Drawing, Polygon Filling, and Transformations.</p> <p>Utilize Texture Analysis Methods, including Statistical Approaches and Wavelets, for Image Understanding.</p> <p>Integrate Object Recognition and Tracking Techniques to Identify and Monitor Objects in Image.</p> <p>Develop a Solid Understanding of Fundamental Concepts in Color Image Processing and Computer Graphics</p>
5	V	AI309	<b>Ad-hoc Networks</b>	<p>Clarify the working principles of ad-hoc wireless networks.</p> <p>List the challenges in design of wireless ad-hoc network.</p> <p>Analyze protocols at MAC, Routing and Transport layers of ad-hoc networks.</p> <p>Identify security issues in designing MANET and VANET.</p> <p>Develop ad-hoc network using physical devices like laptops, mobiles</p>
6	V	AI311	<b>Text and Speech Analysis</b>	<p>Evaluate existing and emerging deep learning architectures for text and speech processing</p> <p>Analyze deep learning techniques for NLP tasks, language modeling, and machine translation</p> <p>Utilize coreference and coherence for text processing Build question-answer systems, chatbots, and dialogue systems</p> <p>Apply deep learning models for building speech recognition and text-to-speech systems</p>

7	V	<b>OE343</b>	<b>Data Science</b>	Articulate basic terms what Statistical Inference means
				Analyze the data using various statistical measures
				Identify data organization techniques used as foundations for modelling data
				Utilize R elements for data handling
				Perform data reduction and apply visualization techniques
8	V	<b>AIMD301</b>	<b>Machine Learning</b>	Utilize machine learning techniques and understand the basic theory underlying machine learning.
				Articulate supervised, unsupervised and reinforcement learning.
				Identify the basic concepts of learning and decision trees.
				Utilize Bayesian techniques for problems appear in machine learning.
				Perform statistical analysis of machine learning techniques.
9	V	<b>AIMD303</b>	<b>Business Intelligence</b>	Articulate data pre-processing techniques
				Analyze the data modeling required for business intelligence related tasks
				Determine the role of statistical techniques in data analysis tasks
				Identify big data analysis techniques
				Utilize different reporting/visualization tool
10	V	<b>SH3034</b>	<b>Scholastic Aptitude I</b>	Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.

				<p>Articulate usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests</p>
				<p>Develop a bridge in analogies, series and visualizing directions.</p>
				<p>Apply various short cuts &amp; techniques to manage speed and accuracy to get</p>
11	V	AI313	<b>Deep Learning Lab</b>	<p>List the useful libraries in Python and for the house price prediction dataset, build multi-layer perceptron</p>
				<p>Model and evaluate their performance.</p>
				<p>Summarize and implement state-of-the-art deep learning models.</p>
				<p>Interpret the model results and analyze the performance of the model for given datasets</p>
12	V	AI315	<b>Big Data Analytics Lab</b>	<p>Identify and investigate the distributed underlying experimental bed of hadoop</p>
				<p>Compare the usage of map-reduce paradigm for parallel execution</p>
				<p>Recognize the nosql prototype to build the big data management</p>
				<p>Apply the skills to construct nosql designs and its manipulation</p>
				<p>Visualizing business benefits from unstructured data analysis</p>
13	V	AI317	<b>Technical Aptitude-III</b>	<p>Choose proper techniques to find solution for engineering problems</p>
				<p>Solve various types of problems</p>
				<p>Develop ability to face competitive examinations</p>

				Inspect the problem & conclude with proper solution
14	V	AI319	<b>Summer Internship/ Professional Certification</b>	Apply the theoretical and practical knowledge of CS/IT Engineering for product/service development.
				Undergo real time IT Industry practices regarding product/service development.
				Identify and analyze engineering problems to provide IT based solutions.
				Adopt recent industry practices for project development
				Improve the ability to work in teams
				Enhance technical skills for solving complex engineering problems.
15	VI	AI302	<b>Optimization Techniques for AI</b>	Understand the principles of optimization and its role in AI.
				Explore various optimization algorithms and their applications.
				Apply optimization techniques to real-world AI problems.
				Analyze and compare the efficiency and effectiveness of different optimization methods
16	VI	AI304	<b>Automata Theory</b>	Solve automata problems using mathematical theorems and techniques.
				Design computational models for different language classes.
				Construct grammar or regular expressions for different language classes.
				Prove and disprove key properties of formal languages and automata.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Create a compiler using various tools like LEX and YACC.
17	VI	AI306	<b>Research Methodology</b>	Utilize the basic concepts of Research Methodology.
				Apply the methodology, irrespective of their discipline, in developing the most appropriate methodology for their research studies.
				Analyze the art of using different research methods and techniques.
				Develop the spirit of scientific inquiry in the students
18	VI	AI308	<b>Smart Cities</b>	Acquire the terminology, technology and its applications of IoT
				Optimize resources for different IoT applications like Smart Cities
				Utilize Real world IoT Design constraint.
				Demonstrate and Deploy responsive Web Application using APIs and generate reports using templates.
19	VI	AI310	<b>Augmented and Virtual Reality</b>	Identify, examine, and develop software that reflects fundamental techniques for the design and deployment of VR and AR experiences.
				Designate how VR and AR systems work.
				Choose, develop, explain, and defend the use of particular designs for AR and VR experiences.
				Evaluate the benefits and drawbacks of specific AR and VR techniques.
				Recognize and examine state-of-the-art AR and VR design problems and solutions.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

20	VI	AI312	<b>Wireless &amp; Mobile Nets</b>	Articulate fundamental concepts of Wireless, Mobile, Ad Hoc, Sensor, Optical and ATM networks operation.
				Choose appropriate protocol for desired communication service.
				Compare various types of routing protocols.
				Evaluate advanced network technologies and network protocols.
21	VI	AI314	<b>Sentiment Analysis</b>	Utilize proficiency in applying supervised and unsupervised sentiment classification techniques.
				Develop expertise in generating sentiment lexicons through dictionary and corpus-based approaches.
				Apply Master advanced skills in analyzing debates, recognizing stances, and mining intents in textual discussions.
				Acquire the ability to identify and analyze comparative opinions, including specialtypes of comparisons.
				Apply knowledge in detecting fake opinions, performing automated abnormal pattern discovery, and assessing the quality of reviews using regression models.
22	VI	OE342	<b>Data Mining</b>	Compare various conceptions of data mining as evidenced in both research and application
				Apply Classification and Clustering techniques for real time problems
				Characterize the various kinds of patterns that can be discovered by association rule mining
				Analyze web mining techniques for structured/un-structured data patterns

				Evaluate mathematical methods underlying the effective application of data mining
23	VI	<b>AIMD302</b>	<b>Principles of AI</b>	<p>Articulate basic concepts and techniques of Artificial Intelligence.</p> <p>Apply AI algorithms for solving typical practical problems.</p> <p>Designate appropriate knowledge representation schemes in AI.</p> <p>Analyze reasoning schemes in AI.</p>
24		<b>SH3064</b>	<b>Scholastic Aptitude II</b>	<p>Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.</p> <p>Articulate usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests</p> <p>Develop a bridge in analogies, series and visualizing directions.</p> <p>Apply various short cuts &amp; techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams</p>
25	VI	<b>AI316</b>	<b>Web Technology Lab</b>	<p>Analyze the difference between static and dynamic web page.</p> <p>Develop application using HTML5, CSS 3.0, Java Script and jquery.</p> <p>Implement application using Java Servlet, Manage session of users in web application.</p> <p>Implement a Java servlet application to connect with RDBMS</p> <p>Build application using Java Server Pages (JSP), Manage session of users in web application.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Develop a Java Server Pages application to connect with RDBMS
26	VI	AI318	<b>Mobile Application Development Lab</b>	Setup the Android development environment
				Utilize the appropriate User Interface controls in Android app
				Implement SQLite and Shared Preferences concepts to store data in Android app
				Implement Location and Notification based functionalities in Android app
				Design and develop a WebView based Android app
				Build and deploy Android app on Google Play Store
27	VI	AI320	<b>Technical Aptitude-IV</b>	Choose proper techniques to find solution for engineering problems
				Solve various types of problems
				Develop ability to face competitive examinations
				Inspect the problem & conclude with proper solution
28	VI	AI322	<b>Capstone Project Phase I</b>	Apply knowledge of computer science for real world problem.
				Possess Professional, Practical and reflective practitioner skills.
				Upgrade and apply the knowledge through continuous learning.
				Effectively apply Design Thinking Processes and Template to structure learning lifecycle in the development of a prototype.
				To develop project management and time management skills

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

				To formulate a process whereby to keep the end-user or customer in mind throughout the project lifecycle.

(An Empowered Autonomous Institute, affiliated to SUK)

# **Electrical Engineering**

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

**UG Program**

- **Department Name :- Electrical Engineering**
- **UG Program Name :- B. Tech. Electrical Engineering**
- **Vision and Mission :-**

<b>Vision</b>	Develop globally competent electrical engineers to serve future needs and challenges of the society.
<b>Mission</b>	<ul style="list-style-type: none"><li>● <b>To inculcate teaching and learning processes to promote state-of-the-art service in electrical industries to address local and global challenges.</b></li><li>● <b>To integrate academics, research, and entrepreneurship skills in the domain of electrical engineering to address the present and future challenges of society.</b></li><li>● <b>To develop professionalism with strong foundations in adopting change in environmental technology.</b></li></ul>

<b>Sr. No.</b>	<b>Program Outcomes</b>
1.	Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
2.	Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
3.	Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
4.	Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
5.	Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
6.	The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
7.	Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
8.	Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
9.	Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
10.	Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
11.	Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

Sr. No.	Program Specific Outcomes
1	Apply knowledge of power systems, power electronics, electrical machines and control systems for the industrial applications.
2	Operate and control renewable energy sources and electric vehicle systems.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	III	EE2014	DC Machines and Transformer	Explain working principle and operation of single-phase and three-phase transformers.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Analyze performance with different applications of three-phase transformers.
				Evaluate performance of the DC Machine.
				Interpret characteristics of DC machines.
				Identify suitable DC Machine and transformer for industrial applications.
2	III	EE2034	Electrical Circuit Analysis	Apply fundamental laws to analyze DC and AC circuits.
				Make use of different theorems to evaluate steady state parameters of AC and DC circuits.
				Analyze the electrical two port networks.
				Evaluate the circuit under transient conditions.
				Design basic passive filters.
3	III	EE211	Mathematics for Electrical Engineers	Solve Linear Differential equations related to engineering application in electrical Engineering.
				Find and represent periodic functions using Fourier series.
				Apply rules of vector differential calculus to evaluate gradient, divergence and conservative vector field.

				Identify an appropriate probability distribution and use its properties to calculate probabilities
				Apply Laplace transform and Z-transform by using properties to various functions to solve electrical engineering problems.
4	III	EE213	Power Transmission and Distribution System	Compare different tariffs for economic generation
				Calculate different transmission line parameters
				Select different components of overhead transmission lines and cables
				Explain various phenomena occurring in power system
				Identify importance of power factor and choose distribution system with minimum power loss.
5	III	EEMD201	Electrical Power Generation	1. Explain the fundamental concepts of energy sources like conventional and non-conventional energy.
				2. Describe various advantages and disadvantages of energy sources.
				3. Illustrate different technology associate with thermal, hydro and nuclear power energy sources.

				4. Illustrate different technology associate with solar, wind, biomass and other renewable energy sources.
				Describe the working of micro/mini hydropower system.
6	III	SH2174	Environmental Science	Apply interdisciplinary knowledge in environmental science by integrating concepts and principles from various fields of science and engineering to address environmental issues.
				Evaluate environmental impacts of human activities on ecosystems and on the environment.
				Use scientific approach to identify and solve environment related problems.
				Design sustainable solutions to address environmental challenges by considering renewable energy sources, waste management strategies conservation measures, and environmental policies.
				Participate in group work to become acquainted with the importance of teamwork, collaboration
				Develop presentation and report writing skills.
7	III	EE2514	DC Machines and Transformer Lab	Perform polarity and O.C. S.C. test on transformer.

				Interpret load characteristics of transformer.
				Demonstrate speed control characteristics of DC Machines.
				Identify characteristics of various machines along with their efficiencies.
				Analyze various parameters of the DC machines.
8	III	EE2574	Computer Programming Lab	Analyze the problem to find the objects and build Object Oriented Program.
				Elaborate the concepts of “Inline function”, “Friend Function”, “Function Overloading” and “Operator Overloading”.
				Modify/Extend the program by using Inheritance.
				Use of memory management technique “Constructors” & “Destructors” to increase speed of program execution.
				Perform different operation of file like “Create”, “Open”, “Close” files and perform “Read”, “Write” and “Append”.
9	III	EE261	Electrical Maintenance and Troubleshooting	Demonstrate safe practice to prevent electrical accidents while handling electrical tools/equipment.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Use tools/instruments for installation and to generate technical reports.
				Conduct various tests as per IS on electrical equipment/machines.
				Prepare maintenance schedule of different equipment/machines.
				Develop trouble shooting chart for various electrical equipment, machines & domestic appliances.
10	III	EE2594	Technical Aptitude -I	Apply the knowledge acquired during the course work.
				Develop the ability of problem solving.
11	III/IV	SH2634	Professional Leadership Skills	Explain the traits of a leadership through real life examples.
				Exhibit the ability to work effectively in team.
				Prepare a presentation as per the audience and context requirements.
12	III/IV	SH2614	Interpersonal Skills	Exhibit interpersonal communication skills.
				Demonstrate decision-making skills.
				Apply conflict resolution styles appropriate in different situations.
				Demonstrate skills to manage balance in work and life.

13	III/IV	SH2694	Innovation Tools and Methods for Entrepreneurs	Explain structured approach to define the problem with every possible detail, identify conflicts and solve them
				Apply User Journey Map to the selected problem to show user interaction at various stages
				Analyze the solutions provided by competitors for effectiveness and gaps if any.
14	III/IV	SH2594	Personal Effectiveness and Body Language	Develop skills to build self-esteem and positive attitude.
				Develop interpersonal skills characterized by effective communication and conflict resolution.
				Demonstrate responsiveness towards time, stress, and health issues.
				Interpret the non-verbal behaviour of a person.
15	III/IV	SH2734	German Language - Level III	Interpret the language if the next person is speaking slowly and clearly.
				Make use of the language in routine life with the routing topics like family, shopping, work etc.
				Demonstrate the language by self-introduction in German with simple sentences.

16	III	SH2714	Japanese Language - Level III	Make use of basic conversations in various situations.
				Identify the sentence patterns.
				Explain insights about the communication required for living in Japan.
				Interpret Japanese work ethics required in their professional career.
17	IV	EE2064	Analog and Digital Electronics	Interpret characteristics of diodes, transistors, and MOSFET.
				Analyze various analog circuits.
				Design operational amplifier-based circuits.
				Describe the fundamental concepts and techniques used in digital electronics.
				Design combinational and sequential logic circuits.
18	IV	EE2024	AC Machines	Describe behavior of three phase and single phase induction motors.
				Interpret various characteristics of three phase induction motor.
				Identify various industrial applications for single phase and three phase Induction Motor.

				Evaluate winding parameters of Synchronous Generator.
				Analyze performance characteristics and testing of Synchronous Machine.
19	IV	EE214	Electrical Measurement and Instrumentation	Analyze different electrical measuring instrument.
				Identify the various parameters in electrical measuring instruments.
				Design measuring schemes for various electronic instrument applications.
				Select appropriate transducer for various measuring applications.
				Describe different non-electrical measuring instruments.
20	IV	EE2084	Signals and Systems	Represent the various signals mathematically
				Classify the systems and infer their properties
				Compute the Fourier series and Fourier Transforms for given signals
				Apply Laplace and Z-transforms to solve the systems.
				Appreciate the significance of Sampling
21	IV	EEMD202	Power System	Write the basic working principles of different generating sources.

				Analyze different types of loads
				Explain importance of power factor and tariffs in power system.
				Identify various components in power transmission and distribution system.
				Select substation equipments as per requirement.
22	IV	SH202	मराठी भाषिक कौशल्यविकास	भाषा आणि व्यक्तिमत्व विकास यांमधील सहसंबंध स्पष्ट करू शकेल
				भाषिक कौशल्यविकास करू शकेल
				कथा या मराठी साहित्य प्रकाराचे विश्लेषण करू शकेल
				एकांकिका या मराठी साहित्य प्रकाराच्या विश्लेषणाची क्षमता प्राप्त करेल
23	IV	SH204	हिंदी कथा साहित्य एवं प्रयोजमूलक हिंदी	विद्यार्थियों में मानवीय संवेदनाओं के विकास के साथ नवीन सामाजिक सांस्कृतिक बोध और जीवन मूल्यों का विकास होगा।
				विद्यार्थियों में साहित्य के माध्यम से कलात्मक गुणों की अभिवृद्धि होगी कला की साहित्यिक विधाओं के प्रति अभिरुचि जागृत होगी तथा रचनात्मक कौशल्य को बढ़ावा मिलेगा।
				विद्यार्थियों में नए वैश्विक मूल्यों के प्रति सजगता को बढ़ावा मिलेगा एवं मूल्यवादी दृष्टि के प्रति दायित्व बोध उत्पन्न होगा। छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
				छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
24	IV	EE2524	AC Machines Lab	Evaluate parameters of AC machines (Asynchronous and Synchronous)

				Plot the characteristics of various AC machines and solving engineering problems.
				Demonstrate speed control characteristics of AC Machines.
				Analyze the parameters and predict the efficiency of the AC machines.
				Analyze the voltage regulation of Synchronous Generator.
25	IV	EE2544	Analog and Digital Electronics lab	Illustrate input-output response of analog electronic.
				Build diode circuits like rectifier, clipper & clamper.
				Design various applications of Op-Amp.
				Design sequential and combinational circuits.
				Simulate and validate Analog and Digital circuits using simulation tools.
26	IV	EE262	Electrical Measurement and Instrumentation Lab	Determine the measurement of electrical parameters using various measurement techniques.
				Examine AC bridges for the measurement of inductance, capacitance and frequency.

				Identify different measuring instruments for the measurement of various electrical and non-electrical parameters.
				Demonstrate various digital measuring instruments.
				Draw the characteristics of solar panel, earth resistance and temperature transducers.
27	IV	EE264	Electrical Installation	Elaborate electrical Safety, Installation Codes, and Standards
				Determine a suitable size of wires and switchgears
				Design various electrical installation diagrams
				Estimate component requirements of electrical installation
				Prepare quotation, tender and other related documents
28	IV	EE2564	Technical Aptitude -II	Apply the knowledge acquired during the course work.
				Develop the ability of problem solving.
29	IV	SH2624	Japanese Language - Level IV	To be able to make basic conversations in various situations.
				To recognize the sentence patterns.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				To improve Japanese Language proficiency.
				To give students insights about the communication required for living in Japan.
				To expose students to the Japanese work ethics required in their professional careers.
30	V	EE3034	Power System Analysis	Apply per unit system for power system components.
				Analyze symmetrical faults in power systems.
				Apply symmetrical component method for unsymmetrical faults in power system
				Examine power system transient stability.
				Outline FACTs and HVDC devices for electrical power systems.
31	V	EE3054	Control System	Represent the physical system into a mathematical model.
				Calculate the time-domain specifications for a given second order system.
				Analyse the different systems using Time domain and Frequency domain tools and techniques.
				Compare different controllers and compensators used in control systems.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Apply the knowledge of State Space techniques for analysing and understanding the MIMO systems.
32	V	EE3094	Energy Storage Technologies	Explain the energy storage as a structural unit of a power system.
				Compare various energy storage technologies for power systems.
				Apply hydrogen energy storage for power system applications.
				Analyze the economics and reliability of energy storage systems.
33	V	EE3114	Restructured Power System	Identify new dimensions associated with the power system and its economics.
				Compare the various operating mechanisms of conventional and restructured power system.
				Interpret various aspects of power markets and market architecture.
				Propose ancillary services and bidding strategies in power sectors
34	V	EE3134	Digital Signal Processing	Formulate signals mathematically in continuous, discrete-time, and frequency domains.
				Analyze discrete-time systems using Z-transform.

				Construct signals using Discrete-Fourier Transform (DFT) and FFT algorithms.
				Design digital filters for various applications
				Apply digital signal processing for the analysis of real-life signals.
35	V	EE3154	Electrical Utilization and Traction	Analyze electric heating for industrial application.
				Demonstrate electric welding for industrial application.
				Inspect electric circuits for refrigeration and air conditioning.
				Evaluate the use of various process control techniques.
				Summarize electrical traction systems and drives.
36	V	OE341	Energy Auditing and Management	Identify the important of Energy Scenario.
				Use energy audit knowledge to carry out energy audit of a given firm.
				Examine different rolls in energy action planning
				Apply project finance and management skills to carry out energy audit
				Plan for energy monitoring and targeting.

K. E. Society's

## Rajarambapu Institute of Technology, Rajaramnagar

(An Empowered Autonomous Institute, affiliated to SUK)

37	V	EEMD301	Electrical Machines	Describe behavior of dc machine.
				Explain the working principle of 1-Phase and 3-Phase transformers.
				Explain working of different induction motors.
				Select the relevant electrical machines for different applications
				Interpret the relevant fractional horse power motor for different applications
38	V	SH3034	Scholastic Aptitude-I	Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.
				Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
				Develop a bridge in analogies, series and visualizing directions.
				Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
39	V	EEMD303	Electrical Technology	Demonstrate speed control methods of electrical machines.

				Analyze performance of DC motor and induction motor for speed control applications.
				Implement power electronic circuits for given application.
				Measure electrical quantities using electrical and electronic instruments.
40	V	EE3514	Control Systems Lab	Test for responses of the mathematical model of different electromechanical systems for various standard inputs.
				Evaluate time domain and frequency domain specifications of LTI systems
				Examine the stability of LTI system using time-domain and frequency-domain techniques.
				Design simple controller for LTI systems
				Analyze state space models of LTI systems
41	V	EE3534	Microcontroller Lab	Illustrate internal and external structure of microcontroller
				Make a use of instruction set to write assembly language programming
				Develop embedded C language program of modern microcontrollers
				Design microcontroller interfacing circuit for various I/O device

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

42	V	EE359	Advanced Software Lab	Analyze AC/DC converters circuits using software.
				Make use of advance software programming and Simulink platform to solve different problems.
				Analyze the power system analysis problem using advance simulation toolbox.
				Develop power system network in advance software to solve power flow analysis problems.
				Design power system network in advance optimization software to solve power systems problem.
43	V	EE3554	Technical Aptitude -III	Apply the knowledge acquired during the course work.
				Develop the ability of problem solving.
44	V	EE3574	Summer Internship	Apply the Technical knowledge in real industrial situations.
				Identify the industry problem on which they can do their final year project.
				Formulate Technical reports/projects.
				Demonstrate professional values and ethical standards.
				Understand the social, economic and administrative considerations that

				influence the working environment of industrial organizations.
45	VI	EE314	Power System Protection	Compare the different protective devices
				Describe Relays for power system protection.
				Identify the proper earthing system and selection of Lightning arrester
				Explain digital relaying scheme
46	VI	EE3044	Power Electronics	Explain power semiconductor devices based on working principle, structure and operating characteristics.
				Estimate the performance parameters of uncontrolled rectifiers and phase-controlled converters for R, RL and RLE Load.
				Analyze the performance of DC-DC converters with respect to configurations and control strategies
				Draw waveforms and circuits of single phase and three phase inverter.
				Describe working principle and applications of AC-AC converters.
47	VI	EE316	Research Methodology	Describe the research process and the principle activities, skills and ethics associated with the research process.
				Formulate a research problem

				Assess and critique a published journal article.
				Identify the components of a literature review process
				Construct an effective research article or proposal by following research ethics
48	VI	EE3064	Electrical Energy Conservation and Auditing	Explain the basic principles of Energy Management and Audit
				Apply mathematical tools to solve energy economics
				Select energy-efficient electrical technologies for electrical motors
				Select energy-efficient Industrial technologies for energy saving
				Apply energy-efficient technologies for energy saving
49	VI	EE318	Battery Management Systems	Discuss BMS for various applications.
				Compare various batteries for specific applications
				Illustrate battery parameters and battery testing
				Explain battery management methods for a given system
				Illustrate thermal management and aging of batteries for electric vehicles

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

50	VI	EE3104	Advanced Control Systems	Design compensators for LTI systems.
				Design state feedback controller and observer for the system models.
				Examine stability of the state space models.
				Analyze discrete time systems
				Examine stability of discrete time systems
51	VI	EE3124	Application of Microcontrollers in Electrical Engineering	Illustrate internal and external structure of PIC microcontroller
				Make a use of instruction set to write assembly language programming
				Develop embedded C language program of modern PIC microcontrollers
				Design PIC microcontroller interfacing circuit for various I/O device
52	VI	OE3182	Industrial Drives	Analyze stability, moment of inertia, speed and torque in industrial drive system
				Elaborate energy conservation in industrial drive system
				Identify various sensors required for industrial drives
				Compare various control strategies for AC and DC drives

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Select special motors for industrial applications
53	VI	EEMD302	Smart Grid	Summarize the concept and future of smart grid
				Develop smart grid architecture
				Compile various smart grid technologies
				Identify communication and information technologies for smart grid
				Elaborate distributed generation and storage technologies
				Recommend smart metering and distribution automation
54	VI	SH3064	Scholastic Aptitude-II	Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.
				Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
				Develop a bridge in analogies, series and visualizing directions.
				Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams

55	VI	EE3544	Power Electronics Lab	Implement triggering circuits and operating characteristics of power semiconductor devices.
				Demonstrate performance of power electronic converters connected to resistive load
				Analyze performance of power electronic converters based on output parameters and operating characteristics.
				Design power electronics converters for specific applications
				Perform simulation of power electronic converters
56	VI	EE360	Automation and Control Lab	Design relay logic-based control system for the given applications.
				Implement IEC based programming languages for various PLCs.
				Develop Relay Logic Ladder for the real-time PLC based control applications.
				Design SCADA based GUI system for the real time applications.
				Develop GUI based monitoring system of the real time applications using HMI.
57	VI	EE362	Power System Protection Lab	Explain different types of power system schemes.

				Compare the Electromagnetic, static and microprocessor based relays
				Describe Current-time and voltage-time characteristics of relays.
				Demonstrate faults on power system fault simulation panels
				Illustrate the proper earthing system and safety precautions in Electrical systems
58	VI	EE3564	Technical Aptitude –IV	Apply the knowledge acquired during the course work.
				Develop the ability of problem solving.
59	VI	EE3584	Capstone Project Phase -I	Carry out literature survey and identify as well as select a problem.
				Communicate problem, methodology and outcomes systematically and effectively in the form of a technical report.
				Work as a member and a team leader in engineering teams / multidisciplinary teams.
				Demonstrate an ability to use different tools and techniques to solve the given problem.
				Comprehend and analyze an engineering problem and report findings to provide an appropriate solution.

60	VII	EE4013	Power System Protection	Explain different types of power system faults.
				Compare the different protective devices
				Describe Relays for power system protection.
				Classify different circuit breakers as per their application
				Ensure the proper earthing system and selection of Lightning arrester
61	VII	EE4033	Electrical Drives	List the parts of electrical drives, advantages and factors affecting the choice of electrical drives.
				Interpret the equivalent parameters, stability and components of load torque for a given motor-load system.
				Apply power electronics converter and their control techniques to control dc drives.
				Estimate the performance parameters of dc drives controlled by rectifiers and choppers.
				Describe stator side and rotor side control of induction motor drive.
				Explain the special motor drives for industrial applications.

62	VII	EE4053	Power System Dynamics and Control	Compare various methods to enhance power system stability.
				Develop dynamic modeling of a synchronous machine, excitation system, speed governing system, and transmission line.
				Examine impact of stability on power system planning, and operation.
				Outline stability issues in interconnected power system.
				Analyze Power system stabilizer.
63	VII	EE4073	HVDC Transmission Systems	Elaborate HVDC system and describe various types of DC links
				Analysis of Line Commutated Converters and Voltage Source Converters in HVDC Transmission System with their control methods
				Explain various faults and protection methods for HVDC transmission systems
				Discuss about Reactive power, Harmonics and filters in HVDC system
				Illustrate HVDC components modeling and AC/DC power flow
64	VII	EE4093	Nonlinear Control Systems	List different types of non-linearities present in the system

				Analyze non-linear systems using analytical and graphical methods
				Comment on stability of nonlinear systems using various approaches.
				Apply Lyapunov stability criteria for nonlinear system
				Develop mathematical model of real-time nonlinear systems
65	VII	EE4113	FACTS Controllers	Examine the importance of controllable parameters and benefits of FACTS Controllers.
				Compare the operation of SVC and STATCOM
				Analyze the functional operation and control of series compensation
				Describe the principles, operation and control of voltage & Phase angle regulator
				Explain combined & special purpose FACTS controllers
66	VII	EE4133	High Voltage Engineering	Identify and analyze the breakdown theories of solid, liquid and gaseous materials
				Describe as well as use different methods of generation of high AC, DC, impulse voltage and current.

				Demonstrate and use different methods of measurement of high AC, DC, impulse voltage and current
				Identify the occurrence of overvoltage and to provide remedial solutions
				Demonstrate an ability to carry out different tests on high voltage equipment and devices as well as ability to design the high voltage laboratory with all safety measures
67	VII	EE4153	Power Quality and Harmonics	Discuss various power quality problems and their analysis.
				Describe Power Quality Standards and Monitoring
				Asses sources of harmonic in power system
				Analyze effects of Harmonics on Power system
				Explain harmonic filters
68	VII	EE4173	Smart Grids	Summarize the concept and future of smart grid
				Develop smart grid architecture
				Compile various smart grid technologies
				Identify communication and information technologies for smart grid

				Elaborate distribution generation technologies
				Recommend smart metering and distribution automation equipment's
69	VII	EE4193	FPGA DSP Processors	Explain the basic functions of FPGA DSP processors.
				Interpret the modules of DSP processors
				Compare FPGA based DSP technologies
				Elaborate FPGA implantation tools and its synthesis
				Develop architecture of FPGA based DP systems
70	VII	EE4213	Computer Modeling of Electrical Power System	Develop mathematical models of various equipment used in power system to analyse both AC and AC-DC power system network.
				Model single and three phase power system network by using linear transformation and compound admittance technique.
				Formulate AC and AC-DC power system analysis problem.
				Apply various methods of load flow studies to analyse AC power system network.

				Analyse AC-DC power system network by using power flow analysis method.
71	VII	EE4233	Power System Optimization	Describe the need of power system optimization.
				Formulate power system optimization problem.
				Apply numerical and heuristic technique to solve power system optimization problem.
				Solve power system optimization problem.
				Assess the impact of parameters on defined optimization problem.
72	VII	EE4253	Battery Management System	Discuss BMS for various applications.
				Compare various batteries for specific applications
				Illustrate battery parameters and battery testing
				Explain battery management methods for a given system
				Illustrate thermal management and aging of batteries for electric vehicles
73	VII	EE4273	Advanced Power Electronics	Design mathematical model of various converters.

				Analyze AC voltage controllers and resonant converters.
				Describe Switched mode power converters.
				Apply knowledge of inverters for various electrical applications
				Select power electronic conditioners and filters for Power Quality Improvement.
74	VII	EE4513	Power System Protection Lab	Explain different types of power system schemes.
				Compare the Electromagnetic, static and microprocessor based relays
				Describe characteristics of relays.
				Demonstrate faults on panels
				Ensure the proper earthing system and safety precautions in Electrical systems
75	VII	EE4533	Electrical Drives Lab	Demonstrate AC and DC drives, fed from various power electronics converters
				Examine closed loop control of electrical drive system
				Analyze performance of electrical drives by plotting speed-torque characteristics
				Compare performance of electrical drives using speed-torque characteristics

				Simulate AC and DC drives, fed from various power electronics converters
76	VII	EE4553	Wind and Solar Lab	Prepare report on wind resource assessment
				Operate and maintain squirrel cage and DFIG based systems.
				Compute reactive power requirement for standalone wind turbine system
				Demonstrate the effects of shadowing on PV modules
				Identify the installation materials for off grid PV systems
77	VII	EE4573	Control and Automation Lab	Design relay logic-based control system for the given applications.
				Implement IEC based programming languages for various PLCs
				Develop Relay Logic Ladder for the real-time PLC based control applications.
				Study SCADA based GUI system for the real time applications.
				Use HMI to develop GUI based monitoring system of the real time applications.
78	VII	EE4593	Capstone Project Phase-II	Devise sound technical knowledge, for identified problem of project.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Propose engineering solution to complex problems.
				Demonstrate the skills and attitude in professional way in a team.
				Illustrate the component and cost optimization solutions wherever applicable.
				Develop skills towards the use of modern tools and presentations.
				Justify outcomes through simulation/ experimentation in environmental and sustainable way.
				Summarize project report in an ethical way.
79	VIII	OE4381	Finance for Engineers	Discuss the fundamental aspects of accounting and finance.
				Apply theoretical knowledge and information for preparing various financial statements.
				Analyze the financial information for solving managerial problems.
				Evaluate financial performance of the organization for effective decision making.
80	VIII	OE4361	Engineering Management & Economics	Develop administrative, organizational and planning skills to execute engineering project.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Develop bar chart/mile stone chart for the project.
				Analyze profit/cost data and carry out economic analysis to take optimal decision.
				Calculate depreciation as per various methods.
81	VIII	IP4023	Internship & Project	Examine the functioning of the company on the terms of inputs, transformation process and the outputs (products and services)
				Develop an attitude to adjust with the company culture, work norms, code of conduct.
				Recognize and follow the safety norms, Code of conduct.
				Demonstrate the ability to observe, analyse and document the details as per the industry practices.
				Interpret the processes, systems and procedures and to relate to the theoretical concepts- studies.
				Develop the leadership abilities, communication.
				Demonstrate project management and finance sense

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Identify the project/problem in the domain of a program relevant for the company.
				Compile the information to the pertaining to the problem identified.
				Analyse the information using the statistical tools/ techniques.
				develop the feasible solution for given problem.
				Analyse the impact of the project on the performance of company/department.
82	VIII	RE4043	Research Project	Investigate the technical literature.
				Recognize and evaluate theories, practices, and/or research on a chosen topic by conducting a thorough literature review and submitting a written integrative, critical summary of the current literature.
				Design a research problem and develop a methodology.
				Develop and implement an advanced original research or creative project.
				Develop the ability to explain the conceptual viability of the project and describe the major components involved.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Develop the ability to explain how the project will impact the relevant body of work.
				Develop advanced discipline-relevant skills and competencies.
				Construct an accurate record of research performed.
				Write a research report and paper.
83	VIII	ED4103	Project Management	Prepare business Plan for selected business.
				Make risk analysis& market analysis of selected project.
				Make risk analysis& market analysis of selected project
				Make financial appraisal of selected project.
84	VIII	ED4043	Commercial Aspects of the Project	Interpret basic Financial Terminologies.
				Prepare & analyze financial statements.
				Prepare financial Plan for venture.
				Apply basic principles of marketing for various products.
				Prepare market survey.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

				Apply knowledge of marketing management for selected business.
85	VIII	ED4062	Entrepreneurship Development Program (EDP)	Apply knowledge of engineering, economics, marketing and finance for formulation of business plan, starting & managing new business
86	VIII	ED4083	Entrepreneurship Development Project	Apply knowledge of engineering, economics, marketing and finance for preparation of project report.
				Make commercial, technical and financial appraisal of project.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

**PG Program**

- **Department Name :- Electrical Engineering**
- **PG Program Name :- M. Tech. Power System and Power Electronics**
- **Vision and Mission :-**

<b>Vision</b>	Develop globally competent electrical engineers to serve future needs and challenges of the society.
<b>Mission</b>	<ul style="list-style-type: none"><li>● To inculcate teaching and learning processes to promote state-of-the-art service in electrical industries to address local and global challenges.</li><li>● To integrate academics, research, and entrepreneurship skills in the domain of electrical engineering to address the present and future challenges of society.</li><li>● To develop professionalism with strong foundations in adopting change in environmental technology.</li></ul>

<b>Sr. No.</b>	<b>Program Outcomes</b>
1.	To independently carry out research /investigation and development work to solve practical problems.
2.	To write and present a substantial technical report/document.
3.	To demonstrate a degree of mastery over the area of power systems and power electronics.
4.	To collaborate, work harmoniously in teams and address multidisciplinary issues with consideration of professional, legal, and ethical concerns.
5.	To use advanced techniques, skills, and modern engineering tools with financial aspects.
6.	To learn continuously, independently and update knowledge & skills

**M.Tech Power Systems and Power Electronics (AY 2024-25)**

**Course Outcomes**

<b>Sr. No.</b>	<b>Semester</b>	<b>Course Code</b>	<b>Course Name</b>	<b>Course Outcome</b>
				1. Estimate the error.

<b>1</b>	<b>I</b>	<b>SHP5152</b>	<b>Numerical Computational Technique</b>	2. Apply the relevant numerical method for interpolating the polynomial
				3. Develop the equation to be fitted and fit the curve for given data
				4. Estimate numerically the solution of given algebraic equation.
				5. Use the relevant method for solving the simultaneous linear equations and compute the Eigen values.
				6. Construct the fuzzy set for given linguistic variable and apply fuzzy logic.
<b>2</b>	<b>I</b>	<b>EPP1012</b>	<b>Computer Aided Power System Analysis</b>	1. Model different components of power system
				2. Carry out contingency analysis of power system
				3. Analyze power network by conducting power flow studies
				4. Model and simulate generator excitation system
				5. Estimate state of power system using state estimation theory
<b>3</b>	<b>I</b>	<b>EPP1022</b>	<b>Electric and Hybrid Electric Vehicles</b>	1. Discuss the trends and philosophy of electric vehicles
				2. Analyze Conventional Vehicles and Powertrains
				3. Discuss the electric drive mechanism.
				4. Classify hybrid electric vehicles
				5. Differentiate Electric and range-extended electric vehicles

				6. Describe plug-in hybrid electric vehicles and electrical infrastructure
4	I	EPP1033	Wind and Solar energy Technology	1. Describe the principle of energy generation from wind and solar PV systems
				2. Formulate wind and solar energy systems by mathematical equations
				3. Assess energy produced from wind and solar energy systems.
				4. Compare the different methods of energy generation from wind and energy systems
				5. Develop economic analysis of a wind turbine and solar PV systems
5	I	EPP1052	Distribution Automation	1. Prepare layout of the substations and feeders considering load and desired voltage
				2. Design distribution system and associated equipment and devices.
				3. Identify an appropriate method of communication for any particular distribution system with a view of automation and SCADA
				4. Analysis distribution feeder components.
				5. Model the different distribution feeder components.
				1. Discuss the smart grid in Indian perspective

<b>6</b>	<b>I</b>	<b>EPP1082</b>	<b>Smart Grid Technologies</b>	2. Explain various smart grid technologies.
				3. Describe smart meters and advance metering infrastructure.
				4. Compare Smart grid and microgrid
				5. Apply power quality management in smart grid
				6. Identify communication technologies for smart grid
<b>7</b>	<b>I</b>	<b>EPP1102</b>	<b>Renewable Energy Lab</b>	1. Prepare report on wind resource assessment
				2. Operate and maintain squirrel cage and DFIG based systems.
				3. Compute reactive power requirement for standalone wind turbine system
				4. Demonstrate the effects of shadowing on PV modules
				5. List the installation materials for off grid PV systems
<b>8</b>	<b>I</b>	<b>EPP111</b>	<b>Electric Vehicle Lab</b>	1. Interpret wiring harness and circuit diagram of EV workbench
				2. Examine the mechanical and electrical specifications and calculate the indices
				3. Demonstrate the voltage and current readings for correct and faulty throttle conditions
				4. Perform motor power and torque calculations to select a motor to build their own EV.

				5. Operate Smart BMS application under different conditions.
9	I	SHP5512	Technical Communication	1. Acquire skills required for good oral and written communication
				2. Demonstrate improved writing and reading skills
				3. Ensure the good quality of oral and written communication
10	II	EPP2022	Advanced Control of Electrical Drives	1. Justify the need of closed loop drive system for industrial applications.
				2. Explain the working principle of different types of drive system.
				3. Compare different types of electric drives.
				4. Develop mathematical models of electric drive system for specific application.
				5. Design controllers for closed-loop operation of different types of electrical motors.
11	II	EPP2052	Power System Optimization	1. Explain the need of power system optimization
				2. Formulate power system optimization problem
				3. Apply numerical and heuristic technique to solve power system optimization problem.
				4. Solve power system optimization problem
				5. Assess the impact of parameters on defined optimization problem.

<b>12</b>	<b>II</b>	<b>EPP2032</b>	<b>Grid Integration of Renewable Energy Sources</b>	1. Summarize the grid codes for integration of renewable energy sources
				2. Explain the working principle of different power electronic topologies and controllers.
				3. Model mathematically renewable energy sources and associated control system
				4. Design systems to reduce impact of renewable energy fluctuations on grid
				5. Develop simulation systems using MATLAB
<b>13</b>	<b>II</b>	<b>EPP2072</b>	<b>Power Quality and Harmonics</b>	1. Discuss various power quality problems and their analysis.
				2. Classify various voltage quality issues and solutions.
				3. Describe Power Quality Standards and Monitoring.
				4. Asses sources of harmonic in power system
				5. Analyze effects of Harmonics on Power system
				6. Design of harmonic filters.
<b>14</b>	<b>II</b>	<b>EPP2092</b>	<b>Research Methodology &amp; IPR</b>	1. Formulate a research problem.
				2. Analyze research related information
				3. Prepare and present research proposal/paper by following research ethics

				4. Make effective use of computers and computing tools to search information, analyze information and prepare report.
				5. Describe nature and processes involved in development of intellectual property rights
15	II	EPP2102	<b>Advanced Power System Protection Lab</b>	1. Analyze characteristics of digital relays
				2. Demonstrate fault simulation on different protection panels
				3. Develop an algorithm for different protection schemes
				4. Simulate protection models
				5. Interpret the simulation results
16	II	EPP2112	<b>Advanced Electric Drives Lab</b>	1. Demonstrate control of Induction motor drive.
				2. Experiment with chopper fed DC drive system.
				3. Experiment with three phase half and full converter fed DC motor drive.
				4. Demonstrate control of BLDC, servo and stepper motor drive system.
				5. Demonstrate control of AC and DC drives using MATLAB/SIMULINK
17	II	EPP2122	<b>Mini Project</b>	1. Formulate a real world problem.
				2. Design solution for a set of requirements.
				3. Use software packages available to analyze the proposed theory.

				4. Explain technical ideas, strategies and methodologies in written form and oral presentations
18	II	SHP552	<b>Framework of Indian Constitution</b>	1. Realise the significance of constitution of India to students from all walks of life and help them to understand the basic concepts of Indian constitution.
				2. Identify the importance of fundamental rights as well as fundamental duties
				3. Understand the functioning of Union, State and Local Governments in Indian federal system
				4. Learn procedure and effects of emergency, composition and activities of election commission and amendment procedure.
19	III	EPP3012	<b>Industry Internship</b>	1. Apply engineering knowledge learned during the program.
				2. Apply his/her technical skills to solve industrial problem.
				3. Work in multi-disciplinary environment.
20	III	MOE2011	<b>Artificial Intelligence - Machine Learning</b>	1. Describe central machine learning methods and techniques and how they relate to artificial intelligence
				2. Differentiate between supervised and unsupervised learning techniques
				3. Apply the ML algorithms to a real-world problem,

- **Department Name :-Electronics and Telecommunication Engineering**
- **UG Program Name :-B. Tech. Electronics and Telecommunication Engineering**
- **Vision and Mission :-**

<b>Vision</b>	Promote excellence in the field of Electronics & Telecommunication Engineering and allied areas through quality education and research to provide valuable assets for industry and society with global perspective
<b>Mission</b>	<ul style="list-style-type: none"> <li>• To provide quality education through industry ready curriculum, effective teaching learning process and stateof-art infrastructure to develop global competency.</li> <li>• To inculcate research aptitude leading to patents and publications in refereed journals.</li> <li>• To imbibe professional ethics, leadership skills, social, cultural &amp; environmental awareness with a passion for lifelong learning.</li> <li>• To strengthen relationships with industry, society, government bodies and alumni</li> </ul>

Sr. No.	Program Outcomes
48.	PO1: Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
49.	PO2: Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
50.	PO3: Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
51.	PO4: Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
52.	PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
53.	PO6: The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
54.	PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
55.	PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
56.	PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
57.	PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to ones own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
58.	PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

Sr. No.	Program Specific Outcomes
1.	Knowledge of Communication Engineering: Demonstrate the knowledge of communication engineering and its tools for the purpose of research, development and testing of main or subsystems in electronics domain.
2.	Knowledge of Embedded Systems: Integrate the hardware and programming for the development of embedded systems.
3.	Knowledge of Signal Processing: Analyze set of data in the form of various kinds of signals for the purpose of research, design and development of electronic systems.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	EC2053	Analog Communication	CO:1 Describe different communication systems

				CO:2 Solve problems based on various communication systems
				CO:3 Analyze different modulation-demodulation techniques
				CO:4 Evaluate performance parameters of communication systems
				CO:5
2	I	EC2133	Analog Communication lab	CO:1 Demonstrate different modulation and demodulation waveforms in time and frequency domain.
				CO:2 Analyse different modulation-demodulation techniques
				CO:3 Interpret result and prepare report
				CO:4
				CO:5
	III	EC2012	Electronics Devices	Describe fundamentals of semiconductor devices
				Explain working principle of various solid state devices
				Illustrate various applications of electronics devices
				Analyze different biasing circuits and frequency models
		EC2032	Digital System Design	State fundamental knowledge of digital design
				Apply knowledge for real-time application
				Illustrate combinational and sequential circuits
				Design combinational and sequential circuits
		EC2052	Analog Communication	1. Describe the basic concepts of communication systems.
				2. Solve problems based on different communication signals.
				3. Develop simple systems for generating and demodulating am and fm signals.

			4. Explain different types of pulse modulation systems.
			5. Compare the performance of various modulation systems
	EC2072	Network Theory	Analyze ac & dc circuits
			Illustrate resonance in series & parallel circuit
			Calculate different parameters of electrical circuits
			Design analog passive filters & attenuators
	SH2112	Engineering Mathematics III	Build and test circuit as per the requirement
			Observe and plot the frequency response of amplifier
			Interpret results of experiment and compared with measured values
			Communicate results and observations and write report
	EC2092	Comprehensive Exam I	Demonstrate overall understanding of core subjects together.
			Manage time to solve critical problems in core subjects.
			Apply appropriate mathematical tools and techniques for quick analysis of the problem.
			Understand self intellectual level to prepare for future competitive exam.
	EC2112	Electronics Devices Lab	Build and test circuit as per the requirement
			Observe and plot the frequency response of amplifier
			Interpret results of experiment and compared with measured values
			Communicate results and observations and write report
	EC2132	Digital System Design Lab	Apply boolean laws/k-map-method to reduce a given boolean function
			Demonstrate the operation of combinational and sequential circuits for various practical applications
			Interpret results and compare with experimental values

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Communicate effectively through lab journals
		EC2152	Analog Communication Lab	Analyze & design simple analog communication systems
				Illustrate amplitude and frequency modulation and demodulation methods
				Draw different modulation and demodulation waveforms and frequency spectrums.
				Demonstrate different types of pulse modulation systems
				Conduct the experiments in group and write reports.

1	II	EC2083	Signals & Systems	CO:1 Describe mathematical description and representation of continuous time and discrete time signals & systems.
				CO:2 Determine the response of LTI systems using Convolution.
				CO:3 Apply knowledge of transform theory techniques for signal and system analysis.
				CO:4 Analyze signals and systems in frequency domain using Fourier transform.
				CO:5 Demonstrate use of MATLAB to manipulate signals and systems.
2	II	EC212	Linear Integrated Circuit & Applications	CO:1 Describe fundamentals of Linear Integrated Circuits.
				CO:2 Analyse different AC and DC parameters of Operational Amplifier.
				CO:3 Design various applications of Operational Amplifier.
				CO:4 Elaborate fundamentals and applications of special Integrated Circuits.
3	II	EC220	Linear Integrated Circuits & Applications Lab	CO:1 Analyze different parameters of various configurations of Op-Amp.
				CO:2 Design various applications of Op-Amp.
				CO:3 Interpret theoretical and practical results.
				CO:4 Communicate effectively through lab journals.
4	II	EC2042	Microcontroller	CO:1 Describe basic fundamentals of pic microcontroller

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				CO:2 Write programs for pic microcontroller
				CO:3 Interface peripherals with pic microcontroller
				CO:4 Develop an embedded application using pic microcontroller
				CO:5
5	II	EC2142	Microcontroller Lab	CO:1 Install configure and utilize the mplab tool for pic microcontroller programming.
				CO:2 Write programs for pic microcontroller
				CO:3 Compile debug and test programs for pic microcontroller
				CO:4 Develop application using pic microcontroller
				CO:5

1	I	EC315	VLSI Testing & Verification	CO:1 Apply techniques to improve testability of VLSI circuits.
				CO:2 Use logic simulation methods, ATPG, BIST and boundary scan techniques in testing of VLSI circuits.
				CO:3 Analyze design of VLSI circuits by application of functional, timing and formal verification methods.
2	I	EC311	Information Theory and Coding	CO:1 Explain different concepts in information theory and coding.
				CO:2 Solve numerical on information theory, source coding and channel coding and error control coding.
				CO:3 Apply various theorems of encoding, error control etc. on signals.
				CO:4 Analyse various channel coding and error control techniques.
				CO:5

		CE2262	Engineering Mechanics	Identify various forces and their effects, to analyze real life problems
				Analyze engineering problems applying conditions of equilibrium
				Determine centroid & moment of inertia of the geometrical plane lamina
				Apply fundamental concepts of kinematics and kinetics to analyze practical problems
IV				

	EC2022	Analog Circuits	<p>Interprete different parameters of various configurations of Operational Amplifier</p> <p>Analyze various applications of Operational Amplifier</p> <p>Explain various oscillators and active filters</p> <p>Illustrate waveform generators using special IC s</p>
	EC2042	Microcontrollers	<p>1. Describe basic fundamentals of pic microcontroller</p> <p>2. Write programs for pic microcontroller</p> <p>3. Interface peripherals with pic microcontroller</p> <p>4. Develop an embedded application using pic microcontroller</p>
	EC2062	Digital Communication	<p>Explain different concepts of digital communication systems</p> <p>Solve numerical on statistical theory, source coding &amp; channel coding</p> <p>Apply various theorems of encoding, error control etc on signals</p> <p>Analyze various digital modulation and channel coding techniques</p>
	EC2082	Signals and Systems	<p>Classify continuous and discrete-time signals and systems</p> <p>Illustrate use of convolution and impulse response in lti systems</p> <p>Apply mathematical techniques to represent signals and systems</p> <p>Make use of transform theory techniques for system analysis</p> <p>Distinguish fourier techniques for frequency-domain analysis</p>
	EC2102	Comprehensive Exam II	<p>Demonstare overall understanding of core subjects together.</p> <p>Mange time to solve critical problems in core subjects.</p> <p>Apply aproprate mathematical tools and techniques for quick analysis of the problem.</p> <p>Understand self intelectual level to prepare for future competitive exam.</p>

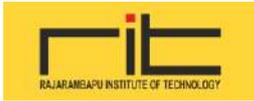

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	CE2282	Engineering Mechanics Lab	Identify various forces and their effects, to analyze real life problems
			Analyze engineering problems applying conditions of equilibrium
			Determine centroid & moment of inertia of the geometrical plane lamina
			Apply fundamental concepts of kinematics and kinetics to analyze practical problems
	EC2122	Analog Circuits Lab	Analyze different parameters of various configurations of Operational Amplifier
			Design various applications of Operational Amplifier
			Interprete theoretical & practical results
			Communicate effectively through lab journals
	EC2142	Microcontrollers Lab	1. install configure and utilize the msp430 tool for pic microcontroller programming.
			2. write programs for pic microcontroller
			3. compile debug and test programs for pic microcontroller
			4. develop application using pic microcontroller
	EC2162	Digital Communication Lab	Calculate PDF, CDF, mean and variance of continuous and discrete random variables using simulation tool
			Demonstrate different modulation and shift keying techniques
			Write necessary reports and conduct the experiments in group
SH2172	Environmental Science	Interpret impacts of human activities on natural resources and its control measure	
		Apply ecological knowledge to solve environmental problems	
		Select the appropriate technology to control environmental pollution	
		Plan waste management and disaster management practices.	
		Justify methods to assess impacts of developmental activities on environment.	

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			Analyze environmental change and its social impacts
V	EC3012	Digital Signal Processing	Relate effect of computation accuracy on performance of digital signal processing system
			Represent signals mathematically in continuous and discrete-time, and in the frequency domain.
			Analyze discrete-time systems using z-transform
			Describe the Discrete-Fourier Transform (DFT) and the FFT algorithms.
			Design digital filters for various applications.
	EC3032	Power Electronics	Discuss characteristics, ratings and drive circuits of the power devices
			Analyze the operation of power electronics converters, inverters and drives
			Determine performance parameters of the converters and inverters
			Design switching control circuit to meet desired specifications.
	EC3052	Product Design	Describe the stages of product design and development
			Apply various concepts for product design.
			Devise product testing methods.
			Explain the processes and importance of documentation.
	EC3072	Electromagnetic Waves & Antenna Theory	Apply the knowledge of vector algebra and co-ordinate system to formulate and solve electromagnetic field problems.
			Use and apply basics of electric and magnetic fields to solve the electrostatics and magnetostatics problems.
			Solve transmission line and Wave propagation problems.
			Explain basics of antennas.
EC3092	Program Elective - I ECS_ ITC	Able to use Mathematics, investigate existing techniques-To have electronics systems	
		Analyze coding techniques with mathematics using different software-To Demonstrate in systems	

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		<p>Apply research based knowledge of coding.- To Analyze the system</p> <hr/> <p>Analyze coding and error correction techniques considering ethical aspects and communicate effectively by demonstrating engineering principles with life long learning.-Demonstrate effectively</p> <hr/>
EC3172	Program Elective - I CS	<p>Identify different mathematical models of the control systems</p> <hr/> <p>Design and analyze the system parameters to meet performance specifications in time and frequency domain.</p> <hr/> <p>Comment on stability of control system using different methods</p> <hr/> <p>Compare different control system and compensators</p> <hr/>
EC3192	Comprehensive Exam III	<p>Demonstrate overall understanding of core subjects together.</p> <hr/> <p>Manage time to solve critical problems in core subjects.</p> <hr/> <p>Apply appropriate mathematical tools and techniques for quick analysis of the problem.</p> <hr/> <p>Understand self intellectual level to prepare for future competitive exam.</p> <hr/>
EC3212	Digital Signal Processing Lab	<p>Design and simulate the working of given digital signal processing techniques</p> <hr/> <p>Describe techniques available for implementation of digital signal processing system</p> <hr/> <p>Write relevant conclusion on the performance of designed digital signal processing system</p> <hr/> <p>Present and write laboratory reports in desired format in grammatically correct language</p> <hr/>
EC3232	Power Electronics Lab	<p>Interpret v-i characteristics of power electronics devices</p> <hr/> <p>Experiment power electronics converter for various conditions</p> <hr/> <p>Design and test power electronic converter.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		Write report on the conduction of experimentation.
EC3235	Object Oriented Programming using C++ Lab	Write, debug, and test basic cpp codes using the object oriented approaches introduced in the course.
		Discuss and analyze c++ problems in an object-oriented programming tool.
		Evaluate the performance of developed c++ program.
		Present and write laboratory reports in desired format in grammatically correct language.
EC3272	Antenna Lab	Measure and analyze the parameters of the different antennas
		Design and Simulate different types of Antennas using Electromagnetic Field solver
		Analyze the performance of the different types of antennas
		Demonstrate ability to work effectively in a team
SH3032	Aptitude Training I	Develop thorough conceptual understanding and logical approach towards solving Aptitude and Reasoning problem.
		Write use of basic aptitude terms of percentage, average, ratios and application of business aptitude terms of profits and interests.
		Develop a bridge in analogies, series and visualizing directions.
EC3292	Summer Internship	Demonstrate skills to use modern engineering tools, software, and equipment to solve real world problems.
		Apply knowledge of professional and ethical responsibilities.
		Communicate in verbal and written form.
		Write a detailed report on Summer Internship

K. E. Society's

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	EC4013	Computer Network	CO:1 Describe the networking concepts
				CO:2 Formulate Algorithms of error correction and congestion
				CO:3 Analyze the performance of the network by implementing various algorithms
				CO:4 Illustrate network security aspects.
				CO:5 Design network for specific application
2	I	EC4192	Computer Architecture	CO:1 Describe computer architecture concepts and mechanisms related to the design of modern processors, memories, and networks and explain how these concepts and mechanisms interact.
				CO:2 Evaluate various design alternatives and make a compelling quantitative and/or qualitative argument for why one design is superior to the other approaches.
				CO:3 Demonstrate the ability to implement and verify designs of varying complexity at the register-transfer-level.
				CO:4 Communicate with i/o devices and standard i/o interfaces.
				CO:5 Create new designs at the register-transfer-level and the associated effective testing strategies.
3	I	EC4132	Biomedical Electronics	CO:1 Analyze the biological processes like other electronic processes
				CO:2 Recognize the application of the electronic systems in biological and medical applications.
				CO:3 Signify the importance of safety aspects in the medical field

- **Department Name :-Electronics and Telecommunication Engineering**
- **UG Program Name :-M. Tech. Electronics**
- **Vision and Mission :-**

<b>Vision</b>	Promote excellence in the field of Electronics & Telecommunication Engineering and allied areas through quality education and research to provide valuable assets for industry and society with global perspective
<b>Mission</b>	<ul style="list-style-type: none"> <li>• To provide quality education through industry ready curriculum, effective teaching learning process and stateof-art infrastructure to develop global competency.</li> <li>• To inculcate research aptitude leading to patents and publications in refereed journals.</li> <li>• To imbibe professional ethics, leadership skills, social, cultural &amp; environmental awareness with a passion for lifelong learning.</li> <li>• To strengthen relationships with industry, society, government bodies and alumni</li> </ul>

Sr. No.	Program Outcomes
13.	<p>PO1:An ability to independently carry out research /investigation and development work to solve practical problems.</p> <p>PO2:An ability to write and present a substantial technical report/document.</p> <p>PO3:Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.</p> <p>PO4:Adapt professional, ethical and moral responsibilities.</p> <p>PO5:Use knowledge of Project Management and Finance to tackle administrative responsibilities.</p> <p>PO6:Explore ideas and engage in lifelong learning.</p>

Course Code	Course Name	CO	CO Statement

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

EEE119	Industrial Automation Lab	CO1	Develop a ladder program for the given application.
		CO2	Use PLC to control the output devices.
		CO3	Measure the performance parameters of the system.
		CO4	Interpret the results of the experimentation.
		CO5	Write a report on the conduction of the experiments.
EEE121	Embedded Systems and IoT Lab	CO1	Use real IoT protocols for communication and transfer IoT data to the cloud.
		CO2	Design an IoT device to work with a Cloud Computing platform.
		CO3	Implement IoT systems using sensors, hardware, and open-source IoT platforms.
		CO4	Study the security and privacy issues in IoT.
EEE123	Soft Computing Lab	CO1	Analyze the applications of fuzzy logic.
		CO2	Evaluate the applications of soft computing.
		CO3	Interpret the applications of hybrid systems.
EEE1255	Advanced Digital Signal Processing Lab	CO1	Design digital signal processing systems based on given specifications.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO2	Develop MATLAB programs to simulate the working of DSP systems.
		CO3	Analyze the performance of digital signal processing systems.
		CO4	Demonstrate effectively through oral/lab reports.
EEE127	Machine Learning Lab	CO1	Demonstrate supervised and unsupervised algorithms.
		CO2	Design various applications using machine learning.
		CO3	Verify practical and theoretical results.
		CO4	Improve the ability to communicate effectively through written lab journals.
EEE102	Optimization Techniques	CO1	Formulate engineering problems into an optimization framework.
		CO2	Acquire efficient computational procedures to solve optimization problems.
		CO3	Analyze various evolutionary optimization techniques.
EEE104	FPGA Based Digital Design	CO1	Describe VLSI front-end design of combinational and sequential systems.
		CO2	Model VLSI circuits and systems using Verilog HDL.
		CO3	Analyze digital designs in terms of various parameters.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO4	Design and synthesize various digital modules.
EEE106	Advanced Communication Engineering	CO1	Describe different types of path loss models.
		CO2	Design RF links, microwave networks, and circuits.
		CO3	Compute parameters of microwave networks and circuits.
		CO4	Analyze different types of antennas and microwave circuits.
EEE108	Automotive Electronics and Electrical Systems	CO1	Describe the use of electrical and electronic systems in vehicles.
		CO2	Summarize various types of sensors and actuators for modern automobiles.
		CO3	Illustrate vehicle communication protocols.
		CO4	Classify vehicle batteries and charging systems.
		CO5	Hypothesize the concept of hybrid vehicles.
EEE110	Digital Image Processing	CO1	Explain different concepts and processes in digital image processing.
		CO2	Apply different image processing operations on an image.
		CO3	Analyze various operations on images using different tools.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO4	Compare filtering, enhancement, segmentation, and classification techniques used in image processing.
		CO5	Design various applications in Image Processing.
<b>Course Code</b>	<b>Course Name</b>	<b>CO</b>	<b>CO Statement</b>
EEE1125	Biomedical Signal Processing	CO1	Analyze genesis of biomedical signals such as the action potential, EMG, ECG, EEG, and heart sound signals.
		CO2	Describe signal processing techniques for filtering, noise removal, and cancellation of interference and characterization of signals.
		CO3	Design and implement techniques for the detection of events such as the QRS complex, heart sounds, and murmurs.
EEE114	Artificial Intelligence	CO1	Apply Artificial Intelligence techniques for problem solving.
		CO2	Comprehend the abstractions and reasoning for Intelligent Agents.
		CO3	Analyze and design a real-world problem for implementation.
		CO4	Develop knowledge of decision-making and learning methods.

K. E. Society's

## Rajarambapu Institute of Technology, Rajaramnagar

(An Empowered Autonomous Institute, affiliated to SUK)

EEE116	Cloud Computing	CO1	Apply the analytics in cloud to extract information.
		CO2	Analyze the cloud information.
		CO3	Deploy their data in the cloud for simple applications.
EEE118	Green Wireless Communications	CO1	Recognize the challenges in energy efficiency and spectral efficiency for digital data transmission.
		CO2	Select methods to manage the dynamic loads of mobile communications for energy saving.
		CO3	Indicate the design practices for power minimization at cellular base station.
		CO4	Practice cell deployment strategies for efficient network management.
		CO5	Conceptualize Smart City essentials.
SHP552	Framework of Indian Constitution	CO1	Realize the significance of the Constitution of India to students from all walks of life.
		CO2	Identify the importance of fundamental rights as well as fundamental duties.
		CO3	Understand the functioning of Union, State, and Local Governments in Indian federal systems.
		CO4	Learn procedures and effects of emergency, composition,

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			and activities of election commissions.
EEE122	Digital Design Lab	CO1	Design circuits of digital VLSI systems.
		CO2	Model VLSI circuits and systems using Verilog HDL.
		CO3	Use tools and techniques to perform experiments and verify the results.
		CO4	Demonstrate effectively through oral/lab report.
EEE124	Advanced Communication Lab	CO1	Design and simulate different types of antennas and microwave structures in electromagnetic field solvers.
		CO2	Analyze different parameters of antennas and microwave structures.
		CO3	Compare the performance of different types of antennas and microwave structures.
EEE126	Automotive Electronics Lab	CO1	Describe automotive system modules.
		CO2	Demonstrate multifunction testers.
		CO3	Interpret the findings of automotive systems.
		CO4	Write reports in an appropriate format.
EEE128	Digital Image Processing Lab	CO1	Demonstrate image enhancement and image filtering algorithms.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO2	Design various applications using image processing.
		CO3	Verify practical and theoretical results.
		CO4	Improve the ability to communicate effectively through written lab journals.
EEE1130	Biomedical Signal Processing Lab	CO1	Realize bio-signals such as ECG, EEG, and EMG.
		CO2	Analyze bio-signals and biomedical devices.
		CO3	Apply signal processing to the bio-signal.
		CO4	Interpret normal and abnormal bio-signals.
<b>Course Code</b>	<b>Course Name</b>	<b>CO</b>	<b>CO Statement</b>
EEE1325	Mini Project	CO1	Select the title of the mini-project and formulate its objectives correctly.
		CO2	Develop, simulate, and implement the system by complying with desired technical specifications.
		CO3	Analyze and synthesize obtained results in theoretical and practical contexts.
		CO4	Present findings in logical order.
		CO5	Write a report to document his/her findings.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

EEE2015	Industry Internship	CO1	Apply engineering knowledge learned during the program.
		CO2	Propose creative and innovative solutions to the given problem.
		CO3	Work in a multi-disciplinary setting.
		CO4	Show concern for society, environment, and other social concerns.
		CO5	Demonstrate given tasks according to industrial needs with full integrity and responsibility.
MOE2011	Artificial Intelligence - Machine Learning	CO1	Describe central machine learning methods and their relation to artificial intelligence.
		CO2	Differentiate between supervised and unsupervised learning techniques.
		CO3	Apply the ML algorithms to real-world problems.
		CO4	Optimize the models learned and report on the expected accuracy.
		CO5	Evaluate a given problem and apply appropriate machine learning techniques.
MOE2021	Creative Thinking: Tools and Techniques	CO1	Comprehend the importance of tackling global challenges as well as everyday problem-solving scenarios.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO2	Apply brainstorming techniques in group activities.
		CO3	Be proficient in applying the 6 thinking hats tool in different life scenarios.
		CO4	Develop a systematic approach to idea generation through morphological analysis.
		CO5	Innovate on existing products or services using the SCAMPER method.
		CO6	Get confident with the theory of inventive problem solving (TRIZ).
MOE2041	Condition Monitoring and Signal Processing	CO1	Identify maintenance schemes and their scope and limitations.
		CO2	Analyze machinery condition monitoring.
		CO3	Appreciate the need for modern technological approaches in maintenance.
		CO4	Emphasize modern testing equipment in failure detection.
		CO5	Identify vibration measurement and lubrication oil analysis techniques.
MOE2051	Aircraft Conceptual Design	CO1	Analyze the design process of an aircraft and decide its configuration.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO2	Choose the type of power plant as per flight regime.
		CO3	Design the fuselage layout and wing configuration.
		CO4	Evaluate lift, drag, and mass for the design synthesis process.
		CO5	Examine the influence of design requirements to derive optimized designs.
MOE2060	Augmented Reality and Virtual Reality	CO1	Define the basic concepts of Virtual and Augmented Reality.
		CO2	Identify differences in AR/VR concepts and technologies.
		CO3	Describe fundamental concepts related to VR such as immersion and engagement.
		CO4	Evaluate usability and critique user experiences of AR/VR.
		CO5	Design and prototype effective AR/VR applications using Unity for various applications.
MOE2070	Industrial Instrumentation	CO1	Elaborate on the working principle of different transducers.
		CO2	Select suitable transducers for specific applications.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO3	Justify the use of specific measurement techniques for specific tasks.
		CO4	Evaluate the calibration and interfacing of transducers.
MOE2080	Advanced Mechatronics Systems	CO1	Explain mechatronics systems.
		CO2	Analyze mechatronics-based systems.
		CO3	Model, simulate, and verify mechatronics systems.
		CO4	Identify electrical, hydraulic, and pneumatic components.
EEE2035	Dissertation Phase I	CO1	Identify research opportunities in multidisciplinary domains.
		CO2	Formulate the problem statement and its objectives correctly.
		CO3	Apply principles of project management during development.
		CO4	Present a synopsis in logical order.
		CO5	Write a synopsis of the proposed system.
<b>Course Code</b>	<b>Course Name</b>	<b>CO</b>	<b>CO Statement</b>
EEE2035	Dissertation Phase I	CO1	Identify research opportunities in his/her domain or multidisciplinary domains.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO2	Formulate the problem statement and its objectives correctly.
		CO3	Apply principles of project management during the development of the project.
		CO4	Present a synopsis in logical order.
		CO5	Write a synopsis of the proposed system.
EEE2055	Dissertation Phase II	CO1	Identify research opportunities in his/her domain or multidisciplinary domains.
		CO2	Formulate the problem statement and its objectives correctly.
		CO3	Develop, simulate, and implement the system by complying with desired technical specifications.
		CO4	Analyze and synthesize obtained results in theoretical and practical contexts.
		CO5	Present findings in logical order.
		CO6	Write a report on the system implementation.
		CO7	Apply principles of project management during the development of the project.
EEE2025	Dissertation Phase III	CO1	Identify research opportunities in his/her

			domain or multidisciplinary domains.
		CO2	Formulate the problem statement and its objectives correctly.
		CO3	Develop, simulate, and implement the system by complying with desired technical specifications.
		CO4	Analyze and synthesize obtained results in theoretical and practical contexts.
		CO5	Present findings in logical order.
		CO6	Write a report on the system implementation.
		CO7	Apply principles of project management during the development of the project.
EEE2045	Dissertation Viva Voce (Dissertation Phase-IV)	CO1	Identify research opportunities in his/her domain or multidisciplinary domains.
		CO2	Formulate the problem statement and its objectives correctly.
		CO3	Develop, simulate, and implement the system by complying with desired technical specifications.
		CO4	Analyze and synthesize obtained results in theoretical and practical contexts.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO5	Present findings in logical order.
		CO6	Write a report on the system implementation.
		CO7	Apply principles of project management during the development of the project.

Course Code	Course Name	CO	CO Statement
EEE1015	Industrial Automation	CO1	Explain the functions of components of industrial automation system.
		CO2	Write PLC ladder programs for the given applications.
		CO3	Interface the given I/O devices with the PLC module.
		CO4	Design an automation system for industrial applications.
EEE103	Embedded Systems and IoT	CO1	Discuss on IoT enabled hardware, various protocols and software.
		CO2	Identify IoT Technologies and their types that are in use.
		CO3	Analyze and evaluate the data received through sensors in IoT.
		CO4	Demonstrate IoT systems using sensors, hardware, and open-source IoT platforms.
EEE1055	Soft Computing	CO1	Describe soft computing techniques and their roles in building intelligent machines.
		CO2	Comprehend the abstractions and reasoning for Intelligent Agents.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO3	Design a real-world problem for implementation.
		CO4	Develop knowledge of decision-making and learning methods.
EEE1075	Advanced Digital Signal Processing	CO1	Explain techniques available for implementation of digital signal processing systems.
		CO2	Design and simulate the working of given digital signal processing systems.
		CO3	Evaluate the performance of digital signal processing systems.
		CO4	Interpret the performance of digital signal processing systems.
EEE109	Machine Learning	CO1	Describe various algorithms in machine learning.
		CO2	Analyze different architectures and basic techniques used in ML.
		CO3	Apply mathematical models and algorithms to solve real-world problems.
		CO4	Design various machine learning applications.
EEE111	Optical Communication	CO1	Describe components of optical fiber communication.
		CO2	Design link for optical fiber communication systems.
		CO3	Analyze the performance of analog and digital optical fiber systems.
EEE1135	Network Security	CO1	Describe the network security issues and service attacks.
		CO2	Apply network layer security protocols, Transport layer security protocols, and Web security protocols.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		CO3	Analyze security protocols for various parameters.
EEE115	Micro Electro Mechanical Systems (MEMS)	CO1	Describe MEMS material and fabrication techniques.
		CO2	Discuss various sensors and actuators used in MEMS.
		CO3	Analyze various applications of MEMS in interdisciplinary areas.
EEE1175	Research Methodology and IPR	CO1	Formulate a research problem.
		CO2	Analyze research-related information.
		CO3	Prepare and present research proposals/papers by following research ethics.
		CO4	Describe the nature and processes involved in the development of intellectual property rights.
SHP5511	Technical Communication	CO1	Use grammatically correct sentences in different types of technical writings.
		CO2	Apply technical writing skills to improve the readability of documents.
		CO3	Demonstrate professional skills required in job interviews and at the workplace.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

- **Department Name :- Information Technology**
- **UG Program Name :- B. Tech. in Computer Science and Information Technology**
- **Vision and Mission :-**

<b>Vision</b>	To become a prominent department of Information Technology producing competent IT professionals with research and multidisciplinary skills, inculcating moral values and societal concerns.
<b>Mission</b>	<ul style="list-style-type: none"> <li>▪ To offer high quality education through state of art curriculum and innovative teaching &amp; learning practices.</li> <li>▪ To establish state of art laboratories and center of excellence in the field of technology.</li> <li>▪ To adopt professional practice, standards and values.</li> <li>▪ To inculcate problem solving aptitude in graduates with lifelong learning skills to become valuable resource for IT industry and society.</li> <li>▪ To create, share, and apply knowledge in Computer Science and Information Technology, including multidisciplinary areas that extend the scope of Computer Science and Information Technology to benefit society.</li> </ul>

Sr. No.	Program Outcomes
59.	<b>PO1: Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
60.	<b>PO2: Problem analysis:</b> Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.
61.	<b>PO3: Design/Development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.
62.	<b>PO4: Conduct investigations of problems:</b> Use fundamental knowledge and engineering skills including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
63.	<b>PO5: Modern tool usage:</b> Create, select, and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
64.	<b>PO6: The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
65.	<b>PO7: Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.
66.	<b>PO8: Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
67.	<b>PO9: Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
68.	<b>PO10: Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
69.	<b>PO11: Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
70.	<b>PO12: Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
---------	---------------------------

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

4.	<b>PSO1:</b> Apply the relevant computational algorithms and techniques to design solutions in multidisciplinary domains.
5.	<b>PSO2:</b> Demonstrate skills in emerging IT technologies like Artificial Intelligence, Data Science Cloud Computing, IIoT and Cyber Security.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	CI2012	Discrete Mathematics	1. Evaluate logic statements using the properties of logic. 2. Apply the concepts in discrete data structures such as sets, relations and functions to solve the problems. 3. Use elementary combinatorics to solve counting problems. 4. Solve examples of lattices, algebraic structures. 5. Prove the theorems and properties of lattices, algebraic structures, graphs. 6. Apply graph theory concepts to solve problems of connectivity.
2.		CI2032	Data Structures	1. Describe the basic terminologies of data structures. 2. Write algorithms for operations performed on data structures 3. Demonstrate the working of various data structures like stack, queue, linked list, tree, graph, etc. 4. Compare static and dynamic representations of data structures 5. Choose appropriate data structures while developing solution to the problem

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

3.		CI219	Digital Logic and Computer Organization	<ol style="list-style-type: none"> <li>1. Comprehend computer structure, types, operational concepts, performance, parallelism, history, and digital logic gates.</li> <li>2. Apply Boolean algebra concepts, perform binary arithmetic operations, understand number base conversions, analyse and manipulate different number representations, utilize various codes, and simplify logic functions using K-Maps up to 4 variables.</li> <li>3. Design combinational circuits and sequential circuits.</li> <li>4. Demonstrate proficiency in instruction set architecture, RISC and CISC instruction sets, instruction execution and branching.</li> <li>5. Explain the I/O organization principle and the memory system concepts.</li> <li>6. Describe the pipelining concepts.</li> </ol>
4.		CIMD20 1	Data Structures  (MDM-I)	<ol style="list-style-type: none"> <li>1. Describe the basic terminologies of data structures.</li> <li>2. Write algorithms for operations performed on data structures</li> <li>3. Demonstrate the working of various data structures like stack, queue, linked list, tree, graph, etc.</li> <li>4. Compare static and dynamic representations of data structures</li> <li>5. Choose appropriate data structures while developing solution to the problem.</li> </ol>
5.		SH2174	Environment al Science	<ol style="list-style-type: none"> <li>1. Apply interdisciplinary knowledge in environmental science by integrating concepts and principles from various fields of science and engineering to address environmental issues.</li> <li>2. Evaluate environmental impacts of human activities on ecosystems and on the environment.</li> <li>3. Use scientific approach to identify and solve environment related problems.</li> <li>4. Design sustainable solutions to address environmental challenges by considering renewable energy sources, waste</li> </ol>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<p>management strategies conservation measures, and environmental policies.</p> <p>5. Participate in group work to become acquainted with the importance of teamwork, collaboration.</p> <p>6. Develop presentation and report writing skills.</p>
6.		CI2052	Object Oriented Programming with Java Lab	<p>1. Explain the concepts and terminologies in object-oriented concepts and java programming language.</p> <p>2. Apply object-oriented programming features and concepts for solving given problem.</p> <p>3. Develop the java application using the collection framework to solve real word problem.</p> <p>4. Apply the concepts of package, multithreading and exception handling to develop efficient and error free codes.</p> <p>5. Use the lambda expression to iterate, filter and extract data from collection and streams to manipulate and transform the data.</p>
7.		CI2072	Data Structures Lab	<p>1. Describe the basic terminologies of data structures and algorithms</p> <p>2. Write algorithms for operations to be performed on data structures</p> <p>3. Elaborate advanced applications in different sectors of cloud computing market.</li> </ol>
2.		CI4031	Soft Computing (PE-III)	<ol style="list-style-type: none"> <li>1. Gain understanding of various soft computing techniques.</li> <li>2. Identify and design fuzzy based systems.</li> <li>3. Analyze performance of different evolutionary algorithms for mathematical and real-world optimization problems.</li> </ol>

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<ol style="list-style-type: none"> <li>4. Explore different selection, crossover and mutation operators in different types genetic algorithms.</li> <li>5. Identify and formulate complex problems from different engineering domains.</li> </ol>
3.		CI4051	Human Computer Interaction (PE-III)	<ol style="list-style-type: none"> <li>1. Explain the concepts of human computer interaction.</li> <li>2. Analyze the steps involved in the design process of human computer interaction.</li> <li>3. Design graphical user interface for given specification.</li> <li>4. Describe special considerations in designing user interfaces for wellness.</li> <li>5. Discuss and analyze research in the field of HCI.</li> </ol>
4.		CI4071	Software Testing (PE-III)	<ol style="list-style-type: none"> <li>1. Describe software testing fundamentals.</li> <li>2. Explain different software testing types.</li> <li>3. Design/build test cases based on different test case design techniques.</li> <li>4. Illustrate the different stages of Defect Management process.</li> <li>5. Make use of modern automation tools for testing a given software system.</li> <li>6. Produce test case reports using manual and automation testing for given case studies.</li> </ol>
5.		CI431	Software Project Management (PE-III)	<ol style="list-style-type: none"> <li>1. Identify the key phases of Software project management.</li> <li>2. Create the systematic project plans for any software projects.</li> <li>3. Estimate the effort and cost needed to implement the software projects.</li> <li>4. Prepare an activity plan for a project and estimate the overall duration.</li> <li>5. Develop strategies to calculate risk factors involved in Software projects.</li> </ol>

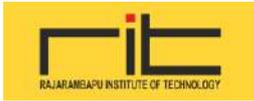

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				6. Assess the Quality management through different types of metrics used in software development.
6.		CI4091	Internet of Things (PE-IV)	<ol style="list-style-type: none"> <li>1. Describe the applications, basic terminologies and fundamentals of IoT.</li> <li>2. Illustrate the different IoT platforms, communication standards and protocols.</li> <li>3. Identify the security issues and challenges in IoT.</li> <li>4. Design and develop the IoT solutions for real word problems.</li> <li>5. Prepare an IoT case study for smart applications.</li> </ol>
7.		CI4111	Computer Vision (PE-IV)	<ol style="list-style-type: none"> <li>1. Identify basic concepts, terminology, theories, models and methods in the field of computer vision.</li> <li>2. Choose the appropriate image processing methods for image segmentation.</li> <li>3. Apply computer vision techniques for solving practical problems on Area Extractions.</li> <li>4. Analyze the accuracy of the methods used in Region Analysis.</li> <li>5. Illustrate basic methods of computer vision related to Facet Model Recognition</li> <li>6. Explain the different forms of Knowledge Representation methods used in computer vision.</li> </ol>
8.		CI4131	Data Analytics (PE-IV)	<ol style="list-style-type: none"> <li>1. Differentiate the characteristics of datasets and compare the trivial data and big data for various applications.</li> <li>2. Select and implement techniques and computing environment that are suitable for the data analytical applications.</li> </ol>

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<ol style="list-style-type: none"> <li>3. Solve problems associated with the data characteristics such as high dimensionality, dynamically growing data and in particular scalability issues.</li> <li>4. Understand and apply scaling up machine learning techniques and associated computing techniques and technologies for data analytical.</li> <li>5. Provide problem solutions for multi-core or distributed, concurrent/Parallel environments.</li> </ol>
9.		CI433	Bioinformatics (PE-IV)	<ol style="list-style-type: none"> <li>1. Extract information from different types of bioinformatics data (gene, protein, disease, etc.), including their biological characteristics and relationships</li> <li>2. Employ different data representation models and formats used for bioinformatics data representation, including markup languages such as SBML and CellML, and ontologies such as GO ontology</li> <li>3. Apply the different approaches used for data integration and data management, including data warehouse and wrapper approaches</li> <li>4. Analyze processed data with the support of analytical and visualization tool</li> <li>5. Interact with non-bioinformatics professionals, such as biologists and biomedical researchers, to better understand their bioinformatics needs for improved support and service delivery</li> <li>6. Design and develop bioinformatics solutions by adapting existing tools, designing new ones, or a combination of both.</li> </ol>
10.		CI4151	Blockchain Technology (PE-V)	<ol style="list-style-type: none"> <li>1. Differentiate Blockchain models.</li> <li>2. Analyze Components &amp; Consensus models of Blockchain.</li> <li>3. Discuss Forking &amp; Cryptographic concepts of Blockchain.</li> <li>4. Describe applications of Blockchain in the sector of Trade, Government &amp; Finance</li> </ol>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				5. Explain research aspects of Blockchain
11.		CI4171	Virtual Reality and Augmented Reality (PE-V)	<ol style="list-style-type: none"> <li>1. Describe the basic concept and framework of virtual reality and development tools.</li> <li>2. Illustrate the principles and multidisciplinary features of virtual reality</li> <li>3. Describe the technology for multimodal user interaction and perception in VR (visual, audial and haptic interface and behavior).</li> <li>4. Discuss the technologies for managing large-scale VR environment in real time.</li> <li>5. Analyze the virtual reality issues.</li> </ol>
12.		CI4211	Parallel Computing (PE-V)	<ol style="list-style-type: none"> <li>1. Summarize parallel programming technique and compare it with Sequential Programming.</li> <li>2. Develop programs to use multi-core processors using OpenMP.</li> <li>3. Write a parallel program using MPI</li> <li>4. Explore different features of the CUDA framework.</li> <li>5. Identify the different CUDA capable GPU platforms.</li> <li>6. Design a parallel algorithm for any compute-intensive application.</li> </ol>
13.		CI4231	Big Data (PE-V)	<ol style="list-style-type: none"> <li>1. Understand the need of Big data Technologies.</li> <li>2. Write program using Map Reduce framework.</li> <li>3. Describe Hadoop and its components</li> <li>4. Write the queries using HIVEQL</li> <li>5. Use Hadoop ecosystem like Pig and Hive to build application</li> </ol>
14.		CI4191	Web Technology Lab	<ol style="list-style-type: none"> <li>1. Install and Configure Web servers and application servers.</li> <li>2. Implement JSTL Tags.</li> <li>3. Design Spring Boot Applications.</li> </ol>

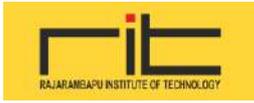

K. E. Society's

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

**UG Program**

● **Mechanical Engineering**

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

- **Department Name: - Mechanical Engineering**
- **UG Program Name: - Mechanical Engineering**
- **Vision and Mission: -**

<b>Vision</b>	To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent, innovative and entrepreneurial Mechanical Engineers.
<b>Mission</b>	<ul style="list-style-type: none"> <li>● To develop state of the art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.</li> <li>● To build the competency to transform students into globally competent mechanical engineers by imparting quality education.</li> <li>● To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices</li> </ul>

**Program Educational Objectives (PEO's)**

1. Graduates will contribute to social reformation through their devotion in science and technology leading to uplifted standard of living.
2. Graduates will provide solutions to global technological challenges being entrepreneurs, consultants and researchers following ethical practices.
3. Graduates will update themselves through lifelong learning such as higher studies, cutting edge research, skill enhancement and other professional activities.

<b>Sr. No.</b>	<b>Program Outcomes</b>
71.	Apply the knowledge of mathematics, science, engineering fundamentals, and mechanical engineering to the solution of complex engineering problems.
72.	Identify, formulate, review research literature, and analyze complex mechanical engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
73.	Design solutions for complex mechanical engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
74.	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

75.	Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex mechanical engineering activities with an understanding of the limitations.
76.	Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practices.
77.	Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
78.	Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practices.
79.	Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
80.	Communicate effectively on complex mechanical engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
81.	Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
82.	Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological changes.

Sr. No.	Program Specific Outcomes
<b>PSO_1</b>	Use Company standards, national and international standards like IS, BS, SAE, ISO, ASTM, etc. for designing and manufacturing mechanical components and systems.
<b>PSO_2</b>	Engage professionally in industries or as an entrepreneur by applying manufacturing, design, thermal and management practices.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	ME2094	Mathematics for Mechanical Engineers	1. Solve the differential equation using the appropriate concept.
				2. Determine the Laplace & inverse Laplace transform of various functions.
				3. Solve Problems on different probability distributions.
				4. Develop Fourier series of periodic functions.
2.	III	ME2114	Manufacturing Processes and Machine Tools	1. Select suitable Engineering forming process for production of component of required specification
				2. Select casting as manufacturing process suitable for the component design and production volume
				3. Select suitable furnaces in casting process as per requirement.
				4. Select appropriate joining process for given application.
				5. Illustrate and identify main parts of machine tools for metal cutting operations.
				6. Describe the Construction of different components of precision machines.
3.	III	ME2134	Engineering Thermodynamics	1. Apply thermodynamics principles to mechanical engineering applications
				2. Describe entropy, change in entropy and increase of entropy principle.
				3. Differentiate between available and unavailable energy with examples.
				4. Recognize the properties of pure substances and use thermodynamic property tables charts.
				5. Apply mathematical fundamental to study the properties of steam gas and gas mixtures

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Explain the air and vapour power cycles and calculate cycle performance.
4.	III	ME2154	Engineering Mechanics	1. Calculate resultant force of coplanar force system.
				2. Analyze engineering problems applying conditions of equilibrium
				3. Determine centroid & moment of inertia of the geometrical plane lamina.
5.	III	CEMD201	Building Construction and Planning	1. Suggest appropriate materials for building construction applications.
				2. Prepare a functional design of components of the building.
				3. Design and draw residential building using principles of planning and bye-laws.
				4. Prepare plumbing and electrification plan for the building.
				5. Explain properties of building finishing materials and application procedure.
6.	III	CSMD201	Introduction to Data Structures	1. Compare between linear and nonlinear data structures
				2. Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				3. Analyze various searching and sorting algorithms and apply it to solve particular problem.
				4. Determine a suitable data structure and algorithm to solve a real world problem
7.	III	EEMD201	Electrical Power Generation	1. List the main components of different power plants
				2. Describe the operation of various power plants used for electrical power generation.
				3. Explain working principles of various power plants

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Compare different power plants based on advantages, limitations and future prospects
				5. Draw layout of electrical power plants.
				6. Explore alternate electrical energy resources for future needs and challenges.
8.	III	ECMD201	Electronics Devices and Applications	1. Describe the fundamental concepts of electronics and working principles of different devices.
				2. Analyze different analog and digital electronics circuits.
				3. Design digital electronics circuits with truth table and logic diagram.
9.	III	CIMD201	Data Structures	1. Explain the basic terminologies of data structures.
				2. Write algorithms for operation performed on data structure array with its types.
				3. Demonstrate the working of stack, queue performed on data structures.
				4. Compare static and dynamic representations of data structures
				5. Choose appropriate data structure while developing solution to the problem.
10.	III	MEMD203	Design Thinking	1. Identify the new product opportunities and sources of new product ideas.
				2. Elaborate the product life cycle and product design process.
				3. Integrate the customer and end-consumer needs into design process.
				4. Assimilate the various product characteristics to design a novel product
				5. Participate effectively in group work sessions and teams to become acquainted with the

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				importance of teamwork and collaboration that is critical to new product success
11.	III	MCMD201	Fundamentals of Mechatronics	1. Identify various elements of mechatronics systems.
				2. Select appropriate sensor for different applications.
				3. Select appropriate Actuator and drives for different mechatronics application.
				4. Identify suitable controller/algorithms for specific mechatronic application.
				5. Analyze different circuits used for signal conditioning.
				6. Develop mechatronic system for various applications
12.	III	AIMD201	Object Oriented Programming	1. Understand the basic object oriented programming concepts and apply them in problem solving.
				2. Illustrate inheritance concepts for reusing the program.
				3. Implement program using loops, decision statements and functions in Python.
				4. Plot data using appropriate Python visualization libraries.
13.	III	RAMD201	<b>Fundamentals of Robotics &amp; Automation</b>	1. Differentiate various robotic configurations and performance metrics.
				2. Compare various end effectors, sensors, and drive systems in robotic applications.
				3. Illustrate kinematic and dynamic principles applied to robotic systems.
				4. Outline robot programming solutions for diverse applications.
				5. Distinguish various types and aspects of automation.
				6. Relate the knowledge of Programmable Logic

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Controllers (PLCs) to industrial automation tasks
14.	III	ME2174	Computer Programming C++ Lab	<ol style="list-style-type: none"> <li>1. Build Object Oriented Programs.</li> <li>2. Elaborate the concepts of “inline function”, “friend function”, “function overloading” and “operator overloading”.</li> <li>3. Extend the program by using inheritance.</li> <li>4. Use memory management technique “constructors” &amp; “destructors”.</li> </ol>
15.	III	ME2314	Engineering Mechanics Lab	<ol style="list-style-type: none"> <li>1. Verify law of polygon of forces, law of triangle of forces and principle of moment.</li> <li>2. Verify Lami's theorem.</li> <li>3. Compare coefficient of friction of various surfaces in contact.</li> <li>4. Correlate theoretical and practical results of support reactions and Centroid of plane lamina.</li> <li>5. Analyze a simple truss.</li> </ol>
16.	III	ME2334	Machine Drawing Lab	<ol style="list-style-type: none"> <li>1. Prepare free hand sketches of engineering and working drawings with dimensions following proper BIS conventions.</li> <li>2. Develop details and assembly drawings using part drawings of machine components with dimensions using CAD.</li> <li>3. Apply limits and tolerances to part and assemblies and choose appropriate fits.</li> <li>4. Interpret the symbols of welded, machining and surface roughness on the component drawings.</li> <li>5. Apply the geometrical dimensioning and tolerances to the mechanical components.</li> </ol>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Prepare details and assembly production drawings using actual measurements of part drawings of machine components with dimensions using CAD
17.	III	ME2354	Workshop Practice -I	1. Demonstrate effect of variables such as Voltage, current on welding process. 2. Produce given joint by MIG welding process. 3. Produce welding run on S.S. by TIG welding. 4. Produce welding run on Aluminum by TIG welding. 5. Produce given job with proper taper and V threading within dimensional tolerances
18.	III	ME2374	Technical Aptitude -I	1. Apply the fundamental knowledge to solve the mechanical engineering problems. 2. Develop the ability of problem solving.
19.	III/IV	SH2634	Professional Leadership Skills	1. Explain the traits of a leadership through real life examples. 2. Exhibit the ability to work effectively in team. 3. Prepare a presentation as per the audience and context requirements.
20.	III/IV	SH2614	Interpersonal Skills	1. Exhibit interpersonal communication skills. 2. Demonstrate decision-making skills. 3. Apply conflict resolution styles appropriate in different situations. 4. Demonstrate skills to manage balance in work and life.
21.	III/IV	SH2694		1. Explain structured approach to define the problem with every possible detail, identify conflicts and solve them

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Innovation Tools and Methods for Entrepreneurs	2. Apply User Journey Map to the selected problem to show user interaction at various stages 3. Analyze the solutions provided by competitors for effectiveness and gaps if any.
22.	III/IV	SH2594	Personal Effectiveness and Body Language	1. Develop skills to build self-esteem and positive attitude. 2. Develop interpersonal skills characterized by effective communication and conflict resolution. 3. Demonstrate responsiveness towards time, stress, and health issues. 4. Interpret the non-verbal behavior of a person.
23.	III	SH2734	German Language - Level III	1. Interpret the language if the next person is speaking slowly and clearly. 2. Make use of the language in routine life with the routing topics like family, shopping, work etc. 3. Demonstrate the language by self-introduction in German with simple sentences.
24.	IV	SH2644	German Language - Level IV	1. Interpret the language if the next person is speaking slowly and clearly. 2. Make use of the language in routine life with the routing topics like family, shopping, work etc. 3. Demonstrate the language by self-introduction in German with simple sentences.
25.	III	SH2714	Japanese Language - Level III	1. Make use of basic conversations in various situations. 2. Identify the sentence patterns. 3. Explain insights about the communication required for living in Japan.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Interpret Japanese work ethics required in their professional career.
26.	IV	SH2624	Japanese Language - Level IV	1. To be able to make basic conversations in various situations. 2. To recognize the sentence patterns. 3. To improve Japanese Language proficiency. 4. To give students insights about the communication required for living in Japan. 5. To expose students to the Japanese work ethics required in their professional careers.
27.	IV	ME216	Fluid Mechanics and Turbomachinery	1. Define, calculate, and measure properties of fluid 2. Apply Continuity equation, Bernoulli's equation, Equation of motion and Momentum equation for different flow system 3. Estimate forces acting on fluid & different energy losses in fluid flow. 4. Estimate forces acting on bodies submerged in fluid. 5. Explain construction, working of turbo machines and select appropriate hydraulic machine for specific applications 6. Perform basic hydraulic/thermal design and interpret performance characteristic curves.
28.	IV	ME2124	Mechanics of Solids	1. Determine types of stresses and strains induced in any machine component. 2. Draw Shear force and bending moment diagram for different types of beam. 3. Develop bending stress distribution and shear stress

K. E. Society's

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>distribution for various cross sections of beam.</p> <p>4. Estimate the slope and deflection of beams by analytical and graphical method</p> <p>5. Find the principal stress and strain for plain stress system</p> <p>6. Analyze axially loaded column for different end conditions.</p>
29.	IV	ME2144	Material Science & Metallurgy	<p>1. Explain different alloys, their properties and applications by referring equilibrium diagrams.</p> <p>2. Determine mechanical properties by destructive testing methods.</p> <p>3. Detect flaws in components by non-destructive testing methods.</p> <p>4. Select suitable heat treatment to achieve desired changes in mechanical properties of steels.</p> <p>5. Select suitable material for given engineering applications.</p> <p>6. Explain manufacturing of a component by using powder metallurgy.</p>
30.	IV	CEMD202	Building Estimation and Valuation	<p>1. Explain the types and basic requirements of the estimate.</p> <p>2. Explain measurement sheet, abstract sheet, and detailed specifications of different construction items.</p> <p>3. Prepare detailed estimate of load bearing structure and framed structure.</p> <p>4. Prepare rate analysis and bar bending schedule of different construction items.</p> <p>5. Explain the tenders and contracts.</p> <p>6. Describe basic terms of valuation.</p>
31.	IV	CSMD202		<p>1. Understand the basic object oriented programming</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Problem Solving using JAVA	concepts and apply them in problem solving. 2. Apply concept of inheritance for code reusability. 3. Develop Programs using multithreading. 4. Develop data-centric applications using JDBC. 5. Design the basics of java console and GUI based programming
32.	IV	EEMD202	Power System	1. Write the basic working principles of different generating sources. 2. Analyze different types of loads 3. Explain importance of power factor and tariffs in power system. 4. Identify various components in power transmission and distribution system. 5. Select substation equipments as per requirement.
33.	IV	ECMD202	Electronics Communication Systems	1. Describe different communication systems. 2. Explain applications of analog and digital modulation techniques. 3. Analyze different modulation and demodulation techniques. 4. Explain the use of satellite communication.
34.	IV	CIMD202	Computer Algorithms	1. Analyzing asymptotically the performance of algorithms. 2. Compare and analyze searching and sorting algorithms. 3. Apply different algorithm design techniques to solve problems like job sequencing, 4. knapsack, TSP, finding shortest path etc. 5. Apply backtracking method to solve problems like N-queens, graph coloring, sum of subsets etc.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
35.	IV	MEMD204	Behavioral Engineering and Design	1. Explain key concepts and theories related to influencing user behavior in product design.
				2. Utilize psychological principles to develop product designs that effectively address user needs and preferences.
				3. Create products that demonstrate high levels of user engagement, measured through metrics such as adoption rates and user interaction patterns.
				4. Develop products that prioritize user satisfaction and usability, as measured through user testing and feedback.
				5. Incorporate aesthetic appeal and ergonomic considerations into product designs, assessed through objective criteria such as user comfort and visual appeal ratings.
				6. Analyze user feedback and iteratively improve designs to enhance user experience, measured by improvements in user satisfaction scores or usability metrics.
36.	IV	MCMD202	Industrial Fluid Power	1. Describe the structure and function of common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors etc.
				2. Model and analyze common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors.
				3. Create & simulate basic hydraulic and pneumatic circuit diagrams for different applications.
				4. Design, develop & analyze simple hydraulic and pneumatic systems for given task

Sr. No.	Semester	Course Code	Course Name	Course Outcome
37.	IV	AIMD202	Data structure & Algorithms	1. Compare between linear and nonlinear data structures
				2. Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				3. Analyze various searching and sorting algorithms and apply it to solve particular problem.
				4. Determine a suitable data structure and algorithm to solve a real world problem
38.	IV	RAMD202	Sensors & Actuators	1. Explain the functioning of various sensors and transducers
				2. Calibrate the transducers such as accelerometers, microphones and strain gauges.
				3. Explain the characteristics of various sensors and transducers
				4. Describe the process and need for calibration.
				5. Choose the sensor for measurement of few parameters.
				6. Use the appropriate sensor and calibrate
39.	IV	SH202	मराठी भाषिक कौशल्यविकास	1. भाषा आणि व्यक्तिमत्व विकास यांमधील सहसंबंध स्पष्ट करू शकेल
				2. भाषिक कौशल्यविकास करू शकेल
				3. कथा या मराठी साहित्य प्रकाराचे विश्लेषण करू शकेल
				4. एकाकिका या मराठी साहित्य प्रकाराच्या विश्लेषणाची क्षमता प्राप्त करेल
40.	IV	SH204	हिंदी कथा साहित्य एवं प्रयोजमूलक हिंदी	1. विद्यार्थियों में मानवीय संवेदनाओं के विकास के साथ नवीन सामाजिक सांस्कृतिक बोध और जीवन मूल्यों का विकास होगा।
				2. विद्यार्थियों में साहित्य के माध्यम से कलात्मक गुणों की अभिवृद्धि होगी कला की साहित्यिक विधाओं के प्रति अभिरुचि जागृत होगी तथा रचनात्मक कौशल्य को बढ़ावा मिलेगा।
				3. विद्यार्थियों में नए वैश्विक मूल्यों के प्रति सजगता को बढ़ावा मिलेगा एवं मूल्यवादी दृष्टि के प्रति

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>दायित्व बोध उत्पन्न होगा छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।</p> <p>4. छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।</p>
41.	IV	SH2174	Environmental Science	<p>1. Apply interdisciplinary knowledge from various fields of science and engineering to address environmental issues.</p> <p>2. Evaluate environmental impacts of human activities on the environment.</p> <p>3. Use scientific approach to identify and solve environment related problems.</p> <p>4. Design sustainable solutions to address environmental challenges.</p> <p>5. Participate in group work to become acquainted with the importance of teamwork, collaboration</p> <p>6. Develop presentation and report writing skills.</p>
42.	IV	ME2204	Fluid Mechanics and Turbomachinery Lab	<p>1. Measure discharge through the fluid system</p> <p>2. Verify and apply Bernoulli's Theorem.</p> <p>3. Calculate various losses through pipes.</p> <p>4. Evaluate various efficiencies of pumps, compressors and turbines.</p> <p>5. Draw performance characteristic curves for pumps, compressors and turbines</p>
43.	IV	ME2224	CAD Modeling Lab	<p>1. Construct accurate sketches of machine parts using CAD software.</p> <p>2. Develop 3D models of machine parts by applying essential modeling commands.</p> <p>3. Assemble multiple machine components into functional</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
47.	V	ME3114	Heat and Mass Transfer	1. Explain modes of heat transfer and solve steady and unsteady state heat conduction problems
				2. Apply the principles of radiation heat transfer to engineering problems
				3. Develop and use various correlations to solve convection problems
				4. Analyse and design an indirect tube type heat exchanger
48.	V	ME313	Kinematics and Dynamics of Machines	1. Select suitable mechanism to get desired motion
				2. Analyze the mechanism for velocity and acceleration
				3. Demonstrate the gyroscopic effect and functioning of governors
				4. Evaluate dynamic forces & its effects on mechanical system
				5. Analyze vibration of single degrees of freedom system
49.	V	ME3314	Mechanics of Composite Material	1. Choose suitable composite materials based on field applications
				2. Explain different fabrication processes and perform cost comparison.
				3. Compute composite properties for given fraction of fibers and matrix.
				4. Design lamina to bring tailor made properties in composite material.
				5. Predict failure of composite laminates by selecting appropriate failure criteria.
				6. Design laminate for given loading conditions.
50.	V	ME333	Engineering Optimization	1. Apply necessary and sufficient conditions for a given optimization problem for optimality.
				2. Select appropriate solution methods and strategies for

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>solving an optimization problem</p> <p>3. Interpret and analyze the solution obtained by specific method</p>
51.	V	ME3354	Fracture Mechanics	<p>1. Apply the basic principles of Linear elastic fracture mechanics.</p> <p>2. Design the engineering components using elastic-plastic fracture mechanics principles.</p> <p>3. Explain the process of crack growth and arrest in the presence of creep.</p> <p>4. Compare the fracture behavior in metals and non-metals.</p> <p>5. Analyze the crack growth under fatigue loading.</p> <p>6. Choose the suitable computational fracture mechanics approach to solve the real mechanical engineering problem.</p>
52.	V	ME336	Python Programing	<p>1. Understand Python code for basic programming tasks.</p> <p>2. Acquire skills in handling and visualizing engineering data using Python.</p> <p>3. Write object-oriented Python programs.</p> <p>4. Apply numerical computing techniques to solve mechanical engineering problems.</p> <p>5. Develop graphical user interfaces for engineering applications.</p> <p>6. Use Python for automating tasks and extracting information from websites for engineering applications</p>
53.	V	ME3414		<p>1. Illustrate concepts related to energy audits.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Cogeneration and Waste Heat Utilization	2. Summarize the energy scenario and emphasize the importance of energy conservation. 3. Explain the principles of Co-generation and Regeneration. 4. Demonstrate various techniques for waste heat recovery. 5. Explain the elements incorporated in thermal utilities for efficient operation. 6. Describe various measures for energy conservation and analyze the financial implications for different thermal utilities.
54.	V	ME343	Alternative sources of energy	1. Explain the basic renewable energy sources like solar, wind ,biomass etc. 2. Explain various advantages and disadvantages of renewable energy sources. 3. Illustrate with different standalone off grid energy sources. 4. Explain different technology associate with solar, wind, biomass and other renewable energy sources
55.	V	ME345	Hybrid and Electric Vehicles	1. Identify the need for hybrid vehicles in today's context. 2. Explain the working of Electric Vehicles and recent trends. 3. Describe different configurations of electric and hybrid electric drive trains 4. Explain the design methodology and control strategies of hybrid drive trains. 5. Discuss different energy sources and drives required for hybrid vehicles. 6. Explain the fuel cell technology for hybrid vehicle applications.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
56.	V	ME3514	World Class Manufacturing	1. Explain characteristics of world class organization.
				2. Plot control charts and comment on the process.
				3. Elaborate the concept of TQM.
				4. Demonstrate the 8 pillars of Total productive maintenance (TPM).
				5. Demonstrate the 13 pillars of Toyota production system (TPS).
				6. Explain the six sigma methodologies.
57.	V	ME3534	Non Traditional Machining Processes	1. Compare the various nontraditional machining processes
				2. Discuss the operational principles, advantages applications, limitations of the various non-traditional machining processes
				3. Explain the material removal mechanism, effect of parameters/ factors associated with the processes on the machining performance.
				4. Select a process /a combination of processes for a specific application/ need/situation depending upon the availability of sources.
58.	V	ME359	Operations Research	7. Identify the breadth of quantitative decision situation that arise in engineering.
				8. Develop skills needed for the mathematical modelling of real world decision situations.
				9. Choose appropriate techniques and methodology to solve the problems.
				10. Ability to work in a team specifically to solve the larger problems.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
59.	V	ME363	Quality Management System	1. Explain the principles of Quality Management.
				2. Discuss the role of quality management gurus in Quality Management.
				3. Select and apply appropriate quality management tools and techniques for Quality assurance and control.
				4. Describe quality management principles for service sector.
				5. Discuss the importance of Quality management system in the organization
60.	V	ME3594	Production and Operation Management	1. Select appropriate production and operation strategies based on situation
				2. Explain the strategic importance of product and service design
				3. Describe the importance of process selection and evaluate its influence on the organization.
				4. Schedule the jobs so as to complete them in minimum makespan time
				5. Apply recent production management trends like JIT and lean philosophy in manufacturing field.
				6. Apply supply chain strategies for various industrial applications.
61.	V	ME361	Sensors and Actuators in Robotic Technology	1. Select the sensor for robotic application and design the systems.
				2. Explain image processing technique
				3. Select the actuators and configuring the parameters of Actuators

Sr. No.	Semester	Course Code	Course Name	Course Outcome
62.	V	OE347	New Product Design and Development	1. Identify the new product opportunities and sources of new product ideas.
				2. Elaborate the product life cycle and product design process.
				3. Integrate the customer and end-consumer needs into design process.
				4. Apply the concepts and tools like DFMA, VE and QFD in design process
				5. Assimilate the various product characteristics to design a novel product
				6. Participate in group work sessions and teams to become acquainted with the importance of teamwork and collaboration that is critical to new product success
63.	V	OE349	Non-conventional Energy Sources	1. Identify the need of requirement of renewable energy source
				2. Summarize the various available energy sources.
				3. Illustrate different technologies essential for conversion of renewable energy sources.
				4. Evaluate the performance of energy conversion systems for maximum efficiency
				5. Compare the various renewable energy technologies.
				6. Select appropriate renewable energy technology for specific application
64.	V	OE351	Hydrogen and Fuel Cell Technology	1. Choose proper energy storage systems hydrogen and applications
				2. Explain the different types of fuel cell technologies, fuels and membrane used in it
				3. Design and Compare performance of fuel cell
65.	V	ATMD301		1. Discuss the basics of vehicle collision and its effects.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Automotive Safety & Ergonomics	2. Summarize the various safety concepts used in passenger cars. 3. Explain use of ergonomics in automotive design. 4. Explain the human response to impact. 5. Explain the use of various systems used in automobiles for safety & ergonomic considerations.
66.	V	CEMD301	Infrastructure Engineering	1. Apply the knowledge of geometric design in road construction. 2. Identify the quality parameters of pavement materials and various methods of road construction. 3. Discuss the various aspects of airport engineering. 4. Explain design parameters of railway engineering and its component parts. 5. Summaries the different off shore structures for dock and harbors.
67.	V	CSMD301	Fundamentals of Database Systems	1. Describe the purpose and nature of the database system for storing and fast access to the data 2. Identify various protocols, issues, and techniques related to transaction management for a consistent & and stable database 3. Draw E-R models to represent simple database application scenarios 4. Design the queries to manipulate and access data using procedural and non-procedural languages 5. Apply relational database design concepts to remove data redundancy and to retrieve data easily

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**

				6. Perform operation on Unstructured data
68.	V	EEMD301	<b>Electrical Machines</b>	1. Describe behavior of dc machine. 2. Explain the working principle of 1-Phase and 3-Phase transformers. 3. Explain working of different induction motors. 4. Select the relevant electrical machines for different applications 5. Interpret the relevant fractional horse power motor for different applications
69.	V	ECMD301	Advanced Communication Techniques	1. Explain the principles of antenna and wave propagation. 2. Understand basic antenna parameters and their types. 3. Discuss the evolution, requirements, and challenges of 5G communication systems. 4. Understand and compare various communication techniques. 5. Communicate effectively on complex engineering topics related to modern communication techniques
70.	V	CIMD301	Introduction of DBMS	1. Describe the fundamental elements of relational database management systems. 2. Design ER-models to represent simple database application scenarios. 3. Write SQL query to perform various operations on the database. 4. Analyze principle of integrity constraints, Hashing and Indexing on databases. 5. Illustrate the transaction management, concurrency control and crash recovery

K. E. Society's

Sr. No.	Semester	Course Code	Course Name	Course Outcome
71.	V	MEMD301	Manufacturing and Assembly Processes	1. Select appropriate manufacturing process suitable for the component design and production volume
				2. Select appropriate joining process for given application.
				3. Select appropriate machine tools for machining operations.
				4. Select appropriate finishing process for given product.
				5. Explain concept of automation in manufacturing.
				6. Explain and select appropriate Non Traditional machining process and machine with constructional details for engineering component.
72.	V	MCMD301	Sensor and Instrumentation	1. Understand the fundamental principles of various sensors and transducers.
				2. Analyze the characteristics, advantages, and limitations of different sensor types.
				3. Apply appropriate signal conditioning techniques to improve sensor output accuracy and integrate sensors into mechatronic systems for real-time data acquisition and control.
				4. Select appropriate sensors for specific mechatronic systems used in real life applications
73.	V	AIMD301	Machine Learning	1. Utilize machine learning techniques and understand the basic theory underlying machine learning.
				2. Articulate supervised, unsupervised and reinforcement learning
				3. Identify the basic concepts of learning and decision trees.
				4. Utilize Bayesian techniques for problems appear in machine learning

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Perform statistical analysis of machine learning techniques.
74.	V	ATMD303	Automobile Engineering Lab	1. Differentiate between S.I. and C.I. engines.
				2. Test engines and plot performance characteristics curves.
				3. Describe the working of various automotive systems
75.	V	CEMD303	Smart Cities & Sustainable Development	1. Develop a critical understanding of the different concept and ideologies of smart cities.
				2. Analyse the different approaches toward planning and development of smart cities on global level.
				3. Assess the existing state and approach of Smart city Mission in India.
				4. Comprehend the concept of resilience and sustainable development and its measurement.
				5. Evaluate the present status of sustainability and rating systems initiatives within the Indian context.
76.	V	CSMD303	Object-oriented Programming in Python	1. Demonstrate a comprehensive understanding of Python syntax, data types, and basic operations.
				2. Make use of common Python libraries for data manipulation.
				3. Implement lists, tuples, sets, and dictionaries for effective data handling.
				4. Apply principles of OOP, including classes, objects, inheritance, and polymorphism
77.	V	EEMD303	Electrical Technology	1. Demonstrate speed control methods of electrical machines.
				2. Analyze performance of DC motor and induction motor for speed control applications.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Implement power electronic circuits for given application. 4. Measure electrical quantities using electrical and electronic instruments
78.	V	ECMD303	Electronic Product Design	1. Elaborate product design processes. 2. Explain various aspects of PCB design. 3. Differentiate product-testing methods. 4. Create various documents for the product.
79.	V	CIMD303	OOP using Java	1. Explain the concepts and terminologies in object-oriented concepts and java programming language. 2. Apply object-oriented programming features and concepts for solving given problem. 3. Develop the java application using the collection framework to solve real word problem. 4. Apply the concepts exception handling to develop error free codes. 5. Utilize the concepts of package to develop efficient codes.
80.	V	MEMD303	Refrigeration and Air Conditioning	1. Explain the basic laws of thermodynamics, working of various RAC systems, psychrometric process of air, applications of RAC systems. 2. Summarise the properties of refrigerants. 3. Calculate performance of refrigeration and air conditioning system.
81.	V	MCMD303	Industrial Automation	1. Explore the architecture of PLC and its functions. 2. Execute the various instructions and logic in PLC. 3. Develop the PLC program for various applications.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Design and develop the SCADA, DCS system for various applications
82.	V	AIMD303	Business Intelligence	1. Articulate data pre-processing techniques 2. Analyze the data modeling required for business intelligence related tasks 3. Determine the role of statistical techniques in data analysis tasks 4. Identify big data analysis techniques 5. Utilize different reporting/visualization tool
83.	V	SH3034	Scholastic Aptitude-I	1. Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems. 2. Explain the basic aptitude terms like percentages, averages, ratios and applications of business aptitude terms of profits and interests 3. Develop a bridge in analogies, series and visualizing directions. 4. Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
84.	V	ME3214	Heat and Mass Transfer Lab	1. Determine the thermal conductivity of materials and compute heat conduction through a fin and a composite wall. 2. Compute heat transfer coefficient in natural as well as forced convection environment. 3. Determine the emissivity and Stefan-Boltzmann constant for radiative heat transfer 4. Compare the performance of heat exchanger

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Determine critical heat flux of material/Examine film wise and drop wise condensation phenomenon
85.	V	ME3234	Kinematics and Dynamics of Machines Lab	1. Estimate moment of inertia of Irregular shape bodies. 2. Analyse the controlling force and stability of governor. 3. Investigate the stability of spinning bodies due to gyroscopic effect. 4. Apply the theoretical knowledge to balance the rotary systems 5. Determine the natural frequency, vibration level, damped frequency and resonant frequency of any vibratory system 6. Recognize the whirling speed conditions of shaft and methods to eliminate it
86.	V	ME3254	Software Training Lab-I : NX-CAM	1. Develop the sketches for the engineering components 2. Develop the part model for the engineering components 3. Generate the toolpath for the machining of engineering component on CNC machines. 4. Simulate the toolpath for the machining of engineering component on CNC machines. 5. Generate process sheet and CNC part programs.
87.	V	ME3254	Software Training Lab-I : NX-CAD	1. Use NX CAD module for the 3D modelling and assembly. 2. Create the detailed drawing of machine components including GD&T
88.	V	ME3254	Software Training Lab-I : MATLAB	1. Write a MATLAB code and solve the mechanical engineering problems. 2. Point out the salient features and relationship between dependent

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				and independent variables by plotting the graph.
89.	V	ME3254	Software Training Lab-I : Software Development using C++	<ol style="list-style-type: none"> <li>1. Write C++ code to solve the mechanical engineering problems.</li> <li>2. Use file handling operations to solve mechanical engineering problems handling large data.</li> <li>3. Draw production drawing as per the design calculations</li> </ol>
90.	V	ME3814	Technical Aptitude -III	<ol style="list-style-type: none"> <li>1. Apply the fundamental knowledge to solve the mechanical engineering problems.</li> <li>2. Develop the ability of problem solving.</li> </ol>
91.	V	ME3834	Summer Internship	<ol style="list-style-type: none"> <li>1. Apply the Technical knowledge in real industrial situations.</li> <li>2. Formulate Technical reports/projects.</li> <li>3. Develop and refine oral and written communication skills.</li> <li>4. Explain the activities and functions of business professionals.</li> </ol>
92.	VI	ME3104	Finite Element Method	<ol style="list-style-type: none"> <li>1. Applying appropriate approximate method to solve the equations from the perspective of finite element method.</li> <li>2. Select the appropriate element type and element numbers to obtain accurate solutions for the given engineering problem.</li> <li>3. Recommend suitable shape functions and comment on the requirement of convergence criteria.</li> <li>4. Calculate the stiffness matrix, load vectors and analyse the solid mechanics problems.</li> <li>5. Construct the characteristics matrix, load vectors and solve thermal related problems.</li> </ol>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Explain the assembly and solution process in the finite element method.
93.	VI	ME3124	Applied Thermal Engineering	1. Differentiate SI and CI engine, cycles, and relate various performance parameters. 2. Analyze the performance of vapour compression refrigeration systems. 3. Estimate the performance of steam boilers. 4. Design a steam nozzle for given condition and calculate nozzle efficiency. 5. Compute efficiency and power developed by impulse and reaction turbines. 6. Calculate vacuum, condenser efficiency, cooling water required for condensing and compare environmental pollution norms.
94.	VI	ME3144	Design of Machine Elements	1. Apply the fundamentals for design and selection of materials for various elements. 2. Design of joints for mechanical applications 3. Design a simple machine component like shafts using theories of failure. 4. Design the spring and power screw. 5. Analyze a component subjected to fluctuating load. 6. Design of gears for industrial applications.
95.	VI	ME316	Research Methodology	1. Select, analyse and interpret research evidences published on a topic to establish a suitable research problem/issue or opportunity to explore further. 2. Design the research study using a suitable paradigm, associated methodologies and methods of data collection and analysis.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Write a research proposal (research blueprint) describing the topic.
				4. Demonstrate the ability to use statistical software to solve problems
96.	VI	ME322	Industrial Robotics	1. Explain the fundamental concepts of robots.
				2. Model forward and inverse kinematics of robot manipulators.
				3. Select end effector and sensor for particular application
				4. Write a program for a robot to perform tasks in industrial applications
97.	VI	ME328	Smart Material and Systems	1. Describe the behaviour and applicability of various smart materials.
				2. Demonstrate the design methods of smart sensors and actuators.
				3. Model smart sensors and actuators for specific application.
				4. Demonstrate the techniques of fabrication of smart systems.
				5. Design simple smart system for specific application
98.	VI	ME3304	Engineering Acoustics	1. Determine acoustic parameters of sound waves in decibel levels for pressure, power and intensity.
				2. Calculate sound levels 1-D wave for air-borne sound.
				3. Estimate absorption coefficient for different acoustic materials.
				4. Measure sound levels of any systems/product and reduce it up to audible range by using suitable method.
99.	VI	ME3364	Energy Conservation & Management	1. Summarize energy scenario and the need for energy conservation.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Conduct energy audit of a system 3. Illustrate various techniques of waste heat recovery and cogeneration. 4. Identify energy conservation measures in various thermal utilities. 5. Summarize different financial terms and techniques used in Energy Conservation
100.	VI	ME3384	Gas Turbine & Jet Propulsion	1. Compare ideal and real cycles of gas turbines 2. Illustrate different techniques used in jet propulsion 3. Explain centrifugal compressor used in gas turbines and jet propulsion 4. Design axial flow compressor used in gas turbines and jet propulsion 5. Analyze combustion system of the gas turbines 6. Evaluate the different turbines used in gas turbine and jet propulsion
101.	VI	ME340	Computational Fluid Dynamics (CFD)	1. Derive governing equations for fluid dynamics and heat transfer. 2. Develop finite difference implicit & explicit algorithms for fluid flow and heat transfer problems. 3. Develop finite volume algorithms for fluid dynamics equations. 4. Select appropriate grid generation methods for CFD analysis. 5. Apply different CFD Techniques to various fluid flow problems
102.	VI	ME3424	Alternative Fuels	1. Justify the need of alternative fuels for IC engines.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Select alternative fuels to IC engines 3. Analyze engine performance using blended fuels 4. Explain the working of electrical and solar-powered vehicles
103.	VI	ME3484	Computer Integrated Manufacturing	1. Describe and classify computer-integrated manufacturing systems (CIMS) 2. Explain the principle of operation of CNC machine 3. Describe part family forming methods 4. Perform quantitative analysis of Flexible Manufacturing Systems (FMS) 5. Analyze various computer integrated planning and control techniques 6. Explain the modern trends in Manufacturing like Industry 4.0 and applications of Internet of Things leading to Smart Manufacturing.
104.	VI	ME3504	Total Productive Maintenance	1. Explain the objectives of Total Productive Maintenance (TPM) 2. Determine the Overall Equipment Effectiveness (OEE) 3. Explain the 12 steps of TPM implementation 4. Explain the Pillars of TPM. 5. Describe Computerized Maintenance Management System (CMMS) 6. Explain tools in TPM.
105.	VI	ME3524	Tool Engineering	1. Explain the mechanism of metal cutting. 2. Analyze the effect of various parameters such as process variables, cutting tool materials etc. on the performance of machining.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Explain the importance of the various elements of tool geometry of single and multi-point cutting tools. 4. Design jigs and fixtures for given components. 5. Design press tools for cutting and forming press working operations. 6. Estimate machining cost.
106.	VI	ME3544	Industrial Organization and Management	1. Recognize the factors that influence business environment and visualize their effect on business. 2. Appraise the scope and objectives of functional areas of business and their integration. 3. Formulate an effective and efficient solution for business problems. 4. Identify several ways in which financial accounting information is used to make business decisions. 5. Apply engineering economics principles for evaluation of a business
107.	VI	ME364	Supply Chain Management	1. Explain key issues in the supply chain management. 2. Develop a framework for network design decision. 3. Describe the information required to produce an aggregate plan. 4. Devise the inventory system. 5. Develop appropriate strategic alliances 6. Select methodologies to evaluate supply chain design decision
108.	VI	ME368	Robot Dynamics and Applications	1. Identify various types of Robots for industrial applications with sound knowledge of the positioning system.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Explain the rigid body motion and its transformation mathematically. 3. Solve and model the kinematics equations of various manipulator 4. Solve and model the differential motion and dynamics of various manipulator configurations. 5. Compute the collision-free trajectory planning. 6. Identify the challenges and control problems in manipulator robotics
109.	VI	OE3284	<b>Supply Chain Management</b>	1. Identify the role and key issues in the supply chain management. 2. Select appropriate SC strategies under given situations. 3. Design the inventory system and level at various locations in supply chain. 4. Specify the distribution and transportation requirements. 5. Develop appropriate strategic alliances for enhancing the performance of SC 6. Describe different strategies used to mitigate risk in global supply chain
110.	VI	OE3324	Entrepreneurship Development	1. Identify, analyze and select business opportunity 2. Apply design thinking process for selected business idea. 3. Prepare business model canvas for selected business idea and analyze it. 4. Prepare business plan. 5. Apply basic fundamental of finance, costing and accounting for selected project 6. Formulate detailed project report and make appraisal of it
111.	VI	OE356	Project Management	1. Explain concept of project Management,

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Prepare project analysis
				3. Prepare technical appraisal of selected project.
				4. Prepare financial appraisal of selected project.
				5. Apply different techniques for project management.
112.	VI	ATMD302	Electric Vehicles	1. Articulate the need of EVs and HEVs in today's transportation context.
				2. Design an electric vehicle for given requirements.
				3. Design a hybrid electric vehicle for given requirements.
				4. Elaborate fuel cell technology for vehicular application
113.	VI	CEMD302	Environmental Engineering	1. Explain importance of water and wastewater analysis for various parameters.
				2. Discuss impact of pollution on man, animal and plants.
				3. Prepare layout of water and wastewater treatment process.
				4. Design Water and Wastewater Treatment Plant.
				5. Apply AI tools for impact of humans on environment
114.	VI	CSMD302	Artificial Intelligence	1. Understand the basic concepts and techniques of Artificial Intelligence.
				2. Apply AI algorithms for solving typical practical problems.
				3. Describe appropriate knowledge representation schemes in AI.
				4. Apply reasoning schemes in AI.
				5. Analyze the planning schemes for goal stack.
				6. Evaluate performance of solution for constraint satisfaction problem
115.	VI	EEMD302	Smart Grid	1. Summarize the concept and future of smart grid
				2. Develop smart grid architecture

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Compile various smart grid technologies 4. Identify communication and information technologies for smart grid 5. Elaborate distributed generation and storage technologies 6. Recommend smart metering and distribution automation
116.	VI	ECMD302	Industrial Electronics	1. Identify basics Power Electronics devices and components. 2. Illustrate use of Power Electronics. 3. Develop PLC logic using ladder programming. 4. Analyze industrial electronics applications.
117.	VI	CIMD302	Software Engineering	1. Describe fundamental concepts in software engineering and project management 2. Practice software process models for the undertaken software problems 3. Design function-oriented and object oriented models using modern tools. 4. Identify classes and build the domain model using advanced concepts in object, dynamic and functional modeling. 5. Analyze existing software systems using function and object-oriented analysis. 6. Design models using UML diagrams for software systems: use case, class, sequence, collaboration, activity, state chart diagrams, component and deployment
118.	VI	MEMD302	Power Plant Engineering	1. Explain economics of power generation and energy scenario 2. Explain improvisations in Rankine cycle and its effect on performance

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Analyze thermodynamics gas power cycles and effect of various parameter on efficiency. 4. Analyze different techniques for improvement of efficiency of gas turbine plant 5. Explain construction and working of nuclear power plants and its subsystems 6. Explain construction and working of different renewable energy power plants
119.	VI	MCMD302	Industrial Robotics	1. Explain the basic concepts of Robots. 2. Select an end effector and sensor for application. 3. Explain drives and controls for robotic system. 4. Develop program for robot to perform tasks in industrial applications
120.	VI	AIMD302	Principles of Artificial Intelligence	1. Articulate basic concepts and techniques of Artificial Intelligence. 2. Apply AI algorithms for solving typical practical problems. 3. Designate appropriate knowledge representation schemes in AI. 4. Analyze reasoning schemes in AI.
121.	VI	SH3064	Scholastic Aptitude-II	1. Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems. 2. Use the basic aptitude terms like percentages, averages, ratios and applications of business aptitude terms of profits and interests 3. Develop a bridge in analogies, series and visualizing directions.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
122.	VI	ME3644	Software Training Lab-II :ABAQUS	<ol style="list-style-type: none"> <li>Analyse the component from structural and thermal perspective and comment on the feasibility of obtained solutions.</li> <li>Compare the results of ABAQUS with other approaches like analytical and experimental results.</li> </ol>
123.	VI	ME3644	Software Training Lab-II : HyperMesh	<ol style="list-style-type: none"> <li>Use simulation and analysis software in Mechanical Engineering.</li> <li>Develop solution for the Mechanical Engineering problems using simulation and analysis software</li> </ol>
124.	VI	ME3644	Software Training Lab-II :Computational Fluid Dynamics	<ol style="list-style-type: none"> <li>Formulate problems in fluid flow and heat transfer.</li> <li>Apply initial and boundary conditions to solve heat transfer problems.</li> <li>Use ANSYS-Fluent for solving real life engineering problems</li> </ol>
125.	VI	ME3644	Software Training Lab-II : ANSYS	<ol style="list-style-type: none"> <li>Apply finite element method to solve problems in solid mechanics and heat transfer.</li> <li>Formulate and solve problems in one dimensional structure including trusses, beams and frames.</li> <li>Choose proper element as per the application</li> </ol>
126.	VI	ME3664	Applied Thermal Engineering Lab	<ol style="list-style-type: none"> <li>Explain the various thermodynamic process of thermal systems</li> <li>Perform the experimentation of thermal systems</li> <li>Analyse the performance of thermal systems</li> </ol>
127.	VI	ME3744	Technical Aptitude-IV	<ol style="list-style-type: none"> <li>Apply the fundamental knowledge to solve the</li> </ol>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				mechanical engineering problems.
				2. Develop the ability of problem solving.
128.	VI	ME3764	Capstone project Phase I	1. Convert an open-ended problem statement into a statement of work or a set of design specifications 2. Identify the literature gap by conducting a survey of several available literature in the preferred field of study. 3. Decompose the problem/task into subtasks, prioritizes subtasks, and establish a timetable and milestones by which progress may be evaluated. 4. Select and apply the appropriate design of experiments, experimental setup, models, or simulation technique for the project task. 5. Collaborates with team members of diverse backgrounds and perspectives to achieve a common goal. 6. Produce usable documents of record regarding the design process and design state and communicate effectively.
129.	VII	ME4014	Industrial Engineering	1. Apply various methods of method study and time study to improve productivity. 2. Use value analysis technique in engineering projects. 3. Select the plant location and design appropriate type of layout along with material handling system. 4. Plan production activities using tool like capacity and aggregate planning

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Design the inventory system using appropriate inventory model
				6. Implement project management knowledge, tools and techniques to achieve project success.
130.	VII	ME4113	Engineering Acoustics	1. Determine acoustic parameters in terms of decibel levels for pressure, power, intensity and impedance.
				2. Calculate sound levels by applying 1-d wave equation for air-borne and structure borne sound
				3. Estimate absorption coefficient for different acoustic materials.
				4. Measure sound levels for mechanical systems and reduce it up to audible range by using suitable method.
131.	VII	ME4153	Machine Tool Design	1. Select & design proper transmission system for machine tool
				2. Decide layout of machine tool
				3. Select proper speed & feed boxes & design the same.
				4. Design machine tool structure- Bed, Columns & Housings, Select & Design Guide ways & slide ways, spindle.
				5. Determine dynamic characteristics of machine tool & carry stability analysis using FEA
				6. Design control systems in machine tools and SPM.
132.	VII	ME4153	Mechanical System Design	1. Select brake and clutch based on functional requirements of automobile transmission systems.
				2. Calculate the stresses induced in pressure vessel subjected to various types of loading

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Apply design principles and obtain suitable dimensions for IC Engine components. 4. Design the flat belt conveyor systems for suitable applications. 5. Design the machine tool gear box for different speeds and torques at driven shaft. 6. Apply statistical considerations for design.
133.	VII	ME4173	Alternative Fuels	1. Justify the need of alternative fuels for IC engines 2. Select alternative fuels to IC engines 3. Analyze engine performance using blended fuels 4. Explain the working of electrical and solar- powered vehicles
134.	VII	ME4192	Cryogenics	1. Summarize the applications of low temperature engineering in various fields. 2. Discuss the properties of materials and cryogenic fluids at low temperature. 3. Compare cryogenic Liquefaction systems. 4. Describe Cryogenic Refrigeration and Measurement Systems. 5. Calculate performance of gas separation systems. 6. Explain the methods of fluid storage, transfer, insulation and vacuum technology in cryogenics.
135.	VII	ME4213	Solar Energy	1. Explain energy scenario and necessity of solar energy 2. Illustrate basic of solar radiation 3. Explain effect of solar energy transmission on various structures / surfaces.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Design and compare solar collector
				5. Write different application of solar energy
				6. Explain various solar electric conversion system
136.	VII	ME4232	Industrial Automation and Robotics	1. Explain manufacturing automation.
				2. Analyze transfer lines for its efficiency and effect of break downs
				3. Analyze automated assembly lines for its efficiency and effect of defective components
				4. Analyze forward and reverse kinematics of robot.
				5. Perform economic analysis of robot
137.	VII	ME4253	Production and operations Management	1. Select appropriate production and operation strategies based on situation
				2. Plan the capacity based on the demand pattern and prepare the manufacturing schedule based on the production plan
				3. Apply Lean tools for manufacturing and services operation
				4. Implement recent production management trends like just in philosophy and lean manufacturing in manufacturing field
				5. Apply engineering economics, principles for managing production function
138.	VII	ME4313	Mechanical Vibrations	1. Define and use the fundamental terms of vibration in design.
				2. Find natural frequencies and mode shapes of 2DOF and Multi DOF systems.
				3. Describe methods of vibration control.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Select instrument and transducers for vibration measurement
				5. Analyze and interpret vibration data.
139.	VII	ME4333	Experimental Mechanics	1. Select the appropriate method of stress analysis to solve the mechanical engineering problem
				2. Apply the concept of transmission photo elasticity and determine the principle stress and direction at the critical point
				3. Use the principle of three dimensional photo elasticity and estimate the state of stress
				4. Evaluate pertinent stress detail at a point by employing stress frizzing and slicing technique in the three dimensional component
				5. Determine stress and strain by using photo elastic coating or brittle coating technique
				6. Design the experimental methodology to measure the strain by using strain gauge technology
140.	VII	ME4352	Automobile Engineering	1. Explain anatomy of an automotive vehicle with location of different parts and systems
				2. Expound various configurations of transmission systems and auxiliary components
				3. Compute different performance parameters of an automobile
				4. Differentiate between various types of braking system with its specific features
				5. Explain various steering and suspension system.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Elucidate working of automotive electronic components and electrical systems.
141.		ME4373	I. C. Engine	1. Differentiate between various configuration of engine and draw valve timing and port timing diagram 2. Analyse and differentiate between theoretical air standards, theoretical fuel air and actual cycles 3. Calculate the design and operating parameters of fuel-supply system of SI engine and analyses mixture requirement at different loads and speeds 4. Compare different types of ejection systems and calculate quantity of fuel and size of nozzle orifice 5. Explain the stages of combustions I SI and CI engines and effect of various operating parameters on combustion 6. Explain methods of Measurement different performance parameters and prepare heat balance sheet 7. Recognize alternative fuels for IC engines with properties and compare different pollution norms 8. Correlate various resent trends in IC Engines
142.	VII	ME4393	Refrigeration and Air Conditioning	1. Apply basic laws to analyze various types of refrigeration systems 2. Determine the psychometric properties of moist air 3. Calculate the cooling load of given building/application 4. Select the fan for given application

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Design a duct for given air conditioning application
				6. Choose the suitable AHU component such as air inlet, outlet devices etc.
143.	VII	ME4413	Mechatronics System Design	1. Demonstrate the importance of integration of Mechanical, Electronics, computers and control in the design of Mechatronics system.
				2. Describe/identify key elements of sensors and transducers and techniques of interfacing with PLC, Microprocessor, Microcontroller etc.
				3. Apply a systematic approach to the design process for Mechatronics systems. (Concurrent engineering).
				4. Create system modeling of basic models and analyze.
				5. Demonstrate the practical application of mechatronics systems in areas such as manufacturing, automobile systems and robotics.
				6. Develop the capacity to think creatively and independently about new design problems and challenges.
144.	VII	ME4433	Manufacturing Simulation	1. Explain concepts of Modelling and simulation
				2. Develop model frameworks for discrete –event simulation
				3. Analyze input and output data of simulation model
				4. Construct software models for manufacturing, logistics and material handling problems
				5. Develop simulation model for a system and verify, validate the model
145.	VII	ME4453		1. To select the proper casting technique

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Casting Design and Simulation	2. To develop casting process for new product 3. To design the gating / risering system for casting
146.	VII	ME4053	Industrial Engineering and Quality Control Lab	1. Perform work and method study at given work station by using suitable industrial engineering tools. 2. Design the work system for the given application 3. Apply inventory management principles for controlling the inventory 4. Conduct process capability analysis 5. Use modern tools and techniques for solving industrial engineering problems.
147.	VII	ME4073	Advanced Machining Lab	1. Develop CNC program and simulate it on CNC Simulation Software for a given job. 2. Perform Set-up operation for CNC Turning Operations. 3. Produce a job with given specifications on CNC Turning Machine. 4. Perform Set-up operation for CNC Milling Operations. 5. Produce a job with given specifications on CNC Milling Machine.
148.	VII	ME4493	Software Training-II	1. Use simulation and analysis software in Mechanical Engineering. 2. Develop solution for the Mechanical Engineering problems using simulation and analysis software.
149.	VII	ME4553	Mechanical Vibrations Lab	1. Estimate natural frequencies and mode shapes of given machine component. 2. Find modal parameters of vibratory system.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Control the vibration by using principle of DVA.
				4. Use vibration measurement technique for fault diagnosis and machinery health monitoring
150.	VII	ME4573	Experimental Stress Analysis Lab	1. Use Photo elastic technique to measure state of stress in the machine component
				2. Apply strain gauge technique to determine state of strain at the critical location in the structural member
151.	VII	ME4593	Automobile Engineering Lab	1. Explain the structure of an automobile.
				2. Describe and Design transmission systems of an automobile.
				3. Demonstrate and select different types of an automobile systems.
				4. Test wheel balancing and wheel alignment.
				5. Model any automobile system/component
152.	VII	ME4613	I. C. Engine Lab	1. Recognize the various parts, systems of IC engine, and disassemble IC engine
				2. Perform various tests on different engines: plot various operating characteristics and compare it with standards.
				3. Demonstrate and differentiate between fuel system of SI and CI engines.
				4. Measure and correlate various engine emission with standards
153.	VII	ME4633	Refrigeration and Air Conditioning	1. Analyze the performance of various refrigeration system and air conditioning system / process
				2. Plot various refrigeration system and air conditioning processes using charts and tables.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Trouble shoot the refrigeration system and air conditioning system
154.	VII	ME4653	Mechatronics System Lab	1. Demonstrate/select proper types of sensors/transducers for given task.
				2. Design signal conditioning circuits for various signal conditioning processes like signal level change, signal form change, filters, bridge circuits etc.
				3. Demonstrate ability of control and automation of simple devices such as motors, cylinders using PLC.
				4. Demonstrate the ability to create microcontroller programs and properly
155.	VII	ME4673	Manufacturing Simulation Lab	1. Describe the nature of discrete-event simulation and the types of simulation models
				2. Illustrate the board applicability of discrete-event simulation to solve basic manufacturing systems problems.
				3. Design model considering as per constraints given
				4. Simulate the essential steps of the simulation methodology & interpret the result
156.	VII	ME4673	Casting Design and Simulation Lab	1. Develop/Select appropriate orientation of the casting & parting plane
				2. Calculate modulus of casting & number of cavities in the mold
				3. Calculate of riser & gating system design
				4. Calculate the yield of the casting
157.	VII	ME4323	Material Handling Systems	1. Explain the flow and type of movement of industrial goods
				2. Apply general rules for

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. the type of movement, and
				4. Identify the appropriate material handling systems to suit the said requirement
				5. Explain current trends in material handling.
158.	VII	ME4343	Aircraft Conceptual Design	1. Understand the design process of aircraft and decide the aircraft configuration.
				2. Choose type of power plant as per flight regime.
				3. Decide the fuselage layout as per type of aircraft.
				4. Design the wing for type of aircraft and its wing loading.
				5. Accurately evaluate lift, drag and mass for design synthesis process.
				6. Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.
159.	VII	ME4363	Process Equipment Design	1. Apply the role of design engineer in designing procedures of various process equipments.
				2. Design important components like flange coupling, heat transfer equipment, Distillation columns, absorber, extractor.
				3. Develop the heat exchanger data sheet and test the design for safety.
				4. Design storage vessels, pressure vessels and various parts of vessels to apply key criteria involved in the design of internal pressure vessels as per IS code.
				5. Develop relation between equipment design, safety and environment.
160.	VII	ME4383		1. Comprehensive fundamental and technical knowledge of sensors and transducers used in

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Autotronics and Vehicle Intelligence	auto vehicles and vehicle intelligence 2. Ability to understand, analyze and use various SI and CI management systems. 3. Become familiar with advanced comfort and safety systems and electric hybrid vehicles. 4. To acquire the knowledge in intelligent technologies applied in modern automotive systems
161.	VII	ME4403	Special Purpose Vehicles	1. Explain special purpose vehicle and different systems used in them 2. Understand constructional & working features of earth moving machines 3. Select instruments for special purpose vehicles 4. Understand farm tractors and working features of farm equipments 5. Understand mobile cranes & it's working 6. Understand tracking, articulated and multi – axle vehicles.
162.	VII	ME4423	Hybrid & Electrical Vehicles	1. Understand the need of hybrid vehicles in today's context 2. Understand working of electric Vehicles and recent trends 3. Describe design steps of a hybrid vehicle for given requirements 4. Explain hybrid drive trains 5. Discuss different Energy sources and drives required for hybrid vehicles. 6. Discuss fuel cell technology for hybrid vehicle application
163.	VII	ME4443	Cogeneration and Waste Heat Recovery	1. Summaries energy scenario and need for energy conservation 2. Illustrate various techniques of waste heat recovery

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3. Describe the various methods of cogeneration
				4. Explain the various measures for energy conservation and financial applications for various thermal utilities
164.	VII	ME4463	Total Quality Management	1. Explain principles of TQM and contribution of TQM Gurus.
				2. Select appropriate tools and techniques for controlling, improving and measuring quality
				3. Apply DMAIC process of six sigma for the quality improvements
				4. Appraise the organizational, Communication and teamwork requirements for effective quality management
				5. Use statistical tools for quality Control
				6. Select suitable Quality Management System for the given industry
165.	VII	ME4483	Microelectromechanical Systems (MEMS)	1. Discuss basics, nature and applications of MEMS and Microsystem for various Fields
				2. Identify and select specific material for manufacturing of MEMS and its packaging
				3. Analyze and select the different techniques in MEMS technology as per requirement of application
				4. Choose micromachining technique, such as bulk micromachining and surface micromachining for a specific MEMS fabrication process
				5. Design and develop MEMS for various applications
				6. Design packaging of MEMS as per requirement
166.	VIII	OE4361		1. Develop administrative, organizational and planning

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			Engineering Management & Economics (Online Course)	skills to execute engineering project. 2. Develop bar chart/mile stone chart for the project. 3. Analyze profit/cost data and carry out economic analysis to take optimal decision. 4. Calculate depreciation as per various methods.
167.	VIII	OE4381	Finance for Engineers (Online Course)	1. Discuss the fundamental aspects of accounting and finance. 2. Apply rules of accounting while recording transactions. 3. Prepare financial statements and analyze financial position of the firm by applying various techniques. 4. Describe the various long term sources of finance available for the business organization.
168.	VIII	IP4023	Internship & Project	<b>1. Internship</b> 1. Examine the functioning of the company on the terms of inputs, transformation process and the outputs (products and services) 2. Develop an attitude to adjust with the company culture, work norms, code of conduct. 3. Recognize and follow the safety norms, Code of conduct. 4. Demonstrate the ability to observe, analyse and document the details as per the industry practices. 5. Interpret the processes, systems and procedures and to relate to the theoretical concepts-studies. 6. Develop the leadership abilities, communication. 7. Demonstrate project management and finance sense <b>2. Project</b>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				1. Identify the project/problem in the domain of a program relevant for the company. 2. Compile the information to the pertaining to the problem identified. 3. Analyze the information using the statistical tools/ techniques. 4. develop the feasible solution for given problem. 5. Analyze the impact of the project on the performance of company/department.
169.	VIII	RE4043	Research Project	1. Investigate the technical literature. 2. Recognize and evaluate theories, practices, and/or research on a chosen topic by conducting a thorough literature review and submitting a written integrative, critical summary of the current literature. 3. Design a research problem and develop a methodology. 4. Develop and implement an advanced original research or creative project. 5. Develop the ability to explain the conceptual viability of the project and describe the major components involved. 6. Develop the ability to explain how the project will impact the relevant body of work. 7. Develop advanced discipline-relevant skills and competencies. 8. Construct an accurate record of research performed. 9. Write a research report and paper.
170.	VIII	ED4103	Project Management	1. Prepare business Plan for selected business.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Make risk analysis & market analysis of selected project.
				3. Make risk analysis & market analysis of selected project
				4. Make financial appraisal of selected project.
171.	VIII	ED4043	Commercial Aspects of the Project	1. Interpret basic Financial Terminologies.
				2. Prepare & analyze financial statements.
				3. Prepare financial Plan for venture.
				4. Apply basic principles of marketing for various products.
				5. Prepare market survey.
				6. Apply knowledge of marketing management for selected business.
172.	VIII	ED4063	Entrepreneurship Development Program (EDP)	1. Apply knowledge of engineering, economics, marketing and finance for formulation of business plan, starting & managing new business.
173.	VIII	ED4083	Entrepreneurship Development Project	1. Apply knowledge of engineering, economics, marketing and finance for preparation of project report.
				2. Make commercial, technical and financial appraisal of project.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

- **Department Name: Mechanical Engineering Department**
- **PG Program Name: M. Tech Design Engineering**
- **Vision:**  
To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent, innovative and entrepreneurial Mechanical Engineers
- **Mission**
- To develop state-of-the-art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.
- To build the competency to transform students into globally competent mechanical engineers by imparting quality education.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices

Sr. No.	Program Outcomes
1.	Independently carry out research /investigation and development work to solve practical problems.
2.	Write and present a substantial technical report/document
3.	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program
4.	Accomplish collaborative and multi-disciplinary scientific research with consideration of professional, legal, and ethical issues.
5.	Manage the projects and its financial aspects on the strength of engineering knowledge and management principles.
6.	Engage in lifelong learning to address contemporary issues through independent and reflective learning.

**Programme Educational Objective (PEO):**

**PEO1:** - Students will apply knowledge of design engineering to pursue successful career in the field of Mechanical Engineering.

**PEO2:** - Students will become innovators, entrepreneurs to design and develop products and services to address social, technical and business challenges.

**PEO3:** - Students will engross in lifelong learning such as higher studies, research and

other continuous professional development activities.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	MDE1016	Advanced Solid Mechanics	Co:1 Analyze mechanical components based on stress and strain point of view.
				Co:2 Formulate constitutive matrix for isotropic materials and establish the relationship between elastic constants.
				Co:3 Use energy methods to solve structural problem.
				Co:4 Select appropriate analogy like membrane, fluid flow, electrical to solve torsion problem.
				Co:5 Design pressure vessel and rotating disks under given constraints
				Co:6 Evaluate deformation and stresses between two contact bodies with point and line contact.
2	I	MDE1026	Finite Element Methods	Co:1 Apply the knowledge of mathematics and engineering to solve problems in stripped structural and thermal engineering by approximate and numerical methods
				Co:2 Solve problems in 1-D structural systems involving bars, trusses, beams, and frames.
				Co:3 Develop 2-D and 3-D FE formulations involving triangular, quadrilateral elements and higher order elements.
				Co:4 Apply the knowledge of FEM for stress analysis, model analysis, heat transfer analysis and flow analysis.
				Co:5 Develop algorithms and FE code for solving design problems and adapt commercial packages for complex problems
3	I	MDE1036	Computer Aided Design	Co:1 Describe the principles of CAD systems, the implementation of these principles, and its connections to CAM and CAE systems.
				Co:2 Demonstrate 2D, 3D transformations and projection transformations.
				Co:3 Describe various approaches of geometric modelling.
				Co:4 Represent 2D and 3D entities mathematically.
4	I	MDE1046	Mechanics of Composite	Co:1 Understand the basic concepts and difference between composite materials with conventional materials.

			Materials (Programme Elective - I)	Co:2 Apply the knowledge of constituent materials in defining the average properties and response of composite materials on macroscopic level. Co:3 Apply knowledge for finding failure envelopes and stress-strain plots of laminates. Co:4 Develop a clear understanding to utilize subject knowledge using computer programs to solve problems at structural level.
5	I	MDE1056	Design for Manufacturing & Assembly (Programme Elective - I)	Co:1 Apply the proper manufacturing process to a new product development process. Co:2 Identify the factors contributing reduction in assembly time and to incorporate assembly & disassembly guidelines in product design. Co:3 Utilize reliability concepts, failure analysis tools and techniques and accelerated life test methods for improving product life cycle. Co:4 Calculate the factors controlling cost and time required for the product maintenance and utilize this information for design for maintenance.
6	I	MDE1066	Experimental Mechanics (Programme Elective - I)	Co:1 Determine direction and magnitude of principal stresses by using various techniques of Experimental Stress Analysis. Co:2 Solve two and three dimensional problems of stress-strain analysis in the field of mechanical engineering. Co:3 Formulate solutions using digital image processing technique.
7	I	MDE1076	Reliability Engineering (Programme Elective - I)	Co:1 Apply the concepts of Reliability, Availability and Maintainability. Co:2 Develop hazard-rate models to know the behaviour of components. Co:3 Build system reliability models for different configurations. Co:4 Assess reliability of components and systems using field and test data. Co:5 Implement strategies for improving reliability of repairable and non-repairable systems
8	I	MDE1291	Reverse Engineering and Benchmarking (Programme Elective - I)	Co:1 Interpret the Reverse Engineering (RE) Methodology Co:2 Appraise the Computer Aided Reverse Engineering Technology Co:3 Design experiments to evaluate a Reverse Engineering tool Co:4 Analyse disassemble products and specify the interactions between its subsystems and their functionality

9	I	MDE1086	Advanced Engineering Materials (Programme Elective - II)	Co:1 Analyse the importance of various engineering materials (metals, polymers, ceramics, composites, Semi-conductor).
				Co:2 Recite polymers, ceramics and composites, their manufacturing techniques, properties and applications.
				Co:3 Propose appropriate ceramics, glass, plastics and polymers for different applications.
				Co:4 Understand and apply Electrical, Thermal, Optical and Magnetic Properties of metals, ceramics, polymers and composites for various applications.
				Co:5 Adapt economic considerations in usage and recycling of materials in human use.
				Co:6 Apply nano materials and nanocomposites for various applications.
10	I	MDE1096	Industrial Tribology (Programme Elective - II)	Co:1 Determine tribological parameters of mechanical systems analytically by using suitable theories of friction and theories of wear.
				Co:2 Select hydrostatic step bearing for real life application in mechanical engineering based on axial load applied and lubricant available.
				Co:3 Calculate the maximum load carrying capacity and pressure equation for hydrodynamic thrust bearing by using engineering principles.
				Co:4 Evaluate elasto-hydrodynamic lubrication occurred in gears, cams and rolling element bearing by using hertz and ertel-grubin equation.
				Co:5 Estimate pressure distribution in gas lubricated bearings by applying reynolds equation for gas lubrication within elastic limits.
11	I	MDE1106	Advanced Mathematical Methods in Engineering (Programme Elective - II)	Co:1 Evaluate Fourier Series for given function and apply it to solve the partial differential equations in Engineering problems.
				Co:2 Apply the specific method of solution of partial differential equations for solving the given problems
				Co:3 Formulate and solve a boundary value problem (Partial differential equation, boundary and initial conditions).
				Co:4 Estimate numerically the solution of given algebraic equation.
12	I	MDE1116	Smart Materials and Systems (Programme Elective - II)	Co:1 Describe the behaviour and applicability of various smart materials.
				Co:2 Demonstrate knowledge of the physical principles underlying the behaviour of smart materials.
				Co:3 Describe the basic principles and mechanisms of the stimuli-response for the most important smart materials.

				Co:4 Design simple models for smart structures & materials.
13	I	MDE1301	Safety Engineering and Management (Programme Elective - II)	Co:1 List out and describe the various functions and activities of safety engineering department.
				Co:2 Provide knowledge on design features for a process industry and safety in the operation of various equipment in industry
				Co:3 Carry out a safety audit and prepare a report for the audit.
				Co:4 Prepare an accident investigation report and estimate the cost due to accident.
				Co:5 Evaluate the safety performance of an organization from accident records.
				Co:6 Identify various agencies, support institutions and government organizations involved in safety training and promotion.
14	I	MDE1126	Stress Analysis Software Lab	Co:1 Solve 1D, 2D and 3D structural analysis problems using the ANSYS software
				Co:2 Evaluate dynamic behavior of components
				Co:3 Appraise Linear buckling concept in Design of members which are succumbed to buckling
				Co:4 Solve structural analysis problems subjected to fatigue load.
				Co:5 Appraise steady state and transient thermal concept in design of members.
				Co:6 Apply basics of MATLAB programming for Engineering applications.
15	I	MDE1136	Design Engineering Lab-I	Co:1 Determine and analyze the stresses and strains in machine component.
				Co:2 Analyze the stresses and strains on combined bending and torsion.
				Co:3 Experiment on demonstration of photoelastic techniques.
				Co:4 Calibration of the photoelastic constant, determination of the stress field in a beam under bending.
				Co:5 Determine stress and strain fields using DIC.
				Co:6 Measure friction and wear using pin on disc.
				Co:7 Find lubricant properties using 4-ball tester.
16	I	SHP5512	Technical Communication	Co:1 Use grammatically correct sentences in different types of technical writings.
				Co:2 Apply technical writing skills to improve readability of documents.
				Co:3 Demonstrate professional skills required in job interviews and at workplace.
17	II	MDE1146	Mechanical Vibrations	Co:1 Derive and interpret equation of motions of multi-degrees of freedom systems.

				Co:2 Derive and interpret equation of motions of continuous systems.
				Co:3 Derive and interpret response of the system subjected to Transient vibrations.
				Co:4 Analyze the systems with Non-linear vibrations.
				Co:5 Select suitable instrument and transducers for vibration measurement.
18	II	MDE1156	Advanced Design of Mechanisms	Co:1 Design mechanism to meet certain motion as per defined application.
				Co:2 Apply the graphical and analytical techniques commonly used in the synthesis of mechanisms.
				Co:3 Design higher pair kinematic linkages for a given applications.
19	II	MDE1166	Acoustics and Noise Control (Programme Elective - III)	Co:1 Determine acoustic parameters in terms of decibel levels for pressure, power, intensity and impedance.
				Co:2 Formulate 1- d wave equation for air-borne sound.
				Co:3 Estimate absorption coefficient for different acoustic materials.
				Co:4 Measure sound levels for mechanical systems and reduce it up to audible range by using suitable method.
20	II	MDE1176	Fracture Mechanics (Programme Elective - III)	Co:1 Apply the basic principles of Linear elastic fracture mechanics.
				Co:2 Design the engineering components using elastic-plastic fracture mechanics principles.
				Co:3 Explain the process of crack growth and arrest in the presence of creep.
				Co:4 Compare the fracture behavior in metals and non-metals.
				Co:5 Analyze the crack growth under fatigue loading.
				Co:6 Choose the suitable computational fracture mechanics approach to solve the real mechanical engineering problem.
21	II	MDE1186	Product Design and Development (Programme Elective - III)	Co:1 Explore and analyse product development processes used in product design and development.
				Co:2 Apply various product development techniques.
				Co:3 Analyse, evaluate and apply design consideration like concurrent engineering, aesthetic and ergonomics for industrial product design.
				Co:4 Apply different methods, tools and technique to create new product design for consumer product.
22	II	MDE1196	Additive Manufacturing	Co:1 Describe the Importance of AM technologies in Manufacturing.

			ng (Programme Elective - III)	Co:2 Classify and select additive manufacturing processes for a given application.
				Co:3 Design for manufacture for AM and carry out Process Analysis.
				Co:4 Point out the software issues addressed in additive manufacturing process.
				Co:5 Identify the Different methods for Post-processing of AM parts.
				Co:6 Suggest the Applications of AM in Automobile, Aerospace, and Bio-medical etc.
23	II	MDE1311	Design of Pressure Vessels and Piping (Programme Elective - III)	Co:1 Apply the design consideration of pressure vessel.
				Co:2 Design the support of the pressure vessel.
				Co:3 Design nozzle for pressure vessel.
				Co:4 Design piping system for pressure vessel.
24	II	MDE1206	Rotor Dynamics (Programme Elective - IV)	Co:1 Model the Rotor bearing systems and formulate the governing equations.
				Co:2 Describe the role of damping, gyroscopic, centrifugal, stiffness and inertial effects on rotors
				Co:3 Compute the critical speeds and stability limits for rotors under axial, transverse and torsional modes
				Co:4 Analyse the rotor bearing systems using transfer matrix method and Finite Element Method.
				Co:5 Compute the transient response of rotors.
25	II	MDE1216	Design for Optimization (Programme Elective - IV)	Co:1 Identify and apply mathematical models in optimization method.
				Co:2 Recognize the suitable method of optimization in nonlinear programming with and without constraints.
				Co:3 Apply optimization method for static and dynamic applications.
				Co:4 Apply knowledge of design of experiment to complex system.
				Co:5 Use genetic algorithm, ANN and Fuzzy logic to optimize various design parameters.
26	II	MDE1226	Robotics (Programme Elective - IV)	Co:1 Comprehend basic terminologies and concepts associated with Robotics and Automation.
				Co:2 Demonstrate comprehension of various Robotic sub-systems.
				Co:3 Compute kinematics and dynamics to explain exact working pattern of robots.
				Co:4 Design and select robots for Industrial and Non - Industrial applications.

27	II	MDE1236	Multi-Body Dynamics (Programme Elective - IV)	Co:1 Derive equations of motion for interconnected bodies in multi-body systems with three dimensional motion.
				Co:2 Implement and analyze methods of formulating equations of motion for interconnected bodies.
				Co:3 Write programs to solve constrained differential equations for analyzing multi-body systems.
				Co:4 Simulate and analyze all types of static and dynamic behaviours of the multi-body systems.
				Co:5 Lead team projects in academic research or the industry that require modelling and simulation of multi-body systems.
28	II	MDE1321	Process Equipment Design	Co:1 Apply the role of design engineer in designing procedures of various process equipments.
				Co:2 Design of pressure vessels as per standard codes.
				Co:3 Develop the process equipments and test the design for safety.
				Co:4 Apply the procedure for the planning of erection of process equipments.
29	II	MDE1246	Research Methodology & IPR	Co:1 Formulate a research problem.
				Co:2 Analyse research related information.
				Co:3 Prepare and present research proposal/paper by following research ethics.
				Co:4 Make effective use of computers and computing tools to search information, analyze information and prepare report.
				Co:5 Describe nature and processes involved in development of intellectual property rights.
30	II	MDE1266	Design Engineering Lab II	Co:1 Estimate natural frequency, damping factor, modal density of given component experimentally.
				Co:2 Find experimental mode shapes of plates.
				Co:3 Predict fault of machine by vibration and sound measurement.
				Co:4 Solve and interpret the vibration engineering problems by using MATLAB codes.
31	II	MDE134	Numerical Computation in MATLAB	Co:1 Apply basics of MATLAB programming for Engineering applications.
				Co:2 Compute differentiation of single variable using MATLAB.
				Co:3 Solve Numerical Integration problems using MATLAB.
				Co:4 Solve Linear and Non Linear equations using MATLAB.
				Co:5 Solve Linear Least Square Regression problems using MATLAB.

				Co:6 Solve Ordinary Differential Equation using MATLAB
32	II	MDE1276	Mini Project	Co:1 Identify structural engineering problems reviewing available literature.
				Co:2 Study different techniques used to analyze complex structural systems.
				Co:3 Work on the solutions given and present solution by using his/her technique applying engineering principles.
33	II	MDE1286	Seminar	Co:1 Survey the literature such as books, national/international refereed journals and contact resource persons for the selected topic of Seminar.
				Co:2 Learn to write technical reports.
				Co:3 Develop oral and written communication skills to present and defend their work in front of Department Post Graduate Committee.
34	II	SHP553	Framework of Indian Constitution	Co:1 Realise the significance of constitution of India to students from all walks of life and help them to understand the basic concepts of Indian constitution.
				Co:2 Identify the importance of fundamental rights as well as fundamental duties.
				Co:3 Understand the functioning of Union, State and Local Governments in Indian federal system.
				Co:4 Learn procedure and effects of emergency, composition and activities of election commission and amendment procedure.
35	III	MDE2016	Industry Internship	Co:1 Identify the real applications and practices of courses studied, at industry level
				Co:2 Recognize various modeling, analysis and validation techniques adopted at industries
				Co:3 Demonstrate the issues at design, manufacturing and assembly levels
				Co:4 Summarize and present technical data in report format.
36	III	MOE2011	Artificial Intelligence – Machine Learning (Open Elective)	Co:1 Describe central machine learning methods and techniques and how they relate to artificial intelligence.
				Co:2 Differentiate between supervised and unsupervised learning techniques.
				Co:3 Apply the ML algorithms to a real-world problem.
				Co:4 Optimize the models learned and report on the expected accuracy that can be achieved by applying the models.
				Co:5 Evaluate a given problem and apply appropriate machine learning technique.

37	III	MOE2021	Creative Thinking: Tools & Techniques (Open Elective)	Co:1 Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios.
				Co:2 Apply different brainstorming techniques in group activities.
				Co:3 Be proficient in the application of the 6 thinking hats tool in different life scenarios.
				Co:4 Develop a systematic approach to idea generation through the use of morphological analysis.
				Co:5 Innovate on an existing product, service or situation applying the SCAMPER method.
				Co:6 Get confident with the theory of inventive problem solving, called TRIZ.
38	III	MOE2031	MOOC Course (Open Elective)	Co:1 Identify the real applications and practices of courses studied, at industry level
				Co:2 Recognize various modelling, analysis and validation techniques adopted at industries.
				Co:3 Demonstrate the issues at design, manufacturing and assembly levels.
				Co:4 Summarize and present technical data in report format.
39	III	MOE2041	Condition Monitoring and Signal Processing (Open Elective)	Co:1 Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.
				Co:2 Analyze for machinery condition monitoring and explain how this compliments monitoring the condition.
				Co:3 Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenance expenditure.
				Co:4 Emphasizes on case studies that require gathering information using the modern testing equipment and processing it to identify the malfunction in that system.
				Co:5 Identify vibration measurement, lubrication oil analysis.
40	III	MOE2051	Aircraft Conceptual Design (Open Elective)	Co:1 Analyze the design process of aircraft and decide the aircraft configuration.
				Co:2 Choose type of power plant as per flight regime.
				Co:3 Design the fuselage layout as per type of aircraft.
				Co:4 Design the wing for type of aircraft and its wing loading.
				Co:5 Evaluate lift, drag and mass for design synthesis.

				Co:6 Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.
41	III	MDE2060	Augmented Reality and Virtual Reality (Open Elective)	Co:1 Define the basic concepts of Virtual and Augmented Reality
				Co:2 Identify the differences in AR/VR concepts and technologies
				Co:3 Describe the fundamental concepts relating to Virtual Reality such as presence, immersion, and engagement
				Co:4 Evaluate usability of AR/VR applications and critique their use of AR/VR capabilities
				Co:5 Design and prototype effective AR/VR applications using UNITY platform for various application.
42	III	MDE2070	Industrial Instrumentation (Open Elective)	Co:1 Elaborate working principal of different transducers.
				Co:2 Select suitable transducer/sensor for specific application.
				Co:3 Justify the use of specific measurement technique for specific task.
				Co:4 Evaluate the Calibration and Interfacing of the transducers.
43	III	MDE2080	Advanced Mechatronics Systems (Open Elective)	Co:1 Explain Mechatronics System.
				Co:2 Analyze the Mechatronics Based System.
				Co:3 Model, simulate, and verify the mechatronics systems.
				Co:4 Identify Electrical, Hydraulic and Pneumatic Components.
44	III	MDE2026	Dissertation Stage-I	Co:1 Explain the contributions of various researchers in the field of design engg after carrying out literature survey from reputed journals.
				Co:2 Recognize the gap in the research and define a problem statement.
				Co:3 Explain significance and applicability of problem statement.
				Co:4 Summarize and present technical data in report format.
45	III	MDE2036	Dissertation Stage-II	Co:1 Outline the work plan for problem statement.
				Co: 2 Identify the proper modelling and analysis tool.
				Co:3 Reproduce the preliminary results of problem statement.
				Co:4 Summarize and present technical data in report format.
46	IV	MDE2046	Dissertation Stage-III	Co:1 Explain the issues related to method adopted in solving the problem
				Co:2 Select proper technique in solving the problem

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

				Co:3 Compare the results with available literature
47	IV	MDE2056	Dissertation Stage-IV	Co:1 Design new methodology to address the problem
				Co:2 Justify the results obtained from new methodology
				Co:1 Write technical report and defend work

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

- **Department Name:- Mechanical Engineering**
- **PG Program Name:- Mechanical Engineering (Thermal Engineering)**
- **Vision:**

To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent, innovative and entrepreneurial Mechanical Engineers

- Mission
- To develop state-of-the-art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.
- To build the competency to transform students into globally competent mechanical engineers by imparting quality education.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices

Sr. No.	Program Outcomes
1.	To independently carry out research /investigation and development work to solve practical problems
2.	To write and present a substantial technical report/document
3.	To demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.
4.	To accomplish collaborative and multi-disciplinary scientific research with consideration of professional, legal, and ethical issues.
5.	To Manage the projects and its financial aspects on the strength of engineering knowledge and management principles.
6.	To Engage in lifelong learning to address contemporary issues through independent and reflective learning.

**Programme Educational Objectives for the M. Tech Mechanical Thermal Engineering**

**PEO1:** - Graduates will apply concepts of thermal engineering to design, model, simulate and solve problems to develop energy efficient systems to pursue successful career in the field of Mechanical Engineering and allied sciences.

**PEO2:** - Graduates will have technical competency in thermal engineering or related areas to become

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

innovators, academicians and provide services to address technical, business and social challenges.

**PEO3:** - Graduates will involve in lifelong learning such as higher studies, research to maintain professionalism and ethical standards.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	SHP5132	Numerical Methods and Optimization Techniques	Co:1 Apply the methods for solving algebraic, transcendental and linear equations.
				Co:2 Solve single variable optimization problems
				Co:3 Apply the methods for curve fitting using regression and interpolation techniques.
				Co:4 Apply the methods to solve differentiation and integration numerical.
				Co:5 Solve ordinary and partial differential equations
				Co:6 Analyze the variance and explain the different research designs.
2	I	MTE1012	Classical and Statistical Thermodynamics	Co:1 Explain different behaviour of gases and thermodynamic relations
				Co:2 Interpret thermodynamics property relations to various mixtures and solutions.
				Co:3 Compare thermodynamics equilibrium of system
				Co:4 Explain the kinetic theory of gases.
				Co:5 Apply the principle of statistical thermodynamics to the various processes.
				Co:6 Develop and analyze the various thermodynamic cycles.

3	I	MTE1023	Advanced Heat Transfer	Co:1 Analyze heat conduction and Radiation
				Co:2 Develop a solution to heat convection to external laminar flow
				Co:3 Formulate heat convection to internal laminar flow.
				Co:4 Examine heat convection in turbulent flow
				Co:5 Interpret convection with phase change
				Co:6 Solve heat transfer problem numerically
4	I	MTE1032	Energy Conservation and Management  ( Program Elective I )	Co:1 Analyze present energy scenario and the need for energy conservation.
				Co:2 Conduct energy audit of any system
				Co:3 Illustrate various techniques of waste heat recovery and cogeneration.
				Co:4 Identify energy conservation measures for various thermal utilities.
				Co:5 Summarize different financial terms and techniques used in Energy Conservation.
5	I	MTE1042	Design of Pumps, Compressor and Blower  ( Program Elective I )	Co:1 Select suitable pump, blower, fan and compressor for a given application.
				Co:2 Design pump, blower, fan or compressor for a given application.
				Co:3 Analyze the performance of compressor and pump
				Co:4 Model and simulate pump, blower, fan and compressor.

6	I	MTE1052	Gas Turbine and Jet Propulsion  ( Program Elective I )	Co:1 Describe the ideal and real thermodynamic cycles of air-breathing engines and Industrial gas turbines.
				Co:2 Design the blading, study the velocity triangles and estimate the performance of centrifugal and axial flow compressors.
				Co:3 Explain the combustion process and design the combustion chamber of a gas turbine.
				Co:4 Design the blading, study the velocity triangles and estimate the performance of axial and radial in-flow turbines.
				Co:5 Analyze off-design performance and matching of the components of a gas turbine.
7	I	MTE1062	Finite Element Method for Thermal Engineering  ( Program Elective I )	Co:1 Establish the mathematical model for the complex analysis problems and predict the nature of the solution.
				Co:2 Formulate element characteristic matrices and vectors.
				Co:3 Identify the boundary conditions and their incorporation into FE equation
				Co:4 Analyze simple geometry problems for Thermal and stress analysis.
				Co:5 Interpret the analysis results for the improvement or modification of the system
8	I	MTE1072	Advanced I. C. Engines and Electric Vehicles  ( Program Elective II )	Co:1 Analyze the gas exchange and charge motion in engines.
				Co:2 Design and develop basic schemes of electric vehicles and hybrid electric vehicles.

				Co:3 Choose proper energy storage systems, electric machine and drive train for vehicle applications.
				Co:4 Analyze various communication protocols and technologies used in vehicle networks.
9	I	MTE1082	Experimental Methods in Thermal Engineering ( Program Elective II )	Co:1 Identify the suitable instrument for measuring transport parameters and estimate error
				Co:2 Detect suitable range of pressure gauge and compute its dynamic response.
				Co:3 Distinguish different flow visualization methods and temperature measurements.
				Co:4 Determine thermal conductivity in solids, liquids and gases and radiation measurements
				Co:5 Develop transfer function of given mechanical system by using concept of control system.
				Co:6 Explain applications of thermal materials.
10	I	MTE1092	Alternative Fuel Technology ( Program Elective II )	Co:1 To Identify the need for alternate fuels and characterize prospective alternate fuels.
				Co:2 To Interpret the properties and performance characteristics of liquid fuels like gasoline, alcohol, vegetable oils in both SI and CI engines.
				Co:3 To Compare the properties and performance characteristics of gaseous fuels like LPG, CNG, and Hydrogen.
				Co:4 To Judge the scope and limitation of different alternate fuels.

11	I	MTE1102	Power Plant Engineering  (Program Elective II)	Co:1 Explain analytical and technological aspects of power plant design, systems and their effects.
				Co:2 Analyze and explain various power plants.
				Co:3 Summarize advanced power cycles.
				Co:4 Recognize environmental issues.
				Co:5 Estimate economics of power plants.
12	I	MTE1112	Modelling Lab	Co:1 Model the components of thermal system using suitable software.
				Co:2 Create computational domain for selected geometry.
				Co:3 Generate mesh and refine mesh elements of given geometry.
13	I	MTE1122	Thermal Engineering Lab - I	Co:1 Conduct test and interpret the theoretical and experimental data of conduction and convection experiments.
				Co:2 Relate the theory and the experimentation pertaining to thermal system.
				Co:3 Examine various thermal systems
14	I	MTE1132	Computational Engineering Lab	Co:1 Develop codes for numerical methods to tackle simple thermal problems.
				Co:2 Simulate codes of computational methods of given conditions.
				Co:3 Analyze and validate output of written codes with analytical solution.
15	I	SHP5511	Technical Communication	Co:1 Use grammatically correct sentences in different types of technical writings.

				Co:2 Apply technical writing skills to improve readability of documents.
				Co:3 Demonstrate professional skills required in job interviews and at workplace.
16	II	MTE2012	Computational Fluid Dynamics	Co:1 Derive governing equations for fluid dynamics and heat transfer.
				Co:2 Develop finite difference algorithms for fluid flow and heat transfer problems.
				Co:3 Develop finite volume algorithms for fluid dynamics equations.
				Co:4 Select appropriate grid generation methods for CFD analysis.
				Co:5 Apply different CFD Techniques to various fluid flow problems
17	II	MTE2022	Design of Thermal System	Co:1 Illustrate basic principles of modeling and optimization of design of thermal systems.
				Co:2 Design thermal systems.
				Co:3 Analyze thermal system.
18	II	MTE2032	Design of Heat Transfer Equipment ( Program Elective – III )	Co:1 Select suitable heat exchanger for particular application.
				Co:2 Design of heat exchanger.
				Co:3 Design and analyse boiler furnace.
				Co:4 Analyse different heat transfer equipments.
19	II	MTE2042	Cryogenics Engineering ( Program Elective – III )	Co:1 Apply the basic principles of low temperature engineering.
				Co:2 Explain the behaviour of solids and liquid at low temperatures
				Co:3 Analyze cryogenic systems.

				Co:4 Discuss gas separation systems.
				Co:5 Design Heat Exchangers for Cryogenic System.
20	II	MTE2052	Food Processing, Preservation and Transport ( Program Elective – III )	Co:1 Analyze mechanism of food spoilage
				Co:2 Design suitable food processing and preservation system
				Co:3 Select suitable cold storage system
				Co:4 Design and analysis transport system of preserved foods
				Co:5 Model the preservation system
21	II	MTE2062	Battery Thermal Management System ( Program Elective – III )	Co:1 Illustrate major functions and parts of a battery-management system.
				Co:2 Design various configurations of battery pack and recent trends in battery pack.
				Co:3 Compute stored energy in a battery pack.
				Co:4 Measure and control current, temperature, and isolation in battery-management system
22	II	MTE2072	Heating Ventilation Air Conditioning and Refrigeration Systems ( Program Elective – IV )	Co:1 Explain different vapor compression refrigeration system and refrigerants.
				Co:2 Design of cooling and heating components of refrigeration system
				Co:3 Explain fundamentals of air conditioning and estimate cooling load on the building by considering various heat sources
				Co:4 Illustrate various air conditioning systems.

				Co:5 Design ducting systems and select air distribution system.
				Co:6 Explain air handling units in various applications.
23	II	MTE2082	Theory and Technology of Fuel Cells ( Program Elective – IV )	Co:1 Demonstrate various configuration of fuel cell.
				Co:2 Explain Low and high temperature fuel cell and modelling practices.
				Co:3 Analyse operating parameters of fuel cell
				Co:4 Explain various fuelling technologies.
				Co:5 Illustrate fuels, processing and systems.
				Co:6 Analyse Fuel cycles and give its applications.
24	II	MTE2092	Cogeneration and Waste Heat Management ( Program Elective – IV )	Co:1 Estimate and quantify available waste heat
				Co:2 Explore different waste heat recovery systems
				Co:3 Explain economics of cogeneration and waste heat recovery systems
				Co:4 Illustrate different cogeneration techniques.
25	II	MTE2102	Advanced Thermal Storage Technology ( Program Elective – IV )	Co:1 Select thermal storage systems and the storage materials
				Co:2 Develop a model and analyze the thermal storage systems
				Co:3 Explain applications of thermal storage systems
26	II	MTE2112		Co:1 Formulate a research problem.

			Research Methodology & IPR	Co:2 Analyse research related information.
				Co:3 Prepare and present research proposal/paper by following research ethics.
				Co:4 Make effective use of computers and computing tools to search information, analyze information and prepare report.
				Co:5 Describe nature and processes involved in development of intellectual property rights
27	II	MTE2122	Computational Fluid Dynamics Lab	Co:1 Formulate problems in fluid flow and heat transfer.
				Co:2 Apply initial and boundary conditions to solve heat transfer problems.
				Co:3 Use ANSYS-Fluent for solving real life engineering problems
28	II	MTE2132	Thermal Engineering Lab-II	Co:1 Evaluate COP of different refrigeration systems.
				Co:2 Estimate cooling load needed for given space.
				Co:3 Design a refrigeration and air conditioning system for given application.
				Co:4 Calculate efficiency and effectiveness of different types of heat exchangers.
29	II	MTE2142	Seminar	Co:1 Review of literature related to thermal engineering
				Co:2 Write technical reports.

				Co:3 Develop skills to present the findings.
30	II	SHP552	Framework of Indian Constitution	Co:1 Realise the significance of constitution of India to students from all walks of life and help them to understand the basic concepts of Indian constitution.
				Co:2 Identify the importance of fundamental rights as well as fundamental duties.
				Co:3 Understand the functioning of Union, State and Local Governments in Indian federal system.
				Co:4 Learn procedure and effects of emergency, composition and activities of election commission and amendment procedure.
31	III	MTE3012	Industry Internship	Co:1 Identify the real applications and practices of courses studied, at industry level
				Co:2 Recognize various modeling , analysis and validation techniques adopted at industries.
				Co:3 Demonstrate the issues at design, manufacturing and assembly levels.
				Co:4 Summarize and present technical data in report format.
32	III	MOE2011	Artificial Intelligence – Machine Learning (Open Elective)	Co:1 Describe central machine learning methods and techniques and how they relate to artificial intelligence.
				Co:2 Differentiate between supervised and unsupervised learning techniques.
				Co:3 Apply the ML algorithms to a real-world problem.

				Co:4 Optimize the models learned and report on the expected accuracy that can be achieved by applying the models.
				Co:5 Evaluate a given problem and apply appropriate machine learning technique.
33	III	MOE2021	Creative Thinking: Tools & Techniques (Open Elective)	Co:1 Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios.
				Co:2 Apply different brainstorming techniques in group activities.
				Co:3 Be proficient in the application of the 6 thinking hats tool in different life scenarios.
				Co:4 Develop a systematic approach to idea generation through the use of morphological analysis.
				Co:5 Innovate on an existing product, service or situation applying the SCAMPER method.
				Co:6 Get confident with the theory of inventive problem solving, called TRIZ.
34	III	MOE2031	MOOC Course (Open Elective)	Co:1 Identify the real applications and practices of courses studied, at industry level
				Co:2 Recognize various modelling, analysis and validation techniques adopted at industries.
				Co:3 Demonstrate the issues at design, manufacturing and assembly levels.
				Co:4 Summarize and present technical data in report format.
35	III	MOE2041	Condition Monitoring and	Co:1 Identify the maintenance scheme, their scope and limitations – apply the

			Signal Processing (Open Elective)	<p>maintenance strategies to various problems in the industrial sectors.</p> <p>Co:2 Analyze for machinery condition monitoring and explain how this compliments monitoring the condition.</p> <p>Co:3 Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenance expenditure.</p> <p>Co:4 Emphasizes on case studies that require gathering information using the modern testing equipment and processing it to identify the malfunction in that system.</p> <p>Co:5 Identify vibration measurement, lubrication oil analysis.</p>
36	III	MOE2051	Aircraft Conceptual Design (Open Elective)	<p>Co:1 Analyze the design process of aircraft and decide the aircraft configuration.</p> <p>Co:2 Choose type of power plant as per flight regime.</p> <p>Co:3 Design the fuselage layout as per type of aircraft.</p> <p>Co:4 Design the wing for type of aircraft and its wing loading.</p> <p>Co:5 Evaluate lift, drag and mass for design synthesis.</p> <p>Co:6 Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.</p>
37	III	MDE2060	Augmented Reality and	Co:1 Define the basic concepts of Virtual and Augmented Reality

			Virtual Reality (Open Elective)	Co:2 Identify the differences in AR/VR concepts and technologies
				Co:3 Describe the fundamental concepts relating to Virtual Reality such as presence, immersion, and engagement
				Co:4 Evaluate usability of AR/VR applications and critique their use of AR/VR capabilities
				Co:5 Design and prototype effective AR/VR applications using UNITY platform for various application.
38	III	MDE2070	Industrial Instrumentation (Open Elective)	Co:1 Elaborate working principal of different transducers.
				Co:2 Select suitable transducer/sensor for specific application.
				Co:3 Justify the use of specific measurement technique for specific task.
				Co:4 Evaluate the Calibration and Interfacing of the transducers.
39	III	MDE2080	Advanced Mechatronics Systems (Open Elective)	Co:1 Explain Mechatronics System.
				Co:2 Analyze the Mechatronics Based System.
				Co:3 Model, simulate, and verify the mechatronics systems.
				Co:4 Identify Electrical, Hydraulic and Pneumatic Components.
40	III	MTE3022	Dissertation Phase I	Co:1 Explain the contributions of various researchers in the field of thermal engineering after carrying out literature survey from reputed journals
				Co:2 Recognize the gap in the research and define a problem statement

				Co:3 Explain significance and applicability of problem statement
				Co:4 Summarize and present technical data in report format
41	III	MTE3032	Dissertation Phase II	Co:1 Outline the work plan for problem statement
				Co:2 Identify the proper modeling and analysis tool
				Co:3 Reproduce the preliminary results of problem statement
				Co:4 Summarize and present technical data in report format
42	IV	MTE4012	Dissertation Phase III	Co:1 Explain the issues related to method adopted in solving the problem
				Co:2 Select proper technique in solving the problem
				Co:3 Compare the results with available literature.
43	IV	MTE4022	Dissertation Phase - IV	Co:1 Design new methodology to address the problem
				Co:2 Justify the results obtained from new methodology
				Co:3 Write technical report and defend work.

(An Empowered Autonomous Institute, affiliated to SUK)

# ● **Mechatronics Engineering**

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

**UG Program 2024-25**

- **Department Name :-Mechatronics Engineering**
- **UG Program Name :-B. Tech**
- **Vision and Mission :-**

<b>Vision</b>	To serve as a pioneering transdisciplinary department dedicated to transform students to professional graduate to cater the needs of Industry and Society.
<b>Mission</b>	<ol style="list-style-type: none"> <li>1. Preparing graduates to meet industry demands through the provision of high-quality education.</li> <li>2. Creating an educational environment that nurtures research, innovation, creativity and entrepreneurship.</li> <li>3. Nurturing professionalism, ethical standards, core human values and the culture of life long learning.</li> </ol>

Sr. No.	Program Outcomes
83.	Apply the knowledge of mathematics, science, engineering fundamentals and Mechatronics engineering to the solution of complex engineering problems.
84.	Identify, formulate, review research literature, and analyze complex Mechatronics engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
85.	Design solutions for complex Mechatronics engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety and the cultural, societal, and environmental considerations.
86.	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
87.	Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to complex Mechatronics engineering activities with an understanding of the limitations.
88.	Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
89.	Understand the impact of the professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of and need for sustainable development.
90.	Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
91.	Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.
92.	Communicate effectively on complex Mechatronics engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations and give and receive clear instructions.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

93.	Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team to manage projects and in multidisciplinary environments.
94.	Recognize the need for and have the preparation and ability to engage in independent and life- long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
6.	Innovate & design mechatronics systems & components using national and international standards like IS BS, SAE, ISO, ASTM to meet required specifications.
7.	Ensure optimized system performance by analyzing & constant improvement in design & enhancing intelligence capability of the system.
8.	Lead professional practices in Industries or as an entrepreneur by applying management principles & practices.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	MC2011	<b>Engineering Mathematics for Mechatronics Engineering</b>	1. Illustrate curve fitting concepts in Mechatronics related problems.
				2. Compute problems on probability distribution by using different formulae.
				3. Evaluate differential equation using appropriate concept.
				4. Analyze the problem and apply the concept of partial differential equations.
				5. Evaluate Laplace & inverse Laplace transform of function and solve ordinary differential equations and linear time invariant systems.
				6. Develop Fourier series of periodic functions.
2.	III	MC2031	<b>Analog and Digital Electronics</b>	1. Explain working principles of electronic devices
				2. Illustrate applications of analog and digital electronic circuits.
				3. Analyze various analog and digital circuits.
				4. Design applications using electronic devices and circuits.
3.	III	MC2051	<b>Industrial Fluid Power</b>	1. Describe the structure and

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>function of common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors etc.</p> <p>2.Model and analyze common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors.</p> <p>3.Create &amp; simulate basic hydraulic and pneumatic circuit diagrams for different applications.</p> <p>4.Design, develop &amp; analyze simple hydraulic and pneumatic systems for given task.</p>
4.	III	MC2071	<b>Engineering Mechanics</b>	<p>1.Calculate resultant force of coplanar force system.</p> <p>2.Analyze engineering problems applying conditions of equilibrium.</p> <p>3.Determine centroid &amp; moment of inertia of the geometrical plane lamina.</p>
5.	III	CEMD201	<b>Building Construction and Planning</b>	<p>1.Suggest appropriate materials for building construction applications.</p> <p>2.Prepare a functional design of components of the building.</p> <p>3.Design and draw residential building using principles of planning and bye-laws.</p> <p>4.Prepare plumbing and electrification plan for the building.</p> <p>5.Explain properties of building finishing materials and application procedure.</p>
6.	III	CSMD201	<b>Introduction to Data Structures</b>	<p>1.Compare between linear and nonlinear data structures</p> <p>2.Describe the characteristics of various data structure such as</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				stacks, queues, trees, graphs and Hash tables.
				3. Analyze various searching and sorting algorithms and apply it to solve particular problem.
				4. Determine a suitable data structure and algorithm to solve a real world problem
7.	III	EEMD201	<b>Electrical Power Generation</b>	1. List the main components of different power plants
				2. Describe the operation of various power plants used for electrical power generation.
				3. Explain working principles of various power plants
				4. Compare different power plants based on advantages, limitations and future prospects
				5. Draw layout of electrical power plants.
				6. Explore alternate electrical energy resources for future needs and challenges.
8.	III	ECMD201	<b>Electronics Devices and Applications</b>	1. Describe the fundamental concepts of electronics and working principles of different devices.
				2. Analyze different analog and digital electronics circuits.
				3. Design digital electronics circuits with truth table and logic diagram.
9.	III	CIMD201	<b>Data Structures</b>	1. Describe the basic terminologies of data structures.
				2. Examine the linear data structure array with its types.
				3. Demonstrate the working of stack, queue performed on data structures.
				4. Illustrate the working of linked list.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Discuss Tree terminologies and their Applications.
				6. Elaborate Graph terminologies with their types.
10.	III	MEMD203	<b>Design Thinking</b>	1. Identify the new product opportunities and sources of new product ideas.
				2. Elaborate the product life cycle and product design process.
				3. Integrate the customer and end-consumer needs into design process.
				4. Assimilate the various product characteristics to design a novel product
				5. Participate effectively in group work sessions and teams to become acquainted with the importance of teamwork and collaboration that is critical to new product success
11.	III	MCMD201	<b>Fundamentals of Mechatronics</b>	1. Identify various elements of mechatronics systems.
				2. Select appropriate sensor/Actuator/controller/control algorithm for different applications.
				4. Develop PLC/ microcontroller-based applications.
12.	III	AIMD201	<b>Object Oriented Programming</b>	1. Identify and integrate basic object-oriented programming concepts and apply them in problem-solving
				2. Construct and test inheritance concepts for reusing the program.
				3. Develop and test a program using loops, decision statements, and functions in Python.
				4. Evaluate the given Plot data using appropriate Python visualization libraries.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
13.	III	RAMD201	<b>Fundamentals of Robotics &amp; Automation</b>	1. Differentiate various robotic configurations and performance metrics.
				2. Compare various end effectors, sensors, and drive systems in robotic applications.
				3. Illustrate kinematic and dynamic principles applied to robotic systems.
				4. Outline robot programming solutions for diverse applications.
				5. Distinguish various types and aspects of automation.
				6. Relate the knowledge of Programmable Logic Controllers (PLCs) to industrial automation tasks.
14.	III	MC2511	<b>Analog and Digital Electronics Lab</b>	1. Analyze electronic circuits as per requirements.
				2. Conduct an experiment to observe response.
				3. Calculate different parameters from experimental results and plot the response.
				4. Interpret results of experiment and compare with measured values.
				5. Improve the ability to communicate effectively through written lab journals.
15.	III	MC2531	<b>Industrial Fluid Power Lab</b>	1. Demonstrate & identify various components of Hydraulics & Pneumatic System along with standard symbols.
				2. Design & analyze basic hydraulic and pneumatic circuits using training kits.
				3. Design & analyze electrohydraulic and electropneumatic circuits using training kits.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				4. Use Automation Studio software to design & simulate the fluid power circuits.
16.	III	MC2551	<b>Workshop Practice –I</b> (Electrical Machines Lab)	1.Perform experiments on AC and DC machines.
				2.Demonstrate testing and control of various electrical machines.
				3.Plot the characteristics of various electrical machines.
				4.Analyse the performance parameters of electrical machines.
				5.Compare the performances of the electrical machines.
17.	III	MC2571	<b>Machine Drawing and CAD Modeling Lab</b>	1.List and draw different standard parts like fasteners and keys.
				2.Inspect Limit, fits and tolerances from sketches of machine parts.
				3.Model machine parts using CAD software.
				4.Assemble machine Parts by using CAD tool.
				5.Generate detailed drawing views.
				6.Create surface features using surface tools.
18.	III	MC2591	<b>Engineering Mechanics Lab</b>	1.Verify law of polygon of forces, law of triangle of forces and principle of moment.
				2.Verify Lami's theorem.
				3.Compare the coefficient of friction of various surfaces in contact.
				4.Correlate theoretical and practical results of support reactions and Centroid of plane lamina.
				5.Analyze a simple truss.
19.	III	MC2611	<b>Technical Aptitude -I</b>	1.Apply the knowledge acquired during the course work.
				2. Develop the ability of problem solving.
20.	III/IV	SH2634	<b>Professional Leadership Skills</b>	1.Explain the traits of a leadership through real life examples.
				2.Exhibit the ability to work effectively in team.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3.Prepare a presentation as per the audience and context requirements.
21.	III/IV	SH2614	Interpersonal Skills	1.Exhibit interpersonal communication skills.
				2. Demonstrate decision-making skills.
				3. Apply conflict resolution styles appropriate in different situations.
				4. Demonstrate skills to manage balance in work and life.
				5. Apply Jeevanvidya wisdom in day-to-day life.
22.	III/IV	SH2694	Innovation Tools and Methods for Entrepreneurs	1.Explain structured approach to define the problem with every possible detail, identify conflicts and solve them.
				2.Apply User Journey Map to the selected problem to show user interaction at various stages.
				3.Analyse the solutions provided by competitors for effectiveness and gaps if any.
23.	III/IV	SH2594	Personal Effectiveness and Body Language	1.Develop skills to build self-esteem and a positive attitude.
				2. Develop interpersonal skills characterized by effective communication and conflict resolution.
				3. Discover ways to overcome procrastination.
				4. Demonstrate responsiveness towards stress and health issues.
				5.Interpret the non-verbal behavior of a person.
24.	III	SH2734	German Language-III	1.Interpret the language if the next person is speaking slowly and clearly.
				2.Make use of the language in routine life with the routing topics like family, shopping, work etc.
				3.Demonstrate the language by self-introduction in German with simple sentences.
25.	III	SH2714	Japanese Language - Level III	1.Make use of basic conversations in various situations.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Identify the sentence patterns. 3. Explain insights about the communication required for living in Japan. 4. Interpret Japanese work ethics required in their professional career.
26.	IV	MC2021	Strength of Materials	1. Determine different types of stresses and strains induced in any machine component. 2. Develop shear force and bending moment diagram for different types of beams. 3. Determine stress distribution for various cross sections of beam. 4. Estimate the deflection of beams by analytical and graphical method. 5. Analyze axially loaded column for different end conditions.
27.	IV	MC2041	Microcontrollers and Embedded systems	1. Understand the fundamentals of embedded systems. 2. Write embedded C programs for on chip and off chip peripherals. 3. Interface peripherals with microcontroller. 4. Design the embedded system using microcontroller.
28.	IV	MC2061	Kinematics & Dynamics of Machines	1. Perform the mobility analysis of mechanism. 2. Determine kinematic analysis (Velocity, acceleration) for a given mechanism using analytically and graphically method 3. Construct different types of cam profile for a given condition 4. Apply appropriate power transmission method for mechanical system 5. Apply different techniques to balance the rotary and reciprocating systems

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Evaluate and analyze the parameters affecting on stability of spinning and rotating bodies.
29.	IV	MC2081	<b>Manufacturing Technologies</b>	1.Explain casting as manufacturing process suitable for the component design and production volume.
				2.Select appropriate joining process for given application.
				3.Select suitable Engineering forming process for production of component of required specification.
				4.Select machine tools for metal cutting operations.
				5.Describe the non-traditional machining processes.
30.	IV	CEMD202	<b>Building Estimation and Valuation</b>	1.Explain the types and basic requirements of the estimate.
				2.Explain measurement sheet, abstract sheet, and detailed specifications of different construction items.
				3.Prepare detailed estimate of load bearing structure and framed structure.
				4.Prepare rate analysis and bar bending schedule of different construction items.
				5.Explain the tenders and contracts.
				6.Describe basic terms of valuation.
31.	IV	CSMD202	<b>Problem Solving using JAVA</b>	1.Understand the basic object-oriented programming concepts and apply them in problem solving.
				2.Apply concept of inheritance for code reusability.
				3.Develop Programs using multithreading.
				4.Develop data-centric applications using JDBC.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5.Design the basics of java console and GUI based programming
32.	IV	EEMD202	Power System	1.Write the basic working principles of different generating sources.
				2.Analyze different types of loads
				3.Explain importance of power factor and tariffs in power system.
				4.Identify various components in power transmission and distribution system.
				5.Select substation equipments as per requirement.
33.	IV	ECMD202	Electronics Communication Systems	1.Describe different communication systems.
				2.Explain applications of analog and digital modulation techniques.
				3.Analyze different modulation and demodulation techniques.
				4.Explain the use of satellite communication.
34.	IV	CIMD202	Computer Algorithms	1.Analysing asymptotically the performance of algorithms.
				2.Compare and analyse searching and sorting algorithms.
				3.Apply different algorithm design techniques to solve problems like job sequencing,
				5.knapsack, TSP, finding shortest path etc.
				6.Apply backtracking method to solve problems like N-queens, graph coloring, sum of subsets etc.
35.	IV	MEMD204	Behavioral Engineering and Design	1.Explain key concepts and theories related to influencing user behavior in product design.
				2.Utilize psychological principles to develop product designs that effectively address user needs and preferences.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				3.Create products that demonstrate high levels of user engagement, measured through metrics such as adoption rates and user interaction patterns.
				4.Develop products that prioritize user satisfaction and usability, as measured through user testing and feedback.
				5.Incorporate aesthetic appeal and ergonomic considerations into product designs, assessed through objective criteria such as user comfort and visual appeal ratings.
				6.Analyze user feedback and iteratively improve designs to enhance user experience, measured by improvements in user satisfaction scores or usability metrics.
36.	IV	MCMD202	<b>Industrial Fluid Power</b>	1.Describe the structure and function of common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors etc.
				2.Model and analyze common hydraulic and pneumatic components such as cylinders, valves, pumps, and motors.
				3.Create & simulate basic hydraulic and pneumatic circuit diagrams for different applications.
				4.Design, develop & analyze simple hydraulic and pneumatic systems for given task.
37.	IV	AIMD202	<b>Data Structures &amp; Algorithms</b>	1.Compare between linear and nonlinear data structures
				2.Describe the characteristics of various data structure such as

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				stacks, queues, trees, graphs and Hash tables. 3.Analyze various searching and sorting algorithms and apply it to solve particular problem. 4.Determine a suitable data structure and algorithm to solve a real world problem
38.	III	RAMD202	Sensors & Actuators	1.Explain the functioning of various sensors and transducers 2.Calibrate the transducers such as accelerometers, microphones and strain gauges. 3.Explain the characteristics of various sensors and transducers 4.Describe the process and need for calibration. 5.Choose the sensor for measurement of few parameters. 6.Use the appropriate sensor and calibrate
39.	I/II	SH202	मराठी भाषिक कौशल्यविकास	1. भाषा आणि व्यक्तिमत्व विकास यांमधील सहसंबंध स्पष्ट करू शकेल २. भाषिक कौशल्यविकास करू शकेल ३. कथा या मराठी साहित्य प्रकाराचे विश्लेषण करू शकेल ४. एकांकिका या मराठी साहित्य प्रकाराच्या विश्लेषणाची क्षमता प्राप्त करेल
40.	I		Hindi	1.विद्यार्थियों में मानवीय संवेदनाओं के विकास के साथ नवीन सामाजिक सांस्कृतिक बोधऔर जीवन मूल्यों का विकास होगा। 2.विद्यार्थियों में साहित्य के माध्यम से कलात्मक गुणों की अभिवृद्धि होगी कला की साहित्यिक विधाओं के प्रति अभिरुचि जागृत होगी तथा रचनात्मक कौशल्य को बढ़ावा मिलेगा। 3.विद्यार्थियों में नए वैश्विक मूल्यों के प्रति सजगता को बढ़ावा मिलेगा एवं मूल्यवादी दृष्टि के प्रति दायित्व बोध उत्पन्न होगा।छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे। 4.छात्र व्यवहार में हिंदी भाषा का उचित प्रयोग कर सकेंगे।
41.	IV	SH2174	Environmental Science	1.Apply interdisciplinary knowledge in environmental science by integrating concepts

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>and principles from various fields of science and engineering to address environmental issues.</p> <p>2.Evaluate environmental impacts of human activities on ecosystems and on the environment.</p> <p>3.Use scientific approach to identify and solve environment related problems.</p> <p>4.Design sustainable solutions to address environmental challenges by considering renewable energy sources, waste management strategies conservation measures, and environmental policies.</p> <p>5.Participate in group work to become acquainted with the importance of teamwork, collaboration.</p> <p>6.Develop presentation and report writing skills.</p>
42.	IV	MC2501	<b>Microcontrollers and Embedded System Lab</b>	<p>1 .Write embedded C programs for on chip and off chip peripherals.</p> <p>2. Interface peripherals with PIC microcontroller.</p> <p>3. Compile debug and test logic on PIC microcontroller.</p>
43.	IV	MC262	<b>Robot Operating System Lab</b>	<p>1.Illustrate the basics of Robot operating system simulation interface.</p> <p>2. Explain basic Linux commands for ROS installation.</p> <p>3. Demonstrate node concepts in multi-Robot system communication.</p> <p>4. Apply basic robotic actions with Robotic arm.</p> <p>5. Analyze the robotic prototypes used in various industries.</p> <p>6. Demonstrate various actions using humanoid robots.</p>
44.	IV	MC2541	<b>Workshop Practice –II</b>	<p>1.Demonstrate effect of variables such as speed, feed, and depth of cut on machining process.</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Produce given joint by MIG welding process.
				3. Produce welding run on S.S. by TIG welding.
				4. Produce given job with proper taper and V threading within dimensional tolerances $\pm 0.2$ mm. on diameter and $\pm 0.5$ mm. on length. (Job – A)
45.	IV	MC2561	Technical Aptitude -II	1. Apply the knowledge acquired during the course work.
				2. Develop the ability of problem solving.
46.	IV	SH 2644	German Language - Level IV	1. Interpret the language if the next person is speaking slowly and clearly.
				2. Make use of the language in routine life with the routing topics like family, shopping, work etc.
				3. Demonstrate the language by self-introduction in German with simple sentences.
47.	IV	SH2624	Japanese Language - Level IV	1. To be able to make basic conversations in various situations.
				2. To recognize the sentence patterns.
				3. To improve Japanese Language proficiency.
				4. To give students insights about the communication required for living in Japan.
				5. To expose students to the Japanese work ethics required in their professional careers.
48.	V	MC3011	Industrial Automation	1. Explore the architecture of PLC and its functions.
				2. Execute the various instructions and logic in PLC.
				3. Develop the PLC program for various applications.
				4. Design and develop the SCADA, DCS system for various applications.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
49	V	MC3031	<b>Sensor and Instrumentation</b>	1.Explain the fundamental principles of various sensors and transducers.
				2.Analyze the characteristics, advantages, and limitations of different sensor types.
				3.Select and integrate sensors into mechatronic systems for real-time data acquisition and control.
				4.Apply appropriate signal conditioning techniques to improve sensor output accuracy.
				5.Develop mechatronic systems using appropriate sensors for real-life applications.
50	V	MC3051	<b>Control Engineering</b>	1.Design mathematical model for electrical, mechanical and electromechanical system.
				2.Evaluate transient and steady state behaviour of systems using standard test signals.
				3.Solve the linear and non-linear systems for absolute stability and relative stability.
				4.Design a stable control system satisfying requirements of stability and reduced steady state error.
				5.Analyse of control systems using the state space approach.
51	V	MC307	<b>Database Management systems</b>	1.Illustrate the design principles for database design, ER model and normalization.
				2.Demonstrate the basics of query evaluation and heuristic query optimization techniques.
				3.Apply Concurrency control and recovery mechanisms for the desirable database problem.
				4.Compare the basic database storage structure and access techniques including B Tree, B+ Tress and hashing.
				5.Review the fundamental view on unstructured data and its management..

Sr. No.	Semester	Course Code	Course Name	Course Outcome
52	V	MC3091	<b>Condition Monitoring</b>	1.Explain the maintenance techniques for condition monitoring in industries.
				2.Select the methods of vibration control.
				3.Accumulate the data for analysis using vibration acquisition equipment.
				4.Apply modern technologies for effective signal analysis and fault diagnosis.
				5.Monitor and analyze the method of failure analysis used for different applications.
53	V	MC3111	<b>Battery And Fuel Cell Technology</b>	1.Explain the electric vehicle and hybrid vehicles technology, environmental and current status.
				2.Justify Energy Storage Requirement in Hybrid and Electric Vehicles and elaborate the Battery Fundamental Characteristics
				3.Discuss the construction, electrochemistry, technology, and applications of selected primary batteries.
				4.Discuss the construction, electrochemistry, technology, and applications of selected Secondary batteries.
				5.Evaluate different batteries or fuel cells in order to select a suitable battery or fuel cell for given application.
				6.Select suitable, membrane, fuel (for fuel cell) and drive line for developing electric vehicles.
54	V	MC 3131	<b>Industrial Organization and Management</b>	1.Recognize the factors that influence the business environment and visualize their effect on business.
				2.Evaluate the scope and objectives of functional areas of business and their integration.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>3. Formulate an effective and efficient solution for business problems.</p> <p>4. Identify several ways in which financial accounting information is used to make business decisions.</p> <p>5. Apply engineering economics principles for evaluation of a business.</p>
55	V	MC3151	<b>Material Handling Systems</b>	<p>1. Explain fundamental principles and concepts of material handling systems.</p> <p>2. Select and apply specific material handling system for respective applications.</p> <p>3. Choose an automatic transfer mechanisms and feed mechanism in material handling systems.</p> <p>4. Analyze usage of RGV's, AVG's, storage, retrieval Systems and use of recent technologies in advanced material handling systems.</p>
56	V	OE353	<b>Factory Automation</b>	<p>1. Recognise various automation technologies in manufacturing and process industries.</p> <p>2. Select various automation tools and methods in the manufacturing industry.</p> <p>3. Implement various control and automation methods in process industries.</p> <p>4. Analyse automation systems for manufacturing and process industries.</p>
57	V	OE355	<b>Cyber Physical Systems</b>	<p>1. Understand the need and purpose of the different components of CPS</p> <p>2. Design physical system depends on its requirements</p> <p>3. Develop the ability to interact with cyber-physical systems protocols</p> <p>4. Analyze common methods used to secure cyber-physical systems</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
58	V	CEMD301	<b>Infrastructure Engineering</b>	1. Apply the knowledge of geometric design in road construction.
				2. Identify the quality parameters of pavement materials and various methods of road construction.
				3. Discuss the various aspects of airport engineering.
				4. Explain design parameters of railway engineering and its component parts.
				5. Summarize the different offshore structures for dock and harbors.
59	V	CSMD301	<b>Fundamentals of Database Systems</b>	1. Describe the purpose and nature of the database system for storing and fast access to the data
				2. Identify various protocols, issues, and techniques related to transaction management for a consistent & and stable database
				3. Draw E-R models to represent simple database application scenarios
				4. Design the queries to manipulate and access data using procedural and non-procedural languages
				5. Apply relational database design concepts to remove data redundancy and to retrieve data easily
				6. Perform operation on Unstructured data.
60	V	EEMD301	<b>Electrical Machines</b>	1. Describe behavior of dc machine.
				2. Explain the working principle of 1-Phase and 3-Phase transformers.
				3. Explain working of different induction motors.
				4. Select the relevant electrical machines for different applications

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5. Interpret the relevant fractional horsepower motor for different applications
61	V	ECMD301	<b>Advanced Communication Systems</b>	1. Explain the principles of antenna and wave propagation.
				2. Understand basic antenna parameters and their types.
				3. Discuss the evolution, requirements, and challenges of 5G communication systems.
				4. Understand and compare various communication techniques.
				5. Communicate effectively on complex engineering topics related to modern communication techniques.
62	V	CIMD301	<b>Introduction of DBMS</b>	1. Describe the fundamental elements of relational database management systems.
				2. Design ER-models to represent simple database application scenarios.
				3. Write SQL query to perform various operations on the database.
				4. Analyze principle of integrity constraints, Hashing and Indexing on databases.
63	V	MEMD305	<b>Product Design Tools and Techniques</b>	1. Explain the basic principles of engineering design.
				2. Design products for ease of manufacturing and assembly.
				3. Apply value engineering and concurrent engineering principles in product design.
				4. Apply reverse engineering on a product.
				5. Apply various prototyping techniques, including rapid prototyping technologies.
64	V	MCMD301	<b>Sensor and Instrumentation</b>	1. Explain the fundamental principles of various sensors and transducers.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>2. Analyze the characteristics, advantages, and limitations of different sensor types.</p> <p>3. Select and integrate sensors into mechatronic systems for real-time data acquisition and control.</p> <p>4. Apply appropriate signal conditioning techniques to improve sensor output accuracy.</p> <p>5. Develop mechatronic systems using appropriate sensors for real-life applications.</p>
65	V	AIMD301	Machine Learning	<p>1. Utilize machine learning techniques and understand the basic theory underlying machine learning.</p> <p>2. Articulate supervised, unsupervised and reinforcement learning</p> <p>3. Identify the basic concepts of learning and decision trees.</p> <p>4. Utilize Bayesian techniques for problems appear in machine learning</p> <p>5. Perform statistical analysis of machine learning techniques.</p>
66	V	RAMD301	Kinematic & Dynamics for Robots	<p>1. Select the type of mechanism for the robotic applications</p> <p>2. Perform kinematic analysis and synthesis of mechanisms.</p> <p>3. Perform forward and inverse kinematics of robots</p> <p>4. Perform workspace analysis for different types of robots</p> <p>5. Design robot manipulators based on dynamic analysis</p> <p>6. Perform forward and inverse dynamics of robots</p>
67	V	CEMD303	Smart Cities & Sustainable Development	<p>1. Develop a critical understanding of the different concept and ideologies of smart cities.</p> <p>2. Analyse the different approaches toward planning and development of smart cities on global level.</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>3. Assess the existing state and approach of Smart city Mission in India.</p> <p>4. Comprehend the concept of resilience and sustainable development and its measurement.</p> <p>5. Evaluate the present status of sustainability and rating systems initiatives within the Indian context.</p>
68	V	CSMD303	<b>Object-oriented Programming in Python</b>	<p>1. Demonstrate a comprehensive understanding of Python syntax, data types, and basic operations.</p> <p>2. Make use of common Python libraries for data manipulation.</p> <p>3. Implement lists, tuples, sets, and dictionaries for effective data handling.</p> <p>4. Apply principles of OOP, including classes, objects, inheritance, and polymorphism.</p>
69	V	EEMD303	<b>Electrical Technology Lab</b>	<p>1. Demonstrate speed control methods of electrical machines.</p> <p>2. Analyze performance of DC motor and induction motor for speed control applications.</p> <p>3. Implement power electronic circuits for given application.</p> <p>4. Measure electrical quantities using electrical and electronic instruments.</p>
70	V	ECMD303	<b>Electronic Product Design</b>	<p>1. Elaborate product design processes.</p> <p>2. Explain various aspects of PCB design.</p> <p>3. Differentiate product-testing methods.</p> <p>4. Create various documents for the product.</p>
71	V	CIMD303	<b>OOP using Java</b>	<p>1. Explain the concepts and terminologies in object-oriented concepts and java programming language.</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>2. Apply object-oriented programming features and concepts for solving given problem.</p> <p>3. Develop the java application using the collection framework to solve real word problem.</p> <p>4. Apply the concepts exception handling to develop error free codes.</p> <p>5. Utilize the concepts of package to develop efficient codes.</p>
72	V	MEMD307	<b>Design and Prototyping</b>	<p>1. Use CAD software to create detailed CAD models and designs.</p> <p>2. Explain the workflow and settings for effective additive manufacturing.</p> <p>3. Simulate the 3D printing process to identify and correct potential issues before actual printing.</p> <p>4. Print a 3D component based on CAD models.</p>
73	V	MCMD303	<b>Industrial Automation</b>	<p>1. Explore the architecture of PLC and its functions.</p> <p>2. Execute the various instructions and logic in PLC.</p> <p>3. Develop the PLC program for various applications.</p> <p>4. Design and develop the SCADA, DCS system for various applications.</p>
74	V	AIMD303	<b>Business Intelligence</b>	<p>1. Articulate data pre-processing techniques</p> <p>2. Analyze the data modeling required for business intelligence related tasks</p> <p>3. Determine the role of statistical techniques in data analysis tasks</p> <p>4. Identify big data analysis techniques</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				5.Utilize different reporting/visualization tool
75	V	RAMD303	<b>Robot Programming Lab.</b>	1.Explain Robot programming ecosystem. 2.Create reusable code for robot powered applications. <b>3.Design a custom robot using programming.</b> 4.Simulate and control the robot using ROS.
76	V	MC3511	<b>Industrial Automation Lab</b>	1.Develop the PLC program for the implementation of logic gates 2.Develop the PLC program for controlling the parameters and applications like Pressure, bottle filling, cylinder actuation and elevator control. 3.Develop the PLC program for various applications like identifying the necessity of using Supervisory Control and Data Acquisition (SCADA) for complex projects. 4.Develop HMI, SCADA programme for various applications.
77	V	MC3531	<b>Sensors and Instrumentation Lab</b>	1.To understand temls and sensors used in engineering applications. 2. Able to design necessary signal conditioning circuits for various sensors.
78	V	MC3551	<b>Control Engineering Lab</b>	1.Develop transfer function of block diagrams using MATLAB. 2.Analyze response of control systems to various input conditions. 3.Design a control system using root locus method. 4.Prepare state space representation for given control system using various programming methods.
79	V	MC3571	<b>Technical Aptitude-III</b>	1.Apply the knowledge acquired during the course work.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2.Develop the ability of problem solving.
80	V	SH3034	Scholastic Aptitude-I	<p>1.Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.</p> <p>2.Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests</p> <p>3.Develop a bridge in analogies, series and visualizing directions.</p> <p>4.Apply various short cuts &amp; techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams.</p>
81	V	MC3591	Summer Internship	<p>1.Apply the Technical knowledge in real industrial situations.</p> <p>2.Formulate Technical reports/projects.</p> <p>3.Develop and refine oral and written communication skills.</p> <p>4.Explain the activities and functions of business professionals.</p> <p>5.Discuss knowledge of the industry in which the internship is done.</p>
82	VI	MC3021	Machine Design	<p>1. Identify the customers need, formulate the problem and draw the design specifications.</p> <p>2 Apply the theories of failure for designing the machine elements.</p> <p>3 Design a simple machine component like levers, bolted &amp; welded joints, shafts, keys and springs.</p> <p>4 Select a bearing and power transmission elements for given application</p> <p>5. Design a spur gear for a given application</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Design a component against fluctuating load.
83	VI	MC3041	<b>Power Electronics and Drives</b>	1.Explain the characteristics, ratings and applications of power devices.
				2.Calculate the performance parameters of the converters and drives.
				3.Analyze the operation of power electronics converters and drives.
				4.Design power converters to meet the given requirements.
84	VI	MC3061	<b>Research Methodology</b>	1.Select on the literature in the field, analyze and interpret research evidence published on a topic to establish a suitable research problem/issue or opportunity to explore further.
				2.Design the research study using a suitable paradigm, associated methodologies and methods of data collection and analysis.
				3.Write a research proposal (research blueprint) describing the topic.
				4.Demonstrate the ability to use the statistical software to solve problems.
85	VI	MC3081	<b>Finite Element Methods</b>	1.Apply the finite element method for solid mechanics and Heat transfer problems to develop the models.
				2.Solve problems in one-dimensional structures including trusses and beams.
				3.Formulate FE characteristic equations for two-dimensional and three-dimensional problems.
				4.Analyze field problems like heat transfer and torsion by deriving element matrices and applying FEM formulations.
86	VI	MC310		1.Apply the fundamentals of conduction heat transfer.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			<b>Thermal Management of Mechatronics System.</b>	2.Distinguish between the basic modes of heat transfer.
				3.Design simple heat transfer systems using electric circuit elements.
				4.Analyse forced and free convection heat transfer situations.
87	VI	MC312	<b>Additive Manufacturing</b>	1.Recognize the Importance of AM technologies in Manufacturing.
				2.Classify and select additive manufacturing processes for a given application.
				4.Design for manufacturing of AM and conduct Process Analysis
				5.Identify software issues related to additive manufacturing process.
				6.Select the suitable method for Post-processing of AM parts
				7.Identify the Applications of AM in Automobile, Aerospace, and Bio-medical etc.
88	VI	MC3141	<b>Digital Signal Processing</b>	1.Characterize the signals mathematically in continuous time, discrete-time, and in the frequency domain.
				2.Analyze discrete-time systems using different transforms.
				3.Explain the digital signal processing algorithms.
				4.Design of different types of digital filters for various applications.
89	VI	MC316	<b>Industry 4.0 Technologies and IIoT</b>	1.Recognise the role of Industry 4.0 and its historical evolution.
				2.Identify and describe the core technologies that underpin Industry 4.0, including IoT, Big Data, Cloud Computing, and Cyber-Physical Systems.
				3.Analyze the components of smart manufacturing systems, including digital twins, additive

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>manufacturing, robotics, and automation.</p> <p>4. Investigate the fundamental concepts and architectures of IIoT.</p> <p>5. Analyze the role of sensors, communication protocols, and data analytics in IIoT implementations.</p>
90	VI	MC3181	<b>Wireless Sensor Network</b>	<p>1. Analyze single node network architecture of WSN.</p> <p>2. Classify routing and MAC layer protocol in WSN.</p> <p>3. Develop specific requirement applications in wireless sensor networks.</p>
91	VI	MC3201	<b>Microelectromechanical Systems (MEMS)</b>	<p>1. Discuss the fundamentals, characteristics, and applications of MEMS and Microsystems across various domains.</p> <p>2. Identify and select specific material for manufacturing of MEMS and its packaging.</p> <p>3. Analyze and select the different techniques in MEMS technology as per requirement of application.</p> <p>4. Compare and choose a micromachining technique, such as bulk micromachining and surface micromachining for a specific MEMS fabrication process.</p> <p>5. Design and develop MEMS solutions tailored to meet the requirements of diverse applications.</p> <p>6. Design packaging solutions for MEMS devices based on specified criteria and application needs.</p>
92	VI	MC322	<b>Process Control</b>	<p>1. Introduce technical terms and nomenclature associated with Process control domain.</p> <p>2. Build models using first principles approach as well as analyze models.</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>3.Design, tune and implement PID Controllers to achieve desired performance for various processes</p> <p>4.Analyze Systems and design &amp; implement control Schemes for various Processes.</p> <p>5.Identify, formulate, and solve problems in the Process Control Domain.</p>
93	VI	OE344	Supply Chain Analytics	<p>1.Identify the role and key issues in the supply chain management.</p> <p>2.Explain the important supply chain drivers and their significance in strategic planning.</p> <p>3.Estimate the demand using suitable demand forecasting method.</p> <p>4.Design the inventory system and level at various locations in supply chain.</p> <p>5.Design the supply chain network using appropriate network design methodology for the given problem.</p> <p>6.Describe the importance of handling uncertainty in supply chain using decision tree.</p>
94	VI	OE346	Mobile Robotics	<p>1.Identify and explain the main components of a robot, including sensors, actuators, and control systems.</p> <p>2.Solve forward and inverse kinematics problems for mobile robots.</p> <p>3.Apply basic motion planning algorithms such as A* and Dijkstra's algorithm.</p> <p>4.Apply Simultaneous Localization and Mapping.</p> <p>5.Implement inter-robot communication and human-robot interaction.</p>
95	VI	CEMD302	Environmental Engineering	<p>1.Explain importance of water and wastewater analysis for various parameters.</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Discuss impact of pollution on man, animal and plants. 3. Prepare layout of water and wastewater treatment process. 4. Design Water and Wastewater Treatment Plant. 5. Apply AI tools for impact of humans on environment.
96	VI	CSMD302	Artificial Intelligence	1. Understand the basic concepts and techniques of Artificial Intelligence. 2. Apply AI algorithms for solving typical practical problems. 3. Describe appropriate knowledge representation schemes in AI. 4. Apply reasoning schemes in AI. 5. Analyze the planning schemes for goal stack. 6. Evaluate performance of solution for constraint satisfaction problem.
97	VI	EEMD302	Smart Grid	1. Summarize the concept and future of smart grid 2. Develop smart grid architecture 3. Compile various smart grid technologies 4. Identify communication and information technologies for smart grid 5. Elaborate distributed generation and storage technologies 6. Recommend smart metering and distribution automation
98	VI	ECMD302	Industrial Electronics	1. Identify basics Power Electronics devices and components. 2. Illustrate use of Power Electronics. 3. Develop PLC logic using ladder programming. 4. Analyze industrial electronics applications.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
99	VI	CIMD302	Software Engineering	1. Describe fundamental concepts in software engineering and project management
				2. Practice software process models for the undertaken software problems
				3. Design function-oriented and object-oriented models using modern tools.
				4. Identify classes and build the domain model using advanced concepts in object, dynamic and functional modeling.
				5. Analyze existing software systems using function and object-oriented analysis.
				6. Design models using UML diagrams for software systems: use case, class, sequence, collaboration, activity, state chart diagrams, component and deployment.
100	VI	MEMD304	Marketing and Business Fundamentals for New Products	1. Explain product positioning and branding strategies for new products
				2. Analyse market trends and consumer behaviour to identify opportunities for new product development.
				3. Develop pricing strategies and cost estimation techniques for new products
				4. Explain the basics of intellectual property rights and patents in the context of new product development
				5. Design distribution channels and sales strategies designed for a new product.
				6. Create effective marketing communication plans and launch strategies for new products.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
101	VI	MCMD302	<b>Industrial Robotics</b>	1.Explain the basic concepts of Robots.
				2.Select an end effector and sensor for application.
				3.Explain drives and controls for robotic system.
				4.Develop program for robot to perform tasks in industrial applications.
102	VI	AIMD302	<b>Principles of Artificial Intelligence</b>	1.Articulate basic concepts and techniques of Artificial Intelligence.
				2.Apply AI algorithms for solving typical practical problems.
				3. Designate appropriate knowledge representation schemes in AI.
				4.Analyze reasoning schemes in AI.
103	VI	RAMD302	<b>Industrial Automation &amp; Control</b>	1.Explain need, basic elements, and systems of industrial automation.
				2.Develop PLC programming for various applications.
				3.Discuss various material handling and identification technologies.
				4.Explain basics of DCS and its interfacing
104	VI	MC3501	<b>Workshop Practice III</b>	1.Develop CNC program and simulate it on CNC Simulation Software/training kit for a given job.
				2.Perform Set-up operation for CNC Turning Operations.
				3.Perform Set-up operation for CNC Milling Operations.
				4.Perform Set-up operation for ECM Machine
				5. Perform Set-up operation for EDM Machine.
105	VI	MC352	<b>Power Electronics &amp; Drive Lab</b>	1.Measure the parameters of power electronic devices, converters and drives.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Analyze the operation of the various converters and drives.
				3. Plot the characteristics/responses.
				4. Interpret the results of the experimentation.
106	VI	MC3541	<b>Data processing and visualization lab</b>	1. Set up and configure the Hadoop Using Cloudera.
				2. Map Reduce Programming Examples.
				3. Install and create database and collection CRUD document in Mongo DB.
				4. Creation of database and table using Hive.
				5. Analyze and use Pig Latin Basic Pig Shell.
				6. Experiment with Tableau Software.
107	VI	MC3561	<b>Technical Aptitude-IV</b>	1. Apply the knowledge acquired during the course work.
				2. Develop the ability of problem solving.
108	VI	SH3064	<b>Scholastic Aptitude-II</b>	1. Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.
				2. Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
				3. Develop a bridge in analogies, series and visualizing directions.
				4. Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
109	VI	MC3581	<b>Capstone Project Phase-I</b>	1. Convert an open-ended problem statement into a statement of work or a set of design specifications
				2. Produce usable documents of record regarding the design

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>process and design state and communicate effectively.</p> <p>3. Identify the literature gap by conducting a survey of several available literature in the preferred field of study</p> <p>4. Decompose problem/task into subtasks, prioritizes subtasks, and establishes a timetable and milestones by which progress may be evaluated.</p> <p>5. Select and apply the appropriate design of experiments, experimental setup, models, or simulation technique for the project task.</p> <p>6. Collaborates with team members of diverse backgrounds and perspectives to achieve a common goal.</p>
110	VII	MC4011	<b>Design of Mechatronics System</b>	<p>1. Demonstrate key elements of mechatronics system design process.</p> <p>2. Apply a systematic approach to the design process of mechatronics systems.</p> <p>3. Create system modelling of basic models &amp; analyse.</p> <p>4. Realize the concept of real time interfacing and data acquisition.</p>
111	VII	MC403	<b>Machine Learning</b>	<p>1. Classify machine learning techniques</p> <p>2. Implement machine learning techniques suitable for problem solving</p> <p>3. Solve the problem using various deep learning techniques</p> <p>4. Describe various basic concept of Artificial Neural Networks</p>
112	VII	MC4051	<b>Industrial Robotics</b>	<p>1. Explain the basic concepts of Robots.</p> <p>2. Select an end effector and sensor for application.</p> <p>3. Explain drives and controls for</p>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				robotic system. 4.Develop program for robot to perform tasks in industrial applications.
113	VII	MC4071	<b>Building Automation</b>	1.Design building automation system by applying basic knowledge of electrical and electronics. 2.Design HVAC system for buildings. 3.Apply different techniques for fire alarm techniques. 4.Access control system for building automation systems. 5.Introduce digital simulation for development of application-oriented logic circuits.
114	VII	MC409	<b>Basics of Cloud Computing</b>	1.Describe fundamental concepts of cloud computing and its Architecture. 2.Differentiate and analyze the components of various cloud platforms. 3.Analyze the Key Components of Amazon Web Services (AWS) 4.Analyze the applications of Cloud Computing in different domains.
115	VII	MC4111	<b>Machine Tool Design</b>	1.Select & design drive system for machine tool. 2.Decide layout of machine tool. 3.Design machine tool structure, guide ways and power screws. 4.Determine dynamic characteristics of machine tool & carry stability analysis. 5.Demonstrate control systems in machine tools and SPM.
116	VII	MC4131	<b>Fuzzy Logic and Neural Network</b>	1.Explain the basic concept of fuzzy sets, fuzzy logic & defuzzification.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2.Demonstrate the basics of Artificial Neural theory and programming of Microprocessors
				3.Analyze various techniques in feedback and feed forward Neural networks.
				4.Explain the principle of competitive neural networks and Adaptive resonance theory.
				5.Demonstrate the architecture and algorithm of Cognitron, Neo cognitron, the concepts of fuzzy associative memory and fuzzy systems.
117	VII	MC4151	<b>Hybrid and Electric Vehicle</b>	1.Choose a suitable drive scheme for developing an electric hybrid vehicle depending on resources.
				2.Design and develop basic schemes of electric vehicles and hybrid electric vehicles.
				3.Choose proper energy storage systems for vehicle applications.
				4.Identify various communication protocols and technologies used in vehicle networks.
118	VII	MC4171	<b>Industrial Engineering</b>	1.Apply industrial engineering tools to improve productivity
				2.Establish standard methods for job and compute standard times
				3.Decide the plant location and design appropriate type of layout and recommend suitable material handling system
				4.Plan production activities using tools like capacity and aggregate planning
				5.Design the inventory system using appropriate inventory model
				6.Implement project management knowledge, tools and techniques to achieve project success.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
119	VII	MC421	<b>Emerging Smart Materials for Mechatronics Applications</b>	1. Develop familiarity with various smart materials and their applications.
				2. Design sensors and actuators using smart materials like piezoelectric materials and shape memory alloys (SMAs).
				3. Analyze vibration control and damping structures using smart materials.
				4. Interpret emerging technical literature related to smart materials and structures.
120	VII	MC4231	<b>Computer Network and Cyber Security</b>	1. Describe the various networking components and topologies.
				2. Illustrate the concepts, services and protocols used in Computer networks.
				3. Solve problems related to Ipv4 addressing.
				4. Describe fundamental terms in cybercrime and compare various cyber-attacks & offences.
				5. Demonstrate cyber forensics using modern tools & techniques.
				6. Construct a strategy for creating awareness about cyber security for e-banking and legal issues among the social community.
121	VII	MC433	<b>Unmanned Aerial Vehicle</b>	1. Elaborate drone technology.
				2. Explain fundamentals and design principles of UAV.
				3. Understand Mechanical and Electrical components of UAV.
				4. Discuss the wide range of applications of drone.
				5. Classify various propulsion and controlling techniques for drone.
122	VII	MC4271	<b>VLSI Design</b>	1. Describe fundamentals of MOS circuits

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				2. Analyze the static and dynamic characteristics of CMOS circuit 3. Apply knowledge of MOS circuit and fabrication process to solve the problems 4. Design and implementation of combinational and sequential circuits 5. Evaluate the performance of CMOS circuits
123	VII	MC4511	<b>Industrial Robotics Lab</b>	1. To explain the basic principles of Robotic technology, configurations, control, and programming of Robots. 2. To choose the appropriate Sensor and Machine vision system for a given application 3. To explain the basic principles of programming and apply it for typical Pick & place.
124	VII	MC4531	<b>Circuit Simulation and PCB Design Lab</b>	1. Compare different circuit simulation and PCB layout design software 2. Make schematic electronic circuits in the software 3. Fabricate PCB using various tools 4. Design and develop layout of PCB using PCB layout design tool with fabrication (free or licensed).
125	VII	MC4551	<b>Computer Network and Cyber Security Lab</b>	1. After successful completion of the course, students will be able to, 2.1. Demonstrate the use of various networking tools and utilities. 3. Use the CISCO packet tracer and Packet Capturing and Analyzing tool i.e Wireshark. 4. Configure and test the different network services. 5. Install and configure the Kali Operating system

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6.Demonstrate different cyber-attacks using Kali Linux.
				7.Demonstrate cyber forensic techniques using windows GUI Based tools and Kali Linux.
126	VII	MC4571	VLSI Design Lab	1.Design and simulate schematic of various digital circuits
				2.Sketch layout of various digital block in cad tools.
				3.Analyze various parameters of VLSI logic circuits
				4.Interpret results and communicate effectively through written lab journals
127	VII	MC467	Unmanned Aerial Vehicles Lab	1.Identify and assemble components of UAVs.
				2.Simulate and analyze drone flight using MATLAB or similar tools.
				3.Integrate and calibrate sensors for drone navigation.
				4.Perform autonomous missions using mission planner software.
				5.Apply basic computer vision techniques in drone operations.
128	VIII	MC4711	Capstone Project Phase II	1.Select and apply the appropriate design of experiments, experimental setup, models, or simulation technique for the project task.
				2.Fabricate project or experimental setup or model and analyze the output of models/simulations to provide information for decisions
				3.Perform feasibility analysis and uses results to choose candidate solutions and evaluate the quality of solutions to select the best one
				4.Collaborates with team

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				members of diverse backgrounds and perspectives to achieve a common goal. 5. Write a technical report and communicate effectively.
129	VIII	OE4382	<b>Finance for Engineers (Online Course)</b>	1. Discuss the fundamental aspects of accounting and finance. 2. Apply theoretical knowledge and information for preparing various financial statements. 3. Analyze the financial information for solving managerial problems. 4. Evaluate financial performance of the organization for effective decision making.
130	VIII	OE4362	<b>Engineering Management &amp; Economics (Online Course)</b>	1. Develop administrative, organizational, and planning skills to effectively manage and execute engineering projects. 2. Create bar charts and milestone charts to track and manage project progress. 3. Analyze profit and cost data, conducting economic evaluations to make informed, optimal decisions. 4. Calculate depreciation using various methods.
131	VIII	IP4024	<b>Industry Internship &amp; Project</b>	<b>1. Internship</b> 1. Examine the functioning of the company on the terms of inputs, transformation process and the outputs (products and services) 2. Develop an attitude to adjust with the company culture, work norms, code of conduct. 3. Recognize and follow the safety norms, Code of conduct. 4. Demonstrate the ability to observe, analyse and document

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				the details as per the industry practices.
				5. Interpret the processes, systems and procedures and to relate to the theoretical concepts-studies.
				6. Develop the leadership abilities, communication.
				<b>2. Project</b>
				1. Identify the project/problem in the domain of a program relevant for the company.
				2. Compile the information to the pertaining to the problem identified.
				3. Analyse the information using the statistical tools/ techniques.
				4. develop the feasible solution for given problem.
				5. Analyse the impact of the project on the performance of company/department.
132	VIII	OE4382	<b>Finance for Engineers (Online Course)</b>	1. Discuss the fundamental aspects of accounting and finance.
				2. Apply theoretical knowledge and information for preparing various financial statements.
				3. Analyze the financial information for solving managerial problems.
				4. Evaluate financial performance of the organization for effective decision making.
134	VIII	OE4362	<b>Engineering Management &amp; Economics (Online Course)</b>	1. Develop administrative, organizational, and planning skills to effectively manage and execute engineering projects.
				2. Create bar charts and milestone charts to track and manage project progress.
				3. Analyze profit and cost data,

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				conducting economic evaluations to make informed, optimal decisions.
				4.Calculate depreciation using various methods.
135	VIII	RE4044	Research Internship	1.Investigate the technical literature.
				2.Recognize and evaluate theories, practices, and/or research on a chosen topic by conducting a thorough literature review and submitting a written integrative, critical summary of the current literature.
				3.Design a research problem and develop a methodology.
				4.Develop and implement an advanced original research or creative project.
				5.Develop the ability to explain the conceptual viability of the project and describe the major components involved.
				6.Develop advanced discipline-relevant skills and competencies.
				7.Write a research report and paper.
136	VIII	ED4104	Project Management (Online Course)	1.Develop a Comprehensive Business Plan for selected business.
				2.Evaluate Project Viability Through Financial Appraisal.
				3.Analyze the Environmental and Technical Aspects of a Project.
				4.Apply Project Management Techniques.
				5.Assess the Commercial Feasibility of a Business Opportunity.
137	VIII	ED4044	Commercial Aspects of the Project (Online)	1.Interpret basic Accounting and Financial Terminologies.
				2.Prepare & analyze financial

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			<b>Course)</b>	statements. 3.Apply basic principles of marketing. 4.Apply knowledge of marketing mix for any organization.
138	VIII	ED4064	<b>Entrepreneurship Development Program (EDP)</b>	1. Apply knowledge of engineering, economics, marketing and finance for formulation of business plan, starting & managing new business.
139	VIII	ED4084	<b>Entrepreneurial Internship</b>	1.Apply knowledge of engineering, economics, marketing and finance for preparation of project report. 2.Make commercial, technical and financial appraisal of project.
140	VIII	REH401	<b>Intellectual Property Rights</b>	1.Explain the basic concepts and importance of Intellectual Property Rights. 2.Identify different types of intellectual property and their relevance in the technology sector. 3.Analyze the legal aspects of IPR and its implications for innovation and business. 4.Apply IPR principles to protect inventions, designs, and creative works. 5.Evaluate the ethical and societal impact of IPR in a global context..
141	VIII	REH403	<b>Research Project (Synopsis) Phase 1</b>	1.Demonstrate an understanding of research methodology and project planning. 2.Identify a research problem with clear objectives and questions. 3.Conduct a systematic literature review using appropriate sources and tools. 4.Develop a research synopsis with a well-defined

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				methodology and expected outcomes.
				5.Present research synopsis/proposal effectively.
142	VIII	REH405	<b>Research- Specific Core Course-1 (Online NPTEL Course)</b>	1.Explain the key concepts and insights gained from the NPTEL course
				2.Apply concepts, tools, and methodologies learned from the NPTEL course into their ongoing research project
				3.Analyze research-specific problems using the knowledge acquired from the online course.
				4.Identify the real life applications and practices of courses studied
143	VIII	REH402	<b>Research Project Phase 2</b>	1.Apply appropriate analytical tools and techniques to process and interpret research.
				2.Identify and address challenges encountered during the research process.
				3.Prepare a comprehensive research report detailing the objectives, methodology, findings, and conclusions.
				4.Communicate research outcomes effectively through written and oral presentations.
				5.Demonstrate ethical guidelines and standards throughout the research process.

Sr. No.	Program Specific Outcomes
9.	NA

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	MGC 1013	Principles of Management	Co:1 Interpret classical & modern theories.
				Co:2 Apply functions of management in real world scenarios
				Co:3 Communicate effectively about management decisions.
				Co:4 Analyze recent trends in live management case studies
				Co:5 Evaluate the current business landscape and trends.
2.	I	MGC1033	Managerial Economics	Co:1 Evaluate microeconomic and macroeconomic variables and its implication in business decision making.
				Co:2 Identify the competitive and global market for making larger presence and leadership.
				Co:3 Assess and evaluate macroeconomic variables for selection of best alternatives to maximize profit and value of an organization
				Co:4 Identify issues related to development and governance issue that hinder the development
				Co:5 Analyse the sectoral development and policies initiated by the governments to improve.
3.	I	MGC1053	Financial Accounting and Analysis	Co:1 Comprehend the fundamental aspects concerning financial accounting and its analysis.
				Co:2 Discuss the significance of preparation of various financial statements.
				Co:3 Apply accounting theory and information for preparing various accounts and financial statements.
				Co:4 Analyze the financial information by associating the tools and techniques for solving managerial problems.
				Co:5 Evaluate financial performance of the organization for effective decision making.
4.	I	MGC1073	Legal & Business Environment	Co:1 Develop an understanding of micro and macro elements of the business environment.
				Co:2 Identify the major and minor factors affecting the functioning of the business.
				Co:3 Exhibit the understanding of essential laws that have a bearing on the conduct of business in India.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Evaluate the strategies adopted by the firm to deal with the various factors of the international, financial and technological environment.
				Co:5 Analyze the dynamics of the business environment and its impact on the functioning of the business.
5.	I	MGC1093	Marketing Management	Co:1 Discuss Core concept of marketing and the role of marketing in business and society.
				Co:2 Develop marketing strategies based on product, price, place and promotion.
				Co:3 Analyse marketing problems and provide solution based on a critical examination of marketing information.
6.	I	MGC1113	Organizational Behaviour	Co:1 Analyze the conceptual anchors of Organizational behavior
				Co:2 Identify personal dimensions of personality. Job satisfaction, motivation and learning
				Co:3 Demonstrate the group dynamics and its applicability
				Co:4 Explain organizational change and culture effect on working relationships
				Co:5 Apply various leadership styles and conflict management strategies used in organizations.
7.	I	MGC1133	Quantitative Analysis	Co:1 Generate mathematical models of business scenarios
				Co:2 Apply basic mathematical, statistical and optimization tools.
				Co:3 Summarize data visually and numerically.
				Co:4 Demonstrate analytical skill for solving business problems.
				Co:5 Interpret results from decision making perspectives
8.	I	MGC1153	Indian Ethos and Business Ethics	Co:1 Interpret the variable values in morality
				Co:2 Propose strategies for maximizing personal growth and productivity of employees.
				Co:3 Apply value-based management and ethical practices in all functional areas of management
				Co:4 Develop ethical decision-making capabilities
				Co:5 Comprehend and practice the way of righteousness in the Indian mythological literature
9.	I	MGC1170	Leadership	Co:1 Develop critical thinking skills
				Co:2 Explain different approaches to leadership.
				Co:3 Apply leadership theories in real world business problems.
				Co:4 Analyze leadership types and take appropriate decisions.
				Co:5 Demonstrate ethical leadership practices
10.	I	MGC1193		Co:1 Write business letters in a proper, formal format
				Co:2 Demonstrate the methods of oral presentation both in a formal and informal environment

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			Business Communication Lab	Co:3 Review the importance of communication relative to securing employment, with emphasis on using both verbal and non-verbal communication and their impact Co:4 Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each
11.	I	MGC1213	Microsoft Office Specialist	Co:1 Demonstrate applying themes and layouts to slides. Co:2 Demonstrate inserting pictures, graphics, shapes, and other things. Co:3 Demonstrate working with sound and videos, master slides, smart art. Co:4 Use existing PowerPoint presentations using advanced editing tools such as theme, layout, timing, and animation.
12.	II	MGC1023	Corporate Finance	Co:1 Discuss fundamental aspects of financial management Co:2 Explain different sources available for raising funds for the business. Co:3 Prepare various financial statement for effective decision making. Co:4 Apply financial theory for taking financing & investment decision. Co:5 Evaluate different proposals by applying various financial techniques.
13.	II	MGC1043	Operations Management	Co:1 Demonstrate fundamentals of operations management in a firm. Co:2 Take decisions related to facility locations & layout. Co:3 Analyze different aspects relating to designing & developing processes. Co:4 Apply various aspects in Operations Planning and Control. Co:5 Evaluate various modern practices in operations management
14.	II	MGC1063	Human Resource Management	Co:1 Effectively manage and plan key human resource functions within organizations Co:2 Identify and analyze problems in the field of HRM and provide innovative solutions Co:3 Appreciate the implications of increasing globalization for the management of human resources Co:4 Evaluate and implement the new trends in HRM Co:5 Analyze different current trends in compensation.
15.	II	MGC1083	Business Research Methods	Co:1 Apply the major types of research designs Co:2 Formulate clearly defined research questions Co:3 Analyze and summarize key issues and themes from existing literature Co:4 Evaluate and conduct research Co:5 Assess the ethical issues associated with the conduct of research

K. E. Society's

**Rajarambapu Institute of Technology, Rajaramnagar**

(An Empowered Autonomous Institute, affiliated to SUK)

16.	II	MGC1103	Managing for Sustainability	Co:1 Demonstrate a multi –stakeholder perspective in viewing CSR issues.
				Co:2 Analyse the impact of CSR implementation on corporate culture.
				Co:3 Evaluate the concept of corporate governance.
				Co:4 Discuss open issues concerning the future evolution of corporate governance in the context of globalization.
17.	II	MGC1123	Management Information System	Co:1 Explain the role and significance of management information systems in business.
				Co:2 Apply the decision support tools of information system to solve business problems.
				Co:3 Identify the causes of information system success and failure.
				Co:4 Implement the information system in various functional areas of management.
				Co:5 Demonstrate the better usage of e-business, e-governance, AI etc
18.	II	MGC1143	Strategic Management	Co:1 Comprehend the basic concepts and principles of strategic management
				Co:2 Analyze the competitive situation and strategic dilemma in dealing with dynamic business environment
				Co:3 Demonstrate the knowledge and abilities in formulating strategies and strategic plans
				Co:4 Evaluate challenges faced by managers in implementing and evaluating strategies based on the nature of business, industry, and cultural differences
19.	II	MGC1163	Aptitude Skills	Co:1 Evaluate critically key issues concerns with real life situation.
				Co:2 Apply innovative thinking skill to solve the problems.
				Co:3 Demonstrate various principle involved in solving mathematical problems.
				Co:4 Evaluate assumptions used in analyzing quantitative data
20.	II	MGC1183	Data Analysis	Co:1 Develop proficiency in handling SPSS software.
				Co:2 Analyse data sets using various descriptive and inferential statistical tools
				Co:3 Develop decision making abilities
21.	II	MGC1203	Capstone Project Phase I	Co:1 Identify a Social / Business problem.
				Co:2 Prepare a Synopsis for developing or solution for the identified problem.
				Co:3 Design the survey tool
22.	II	MGP1020	International Business	Co:1 Describe the foundation of international business.
				Co:2 Discuss the business operations of international organizations and multinational corporations.
				Co:3 Analyze forms of foreign involvement.
				Co:4 Discuss and apply international trade theory.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

23.	II	MGP1040	Total Quality Management for Business Excellence	Co:1 Discuss the nature, need and scope of total quality management and its relationship with operational and then business excellence
				Co:2 Explain the quality of design, off-line control, losses and costs of quality
				Co:3 Analyze statistical process control through process capability studies
				Co:4 Develop total quality relationship with environment and safety systems
24.	II	MGP1060	Global Quality System	Co:1 Comprehend fundamental concepts of customer focused Quality systems and application of strategy in business organizations
				Co:2 Analyze the role of cost of quality to detect internal and external failure cost
				Co:3 Explain fundamentals of defect preventing mechanisms and their guidelines
				Co:4 Apply quality certification system
				Co:5 Identify & correct deviations in quality and their successful implementation
25.	II	MGP1080	Cross Cultural Study	Co:1 Increase their knowledge and sensitivity to other cultures
				Co:2 Become aware of their own cultural strengths and weaknesses when working with people from other cultures
				Co:3 To carry a basic analysis of cultural differences.
				Co:4 Learn fundamental principles and acquire basic information on ways to build bridges between people from diverse cultures working together in some form of business of project.
				Co:5 Identify and negotiate the obstacles to effective communication across cultures
26.	III	MGC2013	Entrepreneurship Development	Co:1 Discuss the values, attitudes and motivation for a plunge in entrepreneurship.
				Co:2 Explain basic entrepreneurial skills and understanding to run a business efficiently and effectively.
				Co:3 Develop and strengthen their entrepreneurial quality and motivation to start their own small-scale business/enterprise.
				Co:4 Analyze the entrepreneurial ecosystem and design strategies accordingly
27.	III	MGE2013	Taxation Planning and Management	Co:1 Apply analytical reasoning tools to assess how taxes affect economic decisions for all taxpaying entities.
				Co:2 Explain components of taxable income determination across taxable entities.
				Co:3 Analyze tax issues by using research skills (including accessing and interpreting sources of

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				authoritative support) to identify and evaluate strengths, weaknesses and opportunities
				Co:4 Discuss tax conclusions and recommendations in a clear and concise manner to relevant stakeholders.
				Co:5 Apply technological skills necessary to undertake tax planning, compliance and research strategies.
28.	III	MGE2023	Healthcare and Hospital Management	Co:1 Build competencies and provide expertise for hospital & healthcare management, operations and administration through learning of Hospital core and Support Services.
				Co:2 Provide the students an intensive, stimulating and challenging learning experience in the management and administration of Hospitals.
				Co:3 Acquaint the Students about Health Policy and Health Care Systems.
				Co:4 Acquaint the Students about different important services needed in a Hospital.
29.	III	MGE2033	Mentoring and Coaching	Co:1 Evaluate the benefits of coaching and mentoring to an organization
				Co:2 Assess support of coaching and mentoring programmes in achieving business objective.
				Co:3 Develop guidelines and protocols for programmes based on accepted coaching and mentoring theory and practice.
				Co:4 Conduct formal and informal coaching conversations and begin to understand formal coaching relationships.
				Co:5 Evaluate the impact to an organization of establishing coaching and mentoring culture
30.	III	MGE2043	Warehouse Management	Co:1 Explain the fundamental concepts of warehouse management.
				Co:2 Design warehouse layout.
				Co:3 Analyze different processes performed for managing warehouses.
				Co:4 Apply warehouse management system.
				Co:5 Discuss the role & importance of inventory & transportation in warehouse Management.
31.	III	MGE2053	Mall Management	Co:1 Analyze the concepts and aspects needed for mall management.
				Co:2 Apply the operational and tenant management principles for malls.
				Co:3 Evaluate the marketing and promotional principals for the malls.
				Co:4 Illustrate the statutory requirements for the mall operations.

K. E. Society's

**Rajarambapu Institute of Technology, Rajaramnagar**

(An Empowered Autonomous Institute, affiliated to SUK)

32.	III	MGE2063	Change Management	Co:1 Describe in general terms a number of change management theories and how they might apply in practice.
				Co:2 Articulate what change management is and why it is important in the contemporary business environment.
				Co:3 Discriminate between different types of change process for different purposes and outcomes.
				Co:4 Identify the steps in putting together an effective change management plan.
				Co:5 Apply critical thinking and problem solving skills to the analysis and resolution of change problems
33.	III	MGE2073	Commodity Markets	Co:1 Explore the fundamental concepts of commodity market & derivative market.
				Co:2 Apply their knowledge of financial markets.
				Co:3 Analyze the dynamics of commodity exchange.
				Co:4 Explain various types of commodities.
				Co:5 Comprehend the workings of commodity market & derivative market.
34.	III	MGE2083	Food Retail Management	Co:1 Identify variables for vast International Food Markets.
				Co:2 Analyses trends in Food Retailing and the challenges present in Food Retail operation and develop CRM strategy for food retail companies.
				Co:3 Measure the brand value of Food Retail organizations and their products.
				Co:4 Apply appropriate law of conducting food business.
				Co:5 Analyze the opportunities and threat associated with GMO Foods.
35.	III	MGE2093	Human Resource Audit	Co:1 Discuss systematic methodology for evaluating HRD.
				Co:2 Examine the adequacy and appropriateness of the HRD systems, structures, styles, culture, and competencies.
				Co:3 Design Human Resource Audit Report
				Co:4 Identify the gaps between the current state and the standard.
				Co:5 Conduct the Human Resource Audit for the organization
36.	III	MGE2103	Small scales industries management	Co:1 Understand small businesses and supporting organizations for its setup.
				Co:2 Identify Business Opportunities and plan according to survey.
				Co:3 Prepare project and develop the report according to planned idea and market.
				Co:4 Analyze the basic aspects of business and understand better to prepare for the same.

				Co:5 Explain the Legal laws governing the business and environment.
37.	III	MGE2113	Total Quality Management	Co:1 Understand the fundamental principles of Total Quality Management.
				Co:2 Develop an understanding on various ISO standards and quality systems.
				Co:3 Apply the tools and techniques of quality management to manufacturing and services processes.
				Co:4 Develop analytical skills for investigating and analyzing quality management issues in the industry and suggest implementable solutions to those.
38.	III	MGE2123	Search Engine Optimization	Co:1 Discuss the search engine ranking of site by implementing the best practices.
				Co:2 Apply SEO strategies through inbound marketing.
				Co:3 Analyze new SEO innovations and changing search engine trends.
				Co:4 Apply Google Analytics and other metrics and tools to monitor progress in achieving search engine marketing goals.
39.	III	MGE2133	E-retailing	Co:1 Identify and explain fundamental e-Retailing Online Merchandising Techniques.
				Co:2 Recognize and discuss the major E-Payment Security Challenges and Solutions.
				Co:3 Assess and discuss issues including Impact of E-retailing on traditional transportation system and opportunities.
				Co:4 Demonstrate an understanding of Concept of online pricing and dynamics pricing for E- retailing.
				Co:5 Analyze the impact of E-retailing on inventory security and Quality management
40.	III	MGE2143	Tourism Management	Co:1 Apply skills associated with problem solving, creative and critical thinking, reflection and decision making to function effectively.
				Co:2 Explain range of leadership skills and abilities such as motivating others, leading changes, and resolving conflict
				Co:3 Analyze supervisory skills and competencies necessary to meet the needs of the ever demanding Travel and Tourism Industry.
				Co:4 Discuss importance of outstanding guest service quality, server-guest relationships, and ethics
41.	III	MGE2153	Export – Import Procedure & Documentation	Co:1 Explain an overall perspective on import & export management.
				Co:2 Discuss an understanding towards export and import procedure and documentation.
				Co:3 Analyze processing of export order.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Apply knowledge of managing risk involves in the import & export transactions.
42.	III	MGE2160	Social Media Marketing	Co:1 Discuss the evolution of social media marketing and identify related ethical issues to communicate its impact on businesses.
				Co:2 Create S.M.A.R.T. social media goals to achieve successful online campaigns.
				Co:3 Design effective social media marketing strategies for various types of industries and businesses.
				Co:4 Identify the major social media marketing portals that can be used to promote a company, brand, product, service or person.
				Co:5 Evaluate a company's current situation, and provide solutions by identifying appropriate social media marketing portals.
43.	III	MGM2013	Sales and Distribution Management	Co:1 Develop the knowledge of Selling and Distribution process in an organization.
				Co:2 Develop proficiency in industry in actual selling process and the management of selling personnel.
				Co:3 Demonstrate the knowledge needed to generate a leads and increase the sales in terms of volume and in monetary terms.
				Co:4 Analyze critical and strategic thinking, improve analytic skills and techniques, and enhance effective decision-making in sales and Distribution.
				Co:5 Identify the management challenges to construct & design Distribution Channel to find appropriate way to reach to the customers.
44.	III	MGM2033	Services Marketing	Co:1 Identify the special management issues and unique challenges involved in marketing and managing services
				Co:2 Understand the expectations of customers and know how to translate this knowledge into genuine value for customers
				Co:3 Interpret service behavior and service consumption in the light of service-dominant marketing logic and articulate the outcome to service marketing management
				Co:4 Appreciate, modify, and/or extend new theories and concepts pertaining to explaining the characteristics of customers' purchasing and consumption behavior of services and service firms' marketing behavior
				Co:5 Apply new approaches to managing customer satisfaction and loyalty
45.	III	MGM2053	Retail Marketing	Co:1 Acquire and apply relevant knowledge and skills to manage retail management issues

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:2 Formulate creative yet feasible solutions for customer care, store care, merchandise care and retail strategies.
				Co:3 Discuss and analyze the latest strategies required for the development of retail marketing.
				Co:4 Identify and evaluate challenges and opportunities concerning the applications of the latest retail strategies.
				Co:5 Explain the factors relating to visual merchandising, such as store layouts and presentation.
46.	III	MGM2073	Consumer Behavior	Co:1 Assess the relevance of consumer behavior to the entire marketing process.
				Co:2 Analyze the causes giving rise to consumer behavior with the theories.
				Co:3 Identify the learning process of consumer at from marketing respective.
				Co:4 Design communication strategies for attracting consumers.
				Co:5 Assess the impact of socio-cultural factors on consumer behavior.
47.	III	MGM2093	Customer Relationship Management	Co:1 Explain and characterize the major concepts and framework of customer relationship management
				Co:2 Discuss the conceptual foundations of relationship marketing and its implications for further knowledge development in the field of business
				Co:3 Apply CRM practices and technologies to enhance the achievement of marketing, sales and service objectives throughout the customer life cycle.
				Co:4 Develop critical skills necessary for building and managing partnering relationships with customers and suppliers.
				Co:5 Analyze the benefits delivered by CRM, the contexts in which it is used, the technologies that are deployed and how it can be implemented
48.	III	MGM2113	Digital Marketing	Co:1 Develop a deeper understanding of the changing digital marketing landscape.
				Co:2 Apply the latest digital marketing trends and skill sets needed for today's marketer.
				Co:3 Distinguish between the functions of various digital communication channels and select solutions appropriate to the needs of the organization and the end users.
				Co:4 Analyze the impact digital technologies have on consumer behavior; consumer research and customer relationships

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:5 Apply to web based marketing tools with the view of incorporating new media into traditional media and marketing planning.
49.	III	MGM2133	Management of Marketing Communications	Co:1 Discuss the basic concepts and terminology in advertising, with an emphasis on IMC
				Co:2 Analyze factors and importance of reaching the target audience through the development of effective media coverage planning, including preparation and justification of an advertising budget.
				Co:3 Refine critical thinking and decision-making in advertising campaign development through class activities and assignments.
				Co:4 Perform advertising monitoring, evaluating, & feedback systems in order to ascertain campaign effectiveness.
				Co:5 Participate in the development of creative solutions to address advertising and marketing communications challenges.
50.	III	MGM2153	Strategic Marketing Management	Co:1 Apply strategic concepts and theories and their application in marketing environments.
				Co:2 Compare and contrast the key principles of marketing strategy
				Co:3 Research and analyze marketing strategies in different contexts
				Co:4 Identify and resolve well-defined problems reaching substantiated conclusions employing methods of analysis specific to marketing.
				Co:5 Employ strategies and processes, which assist independent learning.
51.	III	MGH2013	Compensation Management	Co:1 Apply the knowledge to solve compensation related problems in organizations
				Co:2 Design rational and contemporary compensation systems in modern organizations
				Co:3 Design and maintain a pay system within the organization
				Co:4 Analyze and develop incentive programs
				Co:5 Explain the legally required employee benefits.
52.	III	MGH2033	Performance and Rewards Management	Co:1 Identify and retain talent in an organization to deliver high performance.
				Co:2 Design an organization's performance management process.
				Co:3 Compare and contrast various organizational performance management programs and best practices
				Co:4 Plan effective performance management policies, practices to improve organizational, and employee performance.

				Co:5 Evaluate the relationship amongst the components of total rewards.
53.	III	MGH2053	Organizational Development and Change	Co:1 Apply theories and current research concerning individuals, groups, and organizations to the process of change
				Co:2 Identify organizational situations that would benefit from OD interventions.
				Co:3 Discuss the process of change as applied to organizational culture and human behavior
				Co:4 Explain the differences between insider and outsider approaches to consulting and OD interventions
				Co:5 Analyze ongoing activities within an organization and design the selected OD interventions.
54.	III	MGH2073	Industrial Relations and Labour Law's	Co:1 Acquire a theoretical, practical and ethical perspective on many aspects of industrial relations.
				Co:2 Apply IR competencies to contribute to organizational capability & employee wellbeing.
				Co:3 Explain the various forms and causes of Industrial disputes.
				Co:4 Assess the collective bargaining process, including preparation, negotiation, and settlement.
				Co:5 Understand the statutory provisions concerning the grievance procedure in India.
55.	III	MGH2093	Human Resource Planning	Co:1 Analyze the theory and concepts of human resource planning.
				Co:2 Identify the evolution of HRP throughout the organization.
				Co:3 Apply models and methods used in forecasting.
				Co:4 Describe the applications of a succession analysis & planning.
				Co:5 Evaluate the organization's planning program.
56.	III	MGH2113	Strategic and International Human Resource Management	Co:1 Discuss the strategic and functional roles of HRM in various international contexts, especially in areas such as recruitment and selection, performance management & training.
				Co:2 Identify opportunities and challenges pertaining to international HRM;
				Co:3 Develop competency in dealing with cross cultural situations;
				Co:4 Analyze external forces (e.g. globalization, socio cultural changes, political and economic changes) that have the potential to shape international HRM.
				Co:5 Develop generic and transferable skills-especially in diagnosing international HRM issues
				Co:6 Conduct research for solving cases related to international HRM.

K. E. Society's

**Rajarambapu Institute of Technology, Rajaramnagar**

(An Empowered Autonomous Institute, affiliated to SUK)

57.	III	MGH2133	Training and Development	Co:1 Understand the role and functions of training and development in organizations.
				Co:2 Identify principles and their implications for the effectiveness of training programs.
				Co:3 Assess training needs & evaluate employee training programmes.
				Co:4 Outline the issues and steps involved in designing and implementing a training program.
				Co:5 Design, training and development programs that can be delivered in the form of individual and group.
58.	III	MGH2153	Cross Cultural Management	Co:1 Analyze the impact of culture on business practices.
				Co:2 Analyze the impact of national culture on organizational cultures.
				Co:3 Apply strategies for managing international teams and projects
				Co:4 Develop strategies for working in virtual and co-located multicultural teams.
				Co:5 Assess and leverage the impact of culture in management and other business functions.
59.	III	MGH2173	Conflict and Negotiation Management	Co:1 Analyze the key practical and theoretical concepts of managing and resolving conflicts.
				Co:2 Describe the nature of small and large scale conflicts.
				Co:3 Articulate the theoretical and practical components of negotiation and mediation and explain the link between effective negotiation skills and effective leadership.
				Co:4 Analyse the types of conflict management styles.
				Co:5 Explain the link between effective negotiation skills and effective leadership
60.	III	MGF2013	Indian Financial System	Co:1 Explain the key roles played in modern society by the financial products, markets and institutions, and various functions of market regulators.
				Co:2 Exhibit the understanding of the fundamentals of financial markets & define and illustrate some key financial terms, such as primary market and over-the-counter.
				Co:3 Apply the knowledge of the relative standing of the major financial services in India for various business organizations.
				Co:4 Describe the functions of banking & NBFC in the Current Scenario and discuss the various important aspects concerned with banking and non-banking organizations.
				Co:5 Analyze the need for mutual fund investment and also focus on another relative aspect of the mutual fund industry.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

61.	III	MGF2033	Financial Markets & Institutions	Co:1 Interpret the role and determinants of interest rates and interaction of interest rates with money supply.
				Co:2 Assess the various theoretical concepts underlying money and capital markets.
				Co:3 Analyze the working of various markets for securities (including debt markets, equity markets, derivative markets) and its role in financial markets.
				Co:4 Comprehend significant aspects of banking business.
				Co:5 Compare and contrast the various non-bank operations.
62.	III	MGF2053	International Finance	Co:1 Explain the fundamental of international business, finance as well as international financial markets.
				Co:2 Apply the knowledge of exchange rate mechanism for decision-making.
				Co:3 Apply the risk management strategies in foreign exchange operations.
				Co:4 Discuss long term and short-term asset and liability management techniques used in international business.
63.	III	MGF2073	Working Capital Management	Co:1 Evaluate the importance of effective working capital Mgt.
				Co:2 Investigate funds flow cycles and their impact on working capital management objectives.
				Co:3 Formulate appropriate working capital management policies to achieve corporate objectives.
				Co:4 Apply corporate cash management, accounts receivable management, bank relations, and inventory management techniques to maximize the shareholders' value.
				Co:5 Evaluate comparative working capital management policies and their impact on the firm's profitability, liquidity, risk and operating flexibility.
64.	III	MGF2093	Mergers, Acquisition and Corporate Restructuring	Co:1 Identify the key issues and concepts of mergers, acquisitions and Corporate Restructuring.
				Co:2 Analyze typical valuation strategies, pre and post-merger issues and challenges
				Co:3 Assess the funding alternatives available and the various aspects of financial restructuring in case of mergers, acquisitions.
				Co:4 Discuss the revival of sick units with special reference to the Law and its Procedure
				Co:5 Examine the impact of changing business scenario worldwide on Corporate Restructuring.
65.	III	MGF2110	Behavioral Finance	Co:1 Discuss the basics of Conventional Finance.
				Co:2 Explain the cognitive biases and errors of judgment that affect financial decisions

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:3 Analyze behavioral influences involving individuals investment decisions
				Co:4 Evaluate behavioral influences involving corporate financial decisions
				Co:5 Discuss important developments in this new area and the associated practical insights.
66.	III	MGF2133	Cost Analysis and Control	Co:1 Discover the importance of analyzing and managing costs
				Co:2 Explain Activity-Based Costing (ABC) and Activity-Based Management (ABM)
				Co:3 Justify the importance of process costing and cost allocation
				Co:4 Develop important tools for planning and decision making
				Co:5 Evaluate and manage performance through strategic cost management
67.	III	MGB2013	Marketing Analytics	Co:1 Apply marketing theories to given research problems and types of customer data.
				Co:2 Critically evaluate business problems and of determine the most appropriate analytical technique
				Co:3 Design an appropriate course of action based on empirical evidence.
				Co:4 Formulate and communicate marketing research findings for decision-making.
68.	III	MGB2033	HR Analytics	Co:1 Explain basic concepts of HR Analytics
				Co:2 Apply Data Analytic techniques using software packages
				Co:3 Identify and use key HR Metrics.
				Co:4 Forecast budget numbers for HR costs
				Co:5 Measure workforce productivity and performance
				Co:6 Explore and visualize data
69.	III	MGB2053	Core Python Programming	Co:1 Describe the Numbers, Math functions, Strings, List, Tuples and Dictionaries in Python
				Co:2 Express different Decision-Making statements and Functions
				Co:3 Interpret Object oriented programming in Python
				Co:4 Summarize different File handling operations
				Co:5 Create and execute Python programs
70.	III	MGB2073	R Programming	Co:1 Access online resources for R and import new function packages into the R workspace
				Co:2 Import, review, manipulate and summarize data-sets in R
				Co:3 Explore data--sets to create testable hypotheses and identify appropriate statistical tests
				Co:4 Apply appropriate statistical tests using R
				Co:5 Create and edit visualizations with R

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

71.	III	MGB2093	Financial Analytics	Co:1 Understand different entities and products in the financial markets.
				Co:2 Apply techniques for selecting investment avenues from different securities or asset classes.
				Co:3 Demonstrate Analytical Skills to calculate Bond yields to make an investment decision.
				Co:4 Analyse real-life proposals for financial investment in a meaningful manner.
				Co:5 Compare the currency exchange rates among different currency pairs.
72.	III	MGB2113	Data Mining	Co:1 Discuss basic concept of Data Mining
				Co:2 Identify appropriate data mining algorithms to solve real world problems
				Co:3 Compare and evaluate different data mining techniques like classification, prediction, clustering and Association Rule Mining
				Co:4 Describe complex data types with respect to spatial and web mining.
73.	III	MGB2133	Business Intelligence	Co:1 Explain role of mathematical models in business intelligence
				Co:2 Describe link between strategy and business analytics
				Co:3 Apply various statistical methods on available data
				Co:4 Design physical database
				Co:5 Apply Business Intelligence System in various areas of management.
74.	III	MGO2013	Materials Management & Inventory Control	Co:1 Analyze need & importance of materials management in a firm.
				Co:2 Apply methods of classification, codification, specifications & standardization of materials.
				Co:3 Manage different issues relating to stores department.
				Co:4 Take decisions relating to inventory control by using different techniques.
				Co:5 Demonstrate the role and importance value analysis.
				Co:6 Take make or buy decisions relating to materials management.
75.	III	MGO2033	Operations Planning and Control	Co:1 Analyze need & importance of operations planning and control in a firm.
				Co:2 Forecast demand of the products by applying various methods of demand forecasting.
				Co:3 Apply aggregate planning and master production scheduling for taking managerial decision.
				Co:4 Analyze the need & importance of resource requirements planning.

				Co:5 Take decisions based on materials requirement planning & resource requirements planning.
76.	III	MGO2053	Global Operations Strategy	Co:1 Emphasize the key role of operations strategies in bringing about the growth and profitability of organizations.
				Co:2 Apply different models in relation with operations strategies.
				Co:3 Describe different key drivers used for global operations.
				Co:4 Apply competency based, resource based and process based operations strategies.
77.	III	MGO2073	Managing Six Sigma	Co:1 Understand the concept & philosophy of Six Sigma.
				Co:2 Apply quality function deployment techniques for creating customer driven organization.
				Co:3 Manage six sigma teams for achieving better results.
				Co:4 Apply different tools & techniques for managing Six Sigma.
				Co:5 Manage risk involved in the six-sigma projects.
78.	III	MGO2093	Purchase Management	Co:1 Analyze the Role & Importance of purchase management in a firm.
				Co:2 Apply different criteria for vendor analysis & selection.
				Co:3 Apply different purchase strategies for achieving better results.
				Co:4 Describe the role & importance of buyer – seller relationship.
				Co:5 Evaluate various modern purchase practices.
79.	III	MGO2113	Lean Manufacturing System	Co:1 Explain the concept & philosophy of lean manufacturing.
				Co:2 Analyze different control techniques used under lean manufacturing.
				Co:3 Describe different steps for applying lean in manufacturing and service sectors.
				Co:4 Describe the interrelationship of lean manufacturing with just in time system.
				Co:5 Analyze the role & importance of cellular manufacturing system in relation with lean manufacturing.
80.	III	MGO2133	Maintenance Management	Co:1 Analyze the role and importance of maintenance management
				Co:2 Apply maintenance planning & scheduling technique for better results.
				Co:3 Apply total productive maintenance system in a firm.
				Co:4 Describe computerized maintenance management system.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:5 Manage different issues relating to safety and accident prevention.
81.	III	MGO2153	Manufacturing Systems Management	Co:1 Apply just in time manufacturing practices in a firm.
				Co:2 Analyze the role & importance of benchmarking quality improvement system.
				Co:3 Analyze the planning & implementation of flexible manufacturing systems in a firm.
				Co:4 Apply theory of constraints tools in manufacturing for better performance.
				Co:5 Apply business process reengineering system and green manufacturing practices for improving overall productivity.
82.	III	MGS2013	Enterprise Resource Planning	Co:1 Apply Enterprise tools and its role in integrating business process.
				Co:2 Demonstrate knowledge of ERP modules.
				Co:3 Summarize the concepts of reengineering.
				Co:4 Identify the management challenges to implement ERP.
83.	III	MGS2033	Software Project Management	Co:1 Apply fundamental principles of Software Project Management.
				Co:2 Explain different methods and techniques used for Software project management.
				Co:3 Identify issues that could lead to IT project success or failure.
				Co:4 Identify and describe the key phases of project management.
				Co:5 Describe the responsibilities of IT project managers.
84.	III	MGS2053	Data Warehousing & Data Mining	Co:1 Know the functionality of the various data mining and data-warehousing component.
				Co:2 Appreciate the strengths and limitations of various data mining and data warehousing models.
				Co:3 Explain the analyzing techniques of various data.
				Co:4 Describe different methodologies used in data mining and data ware housing.
				Co:5 Know the data-mining concept, application and their usage.
85.	III	MGS2073	Database Management Systems	Co:1 Explain the basic concepts and the applications of database systems.
				Co:2 Design ER-models to represent simple database application scenarios.
				Co:3 Identify the data models for relevant problems.
				Co:4 Explain & use design principles for logical design of databases, including the E -R method and normalization approach.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:5 Understand the different issues involved in the design and implementation of a database system.
86.	III	MGS2093	Information System Audit and Security	Co:1 Describe fundamental concepts of systems auditing and information security.
				Co:2 Analyze the latest trend of computer security threats and defense.
				Co:3 Identify security thefts in information systems and rectify them with appropriate security mechanisms.
				Co:4 Explain the security controls in the aspects of physical, logical and operational security control.
				Co:5 Analyze the security incident with a proven audit procedure.
87.	III	MGS2113	E-Business	Co:1 Describe about the anatomy of e-commerce applications.
				Co:2 Demonstrate about the E-commerce consumer applications.
				Co:3 Describe about the digital token credit based electronic payment system.
				Co:4 Understand about the key multimedia concepts.
				Co:5 Analyze the potential impacts of different e-Business strategies.
88.	III	MGS2133	Cyber Laws and Cyber Security	Co:1 Discuss an understanding of information security fundamentals.
				Co:2 Identify the applications of cryptography.
				Co:3 Illustrate the methods for data recovery.
				Co:4 Apply the methods for preservation of digital evidence.
				Co:5 Analyze the provisions in laws to deal with cybercrime.
89.	III	MGS2153	System Analysis & Design	Co:1 Explain the roles and responsibilities of systems analysts and project managers in systems analysis and design.
				Co:2 Explain the stages of the system development life cycle model.
				Co:3 Analyze and recognize the causes of information related problems and design a new system to allay these problems.
				Co:4 Design appropriate information systems (ERD).
				Co:5 Manage the development of systems based on system specifications.
90.	III	MGR2013	Rural Banking and Microfinance	Co:1 Identify and evaluate the complexities of Rural Credit Banking policies. Analyze the role of Credit Cooperatives.
				Co:2 Analyze the Functions of Commercial Banks.
				Co:3 Evaluate progress, performance & problems of RRBs, Small Finance Bank & Payment Bank.

K. E. Society's

## Rajarambapu Institute of Technology, Rajaramnagar

(An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Assess the role of microfinance as a tool of socio economic development.
				Co:5 Conduct Social Assessments of MFIs, Loan Disbursement and Repayment.
91.	III	MGR2033	Rural Society and Polity	Co:1 Analyze development of rural economy & rural society and Interdependence between Rural and Urban Sectors.
				Co:2 Develop relationship among Rural Communities, Rural Institutions and Rural Environment.
				Co:3 Analyze problems of Schedule Cast, Schedule Tribe and Women.
				Co:4 Assess the impact of Social Inclusion on development.
				Co:5 Analyze the Differences related to gender, Women in Development (WID) and Works and Gender Relation.
				Co:6 Evaluate Participatory approaches to rural development and social development.
92.	III	MGR2053	Society Up-liftment Policies	Co:1 Identify and evaluate the complexities of Growth Vs Development, Rising Expectations & Development, Challenges & Opportunities in Rural Economy
				Co:2 Analyze the impact of Rural Child Development Programme.
				Co:3 Evaluate the National Rural Health Mission programme.
				Co:4 Analyze the role of Rural Housing Programme on socio economic development of rural areas.
				Co:5 Analyze the impact of Rural Women Empowerment programme.
				Co:6 Evaluate the National Rural Employment programme.
93.	III	MGR2073	ICT in Development	Co:1 Understand and analyze importance of Information, Communication and Technology in development.
				Co:2 Assess role of ICT in Sustainable development goals.
				Co:3 Develop and design ICT as an infrastructure and its relationship in managing development issues.
				Co:4 Identify opportunities in E-inclusion and its importance in development.
				Co:5 Analyze National E Governance Policy.
				Co:6 Examine the impact of ICT in Rural Project Framework.
94.	III	MGR2093	Agribusiness	Co:1 Analyze global Agribusiness Environment and scope of community-based industry.
				Co:2 Estimate demand and plan procurement method.
				Co:3 Identify opportunities in organized food retailing.

K. E. Society's

## Rajarambapu Institute of Technology, Rajaramnagar

(An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Analyze problems in Agri Input Markets.
				Co:5 Analyze ICT application in Agriculture Trade.
				Co:6 Create linkage with apex agriculture and farming welfare institution for getting financial assistance and support from latest research.
95.	III	MGR2113	Managing Cooperatives	Co:1 Differentiate the cooperatives with other business models.
				Co:2 Analyze the functions of short, medium and long-term credit cooperative structure and its role in financial inclusion.
				Co:3 Identify the challenges in management of cooperatives and suggest better solution for that.
				Co:4 Measure the legal aspects integrated with cooperative business.
				Co:5 Develop case study on cooperatives business models.
96.	III	MGR2133	Social Marketing and Social Entrepreneurship	Co:1 Analyze Theories & Approaches in Behavioral Modification.
				Co:2 Identify social marketing projects.
				Co:3 Manage Social marketing programme.
				Co:4 Assess the models of social Entrepreneurship and Enterprise.
				Co:5 Analyze impact of social impact investors.
97.	III	MGR2153	Governance and Development	Co:1 Analyze the relationship between Governance and Development.
				Co:2 Identify the role of environment in Governance.
				Co:3 Analyze Governance issues in Modern state and societies.
				Co:4 Evaluate Board of Director Roles and responsibilities for better corporate governance.
				Co:5 Assess Accountability and Transparency in Governance in CBOs.
98.	III	MGT2013	Engineering Management	Co:1 Understand various functions of Engineer in the organization
				Co:2 Identify the problem and find the optimal solution for that problem.
				Co:3 Make Plan for and organize technical activities.
				Co:4 Manage production and service activities
				Co:5 Understand communication process and Management information system
99.	III	MGT2033	Enterprise Productivity	Co:1 Understand and explain Enterprise level and micro level productivity
				Co:2 Apply different type technology to increase productivity
				Co:3 Understand and Explain different productivity models
				Co:4 Apply different productivity models in business.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

100.	III	MGT2053	Technology Management	Co:1 Understand role of technology and core competence
				Co:2 Explain technology cycle and understand technology change
				Co:3 Identifying and evaluating the impact of relevant changing technology and managing those changes.
				Co:4 Analyze trend and understand role of TIFAC
				Co:5 Identify different patterns of technological changes
101.	III	MGT2073	R & D Management	Co:1 Understand different Managerial aspects of Innovation function.
				Co:2 Develop innovative strategy in business.
				Co:3 Measure Performance of R&D management
				Co:4 Do R & D project.
				Co:5 Understand Intellectual Property Rights
102.	III	MGT2093	Value Engineering	Co:1 Evaluate cost, worth and value.
				Co:2 Create value engineering job plan
				Co:3 Evaluate value engineering projects
				Co:4 Initiate value engineering programming
				Co:5 Use tools of value analysis
103.	III	MGT2113	Engineering Systems Simulation	Co:1 Understand system stimulation
				Co:2 Apply random numbers in simulating systems.
				Co:3 Explain engineering systems modeling and simulation
				Co:4 Conduct simulation experiments
				Co:5 Analyze simulation output
104.	III	MGT2133	Big Data Analytics	Co:1 Explain Challenges of Conventional Systems
				Co:2 Explain Stream Data Model and Architecture
				Co:3 Handle the Hadoop Distributed File System
				Co:4 Develop a Map Reduce Application
				Co:5 Set up a Hadoop Cluster
105.	III	MGT2153	Manufacturing Systems	Co:1 Explain fundamentals of manufacturing and automation
				Co:2 Analyze flow lines without storage and with storage buffer
				Co:3 Develop and implement FMS
				Co:4 Understand functions and components of CIM system
				Co:5 Plan and Schedule Functions in CIM System
106.	III	MGI2010	India's Foreign Trade And Policy	Co:1 Analyze the global business environment in terms of economic, social and legal aspects
				Co:2 Explain the concepts in trade documentation in international business with respect to foreign trade
				Co:3 Discuss Instruments of import policy and the concepts related to imports substitution and restrictions.
				Co:4 Evaluate various types of Tariffs in international trade.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

107.	III	MGI2030	Export Import Procedures, Documentation And Logistics	Co:1 Comprehend export procedure and documentation.
				Co:2 Discuss importance of exports determinants and schemes in India.
				Co:3 Explain guidelines for international business negotiations.
				Co:4 Analyze nature and pattern of registration of exporters and importers and related concepts.
				Co:5 Explain Various Risks in export trade.
108.	III	MGI2050	International Economics	Co:1 Explain the introductory international economics and the terminology adopted in international economics;
				Co:2 Describe various International Trade Theories
				Co:3 Illustrate the Factor Price and trade concepts
				Co:4 Differentiate between various BOP accounts
				Co:5 Analyze the factors influencing the exchange rates.
109.	III	MGI2070	Global Competitiveness Analysis	Co:1 Discuss the complexity and the elusiveness of "competitiveness", for any country.
				Co:2 Examine the links between the concepts of competitiveness and development of a country.
				Co:3 Explain the economic, political and social determinants of competitiveness and their interdependencies.
				Co:4 Analyze different quantitative and qualitative approaches regarding the creation and measurement of competitiveness.
				Co:5 Summarize strategic and tactical decisions taken by firms to enter and compete in international markets
110.	III	MGI2090	Global Marketing Strategies	Co:1 Differentiate between Domestic markets, International Markets and Global Markets with their key characteristics and differentiation
				Co:2 Identify the Global Trading Environment with focus on social, cultural environment and regulatory issues in foreign markets
				Co:3 Relate with Global demographic profiles of ever-changing Global markets and formulate requisite pricing strategies to sustain in Globalization
				Co:4 Categorize the factors impacting pricing and media communication in global environment
				Co:5 Identify the role of Mobile commerce and digital global marketing in the 21st century trading environment and its role in handling security aspects of global trade
111.	III	MGI2110	Management of International Logistics	Co:1 Understand the issues in International Logistics.
				Co:2 Discuss Sales Contract in International Logistics.
				Co:3 Analyze models of Forecasting in Supply Chain Management.
				Co:4 Explain various methods for Demand Forecasting.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:5 Apply skills for inventory management
112.	III	MGI2130	Globalization and Indian Business Scenario	Co:1 Describe the structural features of India's foreign trade
				Co:2 Explain the domestic response to globalization at a disaggregated sectorial level
				Co:3 Illustrate various threats and opportunities in doing business from an India-centric perspective in some emerging fields of global business
				Co:4 Classify the policy environment in India facilitating and/or inhibiting international business
				Co:5 Understand various policies which regulate Indian Business Environment
113.	III	MGI2150	Management of Trans-National Corporations	Co:1 Implement the conceptual tools to navigate through the mass of information about how international competition takes place.
				Co:2 Classify the differences between multi-domestic, global, International and Transnational corporations.
				Co:3 Evaluate the global strategies that will help enhance the firm's long-term profitability and value.
				Co:4 Illustrate the management of a global workforce and the challenges in managing global business across different cultures.
				Co:5 Interpret the effects of economic, cultural, financial, political, and social factors on TNCs management decisions.
114.	III	MGB2010	Insurance Planning & Management	Co:1 Comprehend the various forms of insurance and their suitability.
				Co:2 Analyze criteria for selection of various insurance products.
				Co:3 Explain the pricing mechanism of insurance products.
				Co:4 Discuss systems and procedures associated with various forms of insurance.
115.	III	MGB2030	Risk Management for Banks and Insurance Companies	Co:1 Explain risks faced by banking and insurance companies.
				Co:2 Discuss the challenges in managing banks.
				Co:3 Analyze the risk management strategies for banks and insurance companies.
				Co:4 Discuss the best practices in India and other parts of the world, in respect of 'risk management'.
116.	III	MGB2050	Retail Banking	Co:1 Impart basic banking operation skills and understanding banking types.
				Co:2 Analyze different delivery channels for banking services & products.
				Co:3 Perform activities related to Marketing/Selling of retails banking Products.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Create Customer Relationship Management plan for retail banking organization.
				Co:5 Solve business problems related to retail banking organization.
117.	III	MGB2070	General Insurance	Co:1 Implement the principles of General Insurance
				Co:2 Identify & Suggest the Insurance policies with risk management
				Co:3 Fix problem related to reinsurance & customer retention
				Co:4 Identify the risk management techniques in Insurance marketing & Servicing.
118.	III	MGB2090	Banking Services Operations	Co:1 Evaluate the banking operations with products & services.
				Co:2 Impart electronic banking skills and technology
				Co:3 Identify the risk factors & need of security in e-banking
				Co:4 Develop the sense of record maintenance & risk management.
				Co:5 Impart the ability of risk management strategies in banking sector
119.	III	MGB2110	Treasury Management	Co:1 Understand the concepts and functional framework treasury management
				Co:2 Apply the decisions and types of bill
				Co:3 Evaluate the operational functions of Bills financing and securities
				Co:4 Illustrate the treasury operations and manage customer investor relationships.
120.	III	MGB2130	Law's Governing Banking and Insurance	Co:1 Explain the nature and development of banking and laws.
				Co:2 Discuss Regulatory Framework related to banking and insurance businesses.
				Co:3 Apply the rules and regulations in the establishment of banking and insurance companies.
				Co:4 Demonstrate the knowledge of understanding of important provisions of major acts related to banking and insurance businesses.
				Co:5 Apply due process in claim settlements and understand semi judiciary role of insurance Board in claim settlement
121.	III	MGB2150	Funds Management in Banking and Insurance	Co:1 Get an insight into the liquidity management in commercial Banking business and discuss the necessity of adequate capital fund.
				Co:2 Explain different types of reserves & different factors affecting on its requirement.
				Co:3 Understand the different aspects related with Management of Bank loan.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Evaluate the performance of Bank on the basis of deposit mobilization, credit deployment & profitability.
				Co:5 Discuss different functions & principles of life & non-life insurance. Also describe role of insurance & risk management policies related with non-life insurance.
122.	III	MGC2053	Capstone Project Phase II	Co:1 Prepare the research design and preparation of tool of data collection
				Co:2 Use acquired theoretical knowledge into practical experience and reveal an understanding of the ideas, concepts and skills gained through their MBA program.
				Co:3 Formulate innovative approaches, models and supports actions that enhance innovation
123.	III	MGC2073	Summer Internship Project	Co:1 Apply knowledge and skills learned in the classroom in a work setting.
				Co:2 Develop a greater understanding about career options while more clearly defining personal career goals.
				Co:3 Analyze the activities and functions of business professionals.
				Co:4 Develop and refine oral and written communication skills.
				Co:5 Identify areas for future knowledge and skill development
124.	IV	IPMB2YYY	Online Course-I/Self learning course-I	Co:1 Develop capability of self-education
				Co:2 Demonstrate lifelong learning skills
				Co:3 Assess self critically
				Co:4 Adopt corrective measures for self-improvement
125.	IV	IP2043	Project Management (Online Course)	Co:1 Acquire an understanding of the fundamentals of project management.
				Co:2 Analyze the projects proposal by applying feasibility studies.
				Co:3 Take decisions relating to project cost management.
				Co:4 Identify and manage different issues relating to human aspect in projects.
				Co:5 Taking decisions based on risk management in the projects.
126.	IV	IP2063	Internship & Project	Co:1 Develop industry required skill sets
				Co:2 Develop an attitude to adjust with the company culture, work norms, code of conduct
				Co:3 Demonstrate the ability to observe, analyse and document the details as per the industry practices
				Co:4 Improve the leadership abilities, communication
127.	IV	ED2023		Co:1 Acquire an understanding of the fundamentals of project management.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			Project Management (Online Course)	Co:2 Analyze the projects proposal by applying feasibility studies. Co:3 Take decisions relating to project cost management. Co:4 Identify and manage different issues relating to human aspect in projects. Co:5 Taking decisions based on risk management in the projects.
128.	IV	ED2043	New Venture Finance Startup Funding For Entrepreneurs	Co:1 Apply the strategic aspects of entrepreneurial finance. Co:2 Identify various sources of finance from sources like venture capital, angel financier, private equity and hedge funds and their working procedures, Co:3 Conduct valuation of companies by venture capitalist Co:4 Compare different sources of finance and select the appropriate source for financing needs.
129.	IV	ED2063	Entrepreneurship Development Program (EDP)	Co:1 Apply knowledge of management, economics, marketing and finance for formulation of business plan, starting & managing new business.
130.	IV	ED2083	Entrepreneurship Development Project	Co:1 Apply knowledge of Management for preparation of project report. Co:2 Make commercial, technical and financial appraisal of project.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

- **Department Name :- Department of Management Studies**
- **PG Program Name :- MBA-Innovation, Entrepreneurship and Venture Development [MBA-IEV]**
- **Vision and Mission :-**

**Vision:-**

Achieving excellence in academics and research to develop globally competent and socially responsible managers.

**Mission:-**

1. To leverage innovation and excellence in academic design, delivery and assessment to ensure holistic development of students for employability, entrepreneurship and higher education.
2. To design and keep the curricula updated, based on changing needs of industry and society worldwide.
3. To build and maintain world-class infrastructure, for sustained learning, development and research.
4. To provide an environment that encourages creativity, analysis and critical thinking.

Sr. No.	Program Outcomes
103.	Apply knowledge of business theories and practices to solve business problems.
104.	Foster Analytical and critical thinking abilities for data-based decision making.
105.	Develop Value-based Leadership.
106.	Analyze and communicate global, economic, legal, and ethical aspects of the business.
107.	Lead themselves and others in the achievement of organizational goals

Sr. No.	Program Specific Outcomes
10.	NA

Sr. No.	Semester	Course Code	Course Name	Course Outcome
131.	I	MIV 1011		Co:1 Analyze the DNA of an entrepreneur and assess their strengths and weaknesses from an entrepreneurial perspective

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			Introduction to Entrepreneurship	Co:2 Apply leadership principles in various forms of business organizations.
				Co:3 Connect entrepreneurial principles to non-profit, government and larger corporate organizations.
				Co:4 Analyze common early stage pitfalls and design measures of control
				Co:5 Design value propositions for the products and services.
132.	I	MIV 1031	Entrepreneurial Economics	Co:1 Evaluate the concepts and analytical tools from micro economic theory that are useful for entrepreneurs in making decisions at the firm level
				Co:2 Identify the competitive relationship between demand and supply
				Co:3 Evaluate the microeconomic variables of production function and role in decision making
				Co:4 Identify the issues related to markets and selection of best alternatives to maximize the profit
				Co:5 Analyze the role of International trade and sectoral development
133.	I	MIV 1050	Marketing Research	Co:1 Apply the basics of marketing principles.
				Co:2 Formulate, organize and conduct a marketing research project
				Co:3 Apply and evaluate different sources of marketing information
				Co:4 Apply and evaluate various data collection and analysis techniques
				Co:5 Write a comprehensive market research report
134.	I	MIV 1071	Idea Generation & Validation	Co:1 Identify problems and apply innovative solutions through the mode of ideation
				Co:2 Create ways and identify convergence tools to boost creative process
				Co:3 Apply various brainstorming techniques to break down ideas and visualize it create and assess business ideas
				Co:4 Apply core and basic concept of idea generation and creativity
135.	I	MIV 1081	People Management	Co:1 Recruit, train, and appraise the performance of employees
				Co:2 Manage human resources through rewards and recognition.
				Co:3 Design compensation and salary administration

				Co:4 Align talent management with organizational benefits.
136.	I	MIV 1111	Capstone project I- Idea Generation and Proof of concept	Co:1 Identify a Social / Business problem.
				Co:2 Develop an idea for solution of the identified problem.
				Co:3 Design the visualization exercise to verify the potential real-life application of an idea.
				Co:4 Provide hands on approach to model building
137.	I	MIV 1131	Skill Development Lab I: Business Communication	Co:1 Demonstrate applying themes and layouts to slides.
				Co:2 Demonstrate inserting pictures, graphics, shapes, and other things.
				Co:3 Demonstrate working with sound and videos, master slides, smart art.
				Co:4 Use existing PowerPoint presentations using advanced editing tools such as theme, layout, timing, and animation.
138.	II	MIV 1020	Organizational behavior	Co:1 To apply the conceptual foundation and theories of organizational behaviour.
				Co:2 To develop a good working environment for an individual for the smooth running of the organisation.
				Co:3 To analyse inefficiency and weakness in individual and apply various measures to improve it in the organisation.
				Co:4 To analyze how to develop coordination and teamwork in the organisation.
				Co:5 To apply how to use organisation power and politics in an effective manner.
139.	II	MIV 1041	Pricing Management	Co:1 Apply the key economic, analytical, and behavioral concepts associated with costs, customer behavior and competition.
				Co:2 Apply advanced pricing techniques.
				Co:3 Comprehend pricing strategies of different products, lifecycles, and companies.
				Co:4 Analyze price strategies of competitors in indifferent market situations through case study scenarios
140.	II	MIV 1061	New Venture Establishment and Management	Co:1 Apply the knowledge to generate idea for starting new ventures
				Co:2 Assess the market potential and design strategies to reach out to potential customers, partners, suppliers and experts.
				Co:3 Analyze the legal challenges in setting up new business.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:4 Create a business plan using a business model canvas
				Co:5 Apply strategies for scaling the new ventures.
141.	II	MIV 1091	Entrepreneurial Finance	Co:1 Discuss the fundamental aspects of accounting and finance.
				Co:2 Apply accounting theory and information as a tool for taking managerial decisions.
				Co:3 Prepare various financial statements of the firm.
				Co:4 Analyse and interpret the financial statements by associating the tools and techniques for effective decision making.
142.	II	MIV 1101	Skill Development Lab-II	Co:1 Develop capability of self-education
			NOC: Legal Compliance for Incorporating Startup - Video course	Co:2 Demonstrate skills for incorporating legal aspects in their startups
				Co:3 Assess self critically
				Co:4 Adopt corrective measures for self-improvement
143.	II	MIV 1121	Skill Development Lab III: Business Communication	Co:1 Write business letters in a proper, formal format
				Co:2 Demonstrate the methods of oral presentation both in a formal and informal environment
				Co:3 Review the importance of communication relative to securing employment, with emphasis on using both verbal and non-verbal communication and their impact
				Co:4 Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each
144.	II	MIV 1141	Capstone Project-Formulation of Business Plan & Development of Business Model	Co:1 Create a business plan
				Co:2 Develop a business model
				Co:3 Develop a feasibility analysis in to business plan
				Co:4 Analyze various business entry strategies
145.	III	MIV 2011	Venture Growth and Strategy	Co:1 Identify and evaluate opportunities to scale an organization
				Co:2 Apply game theory to analyze, assess, and respond to competitors

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				Co:3 Assess the impact of a potential merger and acquisition and avoid common pitfalls of this type of growth
				Co:4 Build an innovative capability to add value from innovation to determining an innovation strategy
146.	III	MIV 2031	Incubation Internship	Co:1 Apply knowledge and skills learned in the classroom in a work setting.
				Co:2 Develop a greater understanding about career options while more clearly defining personal career goals.
				Co:3 Analyze the activities and functions of business professionals.
				Co:4 Develop and refine oral and written communication skills.
				Co:5 Identify areas for future knowledge and skill development
147.	III	MIM 2011	Digital Marketing	Co:1 Apply the digital marketing techniques in a real life situation
				Co:2 Assess the role of digitalization in the development of an entrepreneurship venture.
				Co:3 Evaluate how contemporary marketing techniques can be used for maximizing entrepreneurial success.
				Co:4 Design and evaluate the effectiveness of interactive web sites and analyze digital marketing strategies through SEO
148.	III	MIM 2031	Entrepreneurial Marketing & Sales Strategy	Co:1 Apply Marketing mix of an enterprise
				Co:2 Design Growth and marketing strategies
				Co:3 Frame Market Development strategies
				Co:4 Analyze Contemporary issues in Entrepreneurial marketing.
149.	III	MIM 2051	Business to Business Marketing	Co:1 Analyse firm specific issues in B2B markets.
				Co:2 Design strategies and structures to effectively serve the B2B market.
				Co:3 Apply a systematic approach to problem solving and decision making in business marketing organizations.
				Co:4 Develop a business-marketing plan for a real local company that mainly targets business customers.
150.	III	MIM 2071	Consumer Behavior	Co:1 Assess the relevance of consumer behavior to the entire marketing process.
				Co:2 Analyze the causes giving rise to consumer behavior with the theories.

				Co:3 Explain the impact of consumer behavior on the development of marketing strategies including marketing communication, segmentation and target marketing.
				Co:4 Apply the concepts and theories covered in the course to devise effective solutions in enhancing business performance..
				Co:5 Collaborate with other classmates productively on the group work, communicate and present information effectively.
151.	III	MIM 2090	Export – Import Procedure & Documentation	Co:1 Explain an overall perspective on import & export management.
				Co:2 Discuss an understanding towards export and import procedure and documentation.
				Co:3 Analyze processing of export order.
				Co:4 Apply knowledge of managing risk involves in the import & export transactions.
152.	III	MIF 2011	Venture Capital Financing	Co:1 Identify the role that venture capital plays in financing innovation.
				Co:2 Explain how the structure of entrepreneurial financing arrangements alleviates some of the difficulties in funding new firms.
				Co:3 Illustrate valuation of companies by venture capitalist.
				Co:4 Analyse, compare different sources of finance, and select the appropriate source for financing needs.
153.	III	MIF 2031	Investment Analysis & Portfolio Management	Co:1 Demonstrate a comprehensive understanding of the complex current issues relevant to the investment market.
				Co:2 Apply appropriate methods in portfolio management.
				Co:3 Develop a logical mathematical approach to solving complex problems.
				Co:4 Apply stock valuation models in portfolio management
154.	III	MIF 2051	Financial Analysis And Business Valuation	Co:1 Apply the financial statements for analysis.
				Co:2 Apply appropriate measures for executing the financial analysis.
				Co:3 Demonstrate fundamental analysis for understanding the business valuation.
				Co:4 Interpret the statements for managerial decision making
				Co:5 Evaluate the results for setting business strategies

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

155.	III	MIF 2071	Working Capital Management	Co:1 Evaluate the importance of effective working capital Mgt.
				Co:2 Investigate funds flow cycles and their impact on working capital management objectives.
				Co:3 Formulate appropriate working capital management policies to achieve corporate objectives.
				Co:4 Apply corporate cash management, accounts receivable management, bank relations, and inventory management techniques to maximize the share holders' value.
				Co:5 Evaluate comparative working capital management policies and their impact on the firm's profitability, liquidity, risk and operating flexibility.
156.	III	MIF 2090	Tax Planning and Management	Co:1 Identify the relevance of tax planning with reference to setting up a new business and various management decisionst.
				Co:2 Identify the areas for tax planning and different types of taxes levied
				Co:3 explain different types of incomes and their taxability and expenses and their deductibility.
				Co:4 Take financial decisions based on the taxes and their impact
	III	MIH 2010	HR Analytics	Co:1 Explain basic concepts of HR Analytics
				Co:2 Apply Data Analytic techniques using software packages
				Co:3 Identify and use key HR Metrics.
				Co:4 Forecast budget numbers for HR costs
				Co:5 Measure workforce productivity and performance
				Co:6 Explore and visualize data
157.	III	MIH 2030	Group Dynamics for Teams	Co:1 Demonstrate familiarity with different types of groups, including their formation, structure and function.
				Co:2 Apply critical thinking skills to evaluate group dynamics and team processes.
				Co:3 Evaluate team skills within the context of the class project.
				Co:4 Analyze the issues facing teams including conflict, power and social influence.
				Co:5 Analyze the skills for understanding group dynamics and working effectively in groups.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

158.	III	MIH 2050	Human Resource Planning	Co:1 Analyze the theory and concepts of human resource planning.
				Co:2 Identify the evolution of HRP throughout the organization.
				Co:3 Apply models and methods used in forecasting.
				Co:4 Describe the applications of a succession analysis & planning.
				Co:5 Evaluate the organization's planning program.
159.	III	MIH 2070	Industrial Psychology	Co:1 Analyze how perceptions of difference contribute to disparate educational opportunities and work environments.
				Co:2 Conduct a conflict analysis.
				Co:3 Apply leadership lessons to class teams and team assignments.
				Co:4 Communicate effectively on business topics and concepts.
160.	III	MIH 2090	Leadership	Co:1 Develop critical thinking skills
				Co:2 Explain different approaches to leadership.
				Co:3 Apply leadership theories in real world business problems.
				Co:4 Analyze leadership types and take appropriate decisions.
				Co:5 Demonstrate ethical leadership practices
161.	IV	IPMI2YYY	Skill Certification- Online courses Relevant to the Chosen business	Co:1 Develop capability of self-education
				Co:2 Demonstrate lifelong learning skills
				Co:3 Assess self critically
				Co:4 Adopt corrective measures for self-improvement
162.	IV	MIV 2021	Startup Establishment & Incubation Spaces Access	Co:1 Establish their startup.
				Co:2 Avail incubation space access in or outside campus
				Co:3 To develop a robust implementable business plan
163.	IV	MIV 2041	Project Management (Online Course)	Co:1 Acquire an understanding of the fundamentals of project management.
				Co:2 Analyze the projects proposal by applying feasibility studies.
				Co:3 Take decisions relating to project cost management.
				Co:4 Identify and manage different issues relating to human aspect in projects.
				Co:5 Taking decisions based on risk management in the projects.

K. E. Society's

(An Empowered Autonomous Institute, affiliated to SUK)

# • **Department of Computer Applications**

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

**PG Program**

- **Department Name:- Department of Computer Applications**
- **PG Program Name: - Master of Computer Application (MCA 2024-26)**
- **Vision and Mission: -**

<b>Vision</b>	To become the center of excellence in computer education through innovation, cutting-edge research, and advanced knowledge dissemination to develop socially responsible and industry-ready IT professionals.
<b>Mission</b>	<p><b>M1:</b> To foster a dynamic learning environment in computer applications through industrial exposure, combining theoretical knowledge with practical skills.</p> <p><b>M2:</b> To enhance employability, engage students in workshops, seminars, and industry interactions to cultivate tech-driven skills essential for success in the IT sector.</p> <p><b>M3:</b> To equip students with advanced technical expertise, critical thinking, and ethical values, preparing them to tackle contemporary IT challenges with confidence and innovation.</p>

Sr. No.	Program Outcomes
14.	<p><b>PO1 (Foundation Knowledge):</b> Apply knowledge of mathematics, programming logic and coding fundamentals for solution architecture and problem solving.</p>
15.	<p><b>PO2 (Problem Analysis):</b> Identify, review, formulate and analyse problems primarily focus on customer requirements using critical thinking frameworks.</p>
16.	<p><b>PO3 (Development of Solutions):</b> Design, develop and investigate problems with as an innovative approach for solutions incorporating ESG/SDG goals</p>
17.	<p><b>PO4 (Modern Tool Usage):</b> Select, adapt and apply modern computational tools such as development of algorithms with an understanding of the limitations including human biases.</p>
18.	<p><b>PO5 (Individual and Teamwork):</b></p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

	Function and communicate effectively as an individual or a team leader in diverse and multidisciplinary groups. Use methodologies such as agile.
19.	<b>PO6 (Project Management and Finance):</b> Use the principles of project management such as scheduling, work breakdown structure and be conversant with the principles of Finance for profitable project management.
20.	<b>PO7 (Ethics):</b> Commit to professional ethics in managing software projects with financial aspects. Learn to use new technologies for cyber security and insulate customers from malware.
21.	<b>PO8 (Life-long learning):</b> Change management skills and the ability to learn, keep up with contemporary technologies and ways of working.

Sr. No.	Program Specific Outcomes
1	Apply advanced computing and domain-specific knowledge (AI, Cloud, Cybersecurity, Data Science, Full Stack) to design and implement effective IT solutions.
2	Apply computing knowledge and skills to address societal and environmental challenges, considering diverse cultural perspectives.
3	Develop innovative solutions and entrepreneurial skills to create value and address real-world problems in the computing field.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	MCA101	Mathematical Foundations	1. Apply principles of mathematical logic and set theory to solve computational problems.
				2. Utilize combinatorial techniques and graph theory to model and analyze complex networks and structures.
				3. Perform matrix operations and analyze vector spaces to support computational applications in linear algebra.
				4. Apply probability and statistical methods to model and interpret data.
				5. Formulate and solve optimization problems using linear and nonlinear programming

				techniques.
2	I	MCA103	Data Structures using Python	<ol style="list-style-type: none"> <li>1. Implement control structures and functions in the basics of python programming.</li> <li>2. Utilize advanced Python features, including data structures such as lists, tuples, sets, and dictionaries, as well as file handling.</li> <li>3. Implement and manipulate arrays and lists effectively to solve computational problems.</li> <li>4. Apply stack and queue operations, including their implementation and use cases.</li> <li>5. Implement and use various types of linked lists, such as singly, doubly, and circular linked lists.</li> <li>6. Analyse and implement trees and fundamental sorting algorithms, enhancing their problem-solving and computational thinking skills.</li> </ol>
3	I	MCA105	Database Management System	<ol style="list-style-type: none"> <li>1. Normalize databases by drawing ER diagrams with required constraints and cardinality.</li> <li>2. Design ER models to represent simple database application scenarios.</li> <li>3. Write SQL queries to perform various operations on the database.</li> <li>4. Apply concepts of integrity constraints, Hashing, and Indexing on databases.</li> <li>5. Illustrate the transaction management, concurrency control, and crash recovery.</li> <li>6. Analyse the NoSQL (MongoDB) Database System, its features and operations.</li> </ol>
4	I	MCA107	Computer Network	<ol style="list-style-type: none"> <li>1. Analyze the various network components and topologies.</li> <li>2. Illustrate the concepts, services, protocols, and algorithms used in Computer Networks.</li> <li>3. Implement Client-server programs using Berkeley socket programming.</li> <li>4. Solve problems related to routing, framing, error correction, detection, and IPv4 addressing.</li> <li>5. Compare the different services, protocols, and algorithms used in Computer Networks.</li> </ol>
5	I	MCA109	Operating Systems	<ol style="list-style-type: none"> <li>1. Describe the basic functions, structures, and operations of operating systems.</li> <li>2. Utilize various system calls, interface with the operating system, and comprehend the implementation of system programs.</li> </ol>

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				<p>3. Implement process concepts, and scheduling algorithms, and develop multi-threaded applications.</p> <p>4. Apply synchronization techniques, solve critical section problems, and manage deadlocks effectively.</p> <p>5. Analyze memory management strategies, including paging, segmentation, and virtual memory management</p> <p>6. Manage files, and directories, and understand disk scheduling and RAID structures.</p> <p>7. Demonstrate hands-on experience with Linux operating system commands, file and directory management, shell scripting, and user management.</p>
6	I	MCA111	Research Methodology	<p>1.Utilize concepts and processes of research methodology applicable to computer applications.</p> <p>2. Formulate and refine research problems and hypotheses relevant to technical and experimental scenarios.</p> <p>3. Design robust research studies utilizing appropriate technical research methods and tools.</p> <p>4. Employ advanced data collection and analysis techniques, leveraging statistical and computational software.</p> <p>5. Compose and present comprehensive research reports and technical papers.</p> <p>6. Uphold ethical standards in conducting and reporting research in the field of computer applications.</p>
7.	I	MCA113	Data Structures using Python lab	<p>1.Implement control structures and functions in the basics of Python programming.</p> <p>2. Utilize advanced Python features, including data structures such as lists, tuples, sets, and dictionaries, as well as file handling</p> <p>3. Implement and manipulate arrays and lists effectively to solve computational problems.</p> <p>4. Apply stack and queue operations</p> <p>5. Implement and use various types of linked lists, such as singly linked lists.</p> <p>6. Analyse and implement trees and fundamental sorting algorithms.</p>

8	I	MCA115	Database Management System Lab	1. Sketch E-R diagram for given Case Study/ Problem Statement.
				2. Write SQL query for various operations like retrieval, insertion and manipulation of data etc.
				3. Apply PL/SQL for implementing Cursor, Procedure/Function and Trigger.
				4. Design databases for given applications.
				5. Demonstrate basic commands of MongoDB with installation.
9.	I	MCA117	Basics of Computers and Computer Organization (BC)	1. Write simple C programs using input and output operations.
				2. Use decision-making and loops to control the flow of C programs.
				3. Use control structures, functions, arrays, and pointers in C programs.
				4. Perform data handling using structures and file operations in C.
10	II	MCA102	Object Oriented Programming using Java	1. Apply Java data types, operators, and control structures in programs.
				2. Demonstrate /Implement Constructors, Function Overloading, Function Overriding, Wrapper Classes, and Garbage Collection in Java.
				3. Utilize Array, String, and StringBuffer classes with packages and Exception handling.
				4. Implement inheritance, abstract classes, interfaces, and access modifiers
				5. Implement thread synchronization and inter-thread communication.
				6. Apply File handling with serialization and deserialization using Object Streams.
10	II	MCA104	Web Technology	1. Create structured web pages using HTML.
				2. Apply styles to web pages using CSS, Bootstrap, and Tailwind CSS.
				3. Develop interactive web pages using JavaScript and jQuery.
				4. Implement server-side functionalities by applying PHP for CRUD operations.
11	II	MCA106	Software Engineering and Project Management	1. Conduct software requirement analysis and specification.
				2. Practice software process models for the undertaken software problems
				3. Conduct software requirement analysis and specification.

				<p>4. Compare different software testing techniques and strategies.</p> <p>5. Plan and manage software projects effectively.</p> <p>6. Manage software projects using modern project management tools.</p>
12	II	MCA108	Big Data Paradigm	<p>1. Identify characteristics of Big Data and key terminologies.</p> <p>2. Apply Hadoop architecture concepts with HDFS and MapReduce.</p> <p>3. Analyze Hadoop ecosystem components, focusing on YARN and Hadoop 2.0 features.</p> <p>4. Use Hive, HBase, and Pig for querying large datasets.</p>
13	II	MCA110	Principles of Information Security (PE-I)	<p>1. Explain the principles and history of information security.</p> <p>2. Assess security needs and threats in business environments.</p> <p>3. Implement security technologies like firewalls, VPNs, and intrusion detection systems.</p> <p>4. Apply cryptography and design physical security measures.</p>
14	II	MCA112	NoSQL (PE-I)	<p>1. Analyze different types of NoSQL databases and their features.</p> <p>2. Compare relational databases with NoSQL databases.</p> <p>3. Demonstrate the architecture and performance tuning of Document-oriented NoSQL databases.</p> <p>4. Apply NoSQL development tools on various types of NoSQL databases.</p>
15	II	MCA114	Software Testing (PE-I)	<p>1. Analyze fundamentals and types of software testing.</p> <p>2. Design test cases using test case design techniques.</p> <p>3. Use automation tools to test software systems.</p> <p>4. Produce test reports from manual and automated testing.</p>
16	II	MCA116	Object-Oriented Programming Using Java Lab	<p>Apply Object-Oriented Programming concepts in Java.</p> <p>2. Implement File Handling and Data Persistence.</p> <p>3. Utilize Multithreading for Concurrent Programming.</p>

				4. Design and Develop Interactive Applications
17	II	MCA118	Web Technology Lab	1. Apply styles to web pages using CSS, Bootstrap, and Tailwind CSS.
				2. Develop interactive web pages using JavaScript and jQuery.
				3. Implement basic server-side functionalities using PHP.
				4. Perform CRUD operations in PHP for database management.
18	II	MCA120	Professional Communication and Employability Skills	1. Analyze the aspects of nature and process of technical Communication
				2. Develop interpersonal skills beneficial in business meetings, teamwork, decision-making, and group discussion.
				3. Apply presentation skills to prepare and deliver a presentation as per the audience and context requirements.
19	III	MCA201	Machine Learning	1. Implement ML algorithms (Decision Trees, k-Means, PCA) using Python.
				2. Analyze model performance using evaluation metrics.
				3. Assess ML models and justify algorithm selection.
				4. Develop an end-to-end ML application using cloud platforms.
20	III	MCA203	Cloud Computing	1. Analyze basic cloud computing concepts, service, and deployment models.
				2. Demonstrate virtualization and resource management in cloud environments.
				3. Evaluate cloud security challenges, including access management and data encryption.
				4. Develop cloud applications using AWS, Azure, or Google Cloud.
21	III	MCA205	Cyber Security and Forensics (PE-2)	1. Apply the basic terminology of cybercrimes.
				2. Apply a number of different computer forensic tools to a given scenario.
				3. Demonstrate the basics of computer forensics.
				4. Analyze digital evidence, validate its integrity, evaluate acquisition methods used for system security investigations.
22	III	MCA207	Data Mining	1. Apply real-world applications of data mining.

			(PE – 2)	<p>2. Utilize classification, clustering, and association rule mining to analyze large datasets and extract patterns.</p> <p>3. Assess the performance of different data mining models and optimize them for better accuracy.</p> <p>4. Implement data mining solutions using appropriate tools for real-world problem-solving.</p>
23	III	MCA209	Advanced Java and J2EE (PE-2)	<p>1. Implement database-driven applications using JDBC for efficient data management.</p> <p>2. Create interactive GUI applications using Java GUI frameworks such as AWT, Swing, SWT, and SwingX.</p> <p>3. Develop network-based applications using Java Socket programming and communication protocols.</p> <p>4. Utilize Java-based reporting tools for generating structured enterprise reports.</p>
23	III	MCA211	Blockchain Technology (PE-3)	<p>1. Interpret the fundamentals and basic concepts in Blockchain.</p> <p>2. Compare the working of different blockchain platforms.</p> <p>3. Use Crypto wallet for cryptocurrency-based transactions and analyze the importance of blockchain in finding the solution to the real-world problems.</p> <p>4. Illustrate the Ethereum public block chain platform and identify relative application where</p>
24	III	MCA213	Deep Learning (PE-3)	<p>1. Analyze the fundamental principles, architectures, and algorithms of deep learning, including neural networks, backpropagation, and optimization methods.</p> <p>2. Implement deep learning models for various practical applications such as image recognition, natural language processing, and time-series forecasting.</p> <p>3. Evaluate different deep learning architectures, assess their performance, and apply optimization techniques to improve efficiency and accuracy.</p> <p>4. Develop deep learning solutions using state-of-the-art techniques and frameworks, exploring</p>
25	III	MCA215	Dot net framework	<p>1. Analyze the .NET Framework architecture with its components for application development.</p>

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			for Application Development (PE-3)	<p>2. Design applications using console, Windows Forms, or web interfaces based on OOP principles.</p> <p>3. Develop database-integrated applications using ADO.NET for seamless .NET integration.</p> <p>4. Deploy applications by performing debugging, testing, or validation to ensure functionality.</p>
26	III	MCA217	Innovation, Business Models and Entrepreneurship	<p>1. Implement innovation processes to support collaborative experimentation.</p> <p>2. Design business models focused on innovation or technological advancement.</p> <p>3. Manage technological innovation through commercialization, sustainability, or intellectual property strategies.</p> <p>4. Explore emerging trends, challenges, or opportunities in innovation.</p>
27	III	MCA219	Machine Learning Lab	<p>1. Analyze fundamental ML algorithms, including regression, classification, clustering, and dimensionality reduction, using Python and relevant libraries.</p> <p>2. Analyze key performance metrics such as accuracy, precision, recall, F1-score, and confusion matrices to assess the effectiveness of classification models.</p> <p>3. Build neural networks and reinforcement learning models using TensorFlow/Keras and deploy trained ML models using Flask and Docker.</p> <p>4. Utilize Principal Component Analysis (PCA) and t-SNE for feature selection and dimensionality reduction while applying CNNs for image classification tasks.</p>
28	III	MCA221	Full Stack Development Lab	<p>1. Develop structured, visually appealing, user-friendly web pages using modern web technologies.</p> <p>2. Implement JavaScript to enhance user experience through DOM manipulation or event handling.</p> <p>3. Integrate user authentication, file handling, or session management within Express.js applications.</p> <p>4. Manage MongoDB connections for integration with Node.js applications in data storage.</p>

- **Vision and Mission :-**

<b>Vision</b>	To become the center of excellence in computer education through innovation, cutting-edge research, and advanced knowledge dissemination to develop socially responsible and industry- ready IT professionals.
<b>Mission</b>	<p><b>M1:</b> To foster a dynamic learning environment in computer applications through industrial exposure, combining theoretical knowledge with practical skills.</p> <p><b>M2:</b> To enhance employability, engage students in workshops, seminars, and industry interactions to cultivate tech-driven skills essential for success in the IT sector.</p> <p><b>M3:</b> To equip students with advanced technical expertise, critical thinking, and ethical values, preparing them to tackle contemporary IT challenges with confidence and innovation.</p>

Sr. No.	Program Outcomes
108.	<p><b>PO1 (Computing Knowledge):</b></p> <p>Apply foundational knowledge of mathematics, programming, databases, and information systems to design and implement effective computer applications.</p>
109.	<p><b>PO2 (Problem Analysis):</b></p> <p>Identify, analyze, and solve computational and real-world problems using appropriate algorithms, data structures, and software tools.</p>
110.	<p><b>PO3 (Design and Development of Solutions):</b></p> <p>Design, develop, and test computer-based systems and applications with attention to functionality, performance, and sustainability.</p>
111.	<p><b>PO4 (Modern Tool Usage):</b></p> <p>Use modern programming environments, databases, and software tools to develop solutions, while understanding their scope and limitations</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

112.	<b>PO5 (Professional and Ethical Responsibility):</b> Demonstrate effective communication, teamwork, and ethical practices while applying IT knowledge in societal and organizational contexts.
113.	<b>PO6 (Lifelong Learning and Employability):</b> Recognize the need for continuous learning and acquire professional, entrepreneurial, and employability skills to adapt to emerging technologies and industry requirements.

Sr. No.	Program Specific Outcomes
1	PSO1: Design and develop computer applications using programming languages, databases, and web/mobile technologies to solve real-world problems.
2	PSO2: Apply emerging tools, frameworks, and platforms in cloud computing, AI, and data analytics to create innovative and sustainable IT solutions.
3	PSO3: Demonstrate teamwork, communication, and managerial skills to pursue careers in IT industries, higher education, or entrepreneurial ventures.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	I	BC101	Programming in C	1. Implement algorithms and flowcharts; understand top-down design, debugging, and documentation. 2. Understand basic C programs using various data types, variables, and I/O statements. 3. Implement control statements, including branching and looping constructs, in C programs 4. Apply arrays and pointers for effective data management in C programs.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<p>5. Describe functions and perform string manipulations.</p> <p>6. Define and use structures and unions to manage complex data types in C programs.</p>
2	I	BC103	Fundamentals of Information Systems	<p>1. Assess the impact of information systems on organizations and society, including ethical and privacy considerations.</p> <p>2. Describe key computer hardware and software components and their functions.</p> <p>3. Explain basic networking principles, including network components and the role of the Internet and wireless technologies.</p> <p>4. Evaluate the impact of social computing on business functions such as marketing and customer management.</p> <p>5. Identify threats to information systems and measures to protect data, including</p> <p>6. Explain the benefits of business intelligence and cloud computing for decision-making and organizational efficiency.</p>
3.	I	BC105	Professional Communication	<p>1. Analyze aspects of nature and process of communication in a professional context.</p> <p>2. Communicate effectively using various modes of communication.</p> <p>3. Demonstrate reception skills of language to make communication effective.</p> <p>4. To impart the correct practices of the strategies of Effective Business writing</p> <p>5. Organize the content of technical documents in specific forms.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
4.	I	BC107	Programming in C lab	1. Develop problem-solving skills through C programs for swapping variables, finding the largest number, and computing roots of equations.
				2. Gain proficiency in control structures and loops to implement algorithms for summing digits, finding prime numbers, and computing Armstrong numbers.
				3. Acquire skills in defining and using functions, including recursion, for computing Fibonacci numbers, factorials, and series calculations.
				4. Learn to manipulate arrays and matrices, including searching, sorting, and performing operations, and use structures to manage and display complex data like student mark sheets.
5.	I	BC109	Professional Software Skills lab	1. Create and format professional documents and spreadsheets, utilizing features such as styles, formulas, and data visualization tools.
				2. Design and deliver effective presentations using multimedia, animations, and slide transitions.
				3. Implement basic version control with Git and develop styled web pages using HTML and CSS.
				4. Identify key computer hardware components and manage email accounts, including composing and organizing emails
6.	I	BC111	Indian Knowledge System	1. Understand the fundamental concepts and historical significance of the Indian Knowledge System (IKS) and its unique features, including its classification framework and presentation style.

**UG Program**

- **Department Name: -BBA**
- **UG Program Name: -Bachelor of Business Administration**
- **Vision and Mission: -**

<b>Vision</b>	To create excellence in corporate, businesses for nurturing value driven business leaders with analytical and entrepreneurial mindset to foster innovative ideas in order to transform the world and serve the society.
<b>Mission</b>	<ul style="list-style-type: none"> <li>• To design a unique competency directed and industry relevant curriculum based on changing needs of industry and society worldwide</li> <li>• To facilitate student centric sound academic environment with co-curricular and extra-curricular activities to groom and develop future ready business professionals.</li> <li>• To provide experiential learning through industry connect.</li> <li>• To provide innovation and excellence in academic design with outcome-oriented teaching learning System</li> <li>• To ensure holistic development of students for employability, entrepreneurship and higher education</li> <li>• To enhance students' cognitive, research, analytical, ethical and behavioral competencies through programs that equip them to meet global business challenges in the professional world.</li> </ul>

Sr. No.	Program Outcomes
114.	Identify the different functional aspects of business world and recognize different opportunities of business.
115.	Articulate effectively business ideas with written and oral communication especially with the use of appropriate technology.
116.	Analyze the importance of innovation and research, tackle the contemporary needs and accordingly grab the opportunities.
117.	Demonstrate the ability to create business plans and acquire the different employability skills, entrepreneurial skills necessary for the professional attitudes.

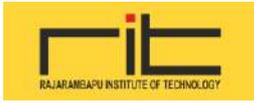

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

118.	Demonstrate a global outlook with the ability to identify aspects of the global business and cross-cultural understanding through German or Japanese as a foreign language .
119.	Develop skills on analyzing the business data application of relevant analysis and problem solving.
120.	Develop innovative and entrepreneurial mindset.

**Program Specific Outcomes-PSO**

Sr. No.	Electives	PSO No.	Program Specific Outcomes
1	Marketing	PSO1	To demonstrate an understanding of marketing principles, theories, and concepts, develop effective marketing strategies, branding and communication expertise, digital marketing competence, sales, and distribution management skills for different business environments.
		PSO2	To design and conduct market research, analyse consumer behaviour, and interpret market trends to identify opportunities and make informed marketing decisions.
2	Finance	PSO1	To analyze the financial performance of an organization applying various tools that aid in decision making.
		PSO2	To identify the relevance of Financing, Investing & Dividend decisions that impact the growth of the firm
3	HR	PSO1	To develop and implement strategic human resource plans aligned with organizational goals, able to handle talent acquisition and

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

			management, design, implement, and evaluate training and development program, develop performance appraisal systems, understand compensation systems, salary structures, employee benefits, and incentives, able to design and manage competitive compensation packages.
		PSO2	To able to leverage HR data analytics to make data-driven decisions, measure HR effectiveness, identify trends, and predict future workforce needs.
4	Business Analytics	PSO1	To possess a solid foundation in data analytics concepts, techniques, and tools, apply statistical analysis methods and data modeling techniques to extract meaningful insights, identify patterns, and make informed business decisions, develop interactive dashboards, reports, and visualizations to effectively communicate analytical findings and support business decision-making processes.
		PSO2	To able to apply predictive analytics and prescriptive modeling to forecast future trends, optimize business processes, and recommend actionable strategies, able to handle and analyze large volumes of structured and unstructured data using big data analytics tools and technologies.
5	Computer Application	PSO1	To develop programming skills, networking skills, learn applications, packages, programming languages, and modern techniques of IT

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

		PSO2	To identify, formulates, analyze and solve problems of programming using different languages.
6	International Business	PSO1	To apply conceptual International Business foundations to solve practical decisionmaking problems, both individually and as part of teams using techniques such as case analysis, projects and assignments.
		PSO2	To develop a systematic understanding of globalization and its impact on People, Global businesses, Technology and the Economy and to demonstrate a critical awareness of current issues with respect to Cross Culture & diversity, social responsibility, sustainability, innovation, knowledge management,
7	Supply Chain Management	PSO1	To develop fundamental knowledge of supply chain concepts in sync with other management functions comprising accounting, finance, marketing and human resources in a business enterprise.
		PSO2	To employ advanced techniques of supply chain management to offer solutions to business problems and aid decision making and to improve the efficiency and effectiveness of supply chain process using the advanced operations to ensure sustainable business practices.
8	Digital Marketing	PSO1	To develop strategic digital marketing plans, executing and managing campaigns across various channels like SEO, social media
		PSO2	To create compelling content, analyzing campaign performance with tools like Google Analytics, and managing online reputation and e-commerce activities

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

9	Data Science	PSO1	To apply computational, statistical, and machine learning techniques to solve real-world problems,
		PSO2	To develop and evaluate data-based models, manage and analyze large datasets, design and implement data-driven systems ethically, and communicate findings effectively
10	Fintech	PSO1	To demonstrate a comprehensive understanding of core financial principles, including financial management, investment analysis, risk management, and digital banking, and apply them in realworld scenarios
		PSO2	To develop proficiency in using advanced technological tools such as blockchain, artificial intelligence, machine learning, and data analytics to solve complex problems in the finance industry
11	Artificial Intelligence and Machine Learning	PSO1	To able to analyze, design, and develop intelligent systems and solutions using AI/ML techniques, apply these to real-world problems, create computational models, and use modern tools and techniques in areas like deep learning, computer vision, and natural language processing for complex societal challenges.
		PSO2	To recognize with machine learning algorithms and their applications in business contexts, able to develop predictive models and implement AI-driven solutions.

**K. E. Society's**  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

12	Innovation and Entrepreneurship	PSO1	To able to develop entrepreneurial and entrepreneurial acumen for developing ideas and starting their own businesses
		PSO2	To develop entrepreneurial and intrapreneurial acumen for developing ideas and starting their own businesses

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	Sem.-I	BBA101	Principles and Practices of Management Business Communication	1.State fundamentals of management concept, principles. Explain different management functions and theories and their effectiveness in various organizational contexts
				2.Illustrate SWOT analysis and strategic formulation in real organizational world
				3.Use management strategy for a hypothetical or real organization using a mix of management theories and practices
				4.Evaluate impact of globalization, diversity and Indian ethos in management
				5.Formulate innovative management solutions to enhance efficiency and effectiveness in given business scenarios
2	Sem.-I	BBA103	Business Communication	1.State the concept, process and importance of communication
				2.Explain basic principles and techniques of Communication
				3.Use the skills of effective letter writing and be able to create various kinds of Business letters.
				4.Illustrate various barriers to communication and apply pre-emptive

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				measures, including feedback, to minimize the same.
				5.Evaluate various kinds of business correspondence and e-correspondence.
				6.Design and produce presentations in front of audience with confidence and expertise
3	Sem.-I	BBA105	Financial Accounting	1.State applications of various principles and practices of Accounting in preparation of accounting statements.
				2.Demonstrate the knowledge on the process of accounting cycle.
				3.Illustrate the knowledge of systematic maintenance of books of accounts to real life business.
				4.Compare Annual Financial statements of Sole proprietorship and Company form of business.
				5.Assess Financial sustainability disclosure standards.
				6.Develop Sustainability reporting need and methods
4	Sem.-I	BBA107	Business Statistics and Logic	1.Recognize importance of logical reasoning in human inquiry.
				2.Explain data handling skills with clarity and logical reasoning.
				3.Illustrate the application of relevant concepts of Statistics to a given context/business scenario.
				4.Inspect business problems and make decisions using appropriate statistical models and explain trends.
				5.Evaluate and interpret data using appropriate statistical techniques

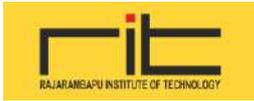

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6.Design a process of organizing a data and conduct statistical treatment
5	Sem.-I	BBA109	English Proficiency & Soft Skills-I	1.State basic grammar of English for writing .
				2.Describe different vocabulary used in English.
				3.Practice listening, speaking, reading and writing skills
				4.Experiment tasks and activities through guided instructions and materials.
				5.Assess English language learning with employability skills and training.
				6.Develop hands-on experience through case-studies, mini-projects, group and individual presentations.
6	Sem.-I	BBA111	IKS-Vision for a Human Society	1. State the concept of Vasudhaiv Kutumbakam and about its realization for the development of vision for a human society.
				2. Discuss the universality in humans and its co-existence in existence.
				3. Classify different stages of life and its development
				4. Illustrate a sense of responsibly, duties and participation of individual for establishment of fearless society.
				5. Investigate programs for ensuring human purpose at individual and societal level.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				6. Revise states of consciousness
6	Sem.-I	BBA113	Environmental Science and Sustainability	1. Recognize the basic environmental concepts and issues relevant to the business and management field.
				2. Compare the interdependence between environmental processes and socio- economic dynamics.
				3. Present the role of business decisions, policies, and actions in minimizing environmental degradation.
				4. Examine possible solutions to curb environmental problems caused by managerial actions.
				5. Measure skills to address immediate environmental concerns through changes in business operations, policies, and decisions.
				6. Revise social issues, legislations and its practical applications
7	Sem.-I	BBA115	Foreign Language- German -I	Recognize basic grammar used in German Language
				Demonstrate familiar everyday expressions and very basic phrases aimed at the satisfaction of needs of a concrete type
				Execute himself /herself and can ask and answer questions about personal details such as where he/she lives, people he/she knows and things he/she has.
				Debate and interact in a simple way provided the other person talks slowly and clearly and is prepared to help.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Assess development in German language vocabulary by interacting with others
				Construct presentation of how to use and scope of German Language.
8	Sem.-I	BBA117	Foreign Language-Japanese-I	Recognize basic grammar used in Japanese Language
				Relate and demonstrate regional languages into Japanese language.
				Experiment Japanese vocabulary in day-today speaking.
				Debate and interact in a simple way with other persons
				Develop basic Japanese language skills (listening, speaking, writing, and reading).
				Produce himself /herself with others and can ask and answer questions
9	Sem.-I	BBA119	Computer Fundamentals	1. Define various concept used in computer
				2. Demonstrate an advance knowledge of the MS Office and a knowledge of how to design different documents
				3. Illustrate effective and structured documents like technical reports, letters. and brochures.
				4. Experiment various features of MS Word for different documents.
				5. Test useful spread sheet application like tabulated statements, balanced sheet

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
(An Empowered Autonomous Institute, affiliated to SUK)

<b>Sr. No.</b>	<b>Semester</b>	<b>Course Code</b>	<b>Course Name</b>	<b>Course Outcome</b>
				statistical chart, business statements.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	Sem.-II	BBA102	Human Behavior and Organization	1. State individual and group behavior in organizational settings.
				2. Explain importance of OB in modern organizations
				3. Illustrate individual and group behavior in the workplace to improve effectiveness of an organization
				4. Examine theoretical knowledge of human behavior in human life setting in management.
				5. Investigate the lacunae in the system to be able to improve the organization health and other OB outcomes.
				6. Design a more productive system and high-performance work culture operating on the principles of OB.
2	Sem.-II	BBA104	Principles of Marketing	1. Recall fundamental marketing concepts, theories, and principles.
				2. Explain elements of marketing mix, the role of marketing in the organization context.
				3. Illustrate critically an organization's marketing strategies
				4. Compare tools and techniques of marketing with focus on Indian experiences, approaches, and cases
				5. Evaluate marketing implementation strategies from several perspectives

				6. Formulate and assess strategic, operational, and tactical marketing decisions
<b>3</b>	Sem.-II	BBA106	Business Economics	1. State fundamental concepts of microeconomics.
				2. Discuss the Demand and Supply Schedule
				3. Illustrate problem of reallocation and distribution of the scarce resources.
				4. Compare forms of market and analyze their pricing strategies.
				5. Evaluate the calculation of national income and true measure for increasing economic welfare.
				6. Assess various challenges associated with the Indian economy and help to balance the economy
<b>4</b>	Sem.-II	BBA108	Emerging Technologies and Applications	1. outline foundational knowledge of emerging technologies such as block chain, IoT, cloud computing, AR/VR, etc.,
				2. Explain comprehensive principles, components, and functionalities of emerging technologies.
				3. Illustrate the practical applications of these technologies in various business contexts,
				4. Experiment how they can optimize operations, enhance decision-making, and drive innovation.
				5. Evaluate the strategic implications of adopting emerging technologies, including potential challenges, risks, and opportunities, to formulate informed strategies for competitive advantage

				6. Develop skills to plan and manage the integration of emerging technologies into business processes, ensuring alignment with organizational goals and effective change management.
5	Sem.-II	BBA112	Aptitude Skills-I (Quantitative Skills)	1. State core mathematical concepts, including number systems.
				2. Demonstrate a thorough understanding of basic arithmetic operations, algebra, geometry, and data interpretation.
				3. Solve various problem-solving techniques and strategies to efficiently tackle quantitative problems, including algebraic equations, geometric calculations, and data analysis.
				4. Examine and simplify data presented in different formats (e.g., tables, graphs, charts) and extract meaningful insights to solve problems.
				5. Test quantitative skills to real-world problems and competitive exam scenarios, demonstrating the ability to approach and solve problems with confidence.
				6. Develop problem-solving skills for different real world problems.
6	Sem.-II	BBA114	Media Literacy & Critical Thinking	1. State proficiency in analyzing media texts and identifying implicit messages and ideologies.
				2. Describe media literacy principles to make informed decisions about media consumption and production.

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				3. Compare the complexities of media production, distribution, and audience behavior.
				4. Inspect media production dynamics and ownership structures in the Indian context.
				5. Evaluate ethical and regulatory considerations in media practices.
				6. Construct digital media literacy for responsible online engagement and combating misinformation.
7	Sem.-II	BBA116	Mathematics-I	1. Recall fundamental concepts in mathematics.
				2. Demonstrate different examples of profit or loss
				3. Solve problems of ratio, proportion
				4. Outline problems of Determinants and its application
				5. Use concepts of matrices that serve as essential basis for several computational techniques.
				6. Revise application of metrics
8	Sem.-II	BBA118	Indian Constitution	1. State an understanding of the Indian Constitution beyond legal and political lenses, emphasizing its significance for business students.

				2. Explain the importance of comprehending constitutional basics and their impact on trade, economy, and business practices.
				3. Illustrate the inclusion of economic justice in the preamble and its implications for post-colonial economic policies.
				4. Connect the legal history of competing claims between economic development and principles of equity and justice in India.
				5. Investigate the transition from state-led industrialization to liberalization, highlighting the constitutional underpinnings of these economic shifts.
				6. Revise the constitutional provisions relevant to business, such as the fundamental right to practice any profession, occupation, trade, or business as enshrined in Article 19.
9	Sem.-II	BBA120	English Proficiency and Soft Skills-II	1. Recall Basics of English Grammar
				2. Describe verbal and non-verbal communication skills, including active listening, clear articulation of ideas, and effective presentation techniques.
				3. Develop critical thinking skills by analyzing situations, identifying problems, and evaluating alternative solutions
				4. Demonstrate heightened emotional intelligence, showing self-awareness, self-regulation, empathy and strong interpersonal skills

				<p>5. Examine the dynamics of teamwork, including roles and responsibilities, collaboration strategies, and effective delegation.</p> <p>6. Recall everyday familiar expressions and very basic phrases aimed at the satisfaction of needs of a concrete type. Make use of the basic grammar concepts correctly</p>
10	Sem.-II	BBA122	Foreign Language-German -II	<p>1. Demonstrate familiar everyday expressions and very basic phrases aimed at the satisfaction of needs of a concrete type.</p> <p>2. Execute himself /herself and can ask and answer questions about personal details such as where he/she lives, people he/she knows and things he/she has.</p> <p>3. Debate and interact in a simple way provided the other person talks slowly and clearly and is prepared to help.</p> <p>4. Assess development in German language vocabulary by interacting with others</p> <p>5. Construct presentation of how to use and scope of German Language.</p>
11	Sem.-II	BBA124	Foreign Language-Japanese -II	<p>1. Recognize basic grammar used in Japanese Language</p> <p>2. Demonstrate an awareness of the relevance of Japanese language to professions and careers.</p>

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

				3. Execute information about cultures and civilizations of the country of Japan. 4. Compare an environment where Japanese is used exclusively.
				5. Demonstrate reading and writing skills.
				6. Produce himself /herself with others and can ask and answer questions
12	Sem.-II	BBA126	Advance Excel	1. Recall Fundamentals of Computer and MS Excel
				2. Explain different MS Excel Tools
				3. Demonstrate advanced functions and productivity tools to assist in developing worksheets
				4. Execute and Manipulate data lists using Outline, Auto filter and Pivot Tables
				5. Illustrate Consolidation to summarize and report results from multiple worksheets
				6. Assess repetitive tasks by creating Macros

K. E. Society's  
**Rajarambapu Institute of Technology, Rajaramnagar**  
 (An Empowered Autonomous Institute, affiliated to SUK)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1	Sem-III	BBA201	Cost and Management Accounting	1. Describe basic concepts and processes used to determine product costs and ascertain Material, Labour and Overhead cost.
				2. Apply various tools like ratio analysis, cash flow statement, marginal costing for analyzing the financial statements for managerial information
				3. Explain the basic understanding of budgetary control.
				4. Develop management report.
2	Sem-III	BBA203	Legal and Ethical Issues in business	1. State key legal and ethical issues in the business context of India
				2. Analyze ethical dilemmas in business decisions
				3. Illustrate the legal and regulatory aspects of business ethics that concern the financial, competitive and charitable responsibilities of organizations.
				4. Categorize organizational and individual factors impact business ethics
3	Sem-III	BBA205	Human Resource Management	1. Explain the role and strategic importance of Human Resource Management in functional business settings and global organizations.
				2. Illustrate the employee life cycle by applying HR planning, recruitment, training, and career management techniques.
				3. Analyze employee engagement, performance management, compensation structures, and industrial relations within legal and ethical frameworks.
				4. Examine the role of technology, HR analytics, and Green HRM, DEI, and wellness initiatives in transforming modern HR practices.

				5. Compare global HRM practices including cross-cultural issues, expatriate management, CSR, and ethical responsibilities in MNCs.
				6. Evaluate emerging HRM trends such as AI, automation, hybrid work models, re-skilling, and mental health strategies for workforce agility and future readiness.
4	Sem-III	BBA207	Indian Systems of Health and Wellness	1. Explain the importance of a healthy lifestyle
				2. Describe students about physical and mental health
				3. Demonstrate an awareness of various lifestyle related diseases
				4. Illustrate understanding of stress management
5	Sem-III	BBA217	Financial Literacy- Fundamentals of Share Market-I & MOOC	1. Explain a basic understanding of the products, players and functioning of financial markets, particularly the capital market (Stock Market)
				2. Evaluate the terms and jargons used in the financial newspapers and periodicals.
6	Sem-III	BBA219	Computerized Accounting-Tally & MOOC	1. Explain the basic concepts of accounting and the role of Tally ERP 9
				2. Create and manage company accounts, ledgers, and groups.
				3. Record and process financial transactions using different vouchers.
				4. Use inventory management and stock transactions efficiently.
				5. Employ taxation & banking features, including GST and reconciliation
				6 Discuss and interpret financial reports for business analysis
7	Sem-III	BBA211	Aptitude Skills-II(Logical Reasoning)	1. Explain the basic examples of arrangement, blood relation, coding etc.

				2. Solve problems of Clock and calendars, Tables, Charts and Other forms of Visualizations
				3. Compute examples of Cause and Effect, Ranking and Order, Cubes and Dice, Logical Venn Diagrams, Critical Reasoning
				4. Evaluate conclusion validity, Data Sufficiency, Inequalities, Mathematical & coded inequalities Decision Making
8	Sem-III	BBA213	Management Information System (MIS)	1. Explain the basic concepts, types, dimensions, and components of MIS, and evaluate the benefits and evolution of IT infrastructure in the digital firm era.
				2. Apply database management principles by setting up and managing DBMS packages, creating Entity-Relationship diagrams, and understanding data models, data warehouses, and administration techniques.
				3. Analyze various MIS applications, including DSS, GDSS, and knowledge management systems, and develop e-commerce solutions by leveraging enterprise models, business process reengineering, and digital communication strategies.
				4. Evaluate project management objectives and methodologies, including agile practices such as SCRUM, and manage projects effectively to control risk factors and understand ethical, social, and political issues in the information era.
9	Sem-III	BBA215	Mathematics -II	1. Explain the basic examples of relations and function
				2. Solve problems of dynamics and statics

				<p>3. Develop understanding of Vector Analysis</p>
				<p>4. Solve problems of Linear Algebra</p>
10	Sem-III	BBA221	Yoga	<p>1. Explain yoga and its modern applications for holistic well-being.</p>
				<p>2. Demonstrate proficiency in yogic anatomy and physiology, enhancing yoga practice and promoting physical and energetic balance.</p>
				<p>3. Illustrate the Eight Limbs of Yoga and comprehend their psychological impact, fostering personal growth and self-realization.</p>
				<p>4. Demonstrate yoga principles into sports and physical fitness activities to enhance performance and prevent injuries.</p>
				<p>5. Develop skills in wellness management and nutrition</p>
11	Sem-III	BBA223	Sports	<p>1. Explain the concept of sports and including its scope, organizational structure, and ethical considerations.</p>
				<p>2. Demonstrate the technique of Suryanamaskar.</p>
				<p>3. Evaluate Knowledge about Fitness, Wellness and Nutrition, Core Physical Education</p>
12	Sem-III	BBA225		<p>1. Recall Basics of English Grammar</p>

			English Proficiency & Soft Skills-III	<p>2. Describe verbal and non-verbal communication skills, including active listening, clear articulation of ideas, and effective presentation techniques.</p> <p>3. Develop critical thinking skills by analyzing situations, identifying problems, and evaluating alternative solutions.</p> <p>4. 				6. State what is a Family Business and how is it different from Entrepreneurship
19	Sem-IV	BBA204	Operations Management	1. Explain the core principles of operations management and their significance in enhancing efficiency, quality, and customer satisfaction.

				2. Analyze different production systems and develop strategies aligned with business objectives.
				3. Optimize operational processes through effective process design, layout decisions, And capacity planning
				4. Implement quality management principles to enhance product/service quality and Reduce defects.
				5. Evaluate emerging trends in operations management, such as sustainable Operations and technological advancements.
20	Sem-IV	BBA206	Financial Management	1. Apply the knowledge in taking finance decisions
				2. develop analytical skills to identify financial management problems and solve them.
				3. analyse the relationship among capital structure, cost of capital, dividend decisions, and value of the business.
21	Sem-IV	BBA208	Business Research Methodology	1. Prepare a detailed research plan covering all essential aspects of a research project.
				2. Construct and administer effective research instruments like questionnaires
				3. Execute data collection strategically to gather relevant information.
				4. Apply advanced statistical techniques for data interpretation
				5. Draft comprehensive research reports tailored to specific audience needs.
22	Sem-IV	BBA210	Geo-Politics and impact on Business	1. Demonstrate a comprehensive understanding of global events and their implications on geopolitics

				2. Identify the role and impact of geopolitics on the International political economic variables in international business
				3 analyse and evaluate the application of knowledge of Global trade and monetary systems to develop competitive strategies in regional, and global markets
				4. Assess and predict how emerging trends in geopolitics impact strategic decisions of international business
23	Sem-IV	BBA212	International Business	1. Demonstrate and interpret the fundamental theories of international business and trade
				2. Develop an understanding of the concept of Foreign Direct Investment and its impact on various world economy.
				3. Analyse the significance of economic Integration in International Business
				4. Appraise and develop a comprehensive understanding of global emerging trends and stakeholder engagement.
24	Sem-IV	BBA214	Aptitude Skills-III (Verbal Reasoning)	1. Explain the basic grammar level
				2. Develop logic behind Sentence completion, sentence arrangement
				3. Illustrate- Opposite meaning, Similar meaning, Word connections, Closest meaning, two odd ones out, Reading information
				4. Develop Insert a letter, Hidden word, missing word, move a letter Compound words, Make a word

25	Sem-IV	BBA216	Design Thinking & Innovation	1. Identify real-time innovative product designs and Choose appropriate frameworks, strategies, techniques during prototype development.
				2. State wicked problems and how to frame them in a consensus manner that is agreeable to all stakeholders using appropriate frameworks, strategies, techniques during prototype development.
				3. Analyse emotional experience and Inspect emotional expressions to better understand users while designing innovative products
26	Sem-IV	BBA218	English Proficiency & Soft Skills-IV	1. Explain Importance of Team Building
				2. Compare styles of Leadership.
				3 analyze categories of thinking and Problem solving
				4. Judge works place etiquettes and practice for the same
27	Sem-IV	BBA220	German Language IV	1. Interpret the language if the next person is speaking slowly and clearly.
				2. Use language in routine life with the routing topics like family, shopping, work etc.
				3. Demonstrate the language by self-introduction in German with simple sentences.
28	Sem-IV	BBA222	Japanese Language-IV	1. Explain to make basic conversations in various situations
				2. Recognize the sentence patterns.
				3. Evaluate Japanese Language proficiency

				4. Demonstrate insights about the communication required for living in Japan.
				5. Execute students to the Japanese work ethics required in their professional careers.
29	Sem-IV	BBA224	Computer Language -R Programming	1. Explain the fundamental syntax of R through practice exercises, readings, demonstrations and writing R code.
				2. Apply programming language concepts such as data types, iteration, control structures and functions by writing R programs.
				3. Illustrate the variety of data formats in R
				4. Summarize data using different R packages.
30	Sem-IV	BBA226	Digital Marketing	1. Explain the applications of Digital Marketing
				2. Analyse the different digital marketing avenues.
				3. Examine digital marketing tools.
				4. Illustrate real life problems in the domain of Digital Marketing
31	Sem-IV	BBA228	Entrepreneurship Development & MOOC	1. Explain and illustrate process of project identification.
				2. Examine institutional support and schemes for entrepreneurship development.
				3. Assess and utilize different methods of project appraisal.
				4. Design business plan with the help of incubation centers/ED centers
				5. Apply business plan practically to start business or startups
